SUMMARY/DISCUSSION:

The County has contracted with Granicus to provide an Agenda Management System using Legistar since 2014. Legistar is legislative management software used by government agencies and is currently used extensively by all County of Monterey departments to manage the County's legislative process. The software allows users to easily create legislative items, quickly gain approvals using automatic workflow system, notify users when the items are ready for their review and efficiently publish agendas and minutes to the County's website while optimizing accessibility and transparency.

ITD recommends the Board's approval of Amendment no. 7, which will extend the term date an additional three years and upgrade an existing encoding appliance which can broadcast video in high-definition format.
