Narrative Summary Form

Monterey County Health Department

Monterey County is located on the Central Coast of California just south of the San Francisco Bay Area, about 45 miles from San Jose. The county's 3,322 square miles are bounded by Santa Cruz County to the north, San Benito, Fresno, and Kings Counties to the east, San Luis Obispo County to the south, and the Pacific Ocean to the west. Monterey County's 12 incorporated cities comprise approximately 75% of the population and 15% of the total land area. Five cities are in the Salinas Valley and seven on the Monterey Bay Peninsula.

According to 2016 U.S. Census Data, Monterey County has an overall population of 435,232 people, and although it covers a large geographic area which includes some rural, sparsely populated areas, over 36% of its population is concentrated in the City of Salinas (157,218). The City of Salinas has a majority Latino population and one in five of its residents lives in poverty (US Census Bureau QuickFacts 2016). The economy in Monterey County is based upon tourism in the coastal regions and agriculture in the Salinas Valley.

In 2013, 10.8% of Monterey County adult residents were current smokers (CHIS Health Profile: Monterey County Adults, 2013-2014). Monterey County and the City of Salinas face serious problems with dental care services. There are three designated Dental Health Professional Shortage Areas (DHPSA) in Monterey County which include Salinas, Carmel Valley and South County (Increasing Access to Dental Services for Children and Adults on the Central Coast, 2016). In particular, vulnerable and underserved populations in Monterey County experience poor oral health. Numerous studies of the oral health of farmworker children and adults consistently show a level of oral health that is worse than what is found in the general population. A lack of dental insurance, long travel times to dental care, and linguistic barriers are key obstacles to care for this population (Increasing Access to Dental Services for Children and Adults on the Central Coast, 2016). According to Monterey County Child Health and Disability Prevention (CHDP) staff, there is less dental care compliance during the summers when parents are working in the agriculture fields/industry.

Recent screening results of reporting school districts showed the prevalence of oral disease at 15.5% among children in Monterey County (Increasing Access to Dental Services for Children and Adults on the Central Coast, 2016). Additionally, the Kindergarten Dental Check-Up Law (AB1433) data shows that in 2016 - 17.8% of students had untreated tooth decay (677 students with untreated decay identified among 3802 students assessed).

Access and utilization of dental services pose major challenges for Monterey County residents. Denti-Cal is the major source of public insurance for the area's low-income children and adults, covering 34.7% of Monterey County's population (Increasing Access to Dental Services for Children and Adults on the Central Coast, 2016). Data from the Department of Health Care Services on annual dental visits in Monterey County from October 2015-September 2016 shows

Narrative Summary Form

Monterey County Health Department

the child (ages 0-20) utilization rate on a Denti-Cal fee-for-service (FFS) plan was 54.2% and the adult (ages 21+) utilization rate on a Denti-Cal FFS plan was 18.7%.

There have been prior efforts to improve dental care access and oral health in Monterey County. In 1980, Clinica de Salud del Valle de Salinas (CSVs) was founded to ensure that basic healthcare was available to low-income families and those working in the agriculture industry. In 1988, recognizing that low-income families struggled to travel to Salinas for healthcare, CSVs became the first health agency to provide both medical and dental services in South Monterey County. In 2004, CSVs also created the first mobile medical and dental van for the county's homeless population.

From 1981 to 2008, Monterey County operated a Happy Teeth children's dental health program which educated school children and increased access to oral healthcare resources (Medi-Cal/Denti-Cal). Happy Teeth provided services to low-income preschoolers and elementary students throughout Monterey County. Services included fluoride education handouts, classroom demonstrations on proper brushing, and educating teachers and involving families in healthy dental hygiene.

Despite these successes, no Established Local Oral Health Program (LOHP) has been established in Monterey County. However, numerous efforts to improve the status of oral health continue. Salud Para la Gente now operates three school-based clinics in Monterey County at Alisal High School, North Monterey County High School, and Pajaro Middle School. In addition, in 2014, CSVs, provided 42,899 dental encounters at five clinic sites and one mobile clinic that serves primarily homeless communities (Office of Statewide Health Planning and Development 2014 Annual Utilization Data).

Monterey County's vision for the LOHP is to build capacity and professional expertise; conduct surveillance of social determinants of health, health status, health needs, and healthcare services available among underserved areas and priority populations; identify assets in the public, private, and non-profit arena to address oral health needs; develop a community health improvement plan and strategies to achieve local oral health objectives; develop an evaluation plan to monitor and assess the progress of the LOHP; implement evidence based programs to achieve California local oral health plan objectives; collaborate with partners to promote oral health by developing and implementing prevention, policies, and guidelines; integrate oral health in traditional healthcare settings; address chronic disease risk factors such as tobacco use and sugar consumption; and expand existing local health networks to achieve oral health improvements through policy, education, dental care and community engagement strategies.

These LOHP goals support the Monterey County Health Department's three guiding strategic initiatives to: Empower the community to improve health through programs, policies, and activities; Enhance community health and safety by emphasizing prevention; and Ensure access to culturally and linguistically appropriate, customer friendly services.

Scope of Work and Deliverables FY 2017-2022

GOAL: The California Department of Public Health, Oral Health Program (CDPH/OHP) shall grant funds to Local Health Jurisdictions (LHJ) from Proposition 56, the California Healthcare, Research and Prevention Tobacco Tax Act of 2016 (Prop 56) for the purpose and goal of educating about oral health, dental disease prevention, and linkage to treatment of dental disease including dental disease caused by the use of cigarettes and other tobacco products. LHJs are encouraged to implement the strategies recommended in the California Oral Health Plan and shall establish or expand upon existing Local Oral Health Programs (LOHP) to include the following program activities related to oral health in their communities: education, dental disease prevention, linkage to treatment, surveillance, and case management. These activities will improve the oral health of Californians.

Objectives 1-5 below represent public health best practices for planning and establishing new LOHPs. LHJs are required to complete these preliminary Objectives before implementing Objectives 6-11 outlined below. LHJs that have completed these planning activities may submit documentation in support of their accomplishments. Please review the LOHP Guidelines for information regarding the required documentation that must be submitted to CDPH OHP for approval.

Objective 1: Build capacity and engage community stakeholders to provide qualified professional expertise in dental public health for program direction, coordination, and collaboration.

Create a staffing pattern and engage community stakeholders to increase the capacity to achieve large-scale improvements in strategies that support evidence-based interventions, health system interventions, community-clinical linkages, and disease surveillance and evaluation. At a minimum an Oral Health Program Coordinator position should be developed to coordinate the LOHP efforts. Recruit and engage key stakeholders to form an Advisory Committee or task force. Convene and schedule meetings, identify goals and objectives, and establish communication methods. This group can leverage individual members' expertise and connections to achieve measurable improvements in oral health.

Objective 2: Assess and monitor social and other determinants of health, health status, health needs, and health care services available to California communities, with a special focus on underserved areas and vulnerable population groups.

Identify partners and form a workgroup to conduct an environmental scan to gather data, create an inventory of resources, and plan a needs assessment. Conduct a needs assessment to determine the need for primary data, identify resources and methods, and develop a work plan to collect missing data. Collect, organize, and analyze data. Prioritize needs assessment issues and findings, and use for program planning, advocacy, and education. Prepare a report and publish.

Scope of Work and Deliverables FY 2017-2022

Objective 3: Identify assets and resources that will help to address the oral health needs of the community with an emphasis on underserved areas and vulnerable population groups within the jurisdiction.

Take an inventory of the jurisdiction's communities to identify associations, organizations, institutions and non-traditional partners to provide a comprehensive picture of the LHJ. Conduct key informant interviews, focus groups, and/or surveys, create a map, and publish the assets identified on your website or newsletter.

Objective 4: Develop a Community Health Improvement Plan (CHIP) and an action plan to address oral health needs of underserved areas and vulnerable population groups for the implementation phase to achieve local and state oral health objectives.

Identify a key staff person or consultant to guide the community oral health improvement plan process, including a timeline, objectives, and strategies to achieve the California Oral Health Plan. Recruit stakeholders, community gatekeepers, and non-traditional partners identified in the asset mapping process and members of the AC to participate in a workgroup to develop the CHIP and the Action Plan. The Action Plan will a timeline to address and implement priority objectives and strategies identified in the CHIP. The workgroup will identify the "who, what, where, when, how long, resources, and communication" aspects of the Action Plan.

Objective 5: Develop an Evaluation Plan that will be used to monitor and assess the progress and success of the Local Oral Health Program.

Participate with the CDPH OHP to engage stakeholders in the Evaluation Plan process, including those involved, those affected, and the primary intended users. Describe the program using a Logic Model, and document the purpose, intended users, evaluation questions and methodology, and timeline for the evaluation. Gather and analyze credible evidence to document the indicators, sources, quality, quantity, and logistics. Justify the conclusions by documenting the standards, analyses, interpretation, and recommendations. Ensure that the Evaluation Plan is used and shared.

Objective 6: Implement evidence-based programs to achieve California Oral Health Plan objectives.

To accomplish this Objective, LHJs can choose evidence-based or best practice strategies such as, but not limited to increase the number of low-income schools with a school-based or school-linked dental program; increase the number of children in grades K-6 receiving fluoride supplements, such as fluoride rinse, fluoride varnish, or fluoride tablets; increase the number of children in grades K-6 receiving dental sealants and increase or maintain the percent of the population receiving community fluoridated water.

Scope of Work and Deliverables FY 2017-2022

Objective 7: Work with partners to promote oral health by developing and implementing prevention and healthcare policies and guidelines for programs, health care providers, and institutional settings (e.g., schools) including integration of oral health care and overall health care.

To accomplish this Objective, LHJs can choose evidence-based or best practice strategies such as, but not limited to: convene partners (e.g., First 5, Early Head Start/Head Start, Maternal Child and Adolescent Health (MCAH), Child Health and Disability Prevention (CHDP), Black Infant Health (BIH), Denti-Cal, Women, Infant and Children (WIC), Home Visiting, schools, community-based organizations, etc.) to improve the oral health of 0-6 year old children by identifying facilitators for care, barriers to care, and gaps to be addressed; and/or increase the number of schools implementing the kindergarten oral health assessment by assessing the number of schools currently not reporting the assessments to the System for California Oral Health Reporting (SCOHR), identifying target schools for intervention, providing guidance to schools, and assessing progress.

Objective 8: Address common risk factors for preventable oral and chronic diseases, including tobacco and sugar consumption, and promote protective factors that will reduce disease burden.

To accomplish this Objective, LHJs can choose evidence-based or best practice strategies such as, but not limited to: increase the number of dental offices providing tobacco cessation counseling; and/or increase the number of dental office utilizing Rethink Your Drink materials and resources to guide clients toward drinking water, especially tap water, instead of sugar-sweetened beverages.

Objective 9: Coordinate outreach programs, implement education and health literacy campaigns, and promote integration of oral health and primary care.

To accomplish this Objective, LHJs can choose evidence-based or best practice strategies such as, but not limited to: increase the number of dental offices, primary care offices, and community-based organizations (CBO) (e.g., Early Head Start/Head Start, WIC, Home Visiting, BIH, CHDP, Community Health Worker/Promotora programs, etc.) using the American Academy of Pediatrics' Brush, Book, Bed (BBB) implementation guide; and/or increase the number of dental offices, primary care clinics, and CBOs using the Oral Health Literacy implementation guide to enhance communication in dental/medical offices; and/or increase the number CBOs that incorporate oral health education and referrals into routine business activities.

To accomplish this Objective, LHJs can choose evidence-based or best practice strategies such as, but not limited to: regularly convene and lead a jurisdiction-wide Community of Practice comprised of Managed Care Plans, Federally Qualified Health Centers, CBOs, and/or Dental Offices focused on implementing the Agency for Health Care Research and Quality's Design Guide for Implementing Warm Handoffs in Primary Care Settings or the ; and/or identifying a staff person or consultant to facilitate quality improvement coaching to jurisdiction-wide Community of Practice members focused on increasing the number of at-risk persons who are seen in both a medical and dental office; and/or improve the operationalization of an existing policy or guideline, such as the increasing the number of infants who are seen by a dentist by age 1; and/or promote effectiveness of best practices at statewide and national quality improvement conferences.

Objective 11: Create or expand existing local oral health networks to achieve oral health improvements through policy, financing, education, dental care, and community engagement strategies.

To accomplish this Objective, LHJs can choose evidence-based or best practice strategies such as, but not limited to: create a new (or expand an existing) Oral Health Network, Coalition, or Partnership by identifying key groups and organizations; planning and holding meetings; defining issues and problems; creating a common vision and shared values; and developing and implementing an Action Plan that will result in oral health improvements. LHJs are also encouraged, where possible, to collaborate with local Dental Transformation Initiative (DTI) Local Dental Pilot Projects to convene stakeholders and partners in innovative ways to leverage and expand upon the existing momentum towards improving oral health. LHJs that are currently implementing local DTI projects should develop complementary, supportive, but not duplicative activities.

Scope of Work and Deliverables FY 2017-2022

DELIVERABLES/OUTCOME MEASURES: LHJs are encouraged to implement the strategies recommended in the California Oral Health Plan. Funds are made available through Prop 56 to achieve these deliverables. The activities may include convening, coordination, and collaboration to support planning, disease prevention, education, surveillance, and linkage to treatment programs. Director and State Public Health Officer

State of California—Health and Human Services Agency
California Department of Public Health

EDMUND G. BROWN JR.
Governor

September 27, 2017

Dear California Local Health Officer:

NOTIFICATION OF INTENT TO SUPPORT LOCAL ORAL HEALTH PROGRAMS

This letter provides notification of the intent to award funds to local health departments or jurisdictions (LHJs) through Proposition 56, The California Healthcare, Research and Prevention Tobacco Tax Act of 2016 (Prop 56), pending approval of the State Budget for Fiscal Year 2017/18. The California Department of Public Health (CDPH), Oral Health Program (OHP) has a unique opportunity to build capacity at the local level to address oral health which is essential for overall health. Tooth decay is the number one chronic disease of childhood.

The purpose of this award is to support the proposed California Oral Health Plan activities. We are confident that the LHJs, in collaboration with the CDPH/OHP, will strive to achieve improvements in oral health and accomplish the state oral health objectives within their jurisdictions. The activities should address problems identified by LHJ needs assessments and reflect the California Oral Health Plan priorities.

The activities in Year 1 may be focused on planning for implementation of interventions in subsequent years. The planning exercise should lead to a three year action plan. Smaller counties may choose to form a consortium with other LHJs and pool resources to implement local oral health programs. LHJs that prefer a resource pool approach should notify CDPH. Based on the interest expressed by local First 5 Commissions and local Child Health and Disability Prevention Programs, LHJs are strongly encouraged to collaborate with them in developing a local oral health program.

We anticipate that approximately \$18 million will be available for distribution. Award amounts to LHJs will vary and be determined by the estimated low income population based on the United States Department of Agriculture Economic Research Service estimate of county poverty rate (<https://data.ers.usda.gov/reports.aspx?ID=17826>).

It is anticipated that awards will be for a term of three years with an option to extend for two additional years. CDPH will provide program guidance regarding requirements,

Please complete the attached Letter of Intent form and submit by June 30, 2017, to indicate whether you intend to participate or not.

Additional information about the Local Oral Health Programs will be forthcoming. If you have questions in the meantime, please contact Rosanna Jackson, Oral Health Program Manager, at Rosanna.Jackson@cdph.ca.gov, or at (916) 552-9896.

The next few years will provide California with a unique opportunity to work together to improve oral health for all Californians, while also furthering the California Oral Health Plan objectives. We look forward to working with you.
