FY20-21 -- Early Childhood Collaboratives

Community Members Supported:

1,557 Children

1,588 Caregivers

80 Early Childhood Providers

“Through its Collaboratives, [First 5] is bringing people together that work in the same community with the same goals. Having different roles that we each contribute to, but then having a space where we come together to see how those different pieces come together, has really given a different dynamic and different spirit to our program where it’s a lot more united and collaborative.”

Mental Health Training: Infant Family and Early Childhood Mental Health

“This year has been challenging and stressful for all of us, but the effects on families with young children has really brought on more stress and isolation. The trainings have given me the opportunity to learn how to be more reflective and compassionate towards the families I work with. I have reached out to the families I work with just to check in and see how they are doing. I let them know that I am here to support them in any way I can.”
