APPENDIX A

Guide- Response Notification Types

Electronic Monitoring

1. **Bracelet Strap Open Alert:** Generated when the base station receives the date and time that the bracelet was cut.
2. **Strap Tamper:** The transmitter's strap has been cut or disassembled so that the strap is separate from the case, or the client has attempted to cut, remove or tamper with the strap, or the transmitter has corroded connection points.

Global Positioning Systems (GPS)

1. **Strap and Backplate Tamper combined:** Strap Tamper occurs when the client attempts to cut, remove or tamper with the strap attached to the device. Backplate tamper occurs if the client attempts to remove/disassemble the device by removing the backplate from the tracking unit.
2. **Strap Tamper:** The fiber-optic circuit inside the strap of a GPS® tracking unit is open, resulting in a tamper alert.
3. **Case Tamper:** The tracking unit's case was opened because it was tampered with or the battery was replaced.
4. **Exclusion Zone Alert:** Occurs when a client is in violation of his schedule by entering a user defined zone that is prohibited. A client entered a forbidden zone and has been in that zone longer than the grace period if one is in effect.

Alcohol Monitoring

1. **Alcohol Detected Alert:** Generated when the bracelet generates three consecutive readings above .020 with at least one of those readings above the agency threshold, which indicates that the client has consumed alcohol.
2. **Potential Tamper Alert:** Generated when there is an unacceptable change in IR voltage from the previous readings, which indicates that the client has inserted something under the bracelet in order to inhibit the testing of alcohol.
3. **Potential Removal Alert:** Generated when the client cuts the strap or removes the bracelet without damaging the strap.
