Notes:

1. An Equivalent Dwelling Unit (EDU) is defined as the flow and strength of a single-family residence consisting of 6 hundred cubic feet (HCF) of wastewater flow per month with Bio-chemical Oxygen Demand (BOD) strength of 250 milligrams per liter (mg/l) and Suspended Solids (SS) strength of 250 mg/l.
2. Low-Strength wastewater is defined as wastewater with a BOD and SS strength of less than or equal to 250 mg/l.
3. High-Strength wastewater is defined as wastewater with a BOD and SS strength of more than or 250 mg/l. and less than or equal to 600 mg/l.
4. For wastewater with a BOD and/or SS strength greater than or equal to 600 mg/l, the charge per EDU will be determined by the District Engineer and based on the actual strength of BOD and SS. (Charge = \$60 * (Flow HCF)/6 HCF * (0.5977 + (BOD mg/l)/250 BOD * 0.2073 + (SS mg/l)/250 mg/l * 0.1949).
