You may store the components at selected central locations designated by the Engineer within the limits of the highway.

For multilane highway lane closures, each vehicle used to place, maintain, and remove components of a traffic control system on a multilane highway must be equipped with a Type II flashing arrow sign that must be in operation whenever the vehicle is being used for placing, maintaining, or removing the components. Vehicles equipped with a Type II flashing arrow sign not involved in placing, maintaining or removing the components if operated within a stationary-type lane closure must only display the caution display mode. The sign must be controllable by the operator of the vehicle while the vehicle is in motion. If a flashing arrow sign is required for a lane closure, the flashing arrow sign must be operational before the lane closure is in place.

14-1.03 HAZARDOUS WASTE AND CONTAMINATION:

Hazardous Waste and Contamination shall conform to the provisions in Section 14-11, "Hazardous Waste and Contamination" of the Standard Specification. Attention is directed to Section 14-11.02A "Unanticipated Discovery of Asbestos and Hazardous Substance," and Section 14-11.02B "Hazardous Waste Management Practices" of the Standard Specification and this special provision.

If delay of work in the area, due to unanticipated discovery of asbestos or hazardous substances, delays the current controlling operation, the delay will be considered as right of way delay and the Contractor will be compensated for the delay in conformance with the provisions in Section 8-1.07, "Delays," of the Standard Specifications.

In conformance with Section 25914.1 of the Health and Safety Code, removal of asbestos or hazardous substances including exploratory work to identify and determine the extent of the asbestos or hazardous substance will be performed by separate contract.

The Department reserves the right to use other forces for exploratory work to identify and determine the extent of such material and for removing hazardous material from such area.

14-1.04 AIR QUALITY:

Comply with section 14-9, "Air Quality," of the Standard Specifications.

Dust control is included in the contract price paid for Job Site Management.

SECTION 15 – EXISTING FACILITIES

15-1.01 COLD PLANING ASPHALT CONCRETE PAVEMENT:

GENERAL

Schedule cold planing activities so that not more than one (1) working day elapses between the time the pavement is cold planed and the HMA is placed, or as directed by the engineer.

MATERIALS

Use the same quality of HMA for temporary tapers that is used for the HMA overlay or comply

with the specifications for minor HMA in section 39.

CONSTRUCTION

General

Do not use a heating device to soften the pavement.

The cold planing machine must be:

1. Equipped with a cutter head width that matches the planing width. If the cutter head width is wider than the cold plane area shown, submit to the Engineer a request for using a wider cutter head. Do not cold plane unless the Engineer approves your request.
2. Equipped with automatic controls for the longitudinal grade and transverse slope of the cutter head and:
 - 2.1. If a ski device is used, it must be at least 30 feet long, rigid, and a 1-piece unit. The entire length must be used in activating the sensor.
 - 2.2. If referencing from existing pavement, the cold planing machine must be controlled by a self-contained grade reference system. The system must be used at or near the centerline of the roadway. On the adjacent pass with the cold planing machine, a joint-matching shoe may be used.
3. Equipped to effectively control dust generated by the planing operation.
4. Operated so that no fumes or smoke is produced.

Replace broken, missing, or worn machine teeth.

Grade Control and Surface Smoothness

Furnish, install, and maintain grade and transverse slope references.

The depth, length, width, and shape of the cut must be as shown or as ordered. The final cut must result in a neat and uniform surface. Do not damage the remaining surface.

Where lanes are open to traffic, the drop-off of between adjacent lanes must not be more than 0.15 foot.

Temporary HMA Tapers

If a drop-off between the existing pavement and the planed area at transverse joints cannot be avoided before opening to traffic, construct a temporary HMA taper. The HMA temporary taper must be:

1. Placed to the level of the existing pavement and tapered on a slope of 30:1 (horizontal:vertical) or flatter to the level of the planed area.
2. Compacted by any method that will produce a smooth riding surface.

Completely remove temporary tapers before placing permanent surfacing.

Remove Planed Material

Remove cold planed material concurrent with planing activities so that removal does not lag more than 50 feet behind the planer.

PAYMENT

Payment for removal of pavement markers, thermoplastic traffic stripe, painted traffic stripe, and pavement marking within the area of cold planing is included in the payment for cold plane asphalt concrete pavement of the types shown in the Bid Item List.

Cold planing asphalt concrete pavement is paid for as Cold Plane Asphalt Concrete Pavement.

15-1.02 OBSTRUCTION:

Attention is directed to Section 15, "Existing Highway Facilities," and Section 5-1.36, "Property and Facility Preservation," of the Standard Specifications and these special provisions.

Facilities requiring special precautions include, but are not limited to: conductors of petroleum products, oxygen, chlorine, and toxic or flammable gases; natural gas in pipelines greater than 6 inches in diameter or pipelines operating at pressures greater than 60 psi (gage); underground electric supply system conductors or cables, with potential to ground of more than 300 volts, either directly buried or in duct or conduit which does not have concentric grounded conductors or other effectively grounded metal shields or sheaths.

As the first order of work, the contractor shall pothole all utility crossings shown on the plans

and obtains measurements to the top of the pipe from a fixed recoverable point marked on the ground adjacent to the pothole.

The Contractor shall notify the Engineer and the appropriate regional notification center for operators of subsurface installations at least two (2) working days, but not more than 14 calendar days, prior to performing any excavation or other work close to any underground pipeline, conduit, duct, wire or other structure. Regional notification centers include, but are not limited to, the following:

Notification Center	Telephone Number

Full compensation for conforming to the provisions in this section not otherwise provided for, shall be considered in prices paid for the various contract items of work involved and no additional compensation shall be allowed therefor.

SECTION 19 – EARTHWORK

19-1.01 SHOULDER BACKING:

Comply with section 19-9, “Shoulder Backing,” of the Standard Specifications.

Shoulder backing material must not consist of reclaimed asphalt concrete.

Shoulder backing is paid for as Imported Material (Shoulder Backing).

SECTION 39 – HOT MIX ASPHALT

39-1.01 HOT MIX ASPHALT (TYPE A):

Comply with Section 39, “Hot Mix Asphalt,” of the Standard Specifications and these special provisions.

Produce and place HMA Type A under the standard construction process.

Asphalt binder used in HMA Type A must be PG 64-10.

Aggregate used in HMA Type A must comply with the 3/4-inch HMA Types A and B gradation.

If you perform half-width paving, at the end of each day's work the distance between the ends of adjacent surfaced lanes must not be greater than can be completed in the following day of normal paving.

Before opening the lane to public traffic, pave shoulders and median borders adjacent to a lane being paved.

Do not leave a vertical joint more than 0.15 foot high between adjacent lanes open to public traffic.

If widening existing pavement, construct new pavement structure on both sides of the existing pavement to match the elevation of the existing pavement's edge at each location before placing HMA over the existing pavement.

SMOOTHNESS CORRECTION

If the top layer of HMA Type A pavement does not comply with smoothness specifications, grind the pavement to within specified tolerance and apply slurry seal.

Grind out areas must be uniform rectangles with edges:

1. Parallel to the nearest pavement edge line or lane line
2. Perpendicular to the pavement centerline

Slurry seal areas must be uniform rectangles that:

1. Extend 1 foot beyond the grinded area
2. Extend from fog line to fog line

The Department deducts payment for HMA that does not comply with smoothness specification. The Engineer calculates the deduction for HMA using the following formula:

$$HMA_D = UC_{HMA} \times HMA_{SC}$$

HMA_D = Payment deducted for HMA

UC_{HMA} = Contract unit price of HMA

HMA_{SC} = Quantity of HMA (in TONS) covered by slurry seal for smoothness correction

The Department does not pay for pavement smoothness correction.

39-1.02 PAVEMENT EDGE TREATMENT:

Comply with Section 39-2.01C(5) of the Standard Specification.

Pavement safety edge treatment is included in the contract price paid for Hot Mix Asphalt (Type A).

Loop wire must be Type 2. Use rubberized “Hot-Melt” loop filler when covering loop wire installations and filling of trenches.

TOTAL ADDITIVE ALTERNATIVE BID							

F – Final Pay Item
S – Specialty Item

- Bids are required for the entire work. The undersigned understands that the quantities given are approximate only, being given as a basis for the comparison of Bids, and the County of Monterey does not, expressly or by implication, agree that the actual amount of work shall correspond therewith, but reserves the right to increase or decrease the amount of any portion of the work, or to omit portions of the work, as may be deemed necessary without claim for damage or loss of anticipated profit and that payment shall be made only on the basis of the actual quantities of work performed.

The bidder shall set forth for each unit basis item of work a unit price and a total for the item, and for each lump sum item a total for the item, all in clearly legible figures in the respective spaces provided for that purpose. In the case of unit basis items, the amount set forth under the "Item Total" column shall be the product of the unit price bid and the estimated quantity for the item.

The basis of award to the lowest responsive, responsible bidder will be the lowest TOTAL BASE BID.

The bid submitted must not contain erasures, interlineations, or other corrections unless each such correction is suitably authenticated by affixing in the margin immediately opposite the correction the surname or surnames of the person or persons signing the bid, in the named person's own handwriting.

In case of discrepancy between the unit price and the item total price set forth for the item, the unit price shall prevail; provided, however, if the amount set forth as the unit price is ambiguous, unintelligible or uncertain for any cause, or is omitted, the amount set forth in the "Item Total" column for the item shall prevail in accordance with the following:

- (1) As to lump sum items, the amount set forth in the "Item Total" column shall be the unit price.
 - (2) As to unit basis items, the amount set forth in the "Item Total" column shall be divided by the estimated quantity for the item, and the price thus obtained shall be the unit price.
3. The undersigned has checked all of the above figures carefully and understands that the County of Monterey (also referred to herein as "Owner") will not be responsible for any errors and omissions on the part of the undersigned in making this bid.

Symbols such as commas and dollar signs will be ignored and have no mathematical significance in establishing any unit price or item total or lump sums. Written unit prices, item totals and lump sums will be interpreted according to the number of digits and, if applicable, decimal placement. Cents symbols also have no significance in establishing any unit price or item total since all figures are assumed to be expressed in dollars and/or decimal fractions of a dollar.

The foregoing provisions for the resolution of specific irregularities cannot be so comprehensive as to cover every omission, inconsistency, error or other irregularity which may occur in a bid. Any situation not specifically provided for will be determined in the discretion of the Owner, and that discretion will be exercised in the manner deemed by the Owner to best protect the public interest in the prompt and economical completion of the work. The decision of the Owner respecting the amount of a bid, or the existence or treatment of an irregularity in a bid, shall be final.

4. It is understood that the Owner reserves the right to reject any and all bids or waive any irregularities or informalities in the bidding.
