

Hughes Internet Access Solutions for Government

HUGHES®

The Broadband Services Your Agency Needs

Does your agency need broadband but there is no suitable terrestrial service available? Then HughesNet Gen4 Internet Access Solutions are for you! Available nationwide, Hughes delivers reliable, high-speed connectivity for instant access to the critical information you need—without DSL, cable, or expensive T1 lines.

Speeds up to 15 Mbps

At speeds up to 15 Mbps, HughesNet Gen4 Solutions satisfy the growing need of agencies of all sizes to support even the most bandwidth-intensive applications, and to connect all workers—no matter where they are located.

Most Advanced Network of Satellites

Setting a new standard of excellence in satellite internet, HughesNet Gen4 is built on the industry's most advanced network of high-capacity satellites and on-the-ground equipment, including the new EchoStar® XVII satellite with JUPITER™ high-throughput technology, and SPACEWAY® 3, the world's first satellite with onboard switching and routing.

Fully backed by a comprehensive 24/7 customer support system, Hughes ensures highly secure and reliable broadband connectivity around the clock—so your staff can make the most of their work day. And since it's broadband over satellite—not over dial-up—your employees can work online without tying up the phone or fax line.

Easy Installation

Hughes utilizes its proven, two-way satellite technology to connect your agency to the Internet. A certified installer will connect a high-performance Hughes satellite modem to a computer or LAN at the specified location and to an external, compact dish, typically installed on the building. It only takes a short time to install, and the full power of broadband Internet access will be available for email, file transmittals, Web browsing, and point-of-sale transactions.

One Location or Many

Built for government offices like yours, there are three HughesNet Gen4 service plans to choose from, depending upon your needs. Whether for one or many field office locations—Hughes has a solution that is right for you.

Satellite Broadband Internet Access for Government

- Get broadband anywhere—even where DSL and cable can't reach and T1 lines are too expensive
- Connect at speeds up to 15 Mbps
- Instantly upgrade your plan as requirements grow
- Competitive pricing and flexible billing plans
- Enterprise-grade equipment, installation, and 24/7 customer care
- Recognized by the Yankee Group as a top-tier managed network provider

Helping Government Serve its Citizens

The Hughes Government Solutions Group is dedicated to supplying the right solutions to address unique government requirements. Hughes has a track record of delivering high-performance network solutions to help government agencies perform more efficiently and cost-effectively.

From distance learning when and where it's needed, to telework connectivity for field offices and remote sites, to emergency preparedness and response, government agencies can count on Hughes to deliver the highest standard of communications solutions to support the many missions of government.
