EXHIBIT A – SCOPE OF SERVICES/PAYMENT PROVISIONS

**To Agreement by and between
County of Monterey, hereinafter referred to as “COUNTY”
and
Harris & Associates, Inc., hereinafter referred to as “CONTRACTOR”**

BACKGROUND:

During the storms of February 2017, Palo Colorado Road at Rocky Creek Crossing sustained damages requiring emergency repair. CONTRACTOR was selected to provide professional engineering services for Phase 1 of the Palo Colorado Road Emergency Repair at Rocky Creek Crossing (hereinafter, “Project”) under a separate Professional Services Agreement (PSA) (Agreement No. A-13275; Multi-Year Agreement (MYA) No. 3000*2685 under Request for Qualifications (RFQ) #1601 for on-call civil engineering for transportation projects. COUNTY has selected CONTRACTOR to provide professional engineering services for completion of Phase 2 of the Project as outlined in the following Scope of Services.

SCOPE OF SERVICES:

TASK 1 – PROJECT MANAGEMENT (PHASE 1 & PHASE 2)

TASK 1.1 – PROJECT MANAGEMENT

Project Management responsibilities shall involve preparation and maintenance of the Critical Path Method (CPM) schedule, resource management, and coordination meetings with the Project Development Team (PDT). The Project Manager shall coordinate the Project kick off meeting and the bimonthly trend meetings to report progress, identify issues, and develop the necessary action items list.

Phase 2 Cost: \$3,950.00

TASK 1.2 – PROJECT MEETINGS

This task includes attendance to Project status meetings with COUNTY staff and appropriate members of the PDT. This task assumes the meetings will occur twice a month and as needed.

Phase 2 Cost: \$14,258.00

TASK 1.3 – FUNDING REIMBURSEMENT DOCUMENTATION

This task includes tracking of the Project documents to assist COUNTY with State and Federal reimbursement. CONTRACTOR’S employee, Ken Leep, who is a former California Office of Emergency Services (Cal OES) employee, shall assist with this effort to compile the required forms and to provide consultation during Project meetings.

Phase 2 Cost: \$11,100.00

PHASE 2, TASK 1 TOTAL COST: \$29,308.00

TASK 2 – ENVIRONMENTAL DOCUMENTATION AND PERMITS (PHASE 1 AND PHASE 2)

CONTRACTOR shall supplement staff from ICF Jones & Stokes, Inc. (ICF) in preparing permit applications and supporting technical documentation.

COUNTY took the necessary emergency action to mitigate the damage to this section of Palo Colorado Road by installing rip-rap and a temporary bridge to maintain resident access. This action required emergency permits for which COUNTY pursued as a part of the emergency response. However, as part of

EXHIBIT A – SCOPE OF SERVICES/PAYMENT PROVISIONS

a long-term solution, COUNTY intends to repair and/or replace existing infrastructure in three (3) contiguous locations:

- **Rocky Creek Crossing:** Install either a pipe culvert, box culvert, or metal arch culvert system with an open bottom, excavate accumulated sediment, install rip-rap, and structural protection for the arch culvert. For the purposes of the environmental permitting scope described below, CONTRACTOR assumes one (1) of these three (3) alternatives shall be the proposed Project.
- **Brandon Creek Crossing:** Upsize the existing pipe culvert, remove debris, install rip-rap, and structural protection for the pipe culvert(s).
- **Palo Colorado Road:** Repair the road between Rocky Creek and Brandon Creek (approximately 950 feet). These improvements may include the installation of a retaining wall, repaving of this section of roadway, and drainage improvements.

CONTRACTOR anticipates the work described above will require environmental permits to authorize impacts on aquatic resources and other habitats under the jurisdiction of the United States (U.S.) Army Corps of Engineers (USACE), Central Coast Regional Water Quality Control Board (Central Coast RWQCB), and the California Department of Fish and Wildlife (CDFW). Additionally, COUNTY will need to comply with the requirements of Section 7 of the Federal Endangered Species Act (ESA) and Section 106 of the National Historic Preservation Act (NHPA). CONTRACTOR shall engage with the regulatory agencies early and often to ensure the proposed Project can be permitted in a timely manner. Furthermore, the Federal Emergency Management Agency (FEMA) will likely provide funding to cover repair of damages incurred during the early January storms. The tasks necessary to achieve these authorizations are described below.

TASK 2.1 – WETLAND DELINEATION AND PRELIMINARY JURISDICTIONAL DETERMINATION

Task 2.1 provided under Phase 1 of the Project and identified for payment under a separate on-call PSA (MYA 3000*2685) with CONTRACTOR.

TASK 2.2 – USACE NATIONWIDE PERMIT (SECTION 404)

Task 2.2 provided under Phase 1 of the Project and identified for payment under a separate on-call PSA (MYA 3000*2685) with CONTRACTOR.

TASK 2.3 – CENTRAL COAST RWQCB WATER QUALITY CERTIFICATION AND/OR WASTE DISCHARGE REQUIREMENTS (WDR) (SECTION 401)

Task 2.3 provided under Phase 1 of the Project and identified for payment under a separate on-call PSA (MYA 3000*2685) with CONTRACTOR.

TASK 2.4 – CDFW LAKE OR STREAMBED ALTERATION AGREEMENT (SECTION 1602)

Task 2.4 provided under Phase 1 of the Project and identified for payment under a separate on-call PSA (MYA 3000*2685) with CONTRACTOR.

TASK 2.5 – BIOLOGICAL RESOURCES ASSESSMENT (SECTION 7)

Task 2.5 provided under Phase 1 of the Project and identified for payment under a separate on-call PSA (MYA 3000*2685) with CONTRACTOR.

EXHIBIT A – SCOPE OF SERVICES/PAYMENT PROVISIONS

TASK 2.6 – CULTURAL RESOURCES STUDIES (SECTION 106)

Task 2.6 provided under Phase 1 of the Project and identified for payment under a separate on-call PSA (MYA 3000*2685) with CONTRACTOR.

TASK 2.7 – CONCEPTUAL MITIGATION PLAN

CONTRACTOR'S biologist and regulatory compliance specialists shall develop a conceptual mitigation plan that can achieve Project authorization from the Federal and State regulatory agencies. CONTRACTOR'S biologists shall work together when in the field to explore opportunities and potential mitigation approaches (during the Task 1 site visit), and shall consult with regulatory agency and COUNTY staff during an interagency site visit (described under Task 2.8) to obtain their input prior to submitting the permit application with the conceptual mitigation plan.

The conceptual mitigation plan shall be in memorandum format, with necessary graphics to display the concept, and be included as an attachment to the permit applications. The conceptual mitigation plan shall identify the location(s) and approach for mitigating any temporary and permanent impacts on jurisdictional wetlands and waters, including riparian habitat, ideally in close proximity to the Project site and in the same watershed. This mitigation may include a combination of minor wetland/stream enhancement, revegetation and/or restoration. The mitigation approach shall also benefit the California red-legged frog and South/Central California coast steelhead to facilitate the Section 7 consultations and concurrence with a not likely to adversely affect determination.

In addition, due to the surrounding trees and proximity to the repairs, the CONTRACTOR will contract with a certified arborist to provide recommendations with respect to the tree root system and the Project improvements.

Assumptions

- *There shall be one (1) round of COUNTY comment and review on the conceptual mitigation plan.*
- *The Project will not permanently affect suitable breeding habitat for Federally listed fish or amphibians.*

Phase 2 Cost: \$7,816.00

TASK 2.8 – PERMITTING PROCESS MANAGEMENT AND MEETINGS

This task includes internal coordination among the CONTRACTOR'S team to support the environmental permitting efforts for the Project necessary to achieve Project authorization, as well as general coordination with agency and COUNTY staff. This task includes time for providing technical guidance to the Project team regarding permitting requirements, responding to as-needed requests for information from the regulatory agencies, providing follow-up coordination with the agencies to facilitate processing of the applications/permits; and participating in Project team meetings, conference calls, and site visits (including an interagency meeting), as requested by COUNTY or agencies.

- *There shall be no more than one (1) round of requests for additional information from each resource agency.*

EXHIBIT A – SCOPE OF SERVICES/PAYMENT PROVISIONS

- *Up to ten (10) conference calls will be held, five (5) internal to the CONTRACTOR team and five (5) with COUNTY staff, during development of permit applications and agency review.*

Phase 2 Cost: \$4,181.00

TASK 2.9 – COASTAL DEVELOPMENT PERMIT (CDP) SUPPORT

The governing parameter for the Rocky Creek portion shall be the alignment of Rocky Creek itself. The creek currently crosses private driveways and Palo Colorado Road. The following identifies the subtasks associated with the preliminary design.

EXHIBIT A – SCOPE OF SERVICES/PAYMENT PROVISIONS

TASK 5.1 – HYDROLOGIC ANALYSIS (PHASE 1)

Task 5.1 completed under Phase 1 of the Project and identified for payment through a separate on-call Agreement with Harris & Associates, Inc. (RFQ #1601).

TASK 5.2 – HYDROLOGIC AND SCOUR EVALUATIONS (PHASE 1)

TASK 5.5 - EVALUATION MATRIX (PHASE 1 & PHASE 2)

CONTRACTOR shall develop a Project evaluation matrix for each alignment and alternative. The Project evaluation matrix is vital for the successful permitting approval and costs justification to Cal OES and FEMA. The evaluations matrix justifies that every component associated with the Project alternative was reviewed from environmental aspects to community impacts. CONTRACTOR, along with COUNTY and other stakeholders, will determine the criteria, the weighted value, evaluate, and score each Project alternative. The evaluation matrix shall be presented to the regulatory permitting agencies to inform the agencies of the CONTRACTOR'S due diligence in vetting each alternative to determine impacts for each aspect of the alternatives. The matrix could include factors such as effectiveness, cost, environmental, and community. The matrix is developed by weighted averages and rankings. The scoring for each section under the categories ranges from zero (0) (least favorable) to ten (10) (most favorable).

Effectiveness evaluates the potential for the alternative to provide favorable results and meet Project objectives. The favorable results would be to provide scour protection, withstand a large storm event, and low risks associated with the failure of the alternative and its associated losses.

Cost evaluates the overall costs associated with the alternative. These costs are the materials, labor, machinery, schedules, and mitigation. The categories for cost were short-term maintenance, long-term maintenance, construction, earthwork, dewatering, schedule, and mitigation. Short-term maintenance would be the maintenance costs required to maintain the Project area immediately following a damaging storm event. The long-term maintenance is associated with the degradation of the alternative, requiring substantial costs to maintain and/or to rebuild the alternative. Construction cost is associated with the cost for the materials and labor required to construct the alternative. Earthwork costs are related to the volume of excavation and fill required. Dewatering costs focus on the complexity of the dewatering of the Project area. Dewatering costs increase with the depth and length of excavation required. The costs associated with the scheduling are based on possible construction delays and miscellaneous Project overruns. The mitigation costs are based on the site restoration required by the regulatory agencies and are determined from the permanent impact area related to the construction of the alternative. The mitigation cost includes the costs associated with temporary impact areas.

EXHIBIT A – SCOPE OF SERVICES/PAYMENT PROVISIONS

Environmental is the third category in the matrix. Environmental analyzes the overall environmental impacts associated with the pre- and post-construction of the alternative. The environmental category is broken into the following: permit approval complexity, temporary impact area, long-term impact area, and mitigation area. The permit approval complexity section determines the effort and justification required to permit the alternative to be constructed through the regulatory agencies. The long-term impact area is associated with the potential destruction of habitat and the increase in the downstream delivery of eroded sediment. The mitigation area is the total amount of the permanent impact area caused by the construction of the alternative.

The Community category identifies the effect the Project has on the local community with respect to acceptance and aesthetics. The acceptance section identifies the benefit the community can anticipate from the construction of the alternative. The aesthetics section reflects whether the alternative will blend in with the surrounding environment. The aesthetics scoring includes the evaluation of both the short and long term development of the alternative.

Phase 2 Cost: \$3,646.00

TASK 5.6 – BASIS OF DESIGN REPORT (BDR) (PHASE 2)

CONTRACTOR shall develop three (3) proposed alternative designs to help COUNTY in the selection of the appropriate type of improvements. The analysis shall be submitted to COUNTY in a BDR with recommendations for the preferred conveyance structure. The report shall include geotechnical findings; public property impacts; utility; environmental and construction impacts; and cost considerations. The environmental (including any mitigation issues) and Project costs impacts will be separated and identified by creek property ownership. Further, the BDR shall include base mapping, preliminary horizontal alignments, roadway and driveway concepts, estimated hydrology and hydraulics to the crossings, and construction staging concepts.

BDR sections are anticipated to include:

- Introduction (Signatures, Location, Purpose, Background, Work Completed to Date, Summary Recommendations)
- Maintenance requirements and discussion of proposed alternatives
- A list of key specification special provision section titles
- Design Criteria and Standards
- Calculations (including Hydrology and Hydraulics, Scour Evaluation, Shear Force Analysis, Preliminary Structural Requirements)
- Administrative Issues (Permits, Utilities, Residents, Schedule)
- Design Issues (Geotechnical, Pavement, Right-of-Way (ROW))
- Alternatives (Including summary analytical matrix of issues. Issues will include environmental impacts and mitigation measures). CONTRACTOR anticipates three (3) alternatives including a no-Project alternative.
- Agency Actions (Environmental Clearances, Hearings, Outreach)
- Life Cycle Cost Estimates to include capital, maintenance, and replacement expenses for the various alternatives at a pre-design level of detail

PHASE 2, TASK 5 TOTAL COST: \$28,156.00

TASK 6 – COMMUNITY OUTREACH (PHASE 2)

COUNTY may wish to conduct community outreach upon selection of the preferred alternative to educate the impacted property owners regarding the permitting and design process. CONTRACTOR Team shall support COUNTY with this effort by preparing presentation materials and attending the community meeting to speak to the process.

TASK 6.1 – PREPARATION OF MEETING MATERIALS

Phase 2 Cost: \$6,240.00

TASK 7 - FINAL PLANS, SPECIFICATIONS & ENGINEERING ESTIMATE (PS&E) (PHASE 2)

TASK 7.1 – INITIAL PS&E (80% SUBMITTAL)

Based upon approval of the preliminary conceptual designs by COUNTY, final designs for the preferred alternative shall be developed including preparation of construction plans and specifications.

The construction plans for the final PS&E will include the following:

- Title Sheet

The improvement plans will be prepared in accordance with the codes and standards of the Department of Transportation (Caltrans). The improvement plans shall include the scour countermeasures details at appropriate locations based on the preferred alternative (e.g., piers, deck rehabilitation, and abutment joint seal replacement).

EXHIBIT A – SCOPE OF SERVICES/PAYMENT PROVISIONS

All plans and structure calculations shall be in English (Imperial) units and follow Caltrans Bridge Design Specifications. Design references from Caltrans will also be used extensively for the design of these structures, such as Bridge Memo to Designer, Bridge Design Aids, Bridge Design Practices, and Bridge Design Details.

In conjunction with the roadway plans, CONTRACTOR shall develop a fifty foot (50') cross section of the roadway showing the existing and proposed surfaces. It is not anticipated that these cross sections shall be part of the bid set but will be working sections for COUNTY and CONTRACTOR'S use. These cross sections will provide earthwork quantity estimates.

CONTRACTOR shall develop detailed Project specifications, including front-end Agreement section, bid schedule, all technical specification requirements.

CONTRACTOR Team shall prepare quantity calculations and develop unit costs for items that are applicable to this Project and prepare the cost estimate. Quantities for all Agreement items used will be supported by calculations. Quantity calculations shall show all sketches, diagrams, and dimensions necessary to allow them to be independently used by field inspectors. Prices used will be based on the latest available data from COUNTY and Caltrans, reflecting the location of the Project and the quantity of each item. The schedule allows for an expedited COUNTY review time.

Phase 2 Cost: \$149,197.00

TASK 7.2 – IMPROVEMENT PLANS AND CONSTRUCTABILITY REVIEW

CONTRACTOR Team shall follow the Caltrans practice and a Registered Engineer will check the calculations and plans independently. The intent is to swap between the designers and checkers in order to maintain objectivity of the independent checking process. Differences in the calculations will be reconciled first before the Final Plans shall be submitted to COUNTY for review and approval.

CONTRACTOR Team shall also review the plans for constructability to avoid delays during construction and to address contractor staging and materials due to access constraints.

Phase 2 Cost: \$47,603.00

TASK 7.3 – IMPROVEMENT PLANS - FINAL PS&E (100% SUBMITTAL)

CONTRACTOR Team shall provide written responses to all the review comments. The review comments will be agreed to by COUNTY before CONTRACTOR issues the final plans with the corrections that have been deemed "needed" details.

CONTRACTOR Team shall prepare final approved plans based on the Checked Details plans, with the corrections that need to be incorporated in the PS&E prior to the Project Deliverable Notice from COUNTY. The plans shall be reviewed by the Specifications and Design Engineers and an updated bid item list will be produced. The Specifications shall then be compiled using the items list to collect and edit the applicable 2015 Caltrans Standard Special Provisions (SSP's) and insert them into the Caltrans' template to create the technical special provisions. The plans shall be submitted to COUNTY for final approval and signatures.

Phase 2 Cost: \$69,050.00

PHASE 2, TASK 7 TOTAL COST: \$265,850.00

EXHIBIT A – SCOPE OF SERVICES/PAYMENT PROVISIONS

TASK 8 – BID PERIOD SERVICES AND DESIGN SUPPORT DURING CONSTRUCTION (PHASE 2)

CONTRACTOR'S direct expenses include travel costs and estimated permit fees for Phase 2 of the Project.

Phase 2 Cost: \$8,637.00

PHASE 2, DIRECT EXPENSES TOTAL COST: \$8,637.00

COST ESTIMATE

Under this Agreement, the total not to exceed amount for completion of Phase 2 Project tasks as described above is \$418,428. The total not to exceed time and materials cost estimate for performing all tasks related to the Project is \$718,142 (Phase 1 tasks total \$299,714; Phase 2 tasks total \$418,428). Detailed costs by task are provided in the following Budget and Fee Estimate which includes the cost for the sub-contractors. The Fee Estimate includes a budget for direct expenses which include travel costs and the estimated permit fees. The permit fees are included as a direct expense in order to expedite the process.

The cost for permit and design services for a project that continues to evolve over time is an estimate. Therefore, CONTRACTOR'S cost may change pending permit reviews and actual design services performed for this emergency Project. Changes and modifications to tasks and amounts are not approved and cannot be provided until the change/modification is presented to COUNTY and with COUNTY approval, amended into this Agreement. Contractors who obtain DBE participation on this contract will assist Caltrans in meeting its federally mandated statewide overall DBE goal.
- B. The goal for DBE participation for this contract is 0%. Participation by DBE contractor or subcontractors shall be in accordance with information contained in the Contractor Proposal DBE Commitment (Exhibit 10-O1), or in the Contractor Contract DBE Information (Exhibit 10-O2) attached hereto and incorporated as part of the Contract. If a DBE subcontractor is unable to perform, CONTRACTOR must make a good faith effort to replace him/her with another DBE subcontractor, if the goal is not otherwise met.
- C. DBEs and other small businesses, as defined in 49 CFR, Part 26 are encouraged to participate in the performance of contracts financed in whole or in part with federal funds. CONTRACTOR or subcontractor shall not discriminate on the basis of race, color, national origin, or sex in the performance of this contract. CONTRACTOR shall carry out applicable requirements of 49 CFR, Part 26 in the award and administration of US DOT-assisted agreements. Failure by CONTRACTOR to carry out these requirements is a material breach of this contract, which may result in the termination of this contract or such other remedy as COUNTY deems appropriate.
- D. Any subcontract entered into as a result of this contract shall contain all of the provisions of this section.
- E. A DBE firm may be terminated only with prior written approval from COUNTY and only for the reasons specified in 49 CFR 26.53(f). Prior to requesting COUNTY consent for the termination, CONTRACTOR must meet the procedural requirements specified in 49 CFR 26.53(f).
- F. A DBE performs a Commercially Useful Function (CUF) when it is responsible for execution of the work of the contract and is carrying out its responsibilities by actually performing, managing, and supervising the work involved. To perform a CUF, the DBE must also be responsible with respect to materials and supplies used on the contract, for negotiating price, determining quality and quantity, ordering the material, and installing (where applicable) and paying for the material itself. To determine whether a DBE is performing a CUF, evaluate the amount of work subcontracted, industry practices, whether the amount the firm is to be paid under the contract is commensurate with the work it is actually performing, and other relevant factors.
- G. A DBE does not perform a CUF if its role is limited to that of an extra participant in a transaction, contract, or project through which funds are passed in order to obtain the appearance of DBE participation. In determining whether a DBE is such an extra participant, examine similar transactions, particularly those in which DBEs do not participate.

**EXHIBIT B – FEDERAL PROVISIONS
CALTRANS LOCAL ASSISTANCE PROCEDURES MANUAL**

- H. If a DBE does not perform or exercise responsibility for at least thirty percent (30%) of the total cost of its contract with its own work force, or the DBE subcontracts a greater portion of the work of the contract than would be expected on the basis of normal industry practice for the type of work involved, it will be presumed that it is not performing a CUF.
- I. CONTRACTOR shall maintain records of materials purchased or supplied from all subcontracts entered into with certified DBEs. The records shall show the name and business address of each DBE or vendor and the total dollar amount actually paid each DBE or vendor, regardless of tier. The records shall show the date of payment and the total dollar figure paid to all firms. DBE prime contractors shall also show the date of work performed by their own forces along with the corresponding dollar value of the work.
- J. Upon completion of the Contract, a summary of these records shall be prepared and submitted on the form entitled, "Final Report-Utilization of Disadvantaged Business Enterprise (DBE), First-Tier Subcontractors" CEM-2402F [Exhibit 17-F, of the LAPM], certified correct by CONTRACTOR or CONTRACTOR's authorized representative and shall be furnished to the Contract Administrator with the final invoice. Failure to provide the summary of DBE payments with the final invoice will result in twenty-five percent (25%) of the dollar value of the invoice being withheld from payment until the form is submitted. The amount will be returned to CONTRACTOR when a satisfactory "Final Report-Utilization of Disadvantaged Business Enterprises (DBE), First-Tier Subcontractors" is submitted to the Contract Administrator.
- K. If a DBE subcontractor is decertified during the life of the contract, the decertified subcontractor shall notify CONTRACTOR in writing with the date of decertification. If a subcontractor becomes a certified DBE during the life of the Contract, the subcontractor shall notify CONTRACTOR in writing with the date of certification. Any changes should be reported to COUNTY's Contract Administrator within 30 days.

ADDITIONAL INSURED – PRIMARY AND NON-CONTRIBUTORY

This endorsement modifies insurance provided under the following:

COMMERCIAL GENERAL LIABILITY COVERAGE PART

The following is added to **SECTION IV – COMMERCIAL GENERAL LIABILITY CONDITIONS, Paragraph 4. Other Insurance:**

Additional Insured – Primary and Non-Contributory

If you agree in a written contract, written agreement or permit that the insurance provided to any person or organization included as an Additional Insured under **SECTION II – WHO IS AN INSURED**, is primary and non-contributory, the following applies:

If other valid and collectible insurance is available to the Additional Insured for a loss we cover under Coverages A or B of this Coverage Part, our obligations are limited as follows:

(1) Primary Insurance

This insurance is primary to other insurance that is available to the Additional Insured which covers the

Additional Insured as a Named Insured. We will not seek contribution from any other insurance available to the Additional Insured except:

- (a) For the sole negligence of the Additional Insured;
- (b) When the Additional Insured is an Additional Insured under another primary liability policy; or
- (c) When (2) below applies.

If this insurance is primary, our obligations are not affected unless any of the other Insurance is also primary. Then, we will share with all that other insurance by the method described in (3) below.

(2) Excess Insurance

- (a) This insurance is excess over any of the other insurance, whether primary, excess, contingent or on any other basis:
 - (i) That is Fire, Extended Coverage, Builder's Risk, Installation Risk or similar coverage for "your work";
 - (ii) That is Fire insurance for premises rented to the Additional Insured or temporarily occupied by the Additional Insured with permission of the owner;
 - (iii) That is insurance purchased by the Additional Insured to cover the Additional Insured's liability as a tenant for "property

damage" to premises rented to the Additional Insured or temporarily occupied by the Additional with permission of the owner; or

- (iv) If the loss arises out of the maintenance or use of aircraft, "autos" or watercraft to the extent not subject to Exclusion g. of **SECTION I – COVERAGE A – BODILY INJURY AND PROPERTY DAMAGE LIABILITY.**

- (b) When this insurance is excess, we will have no duty under Coverages A or B to defend the insured against any "suit" if any other insurer has a duty to defend the insured against that "suit". If no other insurer defends, we will undertake to do so, but we will be entitled to the insured's rights against all those other insurers.
- (c) When this insurance is excess over other insurance, we will pay only our share of the amount of the loss, if any, that exceeds the sum of:
 - (i) The total amount that all such other insurance would pay for the loss in the absence of this insurance; and
 - (ii) The total of all deductible and self insured amounts under all that other insurance.

We will share the remaining loss, if any, with any other insurance that is not described in this Excess Insurance provision and was not bought specifically to apply in excess of the Limits of Insurance shown in the Declarations of this Coverage Part.

(3) Method Of Sharing

- (a) If all of the other insurance permits contribution by equal shares, we will follow this method also. Under this approach each insurer contributes equal amounts until it has paid its applicable limit of insurance or none of the loss remains, whichever comes first.
- (b) If any of the other insurance does not permit contribution by equal shares, we will contribute by limits. Under this method, each insurer's share is based on the ratio of its applicable limit of insurance to the total applicable limits of insurance of all insurers.

ALL OTHER TERMS, CONDITIONS, AND EXCLUSIONS REMAIN UNCHANGED.
