Renovo will be responsible for sharing risk by covering the cost of avoidable damages meeting certain criteria. The coverage is limited to avoidable damage repairs that do not exceed $1250 in parts/ labor per service event with an annual limit of $25000 per year. Credits will be issued as a line item on invoices for customer tracking purposes, and Renovo will keep a spreadsheet of all credits that will be reviewed during quarterly QBRs.

The following exceptions will apply to Shared Risk T&M

- All avoidable damage repairs exceeding $1250 per event will need to be reviewed and approved by the customer and be covered and billed under the T&M budget for the year.
- All consumables/ accessories are excluded from the Shared Risk, examples of accessories are cables, sensors, transducers, glassware, detectors, and batteries. This list is not all-inclusive.
- Special projects involving moving, inspection, setup, configuration, upgrades, and testing of equipment purposed for new locations or for addition to existing or temporary services within or outside the hospital.
- Damages caused by acts of nature (earthquakes, storms, flooding, major power outages, etc.).
- Investigation and evaluation of incidents that require engagement of services outside of Renovo Solutions.

Ultrasound Probe Coverage

In the current agreement, each of the 9 Ultrasound machines has one probe repair per year covered, resulting in some probes being billed when more than 1 fails per machine. In

Docusign Envelope ID: F8690298-1289-47D2-9FAF-69266D6E190B

partnership with Natividad, Renovo would like to propose an option for Renovo to cover the first 9 probe repairs regardless of which system under Renovo coverage it is from. Any additional transducers (exceeding 9) needing repair will be billable as standard T&M. This would exclude any probe repairs from a system not under coverage with Renovo. In reviewing the history, we have not seen 9 repairs annually, potentially resulting in savings.

A. In this proposed agreement, all equipment with existing coverage and annual cost above $0.00 will have no change to the existing amounts and pricing. All equipment items under the current 5% general biomed pool will be priced from the 5% adjustment pool. The 325 net new devices and larger equipment over the $25k capital price cap will receive appropriate budgets and coverage.

B. T&M charges for the past 24 months were reviewed for opportunities to reduce the costs. Additional reductions are identified below.

- Since March 2022, there have been 3 Accidental Damage repairs over $5000. No specific trends for these and no repeat failures.
- I was able to reduce T&M by reviewing some spending compared to equipment that will have coverage; $135,000 looks to be the right amount to budget for T&M.
- After reviewing SMs for systems under NSNP coverage, I moved the Zoll Defibs from NSNP to SMNP. These Systems are under warranty until 2026, but PMs are not included. This was $8K to T&M. We can cover SMs for $6K, adding an additional reduction to T&M and additional savings overall for Natividad.
- Equipment that we did not price but recommend an FDC will further reduce the T&M spend.

C. We propose to remove the 5% inventory adjustment limits on Capital equipment costs, creating a 5% pool of dollars that will be reserved for all equipment falling off warranty and allowing for budgets to be assigned at the time warranty ends regardless of capital cost. This pool would be added to when equipment is removed from service and subtracted from when equipment needs coverage added. Based on the last 2-year agreement, 5% of the contract in funds will be an adequate reserve to stay within budget. Adjustments to the inventory budgets will be made monthly or bi-monthly and submitted in a Change Form, which requires customer review and signature before changes are completed.

D. Renovo will be responsible for sharing risk by covering the cost of avoidable damages meeting certain criteria - The coverage is limited to Avoidable Damage repairs not exceeding $1250 in parts/ labor per service event with an annual limit of $25000 per year. Credits will be issued as a line item on invoices for customer tracking purposes, and Renovo will keep a spreadsheet of all credits that will be reviewed during quarterly QBRs.

The following exceptions will apply to Shared Risk T&M

- All avoidable damage repairs exceeding $1250 per event will need to be reviewed and approved by the customer and be covered and billed under the T&M budget for the year.
- All consumables/ accessories are excluded from the Shared Risk, examples of accessories are cables, sensors, transducers, glassware, detectors, and batteries. This list is not all-inclusive.
- Special projects involving moving, inspection, setup, configuration, upgrades, and testing of equipment purposed for new locations or for addition to existing or temporary services within or outside the hospital.
- Damages caused by acts of nature (earthquakes, storms, flooding, major power outages, etc.).

Docusign Envelope ID: F8690298-1289-47D2-9FAF-69266D6E190B

- Investigation and evaluation of incidents that require engagement of services outside of Renovo Solutions.

Ultrasound Probe Coverage

In the current agreement, each of the 9 Ultrasound machines has one probe repair per year covered, resulting in some probes being billed when more than 1 fails per machine. In partnership with Natividad, Renovo would like to propose an option for Renovo to cover the first 9 probe repairs regardless of which system under Renovo coverage it is from. Any additional transducers (exceeding 9) needing repair will be billable as standard T&M. This would exclude any probe repairs from a system not under coverage with Renovo. In reviewing the history, we have not seen 9 repairs annually, potentially resulting in savings.
