

Natividad Family Medicine Residency

MAT project 2019-2020

- To teach ourselves (faculty and residents) how to prescribe buprenorphine (Suboxone)
- To bring a MAT service to our patients in the hospital and clinics

Buprenorphine is a safer opioid because:

- ✓ It does not cause a high
- ✓ Much less likely to cause overdose
- ✓ It is legal

Addiction is NOT a moral failing

It is a chronic disease which
requires medical treatment
