Each Party acknowledges that due to the unique nature of the other Party's Confidential Information, the disclosing Party will not have an adequate remedy in money or damages in the event of any unauthorized use or disclosure of its Confidential Information. If NMC receives a CPRA request for public records (as defined by the CPRA) regarding the services provided pursuant to this Agreement, other than this Agreement or amendments to the Agreement, NMC will notify DrFirst of the request and confer with DrFirst regarding an appropriate response to said request. If DrFirst reasonably concludes that any records are DrFirst's Confidential Information, not subject to the CPRA,

Other than in the course of treatment for the NMC's patient, NMC shall not provide the Medication History Information to any other person or entity for any reason whatsoever, or use the Medication History Information for any other purpose. NMC shall implement appropriate administrative, technical, and physical safeguards to prevent any use or disclosure of any data provided hereunder for any purpose not authorized by this Agreement. 6.6 Essential Basis of the Agreement. NMC acknowledges and understands that the disclaimers, exclusions and limitations of liability set forth in this Section 6 form an essential basis of the agreement between the Parties, that the Parties have relied upon such disclaimers, exclusions and limitations of liability in negotiating the terms and conditions in this Agreement, and that absent such disclaimers, exclusions and limitations of liability, the terms and conditions of this Agreement would be substantially different.

as applicable, and if such then-current release has been made available to NMC.

10.6 Annual Obligations. DrFirst shall at all times during the term of this Agreement maintain in force the insurance coverage required under this Agreement and shall send, upon request by NMC, annual certificates to County's Contract Administrator and County's Contracts/Purchasing Division. Failure by DrFirst to maintain such insurance is a default of this Agreement, which entitles NMC, at its sole discretion, to terminate this Agreement immediately.

2. **PATIENT DATA; HIPAA**

- a. **Limitations on Use of Medication History Information.** NMC agrees that it will only use Medication History Information provided by the RcopiaAC system for the purpose of providing direct health care services to a NMC patient. NMC acknowledges that the Medication History Information provided hereunder may not be complete or accurate, and neither DrFirst, SureScripts nor any pharmacy or other entity providing information under the Medication History Service provides any representations or warranties with respect to the accuracy or completeness of the Medication History Information, and NMC releases and holds harmless DrFirst, SureScripts and any person or entity providing Medication History Information from any liability, cause of action, or claim related to the completeness or lack thereof of the Medication History Information; provided that NMC is not required to release and hold harmless any party whose conduct is found to be willfully malicious or reckless or grossly negligent. NMC agrees to confirm the accuracy of the Medication History Information with the patient prior to providing any medical services based thereon and NMC agrees that NMC Providers shall use their professional judgment in the provision of care. NMC agrees to obtain patient consent prior to requesting any medication history for that patient. NMC acknowledges that the Medication History Service shall be used only for those patients from whom NMC has obtained the consent of the patient to access such patient’s medication history. Other than in the course of treatment for the NMC’s patient, NMC shall not provide the Medication History Information to any other person or entity for any reason whatsoever, or use the Medication History Information for any other purpose. NMC shall implement appropriate administrative, technical, and physical safeguards to prevent any use or disclosure of any data provided hereunder for any purpose not authorized by this Agreement. NMC shall not use any Medication History Information for any reason, whether in aggregated form or otherwise, except for the sole purpose of treating a NMC patient.
- b. **Protection of Confidential Patient Information Under Applicable Law.** The Parties acknowledge and agree to comply with the terms of Section 4 (Treatment of Confidential Information), Section 5 (Patient Data; HIPAA), and Exhibit D (Data Security) of the Agreement.

- c. **Medication History Usage and Overage.** NMC has unlimited usage for Intended Queries as defined in Section 1. NMC is required to adhere to configuration settings that only allow for Intended Queries. DrFirst shall estimate NMC's total number of Intended Queries based upon the emergency department admissions, and total facility admissions, through sources such as the American Hospital Directory (AHD), which shall form the basis for the pricing set forth in Exhibit C Section 1 A (i). DrFirst shall provide to NMC on a monthly basis, the number of actual medication history requests by NMC. In the event that NMC's monthly actual usage exceeds one-hundred and twenty per cent (120%) of DrFirst's estimate, DrFirst shall have the ability to assess NMC's configuration settings for usage, to ensure that NMC's configuration settings allow only for Intended Queries. If as a result of DrFirst's assessment DrFirst finds that NMC's configuration settings or internal usage allow for usage beyond Intended Queries, then NMC shall permit DrFirst to assist NMC in correcting the configuration settings to allow only for Intended Queries and shall not otherwise alter the settings after the completion of such assessment. If NMC does not allow DrFirst to assist in correcting configuration settings, and/or change the configuration settings per DrFirst's assessment, then NMC agrees to pay DrFirst for all transactions over the one-hundred and twenty per cent (120%) estimated queries at a rate set forth in Exhibit C Section 1 A (i).
3. **Description of RcopiaAC Modules:** RcopiaAC includes three major components which integrate with the Meditech Hospital Information System through software interfaces created by Meditech and DrFirst:
- a. **RcopiaAC: MedHx:** a software service which queries multiple data sources in real time for patient medication history. MedHx retrieves ambulatory medications by querying the following data sources, including:
 1. Payers offering patient histories through Surescripts
 2. Payer patient histories hosted by DrFirst
 3. Retail pharmacy patient medication orders
 4. DrFirst Rcopia patient medication histories (see "Hospital-Affiliated Providers" below)
 5. Other sources as they become available
 - b. **RcopiaAC: DischargeRx:** Seamlessly accepts electronic prescriptions created by the Meditech system and electronically transmits the orders through the electronic prescription delivery network to either the hospital pharmacy or to retail and mail order pharmacies at the time of discharge from the hospital. It also provides a service which can be used to automatically check for formulary compliance, plan design, and clinical issues (such as interactions, dosage ranges, etc.) within the Meditech system.
4. **RcopiaAC Middleware** is a locally-installed DrFirst application that enhances performance of the Integrated Offering and is used to store program API's, formulary files and other infrequently used programs. Rcopia Middleware requires a minimally-configured Windows XP or 2003 Server with 4GB RAM and 250GB hard disk to be installed in the NMC's data-center.
5. **Implementation Requirements for RcopiaAC:**
- a. **DrFirst Responsibilities**
 - i. **Readiness Assessment and Report** –DrFirst's hospital services consultants ("Hospital Consultants") will offer NMC an MEDITECH experienced-based readiness assessment (the "Assessment"). The Assessment is designed to evaluate the condition of your hospital and the potential for Electronic Medication Management. The Assessment will help your organization achieve and speed up the goal of implementing electronic medication management. The Assessment is designed to evaluate the condition of NMC's current RXM build and the potential for Electronic Medication Management. The Assessment will guide your organization towards the goal of implementing electronic medication management. The outcomes provided in the Assessment will result in a better understanding of how to implement and improve your electronic medication management program.
 - ii. **Implementation tools** – DrFirst will provide an online registration system and documentation to NMC which is to be used by NMC to register NMC Authorized End Users on the RcopiaAC system.
 - iii. **Registration** – DrFirst will register NMC physicians entered into the DrFirst registration system on the pharmacy and mail order prescription networks.

 - b. NMC agrees to maintain the physician and staff registration data in the RcopiaAC system including adding new providers and staff and deactivating providers and staff who are no longer using the RcopiaAC system.
- ii. Point of Contact - NMC agrees to assign a single point of contact to work with the Meditech Implementation Coordinator and DrFirst in the implementation, deployment and support of NMC Authorized End Users. NMC may change its point of contact in writing at any time.

Afterwards, NMC agrees to train all providers and staff who wish to use the DrFirst systems. DrFirst and NMC understand that the Meditech Implementation team will provide training for the RcopiaAC modules.
- iv. Support - Unless otherwise provided in this Section, NMC agrees to call Meditech for first-tier support of NMC physicians and staff. First-tier support is defined as providing assistance to NMC physicians and staff and the routine end-user support of NMC physicians and staff. Examples of routine end-user support include (but are not limited to) such issues such as password support, answering training questions related to the use of the system, assisting with registration issues, etc. Should additional support be required, NMC recognizes that Meditech technicians will seek the assistance of DrFirst to resolve any issues of a more technical nature. In the event of any conflict or inconsistency between a provision of this BAA and a provision of any other agreement between Business Associate and Covered Entity, the provision of this BAA shall control unless the provision in such other agreement establishes additional rights for Business Associate or additional duties for or restrictions on Business Associate with respect to PHI, in which case the provision of such other agreement will control.

5.10 Legal Actions. Promptly, but no later than five (5) business days after notice thereof, Business Associate shall advise Covered Entity of any actual action, proceeding, regulatory or governmental orders or actions, that becomes known to it that may affect the interests of Covered Entity under this BAA or jeopardize this BAA, and of any facts and circumstances that may be pertinent to the prosecution or defense of any such actual legal action or proceeding, except to the extent prohibited by law.

5.11 Audit or Investigations. Promptly, but no later than fifteen (15) calendar days after notice thereof, Business Associate shall advise Covered Entity of any audit, compliant review, or complaint investigation by the Secretary or other state or federal agency related to Business Associate's compliance with HIPAA, the HITECH Act, or the California Confidentiality Laws.

DrFirst

Exhibit E Data Security

- DrFirst's Internal Network. DrFirst shall take all appropriate security precautions to prevent malicious or unauthorized access to NMC's systems and maintain the accuracy and integrity of NMC Data, including, but not limited to (i) appropriate protection barriers, firewalls, and logically secure areas and (ii) appropriate levels of internal controls for granting access to source code, data, graphics, audio/visual materials and the like used in performing the services, including the use of two factor identification systems to allow limited and controlled access to DrFirst's internal network for access to the NMC Data to ensure that NMC Data, including without limitation source code, data, graphics and other materials are protected from malicious or unauthorized access. For purposes of this Agreement, "NMC Data" means all data related to the business of NMC or Personal Information (as defined below) of or relating to its employees, customers, suppliers, or contractors (collectively, "NMC Data").
- Ownership. DrFirst acknowledges that NMC is the sole owner of all of NMC Data.
- Data Security. DrFirst will establish and maintain environmental, safety and facility procedures, data security procedures and other safeguards against the destruction, corruption, loss or alteration of NMC Data and to prevent access, intrusion, alteration or other interference by any unauthorized third parties of the same, that are: (i) no less rigorous than those maintained by DrFirst for its own information or the information of its customers of a similar nature; and (ii) no less rigorous than the accepted practices in the industry. Without limiting the generality of the foregoing, DrFirst will: (a) house all equipment in environmental conditions at least equivalent to those recommended by the manufacturers; (b) house all equipment in physically secure premises protected at least by fire and flood protection and access controlled doors; and (c) utilize state-of-the-art virus and intrusion checking software and firewalls.
- SSAE 16 Audit. On an annual basis, DrFirst will provide a SSAE 16 Type II audit report, which shall include information on the physical, logical security, change management and backup/recovery of systems.
- Breach of Data Security. DrFirst agrees to notify NMC within forty-eight (48) hours of DrFirst's discovery of any breach of DrFirst's data security procedures that results in any actual or threatened loss, corruption, unauthorized disclosure, transmission, or alteration of the NMC Data. In such an instance, in addition to DrFirst's other obligations under this Agreement, or under any law or regulation, DrFirst agrees to remedy promptly any such breach and to fully cooperate with NMC in resolving such breach and mitigating any damage from such breach. Notification to NMC's personnel and customers will be at DrFirst's cost. Additionally, DrFirst agrees to indemnify NMC for any costs and expenses incurred by NMC arising out of such security breach, privacy breach or breach of privacy regulations, including the reasonable costs associated with two years of free credit monitoring for any NMC customers whose data was affected by the breach.
- Encryption. DrFirst shall provide encrypted communications for any communications that contain protected health information as requested by NMC between DrFirst and NMC as otherwise agreed upon by the Parties.
- Security and Business Continuity Plan. DrFirst will develop a draft security, business continuity and disaster recovery plan. The plan is incorporated with this reference. Such plan at a minimum will reflect appropriate and effective administrative, technical and physical safeguards, in compliance with all applicable laws, to preserve the integrity, confidentiality, and availability of and to prevent unauthorized or prohibited use of NMC Data. DrFirst will keep such plans current.
- Data Privacy. In the event the NMC Data consists of Personal Information, in whole or in part, DrFirst will comply with the following provisions:
 - Definition. "Personal Information" shall mean all information received by DrFirst in any tangible or intangible form that relates to or personally identifies any NMC employee, customer, agent, end user, or representative. Examples of Personal Information may include, but are not limited to individual names, addresses, phone numbers, email addresses, purchase history, employment information,

financial information, medical information, credit card numbers, social security numbers, and product service history.

- DrFirst represents and warrants that it has developed and continues to maintain a comprehensive written information security program (“WISP”) that is consistent with industry standards, that reflects the size and type of DrFirst’s business as well as the volume and nature of data, and that contains administrative, technical, and physical safeguards to ensure the security and confidentiality of NMC Data.
- DrFirst’s WISP shall include, but shall not be limited to:
 - (a) Designating one or more employees to maintain the WISP;
 - (b) Identifying and assessing reasonably foreseeable internal and external risks to the security, confidentiality, and/or integrity of any electronic, paper or other records containing NMC Data, and evaluating and improving, where necessary, the effectiveness of the current safeguards for limiting such risks, including but not limited to: (i) ongoing employee (including temporary and contract employee) training; (ii) employee compliance with policies and procedures; and (iii) means for detecting and preventing security system failures.
 - (c) Developing security policies for employees that take into account whether and how employees should be allowed to keep, access and transport records containing NMC Data outside of business premises.
 - (d) Imposing disciplinary measures for violations of the WISP.
 - (e) Preventing terminated employees from accessing records containing NMC Data by immediately terminating their physical and electronic access to such records, including deactivating their passwords and user names.
 - (f) Taking reasonable steps to verify that sub-contractors or service providers (collectively “sub-contractor(s)”) with access to NMC Data have the capacity to protect such NMC Data, including (i) selecting and retaining sub-contractors that are capable of maintaining safeguards for NMC Data; and (ii) contractually requiring sub-contractors to maintain such safeguards. Prior to permitting sub-contractors to NMC Data, the person permitting such access shall obtain from the sub-contractor a written certification that such sub-contractor has a written, comprehensive information security program that is no less rigorous than the requirements of this Appendix.
 - (g) Limiting the amount of NMC Data collected to that reasonably necessary to accomplish the legitimate purpose for which it is collected; limiting the time such information is retained to that reasonably necessary to accomplish such purpose; and limiting access to those persons who are reasonably required to know such information in order to accomplish such purpose or to comply with state or federal record retention requirements.
 - (h) Identifying paper, electronic and other records, computing systems, and storage media, including laptops and portable devices used to store NMC Data, to determine which records contain NMC Data, except where the WISP provides for the handling of all records as if they all contained NMC Data.
 - (i) Reasonable restrictions upon physical access to records containing NMC Data, including a written procedure that sets forth the manner in which physical access to such records is restricted; and storage of such records and data in locked facilities, storage areas or containers.
 - (j) Regular monitoring to ensure that the WISP is operating in a manner reasonably calculated to prevent unauthorized access to or unauthorized use of NMC Data; and upgrading information safeguards as necessary to limit risks.

(k) Reviewing the scope of the security measures at least annually or whenever there is a material change in business practices that may reasonably implicate the security or integrity of records containing NMC Data.

(l) Documenting responsive actions taken in connection with any incident involving a breach of security, and mandatory post-incident review of events and actions taken, if any, to make changes in business practices relating to protection of NMC Data.

- DrFirst's WISP shall include the establishment and maintenance of a security system covering its computers, including any wireless system, that, at a minimum, shall have the following elements:

(a) Secure user authentication protocols including:

(i) control of user IDs and other identifiers;

(ii) a reasonably secure method of assigning and selecting passwords, or use of unique identifier technologies, such as biometrics or token devices;

(iii) control of data security passwords to ensure that such passwords are kept in a location and/or format that does not compromise the security of the data they protect;

(iv) restricting access to active users and active user accounts only; and

(v) blocking access to user identification after multiple unsuccessful attempts to gain access or the limitation placed on access for the particular system;

(b) Secure access control measures that:

(i) restrict access to records and files containing NMC Data to those who need such information to perform their job duties; and

(ii) assign unique identifications plus passwords, which are not vendor supplied default passwords, to each person with computer access, that are reasonably designed to maintain the integrity of the security of the access controls;

(c) To the extent technically feasible, encryption of all transmitted records and files containing NMC Data that will travel across public networks, and encryption of all data to be transmitted wirelessly;

(d) Reasonable monitoring of systems, for unauthorized use of or access to NMC Data;

(e) Encryption of all NMC Data stored on laptops or other portable devices;

(f) For files containing NMC Data on a system that is connected to the Internet, there must be reasonably up-to-date firewall protection and operating system security patches, reasonably designed to maintain the integrity of the personal information;

(g) Reasonably up-to-date versions of system security agent software which must include malware protection and reasonably up-to-date patches and virus definitions, or a version of such software that can still be supported with up-to-date patches and virus definitions, and is set to receive the most current security updates on a regular basis; and

(h) Education and training of employees on the proper use of the computer security system and the importance of information security.

- System Access. In the event the Services require DrFirst to access NMC's systems or network, NMC shall provide DrFirst access to NMC's systems and network as required under the following terms and conditions.
 - Access from External Networks. DrFirst agrees that no access from external networks, including the internet, will be permitted unless strong authentication and encryption is used for such access. DrFirst shall maintain an access control list for all access to the internal network from an external network and DrFirst agrees that any of its servers exposed to the internet that contain NMC Confidential Information or Personal Information run on a hardened operation system. In addition, any internet facing server must have a demilitarized zone ("DMZ") that sits between it and DrFirst's network. The DMZ must be separated by firewalls at each border.
 - Use of On-Site Hardware and Software. NMC may provide DrFirst personnel with access to computers, printers, data transmission lines, software, and similar items (collectively, "Hardware") so that DrFirst can better perform its obligations under the Agreement. DrFirst must use all Hardware provided to it solely as necessary for the provision of Services to NMC. DrFirst acknowledges that all such Hardware are owned by NMC. DrFirst shall not pledge as collateral or otherwise allow any liens or encumbrances upon NMC's Hardware. DrFirst further agrees to execute any license, sublicense or other agreement that may be needed to access software contained in the NMC's Hardware or other systems.
 - Viruses and Corrupted Data. DrFirst shall scan any material intended for electronic transmission to or on behalf of NMC in any format (i.e., e-mail, file transfer, diskette tape, etc.) for viruses and/or other malicious computer programs before transferring such material.
 - Policies. DrFirst shall review and make commercially reasonable efforts to comply with any further NMC Information Security policies as may be provided to DrFirst.
