SUMMARY/DISCUSSION

The California Department of Health Care Services (DHCS) has awarded the County of Monterey Health Department a CYBHI - Evidence-Based Practices and Community-Defined Evidence Practices - Round Two Grant in the amount of \$227,159 to assist in building institutional and regional capacity to provide Child-Parent Psychotherapy (CPP) to eligible patients and their families. The family-centered model serves young children and their caregivers, and it is as a treatment modality with robust evidence for effectively improving behavioral health outcomes for diverse populations.

The goal of the grant is to enhance and build the continuum of behavioral and mental health supports available to Monterey County children and families, with a specific focus on investing in evidence-based therapeutic models that meet the needs of specific populations residing in the community. This will be done by engaging MCSTART collaborative clinicians from Monterey County Behavioral Health Bureau (BHB) and Door to Hope in intensive CPP training, purchasing the necessary assessment tools to implement the model, and offering coaching and training to create ongoing capacity in this area for the provision of CPP.

This work supports the following County of Monterey Health Department's 2018-2024 Strategic Plan Goal(s): 3. Ensure access to culturally and linguistically appropriate, customer-friendly, quality health services. It also supports one of the ten essential public health services, specifically 7.
