Forward Advantage Implementation Services Statement of Work Natividad Medical Center

February 14, 2016

Introduction:

Forward Advantage Implementation Services will provide the following services, delivered both onsite and remotely, to ensure a successful implementation of OneSign at the Natividad Medical Center. Below is a summary of the activities that will be provided during the implementation as well as the estimated timeline. At the end of this document is a detailed description of the services provided and estimated duration for delivery of these services.

PHASE 1: DISCOVERY

Forward Advantage and the Natividad Medical Center will validate Natividad Medical Centers network environment in context with Imprivata OneSign requirements. Items for discussion during this phase revolve around the customer enterprise. Application coverage, network topology, security policies, and desktop deployment will be discussed and related to the project plan.

Activities:

- Validate scope of services
- Review implementation pre-trip checklist (Details of Customer Infrastructure)
 - IP Address, Netmask, Gateway, DNS (Domain Name System), FQDN (Fully Qualified Domain Name) for Active Directory, Server Operating Systems, etc.
- Review SSO Application Sign Off Form(s)
- Review SSO Agent Deployment Document
- Review & Customize Project Plan
- Schedule onsite implementation

PHASE 2: INSTALLATION & CONFIGURATION OF ONESIGN:

This phase consists of four (4) primary tasks: Installation, OneSign Configuration, Training and Application Enablement.

Activities:

- Appliance setup & configuration
- Creating & Managing Security Policies within OneSign
 - OneSign Policies Control Authentication, Challenges, Password Self Service and Client Workflow Options
- Manage Users & OneSign Domains within OneSign
 - OneSign Domains configure connection to Active Directory as well as enabling an automated link to User Policies
- Application enablement, both Desktop and Citrix Environments
- Initial/Environment Testing
- Administrator Training
- Help Desk Training

PHASE 3: TESTING:

Technical Services best practices call for a period of testing within the IT/IS Department to simulate the workstations as well as application access of the end-users in the initial department to be deployed. The testing process will include the authentication methods to be utilized by the end-users as well as application access and specific workflows that are to be achieved as defined in the Project Scope/Assumptions.

Upon completion of this internal testing (unit testing), the deployment proceeds to the initial department within the Natividad Medical Center.

Activities:

- Test end-user workstations
- Test end-user enrollment process
- Test end-user application workflows (Login and Change Password Processes)
- Test end-user initial authentication
- Test end-user unlocking of a workstation
- Test authentication methods to Login, Unlock, and Lock Workstations (including timers)
- Test Password Self Service Reset
- Test Reporting/Audit Records

PHASE 4: DEPLOYMENT:

The Deployment phase begins once the implementation team agrees that the Testing Phase is complete and the solution is ready for the initial departments and/or enterprise-wide deployment. Best practices call for a one (1) week initial rollout with approximately 40-60 users ("initial group") after the joint implementation teams feels confident the project scope has been fulfilled. The intention of the initial group rollout is to certify that the OneSign configuration is ready for an enterprise wide deployment. Forward Advantage will assist with the planning and execution to enable this initial group of users.

Activities:

- Determine success criteria
- Determine user community
- Review client software deployment plan
- Review & develop end-user communication plan
- Review & develop end-user training documents
- Train and enable end-users
- Review & develop end-user support plan
- Monitor end-user activity for issues (Technical, Training, Other)
- Collect end-user feedback

Note:

Forward Advantage can optionally assist customer with deployment, however it is not part of the Standard Implementation Services or this Statement of Work.

Project Assumptions:

1. The Services described in this SOW constitute Forward Advantage's entire obligation. If the Natividad Medical Center requests services in addition to the Services presented in this SOW, the performance of such additional services will require an amendment to the contract signed by both parties to modify the details of Services Provided and an adjustment to the schedule and/or fees to be paid by the Natividad Medical Center. The VP of Client Services or lead System Engineer will track any such requests via a change control process and arrange for such services to be rendered.
2. Natividad Medical Center will provide a Project Manager during the course of the entire engagement. The Natividad Medical Center Project Manager is responsible for coordination of weekly project team meetings, scheduling of requirements gathering sessions with stakeholders and remote sites, scheduling of change control requests and facilitation of deployment option decisions.
3. Natividad Medical Center will provide a Technical resource throughout the engagement.
4. Natividad Medical Center will identify the staff that it deems to fit the Imprivata OneSign Implementation Roles & Responsibilities found in pages 5 and 6.
5. Natividad Medical Center will be required to provide access (including to the application owners), to the identified applications for SSO testing and enablement.
6. Natividad Medical Center will be required to provide user credentials to each of the identified applications to Forward Advantage (and Imprivata) as necessary.
7. Natividad Medical Center will be required to provide remote access to Forward Advantage (and Imprivata) via web based connections that are provided by Forward Advantage and Imprivata (Forward Advantage – Bomgar, and Imprivata – Logmein). In the unlikely event that an issue/defect is found that required Imprivata Engineering; it may be requested to have a VPN connection established between Imprivata and Natividad Medical Center.
8. Natividad Medical Center will need to provide an internal FTP Server in the event that Natividad Medical Center intends to automate the OneSign Archive Process and/or its Standard Reporting Process.
9. Natividad Medical Center will have purchased the appropriate number of Imprivata OneSign VDA licenses to correspond with their VMware View Virtual Desktops (also need to include OneSign Web API license).

Project Roles (Forward Advantage & Imprivata):

<p>Forward Advantage Technical Services Consultant</p>	<p>This role is responsible for configuring, training, testing and troubleshooting the Imprivata OneSign Solution. The Technical Services Consultant will provide information as to best practices for OneSign within MEDITECH facilities as well as approaches that have been successful in other deployments in conjunction with HIS Systems and Clinical Modules.</p> <p>The Technical Services Consultant is not responsible for the direct resolution of defects found within the Imprivata OneSign Product or within other systems being utilized by Natividad Medical Center (e.g. Microsoft, Citrix, VMware, HIS System, etc.).</p>
<p>Imprivata Technical Support</p>	<p>This role is responsible for issues raised during the implementation process (as well as post Implementation). Tier 2 is responsible for review of issue and preparation of information (logs, video files, reproduction steps) in order that this issue can be prioritized with Tier 3 (Engineering).</p>
<p>Imprivata Engineering</p>	<p>This role (Tier 3) is responsible for the resolution of software defects identified and confirmed during the implementation process.</p>

Imprivata OneSign Implementation Roles & Responsibilities (*Natividad Medical Center*):

There are eight roles typically involved in an OneSign product implementation. In most cases, an individual will have more than one role assigned. The table below describes each role by responsibilities and skills and can be used to help you prepare for your OneSign deployment.

Role	Responsibilities	Skills
Project Leader	The Project Leader will be responsible for coordinating the timing of the OneSign implementation and prepare the project team for their roles and responsibilities in the implementation. The project leader is also typically responsible for handling all end-user communication and change management issues.	The Project Leader will have experience in managing software implementations and will have strong project management and coordination skills. The project leader has rolled out other software solutions within the organization and knows who to involve from an internal resource perspective.
OneSign Administrator	The OneSign Administrator will be responsible for administering the OneSign solution on a day to day basis. This individual will available for the entire OneSign implementation and will become the onsite expert in the solution. The Administrator will help import the end users into OneSign, set-up security policies, learn to enable applications, and create reports.	The OneSign Administrator must be able to pick up new technology in a short amount of time. They will have a thorough understanding of how their organization wants to roll out security policies and which are the key applications to be enabled for single sign-on.
Desktop Administrator	The Imprivata OneSign agent will need to be deployed to every desktop. Most organizations use a push technology such as AD group policy or SMS to deploy the agent. The Desktop Administrator will be responsible for determining the appropriate strategy for rolling out the Imprivata Agent and will pull together a time line for Agent rollout.	The Desktop Administrator will have knowledge of different software deployment methods and will have the ability to use these technologies to rollout and support the Imprivata Agent initial rollout as well as ongoing software upgrades.
Application Specialist	As part of the initial deployment, the Imprivata Consultant will enable a subset of your applications for single sign-on. The Consultant will need a test account in order to access all of the relevant screens within your key applications. Often the Consultant will work directly with the Application Specialist for each application in order to setup and test all of the relevant screens.	The Application Specialist will have access to test accounts for each application that will be enabled for single sign-on. This includes the ability to test the Change Password functionality within the application. The Application Specialist will have an understanding of all of the screens that are accessed by end-users and will help the Imprivata Consultant in the testing post single sign-on enablement.

Role	Responsibilities	Skills
Directory Administrator	Limited access may be needed to the Directory Administrator in the beginning stages of the OneSign implementation. The Directory Administrator will know which Directory's will be imported into the OneSign appliance and will work with the OneSign Administrator to determine which groups/users should be enabled for Single Sign-On. If the organization is going to be implementing Imprivata's Self-Service Password Reset option, the Directory Administrator logon will be required as well as a SSL certificate on the Directory.	Ability to access Directory store and work with OneSign Administrator to import users and setup synchronization rules for ongoing update and maintenance to OneSign.
Network Administrator	During day one of the OneSign implementation, the Imprivata Consultant will need to work with your Network Administrator to setup the Appliance Pair on your network. The two appliances on the network will need three IP addresses (two static and one virtual). The Network Administrator will be responsible for the DNS entries and assistance in setting up the Appliances in your data center. The Network Administrator will also be responsible for daily backup and recovery process.	Ability to obtain required IP addresses for the OneSign Appliance Pair and access to the data center for setup and testing. The Network Administrator will also need to setup and test OneSign backup and recovery process.
Help Desk	During the initial implementation, the Imprivata Consultant will spend about 2 hours with the key representatives from the Help Desk training them on the key areas of support for OneSign as well as how to access Imprivata resources for ongoing assistance. The Help Desk representatives will be responsible for taking all end-user calls related to questions or issues with OneSign. They will be responsible for tier 1 technical troubleshooting and will contact Imprivata Technical Support for Tier 2 support.	The Help Desk will need to be able to troubleshoot issues and questions related to Agent installation and upgrade, ability to perform initial triage on issues related to application enablement and will be able to do some diagnosis on whether the issue is environmental or product related. They will also know how to access Imprivata Technical Support for additional technical assistance.
Power End-User	End-user that is typically included as part of an implementation in the early phases of the deployment. This end-user will be responsible for testing access to many different applications and will provide feedback to the project team on what is working and what needs improvement. Their feedback is critical prior to the large scale deployment.	Computer savvy and knowledgeable of many different applications accessed by end-users in the organization. They are a strong communicator and interested in being involved in the OneSign implementation.

Amendments

Occasionally, after a project is underway, the scope of services required can be unexpectedly altered. Significant changes in, or additions to, this scope of work during the project that require additional time/services from Forward Advantage Implementation Services will require an Amendment, signed by both parties, to detail a revised Statement of Work. This will ensure that the changes to the Statement of Work are documented, and that both the Natividad Medical Center and Forward Advantage agree to the changes.

An Amendment will reflect the new deliverables, activities, and budget for the remainder of the project. It amends the Agreement and Statement of Work from the date on which is it signed by both parties. Payment for all hours worked and expenses incurred up to the date of the Amendment will be due at this time as they were stated in the original Agreement and Scope of Work.

Acknowledgement and Approvals

The Services described in this SOW and the terms and conditions of the County's Service Agreement constitute Forward Advantage's entire obligation. Any agreement made verbally or via any other means outside of the contents of this Statement of Work is not binding and Forward Advantage is under no obligation to provide those Services or work product.

Upon completion of this SOW, no additional professional services are due to Natividad Medical Center under this SOW.

IN WITNESS WHEREOF, the parties have caused this Agreement to be executed by their duly authorized representatives.

EXHIBIT B to Agreement between NMC and Foward Advantage

BUSINESS ASSOCIATE AGREEMENT

This Business Associate Agreement ("Agreement"), effective January 1, 2015 ("Effective Date"), is entered into by and among the County of Monterey, a political subdivision of the State of California, on behalf of Natividad Medical Center ("Covered Entity") and Forward Advantage ("Business Associate") (each a "Party" and collectively the "Parties").

Business Associate provides certain services for Covered Entity ("Services") that involve the use and disclosure of Protected Health Information that is created or received by Business Associate from or on behalf of Covered Entity ("PHI"). The Parties are committed to complying with the Standards for Privacy of Individually Identifiable Health Information, 45 C.F.R. Part 160 and Part 164, Subparts A and E as amended from time to time (the "Privacy Rule"), and with the Security Standards, 45 C.F.R. Part 160 and Part 164, Subpart C as amended from time to time (the "Security Rule"), under the Health Insurance Portability and Accountability Act of 1996 ("HIPAA"), as amended by the Health Information Technology for Economic and Clinical Health Act and its implementing regulations ("HITECH"). Business Associate acknowledges that, pursuant to HITECH, 45 C.F.R. §§ 164.308 (administrative safeguards), 164.310 (physical safeguards), 164.312 (technical safeguards), 164.316 (policies and procedures and documentation requirements) and 164.502 *et. seq.* apply to Business Associate in the same manner that such sections apply to Covered Entity. The additional requirements of Title XIII of HITECH contained in Public Law 111-005 that relate to privacy and security and that are made applicable with respect to covered entities shall also be applicable to Business Associate. The Parties are also committed to complying with the California Confidentiality of Medical Information Act, Ca. Civil Code §§ 56 *et seq.* ("CMIA"), where applicable. Business Associate acknowledges that the CMIA prohibits Business Associate from further disclosing the PHI it receives from Covered Entity where such disclosure would be violative of the CMIA. The Parties are also committed to complying with applicable requirements of the Red Flag Rules issued pursuant to the Fair and Accurate Credit Transactions Act of 2003 ("Red Flag Rules"). This Agreement sets forth the terms and conditions pursuant to which PHI, and, when applicable, Electronic Protected Health Information ("E PHI"), shall be handled. The Parties further acknowledge that state statutes or other laws or precedents may impose data breach notification or information security obligations, and it is their further intention that each shall comply with such laws as well as HITECH and HIPAA in the collection, handling, storage, and disclosure of personal data of patients or other personal identifying information exchanged or stored in connection with their relationship.

4.2 **Termination.** Either Covered Entity or Business Associate may terminate this Agreement and any related agreements if the terminating Party determines in good faith that the terminated Party has breached a material term of this Agreement; provided, however, that no Party may terminate this Agreement if the breaching Party cures such breach to the reasonable satisfaction of the terminating Party within thirty (30) days after the breaching Party's receipt of written notice of such breach.

4.3 **Automatic Termination.** This Agreement shall automatically terminate without any further action of the Parties upon the termination or expiration of Business Associate's provision of Services to Covered Entity.

Further, no provision of this Agreement shall be waived, except in a writing duly signed by authorized representatives of the Parties. A waiver with respect to one event shall not be construed as continuing, or as a bar to or waiver of any right or remedy as to subsequent events.

5.3 **No Third Party Beneficiaries.** Nothing express or implied in this Agreement is intended to confer, nor shall anything herein confer, upon any person other than the Parties and the respective successors or assigns of the Parties, any rights, remedies, obligations, or liabilities whatsoever.
