

**Before the Board of Supervisors in and for the  
County of Monterey, State of California  
(Draft)**

Resolution No.:

RESOLUTION OF THE MONTEREY COUNTY BOARD OF )  
SUPERVISORS REQUESTING THE UNITED STATES )  
CONGRESS PASS LEGISLATION CREATING A CARBON )  
FEE AND DIVIDEND PROGRAM..... )

**WHEREAS**, greenhouse gas (GHG) emissions from human activities, including the burning of fossil fuels, are causing rising global temperatures; and

**WHEREAS**, the average surface temperature on Earth has been increasing steadily, with the sixteen hottest years ever recorded all occurring since 1998, and the hottest of all years to date being 2016; and

**WHEREAS**, the global atmospheric concentration of carbon dioxide (CO<sub>2</sub>) exceeded 410 parts per million (ppm) in April 2017, the highest level in three million years; and

**WHEREAS**, the average global temperature by the year 2100 is predicted to be 2 degrees Fahrenheit to 11.5 degrees Fahrenheit higher than the current average global temperature, depending on the level of GHG emissions trapped in the atmosphere; and

**WHEREAS**, scientific evidence indicates that it is necessary to reduce the global atmospheric concentration of CO<sub>2</sub> from the current concentration of more than 400 ppm to 350 ppm or less in order to slow or stop the rise in global temperature; and

**WHEREAS**, global warming is already leading to large-scale problems including ocean acidification and rising sea levels; more frequent, extreme, and damaging weather events such as heat waves, storms, heavy rainfall and flooding, and droughts; more frequent and intense wildfires; disrupted ecosystems affecting biodiversity and food production; and an increase in heat-related deaths; and

**WHEREAS**, further global warming poses an unacceptable risk of catastrophic impacts to the ecosystems on which all life depends; and

**WHEREAS**, conservative estimates by the world's climate scientists state that to achieve climate stabilization and avoid cataclysmic climate change, by the year 2050 GHG emissions must be reduced to levels that are 80% below 1990 levels; and

**WHEREAS**, the Global Warming Solutions Act of 2006 (AB 32) commits the State of California to reduce GHG emissions to 1990 levels by 2020, and the State has further established goals to reduce GHG emissions by 40 percent below 1990 levels by 2030 (SB 32), and to 80 percent below 1990 levels by 2050 (Executive Order S-3-05).

**WHEREAS**, the Monterey County Board of Supervisors adopted the 2010 General Plan committing the County to reduce GHG emissions for the County's unincorporated area to a target of 15% below 2005 levels by 2020, in accordance with California's Assembly Bill 32; and

**WHEREAS**, in 2013 the Monterey County Board of Supervisors adopted the Municipal Climate Action Plan committing the County to reduce GHG emissions for County government operations to a target of 15% below 2005 levels by 2020; and

**WHEREAS**, the environmental, health, and social costs of CO2 emissions are not currently included in the price paid for fossil fuels, and these negative externalities are borne by all global inhabitants, particularly those in disadvantaged communities; and

**WHEREAS**, a national carbon tax will benefit the economy, human health, the environment, and national security as a result of correcting market distortions, reducing toxic pollutants, reducing the outflow of dollars to oil-producing countries, and improving the energy security of the United States; and

**WHEREAS**, a phased-in carbon tax on GHG emissions 1) is an efficient, transparent, and enforceable mechanism to drive an effective and fair transition to a renewable energy economy, 2) will incentivize manufacturers, businesses, and consumers throughout the economy to produce and use less fossil fuel, and 3) will stimulate investment in alternative-energy; and

**WHEREAS**, equal monthly dividends (or "rebates") from the funds generated by the carbon tax paid to every American household can help ensure that families and individuals can afford the energy they need during the transition to a GHG-free economy, and these dividends also will stimulate the economy; and

**WHEREAS**, enacting a national carbon tax would make the United States a leader in mitigating climate change and in the clean energy technologies of the 21<sup>st</sup> century, and would incentivize other countries to enact a similar carbon tax, reducing global GHG emissions; and

**WHEREAS**, a national carbon tax, starting at a low rate and increasing steadily over future years, is a market-based solution that would minimally disrupt the economy while sending a clear and predictable price signal to businesses to develop and use non-carbon-based energy resources; and

**WHEREAS**, fossil fuels can be taxed once, as far upstream as possible in the economy as practical, or at the port of entry to the United States, for efficient administration; and

**WHEREAS**, border adjustments levied on carbon-based products imported from countries without comparable carbon pricing, and refunds to exporters, will help level the playing field and maintain the competitiveness of United States' businesses in global markets; and

**WHEREAS**, a national carbon tax can be implemented quickly and efficiently, and respond to the urgency of the climate crisis, because the federal government already has in place mechanisms, such as the Internal Revenue Service, needed to implement and enforce the tax, and already collects taxes from fossil fuel producers and importers; and

**WHEREAS**, the Citizens' Climate Education Corporation contracted with Regional Economic Modeling, Inc. (REMI) to undertake a nation-wide macroeconomic study on the impact of a revenue-neutral carbon tax; and

**WHEREAS**, REMI's research predicts that, after 10 years, a revenue-neutral carbon tax would lead to a decrease of CO2 emissions by 33 percent, an increase in national employment of 2.8 million jobs, and an average monthly dividend for a family of four of \$288; and

**WHEREAS**, if 100% of the carbon tax revenue is returned to households in equal shares, approximately two-thirds of Americans will break even or come out ahead, as their dividends will match or exceed direct and indirect price increases due to the tax, protecting lower and middle income households; and

**WHEREAS**, continued widespread use of fossil fuels and impacts due to climate change pose a present and growing risk to the residents of Monterey County, and a nation-wide, revenue-neutral carbon tax will significantly mitigate those risks and promote the health, safety, and prosperity of communities in Monterey County, across the United States, and around the world.

**NOW, THEREFORE, BE IT RESOLVED** that the Board of Supervisors of the County of Monterey does hereby urge Congress of the United State to enact, without delay, a revenue-neutral tax on carbon-based fossil fuels; and

**BE IT FURTHER RESOLVED** that the tax should be collected once, as far upstream in the economy as practical, or at the port of entry into the United States; and

**BE IT FURTHER RESOLVED** that the tax rate should start low and increase steadily and predictably with the goal of reducing carbon dioxide emissions in the United States to 80 percent below 1990 levels by 2050; and

**BE IT FURTHER RESOLVED** that all tax revenue should be returned to households to protect low and middle income Americans from the impact of rising prices due to the tax; and

**BE IT FURTHER RESOLVED** that the international competitiveness of the United States businesses should be protected by using border tariffs and tax refunds.

**PASSED AND ADOPTED** on this day \_\_\_\_\_ of \_\_\_\_\_, upon motion of Supervisor \_\_\_\_\_, seconded by Supervisor \_\_\_\_\_, by the following vote, to wit:

**AYES:**

**NOES:**

**ABSENT:**

I, Nicholas E. Chiulos, Clerk of the Board of Supervisors of the County of Monterey, State of California, hereby certify that the foregoing is a true copy of an original order of said Board of Supervisors duly made and entered in the minutes thereof of Minute Book\_\_\_\_ for the meeting on \_\_\_\_\_.
