FREY C

Justification For Fee Waiver

The notice requirements set forth in the Monterey County Code were not followed. Ms. Murray never received notice from the County or from the applicant, California American Water, although she is the owner of the real property subject of the application. The application was misleading as California American Water signed the application as the "Property Owner/Agent" when in fact it was neither. It then failed to comply with the notice requirements and notify Ms. Murray of the application.

As Ms. Murray had no knowledge of the application until after it was approved, she was entirely denied of any hearing or input on the application and should not have to pay a fee to appeal the decision.
