Private Web-based Training	\$150 per session (approximately 1 hour)

## Implementation Options & Training

**Option 1: Purchase permanent license.** Maintenance of 18% begins in the 2<sup>nd</sup> year, and includes customer support and all releases and upgrades. The software resides at top-tier 3<sup>rd</sup> party hosting site and is managed by **Evanced Solutions** staff. This provides the best of both worlds: you own the software, but Evanced provides all software installation, hosting, backup and upgrade services on our servers. All customization tools, feeds and widgets are available for website integration.

**Option 2: Subscription.** **Evanced Solutions** may host the software via an annual subscription. The software resides at top-tier 3<sup>rd</sup> party hosting site and is managed by **Evanced Solutions** staff. Your staff will access the software via the Internet. This option is a subscription, with no maintenance fees required. All hosting services, upgrades, training and support are included. All customization tools, feeds and widgets are available for website integration.

Once the order is received, your staff will work with the Evanced Implementation Team to complete worksheets, test the system built for your library, possible work to setup and test authentication, and determine the amount of time required for launch; anywhere 4 to 8 weeks, depending on the organization's scheduling and availability. We are pleased to provide free, unlimited training via scheduled Web classes, videos, and recorded sessions to all customers; additional private Web training sessions are also available.

**Pricing is valid for 30 days**
