Appendix #1A
Provision, Installation and Maintenance
Of Advanced Network (Data) Services:
Reimbursement of Circuit Costs

This Appendix lists the circuits contracted for by CENIC on behalf of CTC and the Library for connecting CENIC's fiber optic backbone to Library and for library connections that are not direct connections to CENIC's fiber optic backbone, e.g. direct connections between libraries (defined as "Services" in the Agreement). Library understands that CENIC will bill CTC, and CTC will bill Library, for the costs of circuits charged by network service providers, including any taxes and surcharges, and any one-time installation fees. Prior to approval of CENIC's E-rate Consortium Library Application, not all applicable E-rate and CTF discounts will be reflected on invoices. After the E-rate Application for any given year is approved, the network service provider will coordinate with CENIC to provide appropriate credits and such credits will be passed from CENIC to CTC and from CTC to the Library. Such credits are typically issued sometime during the fiscal year after the year in which the circuits are installed and Services are first provided. In subsequent years, credits continue to be issued in the fiscal year after the year for which Services have been provided. Library further understands that the exact discounted cost of circuits will not be known until after the E-rate Consortium Library Application is approved. The actual start date of the Service, and therefore of circuit costs, will be dependent on coordination among CENIC, the Library and the network service provider. Any one-time (Non-recurring or NRC) costs included below are typically invoiced by carriers prior to circuit installation and will be invoiced to Library upon receipt of invoice to CENIC from the network service provider.
