Re: Natividad Medical Center – 3RD Floor Renovation
Amendment -1 to Scope of Service

Dear Brian:

Per your request, I am submitting this additional service proposal for the following 3 areas of additional scope of work & services that Natividad Medical Center has requested as well as for reimbursable allowance for the project that was included in the original fee proposal, but left unauthorized.

ADD SCOPE #1 – Extended Programming/ Schematic Design Phases

Due to revised project goals and programmatic changes from the client, this additional scope covers additional time and costs associated with a longer programming/ schematic design phase for this project. Our revised schedule (provided on March 20th, 2012) showed a programming/ schematic design phase of approximately 9 weeks and the phase has gone beyond that by an additional 8 weeks.

We have experienced project objective changes throughout the programming/ schematic design phase based on comments received at the various design presentation meetings. Based on the meeting on June 28th, 2012, the users requested for a major programmatic change to revise the schematic design plan based on 2 pods on the north side of the building into 3 pods. Other changes include the number of exam rooms, size and locations of team work areas, conference rooms and required offices. Design effort was also extended in working out design solutions for program spaces to be located on the 2nd floor. It was later determined that the area on the second floor would not be available for this project so that design team was able to work out design solutions locating all the spaces on the 3rd floor. We understand that there is now no work to be done on the second floor (other than plumbing coordination above the ceiling at the 2nd floor) but the time spent thus far has exceeded what we had originally intended for design. Our office and consultant team members also had to cut short our site investigative services and re-schedule for multiple site visits due to client availability issues on the original day of site survey. Our fee and scope of services were based on the original RFP requirements we have evaluated our efforts and discovered that the design direction has substantially changed and time spent has been valuable to the client in understanding that a strong effort to work out the schematic design phase will only benefit the project in the long term.

ADD SCOPE #2 – HVAC Replacement & Extended Project Schedule

The original scope of the project only included interior tenant improvements, utilizing existing mechanical and electrical systems, under the assumption that these systems are up-to-date and have the capacity to support the new program.

LIST Engineering performed a visual survey a number of months ago, while you were present, of the existing rooftop mechanical equipment and noted that the rooftop unit is approximately 17 years old and almost at the end of its lifetime and more than 50% of the fins on the compressors are missing, which led to the deduction that while the unit was designed to serve the entire 3rd floor, it is currently only operating at 60% efficiency even with half of the 3rd floor being vacant. As such, the existing unit does not have the capacity to serve the entire floor, nor will it be energy-efficient. The exterior ductwork is failing due to prolonged exposure to the weather. The existing motor controls for the VAV system is also antiquated and will require upgrades to a new VFD system. In addition, per your request, LIST engineering performed an analysis of the new loads of the people and equipment in the new space configuration against existing HVAC capacity and determined that the existing mechanical system is under-sized by about 5 tons, and inadequate to serve the newly configured space.

Per your direction, we will be adding the following scope to our work:

- 1) Replace the existing 60 ton unit with a larger 65 ton unit. (Per LIST Engineering's preliminary consultation with a Carrier representative, the cost of replacing the unit with a new one, will be close to the cost of upgrading the individual components, and a new unit will have a longer lifetime, of 20 years.)
- 2) Replace exterior ductwork and new VFD system.

Additional work involved with the replacement of the mechanical rooftop unit will include:

- 1) Additional Site Survey
- 2) Generation of roof plans
- 3) Design, Selection, Coordination and detailing of new rooftop unit
- 4) Design and Coordination of Equipment/ System Controls
- 5) Additional CA work

In addition to the added HVAC replacement scope of work, the project schedule has also been prolonged through the Design Development Phase. Due to multiple rounds of requests for layout changes by the users and an extended Design Development Phase, we are presenting this fee proposal to cover time and costs associated with the efforts to make changes to a layout that has already been approved and signed-off at 50% Design Development. Based on that layout, we had submitted the 100% Design Development documents on October 11th, 2012 and set up a review meeting on Oct 16th, 2012 with our consultants and the stakeholders. However, that pre-scheduled meeting was poorly attended by the Stakeholders and we were unable to get sign-off on that day. We then set up multiple additional subsequent review meetings (ie: Oct 25th, 2012, followed by Nov 19th, 2012, then December 3rd, then Dec 10th, 2012), each in an effort to get stakeholder sign-off, but

changes to the layout were requested at each time. This has delayed the Design Development phase by more than 14 weeks by this point.

Additional work involved with the extended schedule:

- 1) Additional meetings
- 2) Additional Coordination with Consultants & Users

ADD SCOPE #3

Add a redundant boiler to the existing mechanical penthouse at Building 400 at the Natividad Medical Center. My mechanical engineer has noted that there is sufficient room in the existing mechanical penthouse for this addition. This additional scope will increase the construction cost of the project.

Additional work involved with this will include:

- 3) Additional Field survey investigation and analysis
- 4) Design, Selection, Coordination and detailing of new redundant boiler to tie into existing system
- 5) Design and Coordination of Equipment/ System Controls
- 6) Additional CA work

Assumptions:

- 1) This work will be included as part of our Construction Document package for the 3rd floor tenant improvement.
- 2) Work will be completed in 1 phase.
- 3) Existing pad and electrical infrastructure are sufficient to accommodate additional boiler.

With the above requested changes being noted, our office is presenting this fee proposal for the additional scope of work listed above, with the following breakdown by consultant team member for each area of added scope noted:

MONTEREY COUNTY BOARD OF SUPERVISORS

MEETING:	January 24, 2012	AGENDA NO.:
SUBJECT:	Authorize the Purchasing Manager for Natividad Medical Center (NMC) to execute an Agreement with Hibser Yamauchi Architects for 2 nd and 3 rd Floor Building 400 Tenant Improvement per RFQ #9600-18 at Natividad Medical Center – Medical Office Building in an amount not to exceed \$486,599 for the period January 10, 2012 to January 1, 2014.	
DEPARTMENT:	Natividad Medical Center	

RECOMMENDATION:

It is recommended the Board of Supervisors authorize the Purchasing Manager for Natividad Medical Center (NMC) to execute an Agreement with Hibser Yamauchi Architects for 2nd and 3rd Floor Building 400 Tenant Improvement per RFQ #9600-18 at Natividad Medical Center – Medical Office Building in an amount not to exceed \$486,599 for the period January 10, 2012 to January 1, 2014.

SUMMARY/DISCUSSION:

In Fiscal Year 2011 Natividad Medical Center approved capital to build out ambulatory clinic space in Building 400. Since the capital was not used in Fiscal Year 2011, the capital was rolled over to Fiscal Year 2012. Natividad Medical Center desires to develop a Family Practice and Residency clinic on the third floor of Building 400 in conjunction with the Monterey County Health Department. Natividad Medical Center and Monterey County Health Department (HD) have partnered to develop a clinic space in the existing Medical Office Building (MOB), built in 1995 by Swinnerton and Solesky. NMC solicited qualifications for architectural and engineering services, and ultimately selected Hibser Yamauchi (HY) Architects for this project. HY Architects will design 7,500 square feet of shelled space and redesign 10,500 square feet of developed space on the third floor MOB, which will allow the HD Laurel Family Practice Clinic to expand their services and provide a higher standard of quality healthcare delivered to the Monterey County residents.

NMC also seeks to develop clinic support space on the second Floor of the MOB. HY Architects will redesign 6,000 square feet of developed space for physician and resident physician work offices, provide work areas for support staff, and develop a staff conference room.

NMC and HD will develop approximately 24,000 square feet of service and office space with this project.

The Qualifications and Proposals for architectural and engineering services for the tenant improvements of this facility were received on July 22, 2011, from twelve architectural firms. After review of the qualifications, four respondents were shortlisted by the selection committee by qualifications and were invited to be interviewed by NMC Selection Committee on October 5, 2011. On October 10, 2011 Hibser Yamauchi Architects received the highest ranking from NMC Selection Committee and, in conformance with State laws regarding qualification-based selection, the scope and fee schedule was agreed upon in the amount of \$486,599. The design timeline is to commence in December of 2011 and is scheduled to be completed in June 2013. Proceeding with the design at this time will assist in developing the comprehensive cost of the project and produce the formal design and specifications to proceed to construction.

HY Architect's fee includes design concepts, specifications and administration to obtain a building permit from the Monterey County Planning Department. HY Architects will also include certification, contractor pre-qualifications, bid assistance, and contract and construction administration.

As this project is critical to NMC's business plan, review by the Natividad Medical Center Board of Trustees' and Finance Committee will occur in parallel with the Monterey County Approval Process in order to keep the outside agency review time line on track. NMC will then seek the approval of the Board of Supervisors for the project.

(Refer to Exhibit 1 for budget, scheduling and description)

OTHER AGENCY INVOLVEMENT:

County Counsel has reviewed and approved the Agreement as to legal form. Auditor-Controller has reviewed and approved the Agreement as to fiscal provisions. The Agreement has also been supported by the Capital Improvement Committee and the Budget Committee. The Agreement has also been approved by the NMC Finance Committee and NMC Board of Trustees

FINANCING:

The cost for this Agreement is \$486,599 and is approved in the Fiscal Year 2011/2012 Approved Capital Budget. The Capital Project Budget Number is B-2012-15. This action will not require any additional General Fund subsidy.

Exhibit 1
Natividad Medical Center's request to proceed with Architectural and Engineering services 2nd and 3rd Floor Building 400 Tenant Improvement per RFQ #9600-18

Background/ Current Situation

In 1999 Natividad Medical Center opened its newly constructed building. The new facility includes two Inpatient buildings, an Outpatient Building and Administrative building and a Medical Office Building. The Family Practice clinic on the first floor of building 200 has out grown their existing space. Currently the third floor of the Medical Office Building (MOB) is partially shelled (7,500 SqFt) and developed for Hartenell as a training center. Due to enrollment decline Hartenell decided to vacate the (10,500 SqFt) space. Natividad Medical Center has offered to develop the total 18,000 SqFt of the third floor for the new Health Department Residency and Family Practice clinic, and 6,000 SqFt on the second floor of residency staff and doctor offices.

During Fiscal Year 2011, Natividad Medical Center's Board of Trustees approved the hospital's capital budget for third floor Building 400 Tenant Improvements. The funding was to include architectural and engineering services, and renovations. This allowed NMC to move forward with the initial schematic design and solicitation of an architect.

The Qualifications and Proposals for architectural and engineering services for the tenant improvements of this facility were received on July 22, 2011, from twelve architectural firms. After review of the qualifications, four respondents were deemed to meet minimum qualifications and were invited to a facility to be interviewed by NMC Selection Committee in October 5, 2011. On October 10, 2011 Hibser Yamauchi Architects received the highest ranking from NMC Selection Committee and, in conformance with State laws regarding qualification-based selection, the scope and fee schedule was agreed upon in the amount of \$\$486,599. The design timeline is to commence in December of 2011 and is scheduled to be completed in June 30 2013.

After Hibser Yamauchi Architect's agreement has been approved by the Monterey County's approval process, Hibser Yamauchi Architect's will proceed with developing schematic, and development design with the collaboration between staff from Natividad Medical Center and Monterey County Health Department. The design will then be approved by the project team for Hibser Yamauchi to proceed with developing Construction Documents and submit to the Monterey County Planning Department to obtain a building permit.

At that time NMC will follow the Monterey County's approval process to get authorization to proceed with solicitation of a contractor. NMC will then follow the outlined steps in the public improvement process to properly select a contractor in conformance with State laws regarding construction contractor selection. When the lowest responsible bidder has been selected, NMC will return once more to the Monterey County's approval process to get authorization to develop a contract with the lowest responsible bidder.

Authorizing NMC to proceed with design at this time will assist in developing the comprehensive cost of the project and produce the formal design and specifications to proceed to construction.

Key Milestones:

- Board of Supervisors to approve to initiate contract for \$486,599 for A/E services (January 2012)
- Obtain a Building Permit by the Appropriate Agency's that have jurisdiction. (July 2012)
- County to approve NMC to go out to bid for construction (Aug 2012)
- Solicit to the public to acquire a contractor for construction (Aug 2012)
- County to approve contract with awarded bidder (Oct 2012)
- Coordinate with NMC Department and contractor on scheduling
- Start Construction (Nov 2012)
- Construction Completion (May 2013)

Project Schedule:

See Attached Gantt Chart

Budget:

Natividad Medical Center capital budget for Design and Construction is \$3.6M and is approved in the Fiscal Year 2012 Capital Budget. This action will not require any additional Monterey County General Fund subsidy.

Funding:

There will be no impact to the General Fund for this project.
