The expenses of collection services for the designated review period shall be prepared in a format set forth in the Operating Cost Statement, provided below.

The expenses of collection services shall be broken down into the following major Cost Categories: Labor, CNG/Diesel Fuel, Vehicle Replacement, Vehicle Maintenance, All Other, Bad Debt and Disposal.

The Data Sources below will be used to calculate the “RRI Percentage Change” for each Cost Category. The RRI Percentage Change will be based on the year over year 12-month average change ending in June. For example, if the rate adjustment is to be implemented January 1, 2022, the RRI Percentage Change will be based upon the year over year 12-month average change from June 2020 to June 2021. In the event any index is discontinued, a successor index shall be selected by the parties that is most closely equivalent to the discontinued index as recommended by the BLS. The Disposal cost categories are based on the change in the most recent disposal rates per ton available compared to the disposal rates included in the previous year’s RRI calculation.

For each RRI adjustment, each Cost Category will be assigned an Item Weight percentage based on its proportionate share of all expenses in the Operating Cost Statement for Carmel Marina Corporation (CMC) for 12 months ending June. For example, if the rate adjustment is implemented on January 1, 2022, the Item Weight percentage will be based upon the Operating Cost Statement for the 12-month period ending June 30, 2021.

The Weighted Percentage Change for each Cost Category will equal the Percentage Change from the RRI Index multiplied by its Item Weight.

The Total Price Increase will be the sum of each Cost Category’s Weighted Percentage Change.
