AOD Prevention Requirements

Prevention services will meet the definition of Primary Prevention as outlined below:

Primary Prevention (source: NNA Contract, Primary Prevention):

Strategies, programs and initiatives which reduce both direct and indirect adverse personal, social, health, and economic consequences resulting from problematic ATOD (alcohol, tobacco and other drug availability), manufacture, distribution, promotion, sales, and use. Primary prevention strategies are directed at individuals not identified to be in need of treatment.

Prevention will address the six CSAP strategies as they pertain to the Monterey County Four Year AOD Prevention Plan and provide primary prevention services as outlined in federal regulations:

Six CSAP Strategies

Based on the identified population, prevention funds are applied to services that offer sustainable results using the six prevention strategies established by the Center for Substance Abuse Prevention (CSAP). They are:

- **Information Dissemination** provides awareness and knowledge of the nature and extent of substance use, abuse, and addiction and their effects on individuals, families, and communities. It is one-way communication from a source to an audience, with limited contact between the two (e.g., printed materials, websites).
- **Education** is two-way communication between an educator/facilitator and the participants (e.g., classroom curriculum). Activities under this strategy aim to affect critical life and social skills, including decision-making, refusal skills, critical analysis, and systematic judgment abilities.
- **Alternative Activities** provide opportunities to participate in activities that exclude substance use. The assumption is that constructive and healthy activities offset the attraction to alcohol and drugs and, therefore, minimize their use.
- **Problem Identification and Referral** involves identifying those who have indulged in illegal/age-inappropriate use of tobacco or alcohol and those individuals who have indulged in the first use of illicit drugs in order to assess if their behavior can be reversed through education.

This strategy does not include any activity designed to diagnose if a person is in need of treatment.

- **Community-Based Process** aims to enhance the ability of the community to more effectively provide prevention and treatment services for substance abuse disorders. Activities in this strategy include organizing, planning, enhancing efficiency and effectiveness of services implementation, interagency collaboration, coalition building, and networking.

- **Environmental strategies** establishes or changes written and unwritten community standards, codes, and attitudes, thereby influencing incidence and prevalence of substance abuse in the general population. This strategy is divided into two subcategories to permit distinction between activities that center on legal and regulatory initiatives and those that relate to the service and action-oriented initiatives.

Outcomes and Evaluation:

Sun Street Center will provide data, including progress and outcomes on prevention goals and objectives to the County as outlined in their work plan and as requested and/or required to meet CalOMS - Prevention data reporting requirements.
