Based upon 2018 Federal Poverty Level Guidelines

% Fee = Percentage of the total cost of the fee that patient is required to pay.

Free = Patient is not required to pay - all fees are waived.

Fee calculated by taking office charge X % required to pay = \$ patient is responsible to pay

Example: Office Visit $$60.00 \times .80 = 48.00 is the amount the patient is responsible for paying. Patient may be billed if unable to pay at the time of visit.
