**WHEREAS**, Senate Bill 1 (SB 1), the Road Repair and Accountability Act of 2017 (Chapter 5, Statutes of 2017) was passed by the Legislature and Signed into law by the Governor in April 2017 to address the significant multi-modal transportation funding shortfalls statewide; and

**WHEREAS**, SB 1 includes accountability and transparency provisions that will ensure the residents of our County are aware of the projects proposed for funding in our community and which projects have been completed each fiscal year; and

**WHEREAS**, the County must adopt by resolution a list of projects proposed to receive fiscal year funding from the Road Maintenance and Rehabilitation Account (RMRA), created by SB 1, which must include a description and the location of each proposed project, a proposed schedule for the project's completion, and the estimated useful life of the improvement; and

**WHEREAS**, the County, will receive an estimated \$11.6 million in RMRA funding in Fiscal Year 2024-25 from SB 1; and

**WHEREAS**, this is the eighth year in which the County is receiving SB 1 funding and will enable the County to continue essential road maintenance and rehabilitation projects, safety improvements, repairing and replacing aging bridges, and increasing access and mobility options for the traveling public that would not have otherwise been possible without SB 1; and

**WHEREAS**, the County has undergone a robust public process to ensure public input into our community's transportation priorities; and

**WHEREAS**, the County used a Pavement Management System along with input from the Board of Supervisors to develop the SB 1 project list to ensure revenues are being used on the most high-priority and cost-effective projects that also meet the communities' priorities for transportation investment; and

**WHEREAS**, the funding from SB 1 will help the County, this year, rehabilitate approximately 12 centerline miles of roads, rehabilitate approximately 50 miles of pavement traffic stripes, repair damage guard rails, perform drainage maintenance and street sweeping in urbanized areas and perform pavement studies for approximately 16 miles of roads for future pavement rehabilitation projects; and

**WHEREAS**, maintaining the road system in "good" condition will reduce drive times and traffic congestion, which leads to reduced vehicle emissions helping the State achieve its air quality and greenhouse gas emission reduction goals; and

**WHEREAS**, the SB 1 project list and overall investment in our local streets and roads infrastructure with a focus on basic maintenance and safety, investing in complete streets infrastructure, using environmental and sustainable processes, and using cutting-edge technology, materials and practices, will have significant benefits to County of Monterey's major commerce: agriculture and tourism, and will have significant positive co-benefits statewide.
