SUMMARY DISCUSSION:

The County of Monterey Health Department's Public Health Laboratory (PH Lab) provides clinical and environmental testing to support the programs of the Health Department as well as hospitals, clinics, health care providers, private businesses, citizens, and local, state and federal authorities. The PH Lab also serves as the area's Regional Laboratory for Monterey and San Benito counties. The laboratory performs testing to prevent and control communicable disease, rule out bioterrorism agents and identify contaminants in food and water, rabies virus in animals and rare and novel diseases, new strains of influenza and SARS-CoV-2 using lab tests that are not available in the private sector. The PH Lab also serves as the local infectious disease reference laboratory for local hospital laboratories. An Agreement with County of Santa Clara is necessary to provide confirmatory testing services for a small number of procedures that are not performed in the County of Monterey's PH Lab. This Amendment extends the existing Agreement for an additional three years in order to sustain supportive services.

This work supports the County of Monterey Health Department 2025-2028 Strategic Plan Goals:

1) Build community power and partners' capacity to increase equity and improve health; and
