Appendix 3: What is a Health Center?

What is a Health Center?

For more than 45 years, HRSA-supported health centers have provided comprehensive, culturally competent, quality primary health care services to medically underserved communities and vulnerable populations.

Health centers are community-based and patient-directed organizations that serve populations with limited access to health care. These include low income populations, the uninsured, those with limited English proficiency, migrant and seasonal farmworkers, individuals and families experiencing homelessness, and those living in public housing.

Health Center Program Fundamentals

- **Located in or serve a high need community** (designated Medically Underserved Area or Population). [Find MUAs and MUPs](#)
- **Governed by a community board** composed of a majority (51% or more) of health center patients who represent the population served. [More about health center governance](#)
- **Provide comprehensive primary health care** services as well as supportive services (education, translation and transportation, etc.) that promote access to health care.
- **Provide services available to all** with fees adjusted based on ability to pay.
- **Meet other performance and accountability requirements** regarding administrative, clinical, and financial operations.

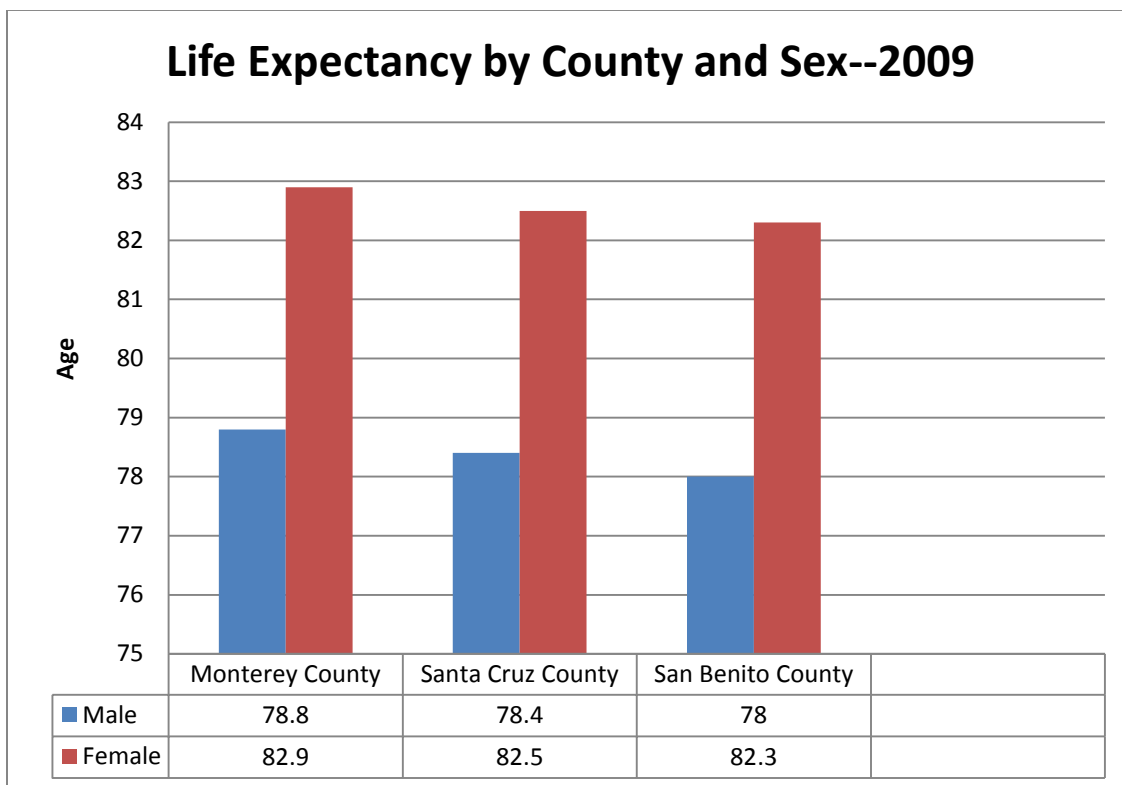

Who Health Centers Serve

- **People of all ages.** Approximately 34 percent of patients in 2011 were children (age 18 and younger); about 7 percent were 65 or older.
- **People without and with health insurance.** The proportion of uninsured patients of all ages was approximately 36 percent in 2011, while the number of uninsured patients increased from 4 million in 2001 to over 7.4 million in 2011.
- **People of all races and ethnicities.** In 2011, 25 percent of health center patients were African-American and 35 percent were Hispanic/Latino – more than twice the proportion of African-Americans and over two times the proportion of Hispanics/Latinos reported in the overall U.S. population.
- **Special populations.** In 2011, health centers served more than 1 million individuals experiencing homelessness; nearly 188,000 residents of public housing; and more than 862,000 farmworkers and their families.

Types of Health Centers

- **Grant-Supported Federally Qualified Health Centers** are public and private non-profit health care organizations that meet certain criteria under the Medicare and Medicaid Programs (respectively, Sections 1861(aa)(4) and 1905(l)(2)(B) of the Social Security Act and receive funds under the Health Center Program (Section 330 of the Public Health Service Act).
- **Federally Qualified Health Center Look-Alikes** are health centers that have been identified by HRSA and certified by the Centers for Medicare and Medicaid Services as meeting the definition of “health center” under Section 330 of the PHS Act, although they do not receive grant funding under Section 330.
- **Outpatient health programs/facilities operated by tribal organizations** (under the Indian Self-Determination Act, P.L. 96-638) or urban Indian organizations (under the Indian Health Care Improvement Act, P.L. 94-437).

Zip code Variables and data set

Codebook:

Variable	Label
ZIP	Zip code (Zip code tabulation area census 2010)
COUNTY	County
POP2010	Total Population (2010 population census)
PDENS	Population Density (Population in 2010 census per square mile)
FEM15_44	Population of Female between 15 and 44 years of age (2010 population census)
UNDOC	Estimate of number of undocumented workers
UNDOCPNT	Number of undocumented workers as % of total population
TOTBTHS	Total number of births in 2010 (MCHD 2010 Birth Report/ SCCHD 2010 birth report)
BRATE	Crude birth rate (TOTBTHS/POP2010*1000)
FERTRATE	Fertility Rate (TOTBTHS/FEM15_44*1000)
MEDCALB	Number of Medi-Cal funded Births (MCHD)
MCBPROP	Proportion of Medi-Cal funded births (MEDCALB/TOTBTHS)
TOTDETHS	Total number of deaths in 2010
DRATE	Crude death rate (TOTDETHS/POP2010*1000)
MCALM	Number of Medi-Cal recipients in 2010 (average of monthly recipients)
MCALSD	Number of Medi-Cal recipients in 2010 (Standard deviation of monthly recipients)

The high risk clinic treats gestational diabetes and other high risk cases with supporting services provided by a diabetes educator and Comprehensive Perinatal Services Program workers. Nurse practitioners provide patients with preventive health services, and ultrasonography is available in this clinic. Staff in our Comprehensive Perinatal Services Program (CPS) offers enhanced dietary, health education and psychosocial counseling to pregnant women. The CPS program accepts referrals from other clinics in the region.
