# DRAFT RESOLUTION

## Before the HCD Chief of Planning in and for the County of Monterey, State of California

In the matter of the application of:

**SPYGLASS HILL PARTNERS LLC (PLN220024)**

### RESOLUTION NO. 23--

Resolution by the Monterey County HCD Chief of Planning:

1. Considering the previously-certified Final Environmental Impact Report (FEIR) for the Del Monte Forest Local Coastal Program Amendment and the Pebble Beach Company (PBC) Concept Plan and finding the project consistent with the FEIR which does not warrant an addendum pursuant to Section 15162 of the CEQA Guidelines; and
2. Approving a Coastal Administrative Permit and Design Approval to allow construction of a 6,468 square foot single family dwelling inclusive of an attached garage, and a Coastal Administrative Permit and Design Approval to allow construction of an 898 square foot Accessory Dwelling Unit and associated site improvements including the removal of 45 Monterey pine and Coast live oak trees.

[3154 Stevenson Drive, Pebble Beach (Assessor's Parcel Number 008-023-033-000), Del Monte Forest Land Use Plan, Coastal Zone.]

**The SPYGLASS HILL PARTNERS LLC application (PLN220024) came on for an administrative decision hearing before the Monterey County HCD Chief of Planning on February 15, 2023. Having considered all the written and documentary evidence, the administrative record, the staff report, oral testimony, and other evidence presented, the Monterey County HCD Chief of Planning finds and decides as follows:**

### FINDINGS

1. **FINDING:** **CONSISTENCY** – The project, as conditioned, is consistent with the applicable plans and policies which designate this area as appropriate for development.  
**EVIDENCE:** a) The project has been reviewed for consistency with the text, policies, and regulations in the:
  - 1982 Monterey County General Plan (General Plan);
  - Del Monte Forest Land Use Plan (DMF LUP);
  - Monterey County Coastal Implementation Plan, Part 5 (DMF CIP); and
  - Monterey County Coastal Zoning Ordinance (Title 20).

No conflicts were found to exist. No communications were received during the course of review of the project indicating any inconsistencies with the text, policies, and/or regulations of the applicable Monterey County Code (MCC). The subject property is located within the Coastal Zone; therefore, the 2010 Monterey County General Plan does not apply.

- b) Allowed Use. The subject property is located at 3154 Stevenson Drive, Pebble Beach (Assessor's Parcel Number [APN]: 008-023-033-000), Del Monte Forest Land Use Plan, and is within Coastal Zone. The parcel is zoned Medium Density Residential, 2 units per acre, with Building Site 6 and Design Control overlays in the Coastal Zone or "MDR/2-B-6-D(CZ)". MDR zoning allows for the establishment of the first single-family dwelling and an Accessory Dwelling Unit as principle uses, subject to the granting of a Coastal Administrative Permit in each case. The project involves the construction of an approximately 5,556 square foot two-story single-family dwelling with an attached 912 square foot three-car garage and a detached 899 square foot Accessory Dwelling Unit (ADU). The project also includes a 1,955 square foot impervious motor court. Associated site improvements include 815 square feet of decks, a 169 square foot covered porch, approximately 840 cubic yards of cut, 330 cubic yards of fill, and the removal of 45 native trees (33 Monterey pines and 12 Coast live oaks). However, approval for tree removal has been obtained through the creation of the subject residential lot (see Finding 5). Therefore, the development is an allowed use for this site.
- c) Lot Legality. The subject property (0.74), APN 008-023-033-000, is identified as Lot 12 of Tract 1536 on a Recorded Map entitled "Del Monte Forest Plan – Spyglass 1 (Area L), recorded in January 2018 (Volume 24, Cities & Towns, Page 58). Therefore, the County recognizes the subject property as a legal lot of record.
- d) Design. Pursuant to Title 20, Chapter 20.44, the project site and surrounding area are designated as a Design Control Zoning District ("D" zoning overlay), which is intended to regulate the location, size, configuration, materials, and colors of structures and fences to assure the protection of the public viewshed and neighborhood character. The single-family dwelling with attached garage and the ADU will have exterior colors and materials that consist of brown vertical 'grove' siding and 'drystack' stone veneer exteriors, bronze doors and windows, and dark bronze metal roofing. The homes within the Pebble Beach area are eclectic in architecture, ranging from modern to California-ranch and Spanish styles homes. The exterior finishes blend with the surrounding environment and are consistent with the surrounding residential neighborhood character. Retained pine and oak trees, as well as the proposed landscaping and tree replanting, will surround the property and shield the development from any public views. Condition No. 8 ensures that all exterior lighting is down lit, unobstructive and harmonious with the surrounding area. The project, as designed, conditioned, and sited, assures protection of the public viewshed, is consistent with neighborhood character, and assures visual integrity.

- e) Visual Resources. The project is consistent with DMF LUP policies for the protection of scenic and visual resources. As depicted on DMF LUP Figure 3, Visual Resources, the subject property is not located within the public view shed. A site visit on September 9, 2022, confirmed that the proposed residence is not visible from 17-Mile Drive due to location and existing topography. Also see Evidence “d” above.
- f) Review of Development Standards. The project meets all required development standards. The development standards for the Building Site or “B” District are identified in Title 20, Section 20.42.030. Development within this district shall meet the required setbacks unless otherwise indicated on a recorded final map. For the subject property, the recorded final map identifies a building envelope with a front setback of 20 feet and side and rear setbacks of 10 feet. As proposed, the single-family dwelling and ADU are located entirely within the building envelope. The proposed main structure will have a height of 27 feet, which is the maximum allowed height for main structures within MDR zoning district. Condition No. 10 (Height Verification) has been applied to ensure that the height of the proposed residence does not exceed the allowable limit of 27 feet.

Title 20, Section 20.14.060.C.2 establishes site development standards for habitable accessory structures, in this case, the detached ADU. The required front setback is 50 feet, side and rear setbacks are 6 feet, and the maximum height limit is 15 feet. The detached ADU is located 43 feet southeast of the single-family dwelling and is adjacent to the proposed motor court. The ADU will have setbacks of approximately 87 feet (front) and 10 feet (east side). Condition No. 10 (Height Verification) has been applied to ensure that the height of the proposed residence and ADU does not exceed the allowable limit of 27 feet and 15 feet, respectively.

The allowed maximum site coverage and floor area ratio (FAR) is 25%. The subject property is 32,234 square feet (0.74 acres), which allows site coverage and FAR of 8,059 square feet. The project results in structural site coverage of 6,166 square feet (19.1%) and FAR of 7,367 square feet (22.8%).

- g) Combined Structural and Impervious Surface Coverage. The subject property is located within the Seal Rock Watershed, a designated watershed as shown on the DMF LUP, Figure 2b. Therefore, site structural and impervious surface coverage are limited to 9,000 square feet per DMF LUP Policy 77. The project results in an impervious surface coverage of 8,467 square feet and is therefore consistent with Policy 77.
- h) Driveway. DMF LUP Policy 1 and CIP Section 20.147.090.A.2 require new residential driveways to minimize surface length and width and provide simple and direct access. The new driveway will provide direct access from the single-family dwelling to Parcel E (roadway and public utility easement) which connects to Stevenson Drive. The motor court has been appropriately sized to minimize tree removal and provide emergency vehicle turnaround, while also

providing adequate spacing for vehicles backing out of the proposed garage. In this case, the driveway and motor court provide access in the most simple and direct location that minimizes surface length and width. As proposed, the development achieves the policy goal of providing simple and direct access to the property, as well as providing adequate fire and emergency response access. Therefore, the driveway meets the requirements of Policy 1.

- i) Cultural Resources. DMF CIP Section 20.147.080.B.1 states that an archaeological survey report shall be required for all development within a known or potential archaeological resource area. According to the Monterey County Geographic Informational System (GIS), the subject property has a high archaeological sensitivity and is not within 750 of a known archeological resource. Previous archaeological reports prepared for Area L (LIB100404 and LIB100268), most recently for the PBC Concept Plan, concluded that there is no surface evidence of potentially significant archaeological resources. The potential for inadvertent impacts to cultural resources is limited and will be controlled by use of the County's standard condition (Condition No. 3), which requires the contractor to stop work if previously unidentified resources are discovered during construction.
- j) Tree Removal. The proposed project includes the removal of 45 Monterey pines and Coast live oaks. See Finding No. 5 and supporting evidence.
- k) Public Access. As demonstrated in Finding 7, the development is consistent with public access policies of the DMF LUP.
  - l) The project planner conducted a site inspection on September 9, 2022 to verify that the project on the subject parcel conforms to the plans listed above. .
- m) The application, plans, and supporting materials submitted by the project applicant to Monterey County HCD-Planning for the proposed development found in HCD-Planning File No. PLN220024.

**2. FINDING:** **SITE SUITABILITY** - The site is physically suitable for the proposed use.

- EVIDENCE:**
- a) The project includes construction of a single-family dwelling and Accessory Dwelling Unit in a residential neighborhood.
  - b) The project was reviewed by Housing and Community Development (HCD)-Planning, Pebble Beach Community Services District (CSD Fire Protection District), HCD-Development Services, HCD-Environmental Services and Environmental Health Bureau. There has been no indication from these departments/agencies that the site is not suitable for the proposed development. Conditions recommended have been incorporated.
  - c) The following technical reports have been prepared:
    - Tree Impact Assessment (LIB220311) prepared by Rob Thompson, Monterey, CA on February 28, 2022
    - Geotechnical Investigation (LIB220312) prepared by Belinda Taluban, Salinas. CA, on December 20, 2021.

Upon independent review, staff concurs with conclusions of these reports. There are no physical or environmental constraints that render the site unsuitable for the use proposed.

- d) Staff conducted a site inspection on September 9, 2022 and confirmed the site is suitable for implementation of the proposed development.
- e) The application, plans and supporting materials submitted by the project applicant to Monterey County HCD-Planning for the proposed development are found in Project File PLN220024.

**3. FINDING:**

**HEALTH AND SAFETY** – The establishment, maintenance, or operation of the project applied for will not under the circumstances of this particular case be detrimental to the health, safety, peace, morals, comfort, and general welfare of persons residing or working in the neighborhood of such proposed use or be detrimental or injurious to property and improvements in the neighborhood or to the general welfare of the County.

**EVIDENCE:**

- a) The project was reviewed by HCD-Planning, Pebble Beach CSD Fire Protection District, HCD-Development Services, HCD-Environmental Services, and Environmental Health Bureau, and conditions have been recommended, where appropriate, to ensure that the project will not have an adverse effect on the health, safety, and welfare of persons either residing or working in the neighborhood.
- b) All necessary public facilities are available to the subject property. Sewer service will be provided by the Pebble Beach Community Services District (PBCSD). The PBCSD wastewater collection and treatment system has adequate remaining capacity for sewage disposal, which then transfers wastewater to the Carmel Area Wastewater District treatment facility. Potable water will be provided by the California American Water Company using water credits purchased from Pebble Beach Company (PBC), and which were allocated for development of properties approved under the PBC Concept Plan (HCD-Planning File No. PLN100138). The Pebble Beach Company has granted the subject property a Water Entitlement of 0.50-acre feet per year (Document No. 2021035640), which is adequate to serve the project.
- c) The project results in grading of approximately 840 cubic yards of cut and 330 cubic yards of fill. Approximately 510 cubic yards of cut will be exported off-site to the Monterey Regional Waste Management. The attached plans include a Construction Management Plan which minimizes traffic on public roads to and from the project site and identifies the hours of operation, duration of construction and location of on-site/off-site parking for construction personnel.
- d) The application, plans, and supporting materials submitted by the project applicant to Monterey County HCD-Planning for the proposed development found in HCD-Planning File No. PLN220024.

**4. FINDING:**

**NO VIOLATIONS** - The subject property is in compliance with all rules and regulations pertaining to zoning uses, subdivision, and any other applicable provisions of the County's zoning ordinance. No violations exist on the property.

- EVIDENCE:**
- a) Staff reviewed Monterey County HCD-Planning and HCD-Building Services records and is not aware of any violations existing on subject property.
  - b) The application, plans and supporting materials submitted by the project applicant to Monterey County HCD-Planning for the proposed development are found in Project File PLN220024.

**5. FINDING:** **TREE REMOVAL** – The siting, location, size and design of the project has been established to minimize tree removal and has been limited to that required for the overall health and long-term maintenance of the property.

- EVIDENCE:**
- a) The previously approved PBC Concept Plan (HCD-Planning File No. PLN100138; Board Resolution Nos. 12-148 and 12-149) allows the build-out development and preservation of remaining undeveloped PBC properties located within the DMF Coastal Zone. The Spyglass 1 Subdivision (Area L), a standard subdivision of 15 residential lots, three preservation areas and natural drainage easements, and two roadway and public utilities easements, was one of the approved sub-projects under PLN100138. The approval of the Concept Plan included a Coastal Development Permit to allow tree removal; therefore, subsequent Coastal Development Permits to allow tree removal are not required provided the proposed development is consistent with the parameters of the Concept Plan.
  - b) The tree removal proposed as part of the Concept Plan was also analyzed in the Final EIR (SCH#2011041028) and mitigated for off-site tree preservation. The Final EIR analysis presumed a development impact area on each residential lot of up to 15,000 square feet of structural, hardscape, and landscape development. Condition No. 13 has been incorporated to ensure development of the property is within the assumption of 15,000 square feet. Additionally, DMF CIP, Section 20.147.050.C.4 (Forest Resources), requires proposed development projects to be sited and designed to minimize the removal of trees.
  - c) The project results in the removal of 45 native trees (33 Monterey pines and 12 Coast live oaks), which are due to construction related impacts and poor conditions. The development has been sited in the most feasible location to meet setbacks and minimize tree removal. The applicant has designed the development on the most open areas of the site. Though not required, the applicant included 20 replacement plantings as part of the project. The resulting removal of 45 native trees thereby minimizes tree removal to the greatest extent possible and is in conformance with the previously-certified Final EIR and the previously-approved PBC Concept Plan. Therefore, in this case, the development is consistent with the parameters of the PBC Concept Plan and a subsequent Coastal Development Permit to allow tree removal is not required.
  - d) In accordance with the prepared Arborist report (LIB220311), staff has applied the standard migratory bird nesting condition (Condition No. 12) to ensure that no active raptor or migratory bird nests occur within the project site or immediate vicinity prior construction. Additionally, the standard tree and root protection condition has been

applied to the project as Condition No. 11 to ensure that trees not proposed for removal are not impacted during construction or during removal of approved trees. Condition No. 10 requires that no tree removal occurs until such time that a construction or grading permit is issued from HCD-Building Services.

- e) The application, plans and supporting materials submitted by the project applicant to Monterey County HCD-Planning for the proposed development are found in Project File PLN220024.

**6. FINDING: ACCESSORY DWELLING UNIT** – The Accessory Dwelling Unit meets the established regulations and standards as identified in Title 20, Section 20.64.030.

- EVIDENCE:**
- a) Title 20, Section 20.64.030 establishes regulations and standards for which an Accessory Dwelling Unit, accessory to the main residence on a lot, may be permitted. The project includes the construction of an 899 square foot Accessory Dwelling Unit (ADU) that includes independent living facilities as shown in the attached plans.
  - b) The ADU is below the maximum 1,200 square foot floor area and will be the first ADU on the subject property.
  - c) As defined in Title 20, Section 20.58.040, the ADU requires one parking space. Consistent with this requirement, the ADU will have one parking space.
  - d) The ADU meets the required site development standards and design criteria as defined in Title 20 Section 20.12.060 and Chapter 20.44 (See Finding 1, Evidence “d” and “f”).
  - e) The application was reviewed by the Environmental Health Bureau (EHB) to ensure adequate sewage disposal and water supply facilities exist and are readily available to serve the ADU. EHB made the determination that the property has adequate public facilities, and no further comments or conditions were provided (see Finding 3).
  - f) The application, plans, and supporting materials submitted by the project applicant to Monterey County HCD-Planning for the proposed development found in HCD-Planning File No. PLN220024.

**7. FINDING: CEQA (Consider the Previously-Certified Final Environmental Impact Report)** – The project is consistent with the previously-certified Final Environmental Impact Report (FEIR) for the Del Monte Forest Local Coastal Program Amendment and the Pebble Beach Company Concept Plan. Pursuant to Section 15162 of the CEQA Guidelines, the HCD Chief of Planning has reviewed the project, considered the FEIR, and finds that the project does not require a subsequent EIR based on the following findings:

- 1) No substantial changes are proposed in the project which will require major revisions to the previous EIR due to involvement of new significant environmental effects or a substantial increase in the severity of previously identified impacts;
- 2) No substantial changes have occurred with respect to the circumstances under which the project is undertaken which will require major revisions to the previous EIR due to the involvement of new significant environmental effects or a

substantial increase in the severity of previously identified effects; and

3) No new information of substantial importance has been provided which was not known at the time of the previous EIR.

- EVIDENCE:**
- a) Pursuant to the California Environmental Quality Act (CEQA) Guidelines Section 15162, when an EIR has been certified, no subsequent EIR shall be prepared for the project unless the agency determines that substantial changes are proposed, or substantial changes occur with respect to the circumstances under which the project is undertaken. In this case, no new information has been presented to warrant further environmental review. None of the conditions described in Section 15162 calling for preparation of a subsequent EIR or negative declaration have occurred.
  - b) The Del Monte Forest (DMF) Agreement between the California Coastal Commission (CCC) and Pebble Beach Company (PBC) formed the basis for a Local Coastal Program (LCP) Amendment and development proposal, known as the PBC Concept Plan. The LCP Amendment was required to establish the regulatory framework for the development proposal, consisting of the build-out development and preservation of the remaining undeveloped PBC properties located within the Coastal Zone of the DMF. The subject parcel was part of the PBC Concept Plan development proposal.
  - c) On May 9, 2012, the CCC unanimously certified the amendment as submitted.
  - d) On May 22, 2012, the Monterey County Board of Supervisors acknowledged receipt of the CCC resolution certifying the LCP Amendment and adopted the LCP Amendment by adopting a resolution to amend the DMF Land Use Plan and adopting an ordinance to amend the Monterey County Coastal Implementation Plan.
  - e) On June 19, 2012, the Board of Supervisors certified the Final EIR (SCH# 2011041028) prepared for DMF LCP Amendment and PBC Concept Plan development proposal, pursuant to Board Resolution Nos. 12-148 and 12-149. The LCP Amendment became effective on June 22, 2012.
  - f) The project proposes residential development on an 0.74-acre lot identified in the Spyglass 1 Subdivision (Area L) as Lot 12, which was contemplated and analyzed in the certified FEIR for the LCP Amendment and the PBC Concept Plan development proposal.
  - g) The EIR contemplated residential development of the lot including removal of trees and up to 15,000 square feet of structural, hardscape, and landscape improvements. The project includes structural and impervious surfaces less than 9,000 square feet (see Finding 1, Evidence “g”). In accordance with the PBC Concept plan, the LCP Amendment and the FEIR, a non-standard condition of approval has been applied to ensure landscaping on the parcel does not exceed 6,000 square feet (Condition No. 13). Tree removal proposed as part of this project was analyzed in the Final EIR and mitigated for off-site replacement (see Finding 5). No mitigation measures from the Final EIR are required to be applied to this project. There has been no change in the project and no indication during review of the project,

or in testimony from the public, that circumstances have changed since the EIR was certified.

- h) The project does not involve a designated historical resource, a hazardous waste site, development located near or within view of a scenic highway, unusual circumstances that would result in a new significant effect, or development that would result in a new cumulative significant impact.
- i) No adverse environmental effects were identified during staff review of the development application, and there are not any significant adverse impacts associated with this project that have not been adequately mitigated in the conditions of the PBC Concept Plan.
- j) The application, plans and supporting materials submitted by the project applicant to Monterey County HCD-Planning for the proposed development are found in Project File PLN220024.

**8. FINDING: PUBLIC ACCESS** – The project is in conformance with the public access and recreation policies of the Coastal Act (specifically Chapter 3 of the Coastal Act of 1976, commencing with Section 30200 of the Public Resources Code) and applicable Local Coastal Program, and does not interfere with any form of historic public use or trust rights.

- EVIDENCE:**
- a) No access is required as part of the project as no substantial adverse impact on access, either individually or cumulatively, as described in DMF CIP, Section 20.147.130 can be demonstrated.
  - b) No evidence or documentation has been submitted or found showing the existence of historic public use or trust rights over this property.
  - c) The subject property is not described as an area where the Local Coastal Program requires physical public access (Figure 8, Major Public Access and Recreational Facilities, in the DMF LUP).
  - d) The subject project site is not identified as an area where the Local Coastal Program requires visual public access (Figure 3, Visual Resources, in the DMF LUP).
  - e) Based on the project location, and its topographical relationship to visual public access points in the area, the development proposal will not interfere with visual access along 17-Mile Drive or from Point Lobos. Consistent with DMF LUP Policies 123 and 137, the proposed development will not block significant public views toward the ocean and will not adversely impact the public viewshed or scenic character in the project vicinity.
  - f) The application, plans and supporting materials submitted by the project applicant to Monterey County HCD-Planning for the proposed development are found in Project File PLN220024.

**9. FINDING: APPEALABILITY** - The decision on this project may be appealed to the Board of Supervisors and the California Coastal Commission.

- EVIDENCE:**
- a) Board of Supervisors. Pursuant to Title 20, Section 20.86.030, an appeal may be made to the Board of Supervisors by any public agency or person aggrieved by a decision of an Appropriate Authority other than the Board of Supervisors.
  - b) Coastal Commission. Pursuant to Title 20, Section 20.86.080.A, the project is subject to appeal by/to the California Coastal Commission

because it involves development between the sea and the first through public road paralleling the sea (i.e., State Route/Highway 1).

## DECISION

**NOW, THEREFORE**, based on the above findings and evidence, the Chief of Planning for the Housing and Community Development does hereby:

1. 1. Soil to be amended with compost at time of planting. Compost at a rate of a minimum of four (4) cubic yards per 1,000 sq.ft. of permeable area, and incorporated to a depth of six (6) inches into the soil. Soils with greater than 6% organic matter in the top 6 inches of soil are exempt from adding compost and tiling.
2. A minimum three (3) inch layer of mulch shall be applied on all exposed soil surfaces of planting areas except turf, creeping or rooting ground covers, or direct seeding applications where mulch is contraindicated. To provide habitat for beneficial insects and other wildlife, up to 5% of the landscape area may be left without mulch. Designated insect habitat will be indicated on the landscape plan if applicable. Use non combustable mulch within 5' of structures, except where noted.
3. Hydrozone areas of chosen plants are indicated on plan. All plants are low hydrozone, except where noted.
4. See Arborist report by Rob Thompson dated 2/28/2022 for additional care and maintenance information.

**Zone 0 – Ember-Resistant Zone**  
 Zone 0 extends 5 feet from buildings, structures, decks, etc.

- Use hardscape like gravel, pavers, concrete and other noncombustible mulch materials. No combustible bark or mulch
- Remove all dead and dying weeds, grass, plants, shrubs, trees, branches and vegetative debris (leaves, needles, cones, bark, etc.); Check your roofs, gutters, decks, porches, stairways, etc.
- Remove all branches within 10 feet of any chimney or stovepipe outlet
- Limit plants in this area to low growing, nonwoody, properly watered and maintained plants
- Limit combustible items (outdoor furniture, planters, etc.) on top of decks
- Relocate firewood and lumber to Zone 2
- Replace combustible fencing, gates, and arbors attach to the home with noncombustible alternatives
- Consider relocating garbage and recycling containers outside this zone
- Consider relocating boats, RVs, vehicles and other combustible items outside this zone

**Zone 1 – Lean, Clean and Green Zone**  
 Zone 1 extends 30 feet from buildings, structures, decks, etc. or to your property line, whichever is closer.

- Remove all dead plants, grass and weeds (vegetation).
- Remove dead or dry leaves and pine needles from your yard, roof and rain gutters.
- Remove branches that hang over your roof and keep dead branches 10 feet away from your chimney.
- Trim trees regularly to keep branches a minimum of 10 feet from other trees.
- Relocate wood piles to Zone 2.
- Remove or prune flammable plants and shrubs near windows.
- Remove vegetation and items that could catch fire from around and under decks, balconies and stairs.
- Create a separation between trees, shrubs and items that could catch fire, such as patio furniture, wood piles, swing sets, etc.

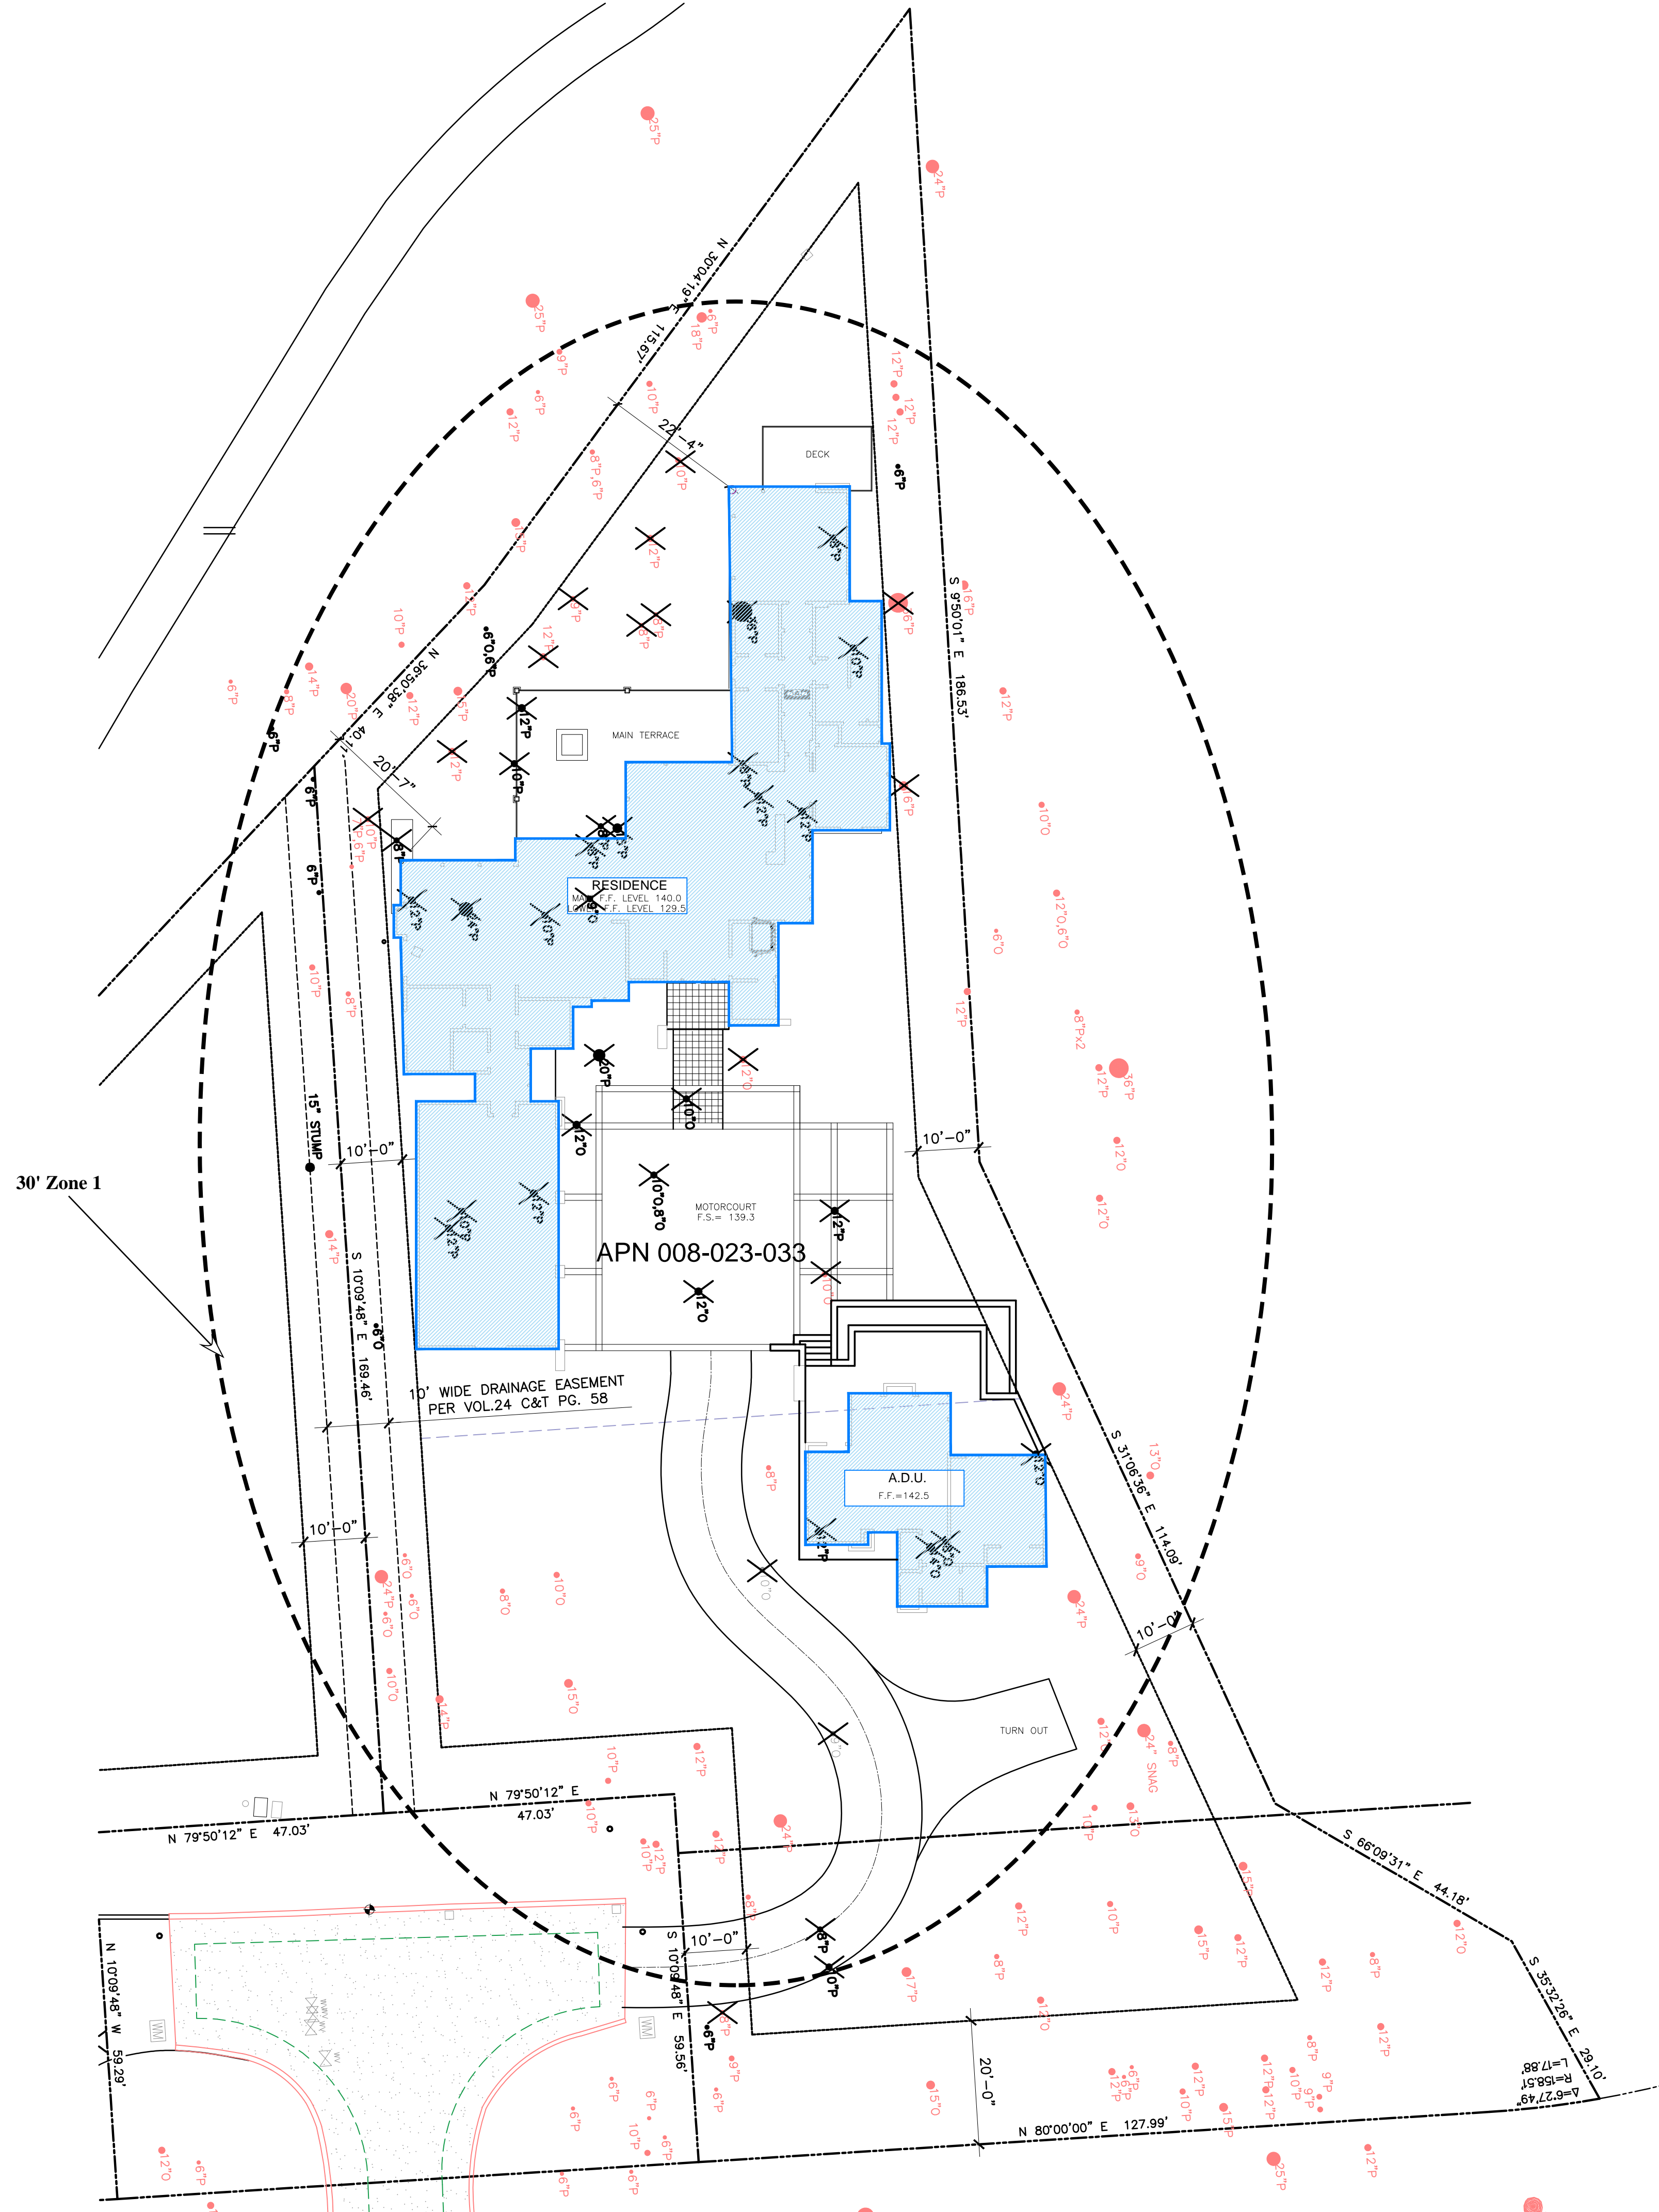

**Zone 2 – Reduce Fuel Zone**  
 Zone 2 extends from 30 feet to 100 feet out from buildings, structures, decks, etc. or to your property line, whichever is closer.

- Cut or mow annual grass down to a maximum height of 4 inches.
- Create horizontal space between shrubs and trees. 2x-6x the height of the shrub depending on degree of slope of the land.
- Create vertical space between grass, shrubs and trees. Remove all tree branches at least 6 feet from the ground.
- Remove fallen leaves, needles, twigs, bark, cones, and small branches. However, they may be permitted to a depth of 3 inches.
- All exposed wood piles must have a minimum of 10 feet of clearance, down to bare mineral soil, in all directions.

**Vegetation maintenance**

From a fire resilience perspective, vegetation management consists of good water management practices, appropriate fertilization, and a regular practice of plant pruning and cleanup. Regular watering, pruning, and cleanup increases plant health, making them more resistant to wildfire. Drip irrigation can be helpful as is mulch for water conservation. Unfortunately, combustible mulches near the home create an additional fire risk (Quarles and Smith, 2008). Eliminate combustible mulches within 0-5 feet from the home and recognize that from 5-30 feet, combustible mulch can burn and emit embers. Rock mulch will have greater fire resistance. Compost that is mixed into the earth around plants, has a lower combustibility or low combustible rating and are a better alternative to combustible mulches.

ADDITIONAL MEASURES MIGHT INCLUDE CHANGING THE LOCATION OF STATIONARY NOISE GENERATING EQUIPMENT, SHUTTING OFF IDLING EQUIPMENT, RESCHEDULING CONSTRUCTION ACTIVITY, INSTALLING ACOUSTIC BARRIERS AROUND STATIONARY SOURCES OF CONSTRUCTION NOISE, TEMPORARILY RELOCATING RESIDENTS WHERE PRACTICABLE, USING ALTERNATIVE EQUIPMENT OR CONSTRUCTION METHODS THAT PRODUCE LESS NOISE, AND OTHER SITE-SPECIFIC MEASURES AS APPROPRIATE.

ADDITIONAL NOTES:  
 1. THIS PROJECT SITE WILL EXPECT 2-8 WORKERS PER DAY.
