

Resume for Mark Grandcolas

1980 Bachelor of Science in Engineering, University of Texas at Austin, graduated with honors.

Worked for four years at NASA space center in Houston, then 4 years with Rocketdyne in southern California. Moved to silicon valley and the computer industry in 1989 working for IBM, and several years later founded my own software company which was acquired by Qualcomm in 2014.

Have been retired since, and a full time resident of Carmel Highlands.

Besides being a member of Quail, I serve as President of the Rotary Club of Carmel by the Sea, chair of the RI Foundation committee and Board member, and I actively developed the Classic Car restoration program at Rancho Cielo with a grant from Rotary International Foundation. I continue to work to expand this program via grants.

In addition, I volunteer on the Underground Utilities committee of the Highlands.

I choose to be active in my community wherever I can add value and produce results beneficial for all stakeholders. I am interested in the Big Sur Byway organization as it is addressing a complex challenge but I believe an approach to manage this busy corridor can be found that benefits the quality of life and safety of visitors, residents, and wildlife.

Sincerely,
Mark Grandcolas
