**UPDATING THE FEDERAL POVERTY LEVEL TABLE ANNUALLY**  
**Used for Sliding Scale Fee Calculation, CHDP, Fam PACT and**  
**Presumptive Elig. Verification at the front desk.**

Fed Poverty level tables come out usually in Feb of each year  
 Go to google.com, type in Federal Poverty Level Tables, Year  
 i.e. Federal Poverty Level Tables, 2012, and it will bring up a  
 website to look them up. Usually, Table is formatted such  
 that it gives you the 100% of Federal Poverty Level. Load  
 it in under Column 1. All other sections of the table are  
 multipliers off this column, and formulas are prebuilt in,  
 and also listed below.

*****FORMULAS FOR REST OF TABLE*****

11	50,770	60,924	67,524	93,925	101,540

Take the SSF table template, attached on next tab, and load  
 the 100% figures into the far right hand column, so it reads  
 0-11,170 for Family Size one, and so on.

For Colum 120% poverty, the start of the range will be 11,171  
 to 13,404 (start of 120%). For next Colum, range will be 13,405  
 to 14,856 (start of 133%). For next Column, range will be  
 14,857 to 20,665 (start of the 185%) . Next Column will be  
 20,666 to 22,340 (start of the 200% column) Final Column will  
 be 22,341 and over.

Change the Header to read 2012, and change note at bottom  
 to read 2012 Fed. Poverty Level Guidelines, released 2-1-2012.

Would strongly suggest you have someone proof this after  
 you finish, as much of this has to be hand entered into the  
 schedule, and it needs to be accurate.
