Current Status: Appointment
Matter Type: General Agenda Item

Confirm the appointments of Steve McIntyre to Primary and Jerry Lohr to the Alternate Agriculture Director positions for the Forebay, and Ryan Kelly to the Primary and Robert Rodoni to the Alternate Director positions for the 180/400 Basin, on the Salinas Valley Basin Groundwater Sustainability Agency ("SVBGSA") Board of Directors ("BOD"); select and appoint Robin Lee to Primary and Janet Brennan to Alternate Environment Director positions, all for terms commencing July 1, 2026, through June 30, 2029; and direct the Clerk of the Board to notify the Members and BOD of the SVBGSA of updates to the list of entities that constitute the nominating group for the Environment Director Position.

RECOMMENDATION:

It is recommended that the Board of Supervisors ("BOS"):

1. Confirm the appointments of Steve McIntyre to Primary and Jerry Lohr to the Alternate Agriculture Director positions for the Forebay, and Ryan Kelly to the Primary and Robert Rodoni to the Alternate Director positions for the 180/400 Basin, on the Salinas Valley Basin Groundwater Sustainability Agency ("SVBGSA") Board of Directors ("BOD"), for terms commencing July 1, 2026, through June 30, 2029;
2. Select and appoint Robin Lee to Primary and Janet Brennan to Alternate Environment Director positions, for terms commencing July 1, 2026, through June 30, 2029; and
3. Direct the Clerk of the Board to notify the Members and BOD of the SVBGSA of updates to the list of entities that constitute the nominating group for the Environment Director Position.

SUMMARY:

In a preliminary procedural step, the County Board of Supervisors ("BOS") is required by the SVBGSA's Joint Powers Authority Agreement ("JPA") to confirm the appointments of certain Director positions (both the Primary and Alternate seats) on the SVBGSA's BOD - specifically, two of the Agriculture Director positions who have terms expiring on June 30, 2026.

In addition to this, the BOS has discretion to select and appoint a Primary and Alternate Environment Director Position, choosing from nominees presented by the Nominating Group set forth in the JPA (which for the Environment Director Position, is made up of those entities listed on Exhibit F to the JPA).

Finally, the BOS is requested to direct the Clerk of the Board to notify the Members of the GSA, and the BOD, of updates to the Nominating Group for the Environment Director Position.

Last year, the Board confirmed appointments to the other two Agricultural Director seats, and further selected and appointed a Public Director (and alternate) - and it is now recommended that the BOS take similar action with respect to the Agricultural Director and Environment Director Positions.

DISCUSSION:

The SVBGSA - A Brief Background

The SVBGSA is a Joint Powers Authority created by the County, the Water Resources Agency, various cities, and other public entities in the Salinas Valley, and is governed by an 11-member Board of Directors. Each Director position has a Primary and an Alternate Director, and each represents a different interest or stakeholder group generally as required by the Sustainable Groundwater Management Act. As set forth in the Joint Powers Authority agreement forming the SVBGSA, various members of JPA make nominations and appointments to the Director positions.
Under the JPA, the County is responsible in some capacity for the appointments of a Primary and Alternate for each of 7 Director positions: A) one representing Other GSA Eligible Entities; B) four representing agricultural interests; C) one representing environmental interests; and D) one Public Member representing interests not otherwise represented on the Board. Generally, the Director positions have three-year terms; however, so that not all Director positions would expire at the same time, a number of the positions were given two-year terms at the start.

General Qualifications for Directors

The JPA agreement sets forth general qualifications for Directors:

1. General education and/or knowledge, interest in and experience relating to the control, storage, and beneficial use of groundwater;
2. General understanding and knowledge of the Basin and all its beneficial users;
3. Working knowledge and understanding of how to develop strategic plans, policies, programs, and financing/funding mechanisms;
4. Genuine commitment to collaboratively work together to (a) achieve groundwater sustainability through the adoption and implementation of a Groundwater Sustainability Plan for the Salinas Valley Groundwater Basin, and all its beneficial users; and (b) provide for the ongoing sustainable management of the basin;
5. General knowledge and understanding of one or more of the different facets (administration, financial, legal, organizational, personnel, etc.) needed for a successful and productive organization;
6. Ability to commit the time necessary, estimated at a minimum 15 - 20 hours per month, to responsibly fulfill their commitment to the organization. This includes, but is not limited to: (a) Board meetings, (b) Board training, (c) analyzing financial statements and technical reports, (d) reviewing Board documents before Board meetings, (e) attending Board meetings, and (f) serving on committees to which they are assigned; and
7. A permanent resident within the Basin, or a representative of an agency with jurisdiction, or a business or organization with a presence, within the Basin.

Specific Qualifications and Process for Nominating and Appointing Directors

1. Agricultural Director

Each of the Director positions also has specific qualifications; an “Agriculture Director” must be an individual that is either:

- engaged in, and derives the majority of his or her gross income or revenue from, commercial agricultural production or operations; or
- designated by an entity this is engaged in commercial agricultural production or operations,

and the individual derives the majority of his or her gross income or revenue from agricultural production or operations, including as an owner, lessor, lessee, manager, officer, or substantial shareholder of a corporate entity

The Agricultural Association nominates for these Director positions. The Association has nominated the following individuals for the following positions:

Steve McIntyre - Primary Director for Forebay Subbasin

Jerry Lohr - Alternate Director for Forebay Subbasin

Ryan Kelly - Primary Director for 180/400 Subbasin

Robert Rodoni - Alternate Director for 180/400 Subbasin

The BOS is the "Appointing Authority" per the JPA, and, according to its terms, the BOS is required to confirm these specific positions as proposed by the Agricultural Association.

2. Environment Director

An "Environment Director" must be an individual that is:

- A representative of an established environmental organization that has a presence or is otherwise active in the Basin.

The Environment Director Nominating Group, consisting of the organizations listed on Exhibit F of the JPA, proposes nominees for this seat. The group includes: Sustainable Monterey County, League of Women Voters of Monterey County, Landwatch Monterey County, Friends and Neighbors of Elkhorn Slough, California Native Plant Society (Monterey Chapter) Trout Unlimited, Surfriders, The Nature Conservancy, and the Carmel River Steelhead Association.

Concurrently with its submission of the Environment Director nominees, the Nominating Group has updated its membership list, and is requesting the BOS provide notice to the GSA Members and BOD, as required under the JPA. (See Attachments, letters from the Environmental Director Nominating Group.) The requested changes result in the addition of Central Coast Wetlands and Elkhorn Slough Foundation, and the removal of the Nature Conservancy and Friends and Neighbors of Elkhorn Slough.

The Environmental Director Nominating Group has nominated the following individuals:

Robin Lee - Primary Director

Janet Brennan - Alternate Director

The BOS is the "Appointing Authority" per the JPA, and, according to its terms, the BOS has discretion to select and appoint the Primary and Alternate Environment Director, but only from the list of nominees provided.

Each of the nominees will be invited to the Board meeting to address the Board if the Board has questions.

Notification of Updates to Environment Director Position Nominating Group

Under the JPA, the entities which constitute the Environment Director Nominating Group are permitted to, and have revised, their membership. The new Environment Director Position Nominating Group has added Central Coast Wetlands and the Elkhorn Slough Foundation to its roster, while removing the Nature Conservancy and Friends and Neighbors of Elkhorn Slough. The JPA requires the BOD, as Appointing Authority, to notify the Members of the GSA and its BOD of these revisions - accordingly, it is requested that the BOS direct the Clerk of the Board to send appropriate notices.

Subject: Request to Amend Exhibit F of the SVBGSA Joint Powers Agreement – Update to Environmental Nominating Group

Dear Chair and Members of the Board:

On behalf of the Environmental Caucus associated with the Salinas Valley Basin Groundwater Sustainability Agency (SVBGSA), we respectfully request that the Monterey County Board of Supervisors, as the Appointing Authority, approve updates to Exhibit F of the SVBGSA Joint Exercise of Powers Agreement (JPA) related to the Environment Director Position Nominating Group. Pursuant to Section 6.5(g) of the JPA, modifications to the composition of the nominating group may be made with notification to the Appointing Authority, including both the addition and removal of participating entities. Consistent with these provisions, the Environmental Caucus requests the following updates:

1. Addition of Central Coast Wetlands and Elkhorn Slough Foundation
In accordance with Section 6.5(g)(vii), the Caucus supports inclusion of both Central Coast Wetlands and the Elkhorn Slough Foundation in Exhibit F. These organizations bring strong regional expertise in watershed management, habitat restoration, estuarine systems, and water quality protection. Their work is closely aligned with SGMA objectives and the mission of SVBGSA, particularly in protecting environmental beneficial uses and understanding groundwater–surface water interactions. Their participation will strengthen the diversity, technical depth, and regional representation of the Environmental Nominating Group.

2. Removal of The Nature Conservancy
In accordance with Section 6.5(g)(vi), the Caucus requests removal of The Nature Conservancy from Exhibit F. Despite multiple attempts, the Caucus has been unable to reach or engage the organization in the nominating group process. As a result, their continued inclusion does not reflect active participation in the caucus.

These updates will help ensure that the Environmental Nominating Group remains active, engaged, and representative of organizations contributing to groundwater sustainability efforts in the Salinas Valley.

Accordingly, we respectfully request that the Board acknowledge these changes and direct that Exhibit F of the SVBGSA JPA be updated to (1) add Central Coast Wetlands and Elkhorn Slough Foundation and (2) remove The Nature Conservancy.

We appreciate your consideration and continued support of effective and inclusive governance of the SVBGSA.

Sincerely,

Janet Brennan

In accordance with Section 6.5(g)(vi), the Caucus requests removal of Friends and Neighbors of Elkhorn Slough from Exhibit F. This entity has let the Caucus know they no longer have the time to participate. As a result, their continued inclusion does not reflect active participation in the caucus.

Accordingly, we respectfully request that the Board acknowledge these changes and direct that Exhibit F of the SVBGSA JPA be updated to remove Friends and Neighbors of Elkhorn Slough.

I am a U.S. Navy veteran and over the past two years have served on the Military & Veterans Affairs Advisory Commission, I have had the opportunity to work alongside fellow commissioners, veteran-serving organizations, and community leaders to help strengthen support, recognition, and resources for veterans and their families. Professionally, I'm the Director of Philanthropy for Natividad Medical Foundation. Outside of my professional role, I volunteer with several veteran-focused organizations, including the Salinas Hometown Heroes Banner Program, the American Legion, the Monterey County Vietnam Veterans Memorial Committee, and local efforts that promote military appreciation, veteran recognition, and

As a veteran, I understand the importance of community support and the challenges many veterans face after military service. Over the past two years on the Commission, I have developed a greater understanding of the needs within our local veteran community and the opportunities to strengthen collaboration among government agencies, veteran-serving organizations, and community partners. I believe there is still important work to be done to improve awareness of available services, recognize military service, and foster greater engagement with veterans throughout Monterey County.

a. Receive an update on community and stakeholder support regarding a potential real estate transfer tax affecting ultra-high-value residential properties in unincorporated areas; and
b. Provide direction to staff on whether to move forward with developing a tax measure for potential placement on a future ballot.

RECOMMENDATION:
It is recommended that the Board of Supervisors:
a. Receive an update on community and stakeholder support regarding a potential real estate transfer tax affecting ultra-high-value residential properties in the unincorporated area; and
b. Provide direction to staff on whether to move forward with developing a tax measure for potential placement on a future ballot.

SUMMARY/DISCUSSION:
On March 17, 2026, the Board reviewed the first follow-up report for Board Referral No. 2026.01 (Daniels), which requested staff to analyze the feasibility of a special real estate transfer tax (PTT) applied to transactions involving ultra-high-value residential properties. The discussion addressed:

- Considering a $10 million threshold, with a possible adjustment to $5 million;
- An initial assessment of market impacts, policy framework, and legal requirements; and
- Instructions to return with further analysis.

On April 7, 2026, staff presented a broadened evaluation including alternative thresholds, revenue estimates, experiences from similar jurisdictions, and suggestions to conduct public opinion polling for a potential Property Transfer Tax (PTT). The Board approved funding for a community survey and scheduled to return on June 9, 2026, to share results.

On June 9, 2026, the Board reviewed the survey findings, which showed limited support for a special PTT, starting at approximately 51 percent, short of the two-thirds majority required under state law. While support rose slightly after additional information was provided, it never reached the necessary two-thirds level. Survey responses ranged from the low to high 50s during the polling period, indicating that even with improved messaging, passing the PTT as a special tax would likely be difficult. The survey focused on a 3% property transfer tax for single family residences valued over $10 million in the unincorporated area.

The Board directed that the issue should return for consideration on June 16, 2026, to assess community stakeholder support or opposition and discuss the possibility of advancing the item as a

general tax, which would require approval by a simple majority vote (50% plus one).

OTHER AGENCY INVOLVEMENT/COMMITTEE ACTIONS:
The Office of the County Counsel, Assessor-County Clerk-Recorder's Office, Housing and Community Development, County Administrative Office, and District 5 Supervisor Office have been involved in this process.

FINANCING:
The Property Transfer Tax is estimated to generate approximately $5 million annually.

SUMMARY:
The County Administrative Office (CAO) presented the FY 2026-27 Recommended Budget to the Board of Supervisors at the Budget Hearings on May 27, 2026. The Board approved several modifications and directed the CAO to incorporate related changes in the budget for adoption on June 16, 2026. Budget Hearing modifications are detailed in Attachment A and Exhibit 1. The budget also

contains corrections as detailed in Attachment C and Exhibit 1.

The Human Resources Department (HRD) completed base wage compensation studies for the Recommended Budget. Attachment D outlines the classifications found to be below the market of the County's comparable agencies; therefore, it is recommended that the salary ranges be amended.

DISCUSSION:
The FY 2026-27 Budget for all funds governed by the Board of Supervisors, and by the Board of Supervisors acting as the Board of Directors of individual special districts and Successor Agencies, totals $2,346,498,487. Total financing includes $2,281,019,141 in revenues and $65,479,346 in fund balance use. The County's FY 2026-27 Adopted Budget will provide 5,709.3 full-time equivalent (FTE) positions (Exhibit 1). The Adopted Budget details are included in the FY 2026-27 Recommended Budget presented at Budget Hearings on May 27, 2026, and in the attachments to this report. The Board of Supervisors, acting as the Board of Directors of individual special districts and Successor Agencies, will consider related budgets, included in the above totals, for adoption during individually convened hearings on June 16, 2026, as appropriate.

General Fund appropriations total $1,024,198,448 offset by revenues of $991,315,574 and fund balance use of $32,882,874. The General Fund budget provides for 3,446.75 FTEs.

The Adopted Budget includes a contribution to the Road Fund of $10,037,154, representing a 25% allocation from the Transient Occupancy Tax (TOT) revenue.

The Adopted Budget utilizes an additional $1,070,400 in Measure AA revenues, an additional $1,331,279 in unassigned fund balance, and reduces the appropriation for Contingencies by $75,000 to support board modifications directed at the Budget Hearing on May 27, 2026. The modifications include the restoration of 6.5 FTEs. Additionally, the Board authorized the use of $1,000,000 of Building and Improvement Replacement funds to support unscheduled maintenance to county-owned facilities.

The CAO recognizes that the adoption of the State's FY 2026-27 Budget and federal budgetary changes could impact county operations. The CAO closely monitors the County's revenue and expenditure conditions to identify emerging issues and potential impacts that may require additional Board action. In addition, pending negotiations with labor groups could also impact the FY 2026-27 budget. To manage workforce costs during FY 2026-27, the CAO will discontinue operating the Hiring Freeze Policy initiated in October 2024 and replace it with a Maximum Filled Full-Time Equivalency (FTE) Policy as reflected in Attachment E. County staff will provide continued oversight and regularly report to the Board of Supervisors regarding emerging federal, state, and local matters that may affect the County's budget. As issues arise and their impacts are identified and quantified, staff will develop, present, and make recommendations to the Board. These actions are intended to ensure the County maintains a balanced budget throughout the fiscal year and to proactively address any potential challenges or necessary adjustments.

The Human Resources Department (HRD) contracted with independent firms Management Strategies Group, a consulting division of Sloan Sakai Yeung & Wong LLP, and Regional Government Services

(RGS) to conduct multiple base wage studies, while others were conducted internally. As a result, several classifications/series were found to be below the market of the County's comparable agencies. Effective FY 2024-25, HRD, in partnership with the CAO, implemented a new process for aligning the implementation of completed base wage compensation studies with the County's budget adoption process. Therefore, HRD recommends adopting a resolution to amend Personnel Policies and Practices Resolution (PPPR) No. 98-394, Appendix A, to adjust the base wage salary ranges and effective dates for classifications below market as indicated in Attachment D.

OTHER AGENCY INVOLVEMENT:
All County offices and departments participate in developing the annual budget. At the close of the Budget Hearing on May 27, 2026, the CAO - Budget and Analysis Division, Auditor-Controller's Office, and HRD initiated collaborative efforts to ensure that all components of the FY 2026-27 Adopted Budget are programmed in the countywide enterprise budget, payroll, accounting, and human resources position tracking systems for accurate and timely implementation on July 1, 2026.

FINANCING:
The FY 2026-27 Adopted Budget reflects the FY 2026-27 Recommended Budget and changes directed by the Board of Supervisors during the Budget Hearing held on May 27, 2026. The FY 2026-27 Budget is balanced and meets all requirements for adoption and implementation effective July 1, 2026.

Process Name	Maximum Filled FTE	**SOP Version**	Draft v1.0
Applies To	Departments funded by the General Fund, directly, indirectly, fully, or partially	**Review Cycle**	Bi-monthly monitoring; annual budget reset
Primary Control Point	Total filled FTE by department	**Secondary Control Point**	General Fund salary and benefit exposure
Approving Authority	Board of Supervisors	**Operating Control**	Human Resources Department
Prepared For	Human Resources Department and CAO	**Prepared By**	Deja Sero, County Budget Director

Note: This SOP is a draft. Human Resources, County Counsel, and Board of Supervisors review should occur before full implementation.

1. Purpose

The purpose of this SOP is to establish a uniform, transparent, and auditable process for setting, monitoring, and adjusting each department's Maximum Filled FTE who receive general fund appropriations. The process is intended to replace the existing Soft Hiring Freeze with a Board-established maximum number of filled FTEs that each department may have at any point in time, while preserving department operational flexibility within the approved total. Additionally, the process is intended to control General Fund workforce growth, improve salary and benefit forecasting, and provide the Budget Committee and Board of Supervisors (Board) with regular information updates to make timely workforce and budget decisions.

2. Policy Statement

The Board of Supervisors establishes the maximum number of filled FTEs each applicable department is allowed to maintain at any time. The Human Resources Department (HRD) and the County Administrative Office (CAO) administer the control by department-level total filled FTE, not by individual job classification title. Departments retain discretion to decide which classifications or positions to fill, provided the department remains within its approved Maximum Filled FTE and complies with budget, classification, recruitment, applicable personnel policies and procedures, and funding requirements.

3. Scope

This SOP applies to all departments, offices, and agencies that receive General Fund support directly or indirectly. Natividad, Behavioral Health, Library, Road Fund, and Emergency Operations positions that are 100% funded by enterprise revenues, third-party revenues, grants, fees, reimbursements, or other non-General Fund sources are reviewed for informational and verification purposes but are not considered for reduction under the Maximum Filled FTE limitation unless directed by the Board or another applicable authority.

- The Maximum Filled FTE process does not eliminate the need for adopted appropriations, authorized positions, classification approval, recruitment approval, or funding verification.
- The Maximum Filled FTE amount is not the same as Authorized FTE. Authorized FTE is the budgeted position authority. Maximum Filled FTE is the maximum number of the Authorized FTEs that may be filled at any given time.
- Temporary staffing, Allocations on Loan, contract staffing, and overtime are outside the filled permanent FTE count unless the Board or CAO directs that they be reported as an offsetting workforce pressure or substitute labor cost.

4. Definitions

Term	Definition
Authorized FTE	The number of FTE positions authorized in the Adopted Budget, including any Board-approved budget modifications.
Filled FTE	A position or portion of a position occupied by an employee in the County's Human Capital Management (HCM) Human Resources Information System (HRIS) as of a point in time. For purposes of this policy, filled FTE is measured using the official HCM-HRIS of record.
Maximum Filled FTE	The Board-approved allowable maximum total filled FTE count a department may have at any point in time for positions subject to this control.
General Fund-supported FTE	Any FTE fully or partially funded by the General Fund, including positions indirectly supported by General Fund contribution, subsidy, match, backfill, or cost allocation.
Committed Hire	A recruitment action that has progressed to, a conditional offer of employment, a final offer of employment , or an offer of employment that has been accepted by the job candidate or other HR-confirmed commitment that should be considered when calculating available capacity.
Budgeted Salary Savings	The dollar amount and associated FTE included in the budget to reflect anticipated savings from vacancy, turnover, timing of hiring, or intentional holding of positions vacant.
Available Hiring Capacity	The difference between the approved Maximum Filled FTE and the department's current filled FTE after considering committed hires and any other encumbrances established by Human Resources.

DRAFT

Adjustment	A Board-approved authorized change to a department's Maximum Filled FTE after initial adoption.
Exception	A CAO approved documented, time-sensitive request to temporarily fill above the approved Maximum Filled FTE or to treat a position differently from the standard control due to legal mandate, grant compliance, or revenue protection. An adjustment request to Maximum Filled FTE must follow all approved exceptions.

5. Guiding Principles

- Board authority: Department Maximum Filled FTE limits are established by the Board and may not be exceeded without required Board approval, unless authority is granted to CAO, and CAO approved exception.
- General Fund control: The process is targeted but not limited to General Fund workforce cost exposure.
- Operational flexibility: Departments may choose which positions to fill within their Maximum Filled FTE limits; the control is on total filled FTE, not by classification title.
- Equity and transparency: Departments receive a consistent review process, consistent data inputs, and an opportunity to request adjustments to established Maximum Filled FTE.
- Data-driven recommendations: Recommendations are based on maximum filled FTE history, current vacancies, salary and benefit costs, funding sources, budgeted salary savings, current job offers, current recruitments, and department justification.
- Continuous monitoring: The CAO provides recurring reports to the Budget Committee and Board that include employee costs and any recommended adjustments to department maximums.

6. Roles and Responsibilities

Role	Responsibilities
Board of Supervisors	Approves initial department Maximum Filled FTE amounts; considers recommended adjustments; provides policy direction on workforce controls and General Fund exposure.
Budget Committee	Receives bi-monthly monitoring reports from the CAO; reviews salary and employee benefit forecasts; reviews recommended adjustments to department maximums before Board action when applicable.
County Administrative Officer / CAO Executive Team	Provides executive direction; resolves policy issues; ensures the process aligns with Board direction and countywide fiscal strategy.
CAO Budget & Analysis Team	Leads the analytical review; collects department requests; validates budgeted salary savings, current vacancies, salary and benefit totals, and funding sources; prepares recommendations, Board reports/materials, and recurring reports.
Human Resources Department	Reviews hiring transactions against the approved department Maximum Filled FTE limit; verifies filled

	FTE counts using the HCM-HRIS; coordinates with CAO Budget & Analysis on position control data.
Department Heads / Elected Officials	Adhere to Board-approved Maximum Filled FTE limits and regularly assess department minimum filled FTE needed to maintain operations.
Finance Managers / Department Fiscal Staff	Implement controls and manage Maximum Filled FTE; assist department heads and elected officials with funding-source verification, salary and benefit projections, budgeted salary savings analysis, vacancy information, documentation for requested adjustments or exceptions, and prepare/assist with Board reports as required.

7. Procedure Overview

1. CAO Budget & Analysis compiles information necessary to report on a bi-monthly basis to the Budget Committee.
2. HRD maintains Maximum Filled FTE transaction control through review of current filled FTE.
3. Temporary staffing, allocations on loan (which are temporary in nature), contract staffing, and overtime are exempt from the Maximum Filled FTE limits.
4. Departments request adjustments through the Budget Committee and Board process when operating, fiscal, mandate, or funding conditions change.
5. Departments may request exemptions by submitting a request to the CAO. Once granted, the exception needs to accompany the transaction request when submitting to HRD in order to be processed. An adjustment request to Maximum Filled FTE must follow all approved exceptions.

8. Human Resources Transaction Control

Human Resources maintains the Maximum Filled FTE by department-level total filled FTE not by job classification unless a separate job classification-specific restriction exists. This allows departments to prioritize which positions are filled while maintaining the Board-approved Maximum Filled FTE limit.

8.1 Hiring Transaction Check

6. Department submits a Request for Referral to their Departmental HR Analyst, which could result in an action that would increase filled FTE.
7. Departmental HR Analyst verifies current filled FTE for the department using HCM
8. Departmental HR Analyst reviews committed hires and pending actions that are already approved and not yet reflected as filled FTE in the HCM.
9. Departmental HR Analyst determines whether the new action would keep the department at or below its approved Maximum Filled FTE.
10. If the department remains at or below the Board-approved Maximum Filled FTE, Departmental HR Analyst may proceed subject to normal HR, budget, classification, and funding requirements.
11. If the action would exceed the approved maximum, Departmental HR Analyst notifies the department that the action would exceed the approved maximum. .

    10.a. The department may withdraw the action, identify an offsetting vacancy/separation, delay the hire, or request an exception/adjustment through the process in this SOP.

DRAFT

8.2 Department Flexibility Within the Cap

- Departments may select which eligible positions to fill within their approved total filled FTE limit.
- The job classification does not control Maximum Filled FTE compliance unless the Board, CAO, HRD, or applicable law imposes a specific job classification requirement.
- Departments remain responsible for ensuring filled positions have budgeted appropriations and valid funding.
- Departments should prioritize legally mandated services, public safety, revenue protection, grant compliance, and Board-directed service levels when selecting positions to fill.

9. Exceptions and Adjustments

Exceptions and adjustments must be documented, limited to the need presented, and routed through the required approval path. The standard is that recurring or structural increases to Maximum Filled FTE require Board approval. Temporary operational exceptions may be considered only if authority has been delegated by Board action or CAO policy.

9.1 Grounds for Exception or Adjustment

- Board Resolution
- Declared public safety emergency
- Board-directed priority, new program, or service-level commitment approved after the initial Maximum Filled FTE was established.
- Approved augmentation, mid-year budget action, or adopted budget revision that changes staffing authority or funding.

9.2 Adjustment Request Contents for Budget Committee and Board Process

Adjustment requests will be submitted to the Budget Committee and/or Board through the standard Board Report process. Board reports must include the following information:

- Department name and requested action.
- Current approved Maximum Filled FTE, current filled FTE, job offers and **requested** filled FTE level.
- Hiring Salary Step(s), funding source(s), and General Fund exposure.
- Detailed explanation of why department cannot maintain status quo within the approved maximum.
- Three-year fiscal impact for salary, benefits, and any offsetting revenue or savings.
- Duration of request: on-going or one-time. For temporary or term limited provide duration of time requested
- Operational, legal, grant, revenue, public safety, or Board-policy impact if denied.
- Department head approval and finance manager verification.
- If a department is requesting Board authorization to modify their adopted authorized FTE, the department must also include a request to adjust their Max Filled FTE limit.

9.3 Exception Request Contents For CAO

Exception requests will be submitted to the CAO through a standardized form, which can be accessed here: . The form will require the following information:

- Department name and requested action.
- Current approved Maximum Filled FTE, current filled FTE, job offers and **requested** filled FTE level.
- Hiring Salary Step(s), funding source(s), and General Fund exposure.

- Detailed explanation of why department cannot maintain status quo within the approved maximum.
- Three-year fiscal impact for salary, benefits, and any offsetting revenue or savings.
- Duration of request: on-going or one-time. For temporary or term limited provide duration of time requested
- Operational, legal, grant, revenue, public safety, or Board-policy impact if denied.
- Department head approval and finance manager verification.

- The process was communicated as a replacement for the Soft Hiring Freeze (established October 2024) beginning July 1, 2026, subject to Board approval.
- Departments were asked to submit final requested Maximum Filled FTE for FY 2026-27 and include current job offers, current recruitments, and third-party/locally funded FTEs.
- Budget & Analysis review included budgeted salary savings, current vacant positions, salary and benefit totals on General Fund only, and vacant position funding sources to establish recommended Maximum Filled FTE limits.
- The Human Resources Department was identified as the review point for maximum filled FTE, with review by total FTE only and no control on classification title.
- The rough process notes identify a Board-established maximum, a baseline using the highest number of filled FTEs in the past two years with department adjustments, department review, and bi-monthly CAO reports to the Budget Committee including salary/benefit forecasts and recommended adjustments.

SUMMARY:

In March 2024, California voters approved Proposition 1, which enacted the Behavioral Health Services Act (BHSA), significantly restructuring the former Mental Health Services Act (MHSA) and establishing a unified framework for mental health and substance use disorder (SUD) services. The

reform also introduced new planning, accountability, and fiscal requirements for counties, including a consolidated Integrated Plan structure and expanded statewide reporting and oversight requirements. The BHSA Three-Year Integrated Plan and Budget is a state-required standardized template used by counties to document service strategy, funding allocations, and compliance with California Department of Health Care Services (DHCS) planning requirements.

Pursuant to DHCS requirements, the final BHSA Three-Year Integrated Plan and Budget (Integrated Plan) must be submitted no later than June 30, 2026. In preparation for implementation, the County of Monterey Health Department Behavioral Health Bureau has engaged in a multi-phase planning and transition process to align services, contracts, workforce development, and fiscal systems with BHSA requirements.

The BHSA Three-Year Integrated Plan and Budget for Fiscal Years 2026-27 through 2028-29 (Integrated Plan) is the County's first comprehensive plan under the BHSA framework and replaces the prior MHSA planning and expenditure reporting structure.

DISCUSSION:
Consistent with applicable Community Program Planning Requirements and DHCS guidance, the County of Monterey Health Department Behavioral Health Bureau (BHB) conducted a comprehensive Community Program Planning (CPP) process to inform development of the BHSA Three-Year Integrated Plan. The CPP process included community listening sessions, stakeholder meetings, monthly Behavioral Health Treatment (BHT) Collaborative meetings from November 2025 through March 2026, meetings with providers of Prevention and Early Intervention (PEI) services impacted by BHSA-related funding transitions in early 2026, public outreach, and opportunities for written public comment throughout Monterey County. Major planning milestones included stakeholder engagement and community outreach conducted from Fall 2024 through Spring 2025, release of the Draft BHSA Three-Year Integrated Plan on April 3, 2026, a 45-day public comment period from April 3, 2026, through May 18, 2026, and the Behavioral Health Commission public hearing held on May 28, 2026.

The BHSA Three-Year Integrated Plan establishes Monterey County's strategic framework for the delivery of behavioral health services across mental health and substance use disorder systems for Fiscal Years 2026-27 through 2028-29. The Integrated Plan includes a comprehensive community needs assessment analyzing behavioral health needs and disparities across Monterey County populations, geographic regions, and service systems using epidemiological data, stakeholder feedback, and community planning input. The Integrated Plan also outlines the County's behavioral health service delivery strategy, including Full-Service Partnerships (FSPs), prevention and early intervention services, outreach, crisis response, and substance use disorder treatment services. Additional components include workforce, education, and training strategies focused on recruitment, retention, peer support development, and culturally responsive workforce initiatives; innovation and quality improvement activities emphasizing evidence-based practices and outcome measurement; a three-year budget projection for BHSA revenues and expenditures; and a compliance strategy for statewide behavioral health accountability, reporting, and transparency requirements.

Consistent with BHSA priorities, the Integrated Plan emphasizes services for individuals with the

highest behavioral health needs, including those experiencing homelessness, serious mental illness, co-occurring serious mental health and substance use disorders, justice-system involvement, and repeated utilization of acute care systems. Priority populations identified through the CPP process include adults with serious mental illness, particularly individuals experiencing homelessness or instability; transition age youth with co-occurring behavioral health needs; children, youth, and families in need of prevention and early intervention services; older adults experiencing isolation, chronic illness, and behavioral health challenges; individuals requiring integrated mental health and substance use disorder treatment; and rural, agricultural, Spanish-speaking, and Indigenous-language-speaking communities experiencing barriers to behavioral health access.

The BHSA Three-Year Integrated Plan includes projected revenues and expenditures for Fiscal Years 2026-27 through 2028-29. BHSA funding continues to be derived from the statewide 1% income tax on personal income above $1 million established under Proposition 63 and modified through Proposition 1. The Integrated Plan's budget reflects projected state allocations, required prudent reserve funding, maintenance of effort obligations, and anticipated expenditure across BHSA service categories. The Integrated Plan's budget serves as a planning document and does not constitute final appropriation authority. Annual appropriations will continue to be incorporated through the County's annual budget process and remain subject to approval by the Board of Supervisors.

During the 45-day public comment period, the County received feedback from consumers, family members, providers, advocates, and community stakeholders through written comments, community meetings, and public engagement activities. Common themes identified through public comment included support for expanded crisis response and stabilization services, requests for increased culturally and linguistically responsive services, expansion of peer support and lived-experience-informed services, increased outpatient and step-down services following psychiatric hospitalization, and improved coordination between behavioral health, housing, and homelessness systems. All comments received during the public comment period were reviewed and considered during finalization of the Integrated Plan. A summary of public comments and County responses was presented to the Monterey County Behavioral Health Commission during its public hearing on May 28, 2026, and is included beginning on page 68 under table "7. Stakeholder Input" of Attachment A.

On May 28, 2026, the Monterey County Behavioral Health Commission conducted a public hearing on the Draft BHSA Three-Year Integrated Plan and Budget. Following receipt of public testimony, presentation of the public comment summary and County responses, and staff presentation, the Commission confirmed that the public hearing was held in accordance with applicable requirements.

Following the close of the public comment period and the Behavioral Health Commission public hearing, MCBH reviewed all comments and recommendations received from community members, stakeholders, providers, advocates, and Commissioners. Where appropriate and consistent with BHSA requirements, DHCS guidance, available funding, and the scope of the Integrated Plan, feedback-informed revisions, clarifications, and enhancements to the final Integrated Plan were made. The final Integrated Plan presented to the Board reflects consideration of public input received through the Community Program Planning process, written public comments, testimony provided during the Behavioral Health Commission public hearing, recommendations made by the Behavioral Health Commissioners at the public hearing, and technical feedback received from DHCS during its review of

the draft Integrated Plan. Revisions incorporated into the final Integrated Plan are highlighted in Attachment A for ease of reference.

The County submitted a draft BHSA Three-Year Integrated Plan to DHCS on March 30, 2026. Following DHCS review, the draft Plan was returned twice for technical corrections, clarifications, and required updates associated with evolving state guidance and implementation requirements. The proposed final BHSA Three-Year Integrated Plan and Budget incorporates these DHCS-required revisions and updates and is being presented to the Board for approval and subsequent submission to DHCS for final review and certification.

The Board of Supervisors, as outlined DHCS's policy manual, is required to confirm in each integrated plan that the County will meet their realignment obligations (WIC section 14197.71, subdivision (c)(2)). Accordingly, the Board of Supervisors is asked to attest that the County is meeting their realignment obligations, including but not limited to time and distance standards and appointment time standards as set forth WIC section 14197.71, or other applicable guidance, without utilizing waitlists. The Behavioral Health Director has confirmed the County is meeting these requirements.

Upon Board adoption and approval, the final Integrated Plan will be submitted to the DHCS for review and certification consistent with BHSA statutory and regulatory requirements. Pursuant to DHCS guidance, counties are required to submit their final BHSA Three-Year Integrated Plans and Budgets to DHCS no later than June 30, 2026.

SUMMARY:

In March 2024, California voters approved Proposition 1, which enacted the Behavioral Health Services Act (BHSA), significantly restructuring the former Mental Health Services Act (MHSA) and establishing a unified framework for mental health and substance use disorder (SUD) services. The

reform also introduced new planning, accountability, and fiscal requirements for counties, including a consolidated Integrated Plan structure and expanded statewide reporting and oversight requirements. The BHSA Three-Year Integrated Plan and Budget is a state-required standardized template used by counties to document service strategy, funding allocations, and compliance with California Department of Health Care Services (DHCS) planning requirements.

Pursuant to DHCS requirements, the final BHSA Three-Year Integrated Plan and Budget (Integrated Plan) must be submitted no later than June 30, 2026. In preparation for implementation, the County of Monterey Health Department Behavioral Health Bureau has engaged in a multi-phase planning and transition process to align services, contracts, workforce development, and fiscal systems with BHSA requirements.

The BHSA Three-Year Integrated Plan and Budget for Fiscal Years 2026-27 through 2028-29 (Integrated Plan) is the County's first comprehensive plan under the BHSA framework and replaces the prior MHSA planning and expenditure reporting structure.

DISCUSSION:
Consistent with applicable Community Program Planning Requirements and DHCS guidance, the County of Monterey Health Department Behavioral Health Bureau (BHB) conducted a comprehensive Community Program Planning (CPP) process to inform development of the BHSA Three-Year Integrated Plan. The CPP process included community listening sessions, stakeholder meetings, monthly Behavioral Health Treatment (BHT) Collaborative meetings from November 2025 through March 2026, meetings with providers of Prevention and Early Intervention (PEI) services impacted by BHSA-related funding transitions in early 2026, public outreach, and opportunities for written public comment throughout Monterey County. Major planning milestones included stakeholder engagement and community outreach conducted from Fall 2024 through Spring 2025, release of the Draft BHSA Three-Year Integrated Plan on April 3, 2026, a 45-day public comment period from April 3, 2026, through May 18, 2026, and the Behavioral Health Commission public hearing held on May 28, 2026.

The BHSA Three-Year Integrated Plan establishes Monterey County's strategic framework for the delivery of behavioral health services across mental health and substance use disorder systems for Fiscal Years 2026-27 through 2028-29. The Integrated Plan includes a comprehensive community needs assessment analyzing behavioral health needs and disparities across Monterey County populations, geographic regions, and service systems using epidemiological data, stakeholder feedback, and community planning input. The Integrated Plan also outlines the County's behavioral health service delivery strategy, including Full-Service Partnerships (FSPs), prevention and early intervention services, outreach, crisis response, and substance use disorder treatment services. Additional components include workforce, education, and training strategies focused on recruitment, retention, peer support development, and culturally responsive workforce initiatives; innovation and quality improvement activities emphasizing evidence-based practices and outcome measurement; a three-year budget projection for BHSA revenues and expenditures; and a compliance strategy for statewide behavioral health accountability, reporting, and transparency requirements.

Consistent with BHSA priorities, the Integrated Plan emphasizes services for individuals with the

highest behavioral health needs, including those experiencing homelessness, serious mental illness, co-occurring serious mental health and substance use disorders, justice-system involvement, and repeated utilization of acute care systems. Priority populations identified through the CPP process include adults with serious mental illness, particularly individuals experiencing homelessness or instability; transition age youth with co-occurring behavioral health needs; children, youth, and families in need of prevention and early intervention services; older adults experiencing isolation, chronic illness, and behavioral health challenges; individuals requiring integrated mental health and substance use disorder treatment; and rural, agricultural, Spanish-speaking, and Indigenous-language-speaking communities experiencing barriers to behavioral health access.

The BHSA Three-Year Integrated Plan includes projected revenues and expenditures for Fiscal Years 2026-27 through 2028-29. BHSA funding continues to be derived from the statewide 1% income tax on personal income above $1 million established under Proposition 63 and modified through Proposition 1. The Integrated Plan's budget reflects projected state allocations, required prudent reserve funding, maintenance of effort obligations, and anticipated expenditure across BHSA service categories. The Integrated Plan's budget serves as a planning document and does not constitute final appropriation authority. Annual appropriations will continue to be incorporated through the County's annual budget process and remain subject to approval by the Board of Supervisors.

During the 45-day public comment period, the County received feedback from consumers, family members, providers, advocates, and community stakeholders through written comments, community meetings, and public engagement activities. Common themes identified through public comment included support for expanded crisis response and stabilization services, requests for increased culturally and linguistically responsive services, expansion of peer support and lived-experience-informed services, increased outpatient and step-down services following psychiatric hospitalization, and improved coordination between behavioral health, housing, and homelessness systems. All comments received during the public comment period were reviewed and considered during finalization of the Integrated Plan. A summary of public comments and County responses was presented to the Monterey County Behavioral Health Commission during its public hearing on May 28, 2026, and is included beginning on page 68 under table "7. Stakeholder Input" of Attachment A.

On May 28, 2026, the Monterey County Behavioral Health Commission conducted a public hearing on the Draft BHSA Three-Year Integrated Plan and Budget. Following receipt of public testimony, presentation of the public comment summary and County responses, and staff presentation, the Commission confirmed that the public hearing was held in accordance with applicable requirements.

Following the close of the public comment period and the Behavioral Health Commission public hearing, MCBH reviewed all comments and recommendations received from community members, stakeholders, providers, advocates, and Commissioners. Where appropriate and consistent with BHSA requirements, DHCS guidance, available funding, and the scope of the Integrated Plan, feedback-informed revisions, clarifications, and enhancements to the final Integrated Plan were made. The final Integrated Plan presented to the Board reflects consideration of public input received through the Community Program Planning process, written public comments, testimony provided during the Behavioral Health Commission public hearing, recommendations made by the Behavioral Health Commissioners at the public hearing, and technical feedback received from DHCS during its review of

the draft Integrated Plan. Revisions incorporated into the final Integrated Plan are highlighted in Attachment A for ease of reference.

The County submitted a draft BHSA Three-Year Integrated Plan to DHCS on March 30, 2026. Following DHCS review, the draft Plan was returned twice for technical corrections, clarifications, and required updates associated with evolving state guidance and implementation requirements. The proposed final BHSA Three-Year Integrated Plan and Budget incorporates these DHCS-required revisions and updates and is being presented to the Board for approval and subsequent submission to DHCS for final review and certification.

The Board of Supervisors, as outlined DHCS's policy manual, is required to confirm in each integrated plan that the County will meet their realignment obligations (WIC section 14197.71, subdivision (c)(2)). Accordingly, the Board of Supervisors is asked to attest that the County is meeting their realignment obligations, including but not limited to time and distance standards and appointment time standards as set forth WIC section 14197.71, or other applicable guidance, without utilizing waitlists. The Behavioral Health Director has confirmed the County is meeting these requirements.

Upon Board adoption and approval, the final Integrated Plan will be submitted to the DHCS for review and certification consistent with BHSA statutory and regulatory requirements. Pursuant to DHCS guidance, counties are required to submit their final BHSA Three-Year Integrated Plans and Budgets to DHCS no later than June 30, 2026.

This work supports the County of Monterey Health Department 2025-2028 Strategic Plan Goal: Deepen organizational effectiveness and support long-term sustainability. It also supports Essential Public Health Service No. 6: Utilize legal and regulatory actions designed to improve and protect the public's health.

OTHER AGENCY INVOLVEMENT:
The Monterey County Behavioral Health Commission reviewed the Draft BHSA Three-Year Integrated Plan and Budget and conducted the required public hearing on May 28, 2026, with engagement from community-based organizations, contracted providers, stakeholders, and system partners throughout the planning process.

County Counsel has reviewed and approved as to legal form.

FINANCING:
There is no additional impact to the County General Fund associated with the recommended action. The BHSA Three-Year Integrated Plan is funded through Monterey County's BHSA allocation derived from statewide Proposition 63 and Proposition 1 revenues.

Introduction

The County of Monterey Health Department's Behavioral Health Bureau (MCBH) is pleased to present the Fiscal Years 2026/27 through 2028/29 Behavioral Health Services Act (BHSA) Three-Year Integrated Plan. This BHSA Integrated Plan reflects MCBH's continued commitment to strengthening a coordinated, community-informed behavioral health system that supports individuals and families throughout Monterey County.

The Behavioral Health Services Act, established through Proposition 1 and Senate Bill 326 (SB 326), represents a significant statewide transformation in how behavioral health services are funded, structured, and delivered throughout California. The BHSA replaces the Mental Health Services Act (MHSA) framework and introduces new statewide requirements related to funding structure, service categories, accountability, housing interventions, outcomes, and integrated behavioral health planning across mental health and substance use disorder systems.

As part of BHSA implementation, every county in California is required to develop and submit a Three-Year Integrated Plan using standardized Integrated Plan and Budget Templates established by the California Department of Health Care Services (DHCS). The Integrated Plan is intended to support statewide consistency, transparency, and alignment between state behavioral health priorities, local planning efforts, and community identified needs.

Unlike prior MHSA Three-Year Program and Expenditure Plans, the BHSA Integrated Plan represents a broader, systemwide planning and accountability framework that demonstrates how counties will align behavioral health services, funding strategies, statewide priorities, and local needs across the continuum of care. The Integrated Plan is not intended to serve as a comprehensive inventory of all behavioral health programs, services, and activities provided within the community. Rather, its purpose is to document county alignment with the new service delivery, eligibility, and funding requirements established under the BHSA.

This Integrated Plan was developed using the required DHCS Integrated Plan Template and accompanying Budget Templates, consistent with statewide BHSA planning and reporting requirements. The Plan was informed by multiple data sources, including statewide and local secondary data, stakeholder input, and findings from relevant planning and assessment efforts. Several data gaps in County and state-provided data exist. To address identified data gaps, the County will continue strengthening its behavioral health data infrastructure, partner data-sharing processes, and internal reporting workflows over the implementation period. Key resources reviewed during the development of the Plan included the Lead Me Home Plan, the Housing Tools Residential Care Facility Incubator

(RCFI) Final Innovative Project Report, Community Health Needs Assessment (CHNA), and other local and regional reports relevant to behavioral health service delivery, housing, workforce, and community wellbeing. The Plan is intended to support transparency, shared understanding, and alignment between state expectations, local behavioral health priorities, and community-identified needs.

Stakeholder Engagement

This Integrated Plan was developed in accordance with DHCS guidance and informed through the Community Planning Process. This includes community listening sessions, system partner engagement activities, local data review of population health data, and cross-sector collaboration efforts.

Community feedback, system data, and stakeholder input helped inform local priorities, identify service gaps, and shape strategies included throughout this Plan.

MCBH Priorities

The Integrated Plan reflects continued focus on:

- Providing specialized behavioral health treatment and supports for individuals with severe needs that significantly impair daily functioning
- Reducing homelessness among individuals with severe behavioral health conditions
- Addressing disparities in access, engagement, and behavioral health outcomes
- Strengthening coordination and continuity across systems of care
- Maintaining core behavioral health services during a period of significant fiscal and operational transition under BHSA

As reflected throughout this Plan, MCBH remains committed to accessible, coordinated, and community-based behavioral health services for Monterey County residents while thoughtfully navigating the transition from MHSA to BHSA and maintaining continuity of care during a period of significant system change.

Acknowledgement

The County of Monterey extends its sincere appreciation to all community members, partners, stakeholders, providers, advocates, and individuals with lived experience who contributed to the development of this Integrated Plan.

Through continued collaboration and community engagement, MCBH remains committed to promoting wellness, resilience, and recovery through community support and partnering to provide welcoming mental health and substance use care.

Funding Transfer Requests

If the county aims to submit a funding transfer request for the Fiscal Years (FY) 2026- 2029 Integrated Plan (IP) period, please complete the questions below. Counties must submit their request by March 31 of the FY prior to the FY covered in the IP (i.e., exemption requests for the FY 2026-2029 IP must be submitted to DHCS by March 31, 2026) to facilitate timely review and approval.

Please enter the proposed allocation adjustments to the tables below.

- Each year column must equal 100 percent.
- Counties may transfer no more than 7 percent from each component to another component, with a maximum of 14 percent of total funds transferred.
- If the county allocates any Housing Interventions outreach and engagement funds up to 7 percent, the amount of funds the county can transfer out of the Housing Interventions allocation component must be decreased by the corresponding amount.

- The base percentage for Housing Interventions may be higher or lower for small counties requesting a Housing Interventions exemption.
- Counties may transfer no more than 7 percent of total funds from each component to another component, with a maximum of 14 percent of total funds transferred.

Dollars transferred into Full Service Partnerships	$0	$0	$0
Dollars transferred into Housing Interventions	$0	$0	$0

2. For Behavioral Health Services and Supports, please include a rationale for the funding allocation transfer request: The County of **Monterey Behavioral Health has historically utilized MHSA funds primarily to support direct behavioral health services across the system of care. Under the Behavioral Health Services Act, the shift in funding structure, combined with the 5 percent statewide allocation, results in an effective 35 percent reduction in locally available service dollars if no transfer authority is exercised. Absorbing a reduction of this magnitude would significantly disrupt existing service capacity, including outpatient treatment, Full-Service Partnerships, and other core supports that individuals and families currently rely**

upon. Maximizing the allowable transfer from the Housing Intervention funding component to the Behavioral Health Services and Supports funding component is necessary to stabilize the local system of care during this transition. The County recognizes the critical role that housing plays in behavioral health recovery and community stability and remains committed to achieving the long-term vision of a fully developed Housing Interventions continuum. At the same time, BHSA implementation requires consideration of the full behavioral health continuum, including prevention and early intervention services, outpatient treatment, intensive community-based services, crisis response, residential care, workforce needs, and housing supports.

Additional planning, analysis, and collaboration with behavioral health providers, housing partners, health care organizations, homelessness response partners, and other community stakeholders is needed to fully evaluate the potential impacts of current funding changes across the broader system of care. During the three-year implementation period, MCBH will continue assessing community needs, service utilization patterns, housing needs, system capacity, and available funding opportunities to help inform future decisions regarding the timing, pace, and approach for aligning with the full BHSA Housing Interventions funding allocation. This process will help ensure that future investments in Housing Interventions are implemented in a manner that strengthens housing resources while maintaining the stability and effectiveness of the broader behavioral health system of care.

Dollars transferred into Full Service Partnerships	$0	$0	$0

2. For Housing Interventions, please include a rationale for the funding allocation transfer request: **While Housing Interventions remain a critical strategy for long-term stability and recovery, the County of Monterey may need to moderate spending from the Housing Intervention funding component during the initial years of BHSA implementation in order to protect the broader behavioral health treatment system. The County's historical reliance on MHSA funds for direct behavioral health services means that the structural fiscal changes under BHSA create a substantial funding reduction for core treatment, outpatient, crisis, and Full-Service Partnership services. Expanding Housing Intervention expenditures without stabilizing the underlying service infrastructure could result in individuals being housed but unable to access sufficient clinical and rehabilitative supports necessary to sustain housing and recovery.**

Supporting Information and Data

1. How does this funding transfer request respond to community needs and input? **The County of Monterey's request to maximize the allowable transfer from the Housing Intervention (HI) component to the Behavioral Health Services and Supports (BHSS) component is grounded in documented community needs and demonstrated service demand.**
Community planning findings consistently indicate significant gaps in access to mental health and substance use treatment. Residents identified anxiety, alcohol use disorder, and trauma as top concerns, while more than half of respondents reported that mental health services are insufficient to meet community needs. Conversations with community and system stakeholders characterized access to care as a major problem, citing provider shortages, long wait times, limited specialty services, and inadequate language access.

High-need populations, including individuals experiencing housing instability, Medi-Cal recipients, and Indigenous language speakers, reported even greater barriers to accessing services. Community members emphasized that housing alone is not sufficient for long-term stability without integrated behavioral health treatment, crisis response, case management, and culturally responsive supports.

Maximizing the transfer to BHSS allows the County to address documented service gaps, strengthen treatment capacity, and ensure that housing interventions are supported by the behavioral health infrastructure necessary for sustained outcomes.

5. Of the data reported in this section, are there any areas where the county would like to provide additional context for DHCS's understanding?
    ☒ **Yes** ☐ No
    a. If yes, please explain: **There are data sharing limitations across agencies (i.e. corrections, probation, child welfare, hospitals, etc.). Monterey County Behavioral Health relies on data entered in the EHR or manual counts shared from other entities. Data for the following fields were not available at the time of plan development and therefore are not reported in this Integrated Plan: the number of individuals who experienced unsheltered homelessness; the number who moved from unsheltered homelessness to being sheltered (emergency shelter, transitional housing, or permanent housing); and, of those who moved from unsheltered to sheltered, the number who transitioned into permanent housing. In addition, the following institutionalization measures are reported as 000 because discrete counts were not available: the number of individuals admitted for 14-day periods of intensive treatment, the number admitted for 30-day periods of intensive treatment, and the number admitted for 180-day post-certification intensive treatment. Data for 14-day and 30-day involuntary holds were combined in the available source data and could not be reliably separated into the required categories.**

6. Please describe the local data used during the planning process: Electronic health record (Avatar) and LPS data from local hospitals (NMC/CHOMP):

DRAFT

County of Monterey used multiple local quantitative and administrative data sources to inform planning for Behavioral Health Services Act (BHSA) implementation. Primary analyses relied on data extracted from the County's behavioral health electronic health record (EHR) and quality improvement reporting systems for Fiscal Year 2024–25, inclusive of county-operated and contracted providers and the full behavioral health population, not limited to MHSA-funded services.

For children and youth, the County reviewed distinct counts of individuals receiving Medi-Cal Specialty Mental Health Services, substance use disorder prevention, early intervention, and treatment services, including Drug Medi-Cal and DMC-ODS. Program-level data were examined for youth involved in justice-involved services, early psychosis and first episode programs, child welfare–associated programs, and those experiencing homelessness or housing instability. Data on youth reentering the community from juvenile justice settings and those receiving acute psychiatric inpatient care were also reviewed.

For adults and older adults, the County analyzed EHR and administrative data on utilization of Medi-Cal Specialty Mental Health Services, DMC and DMC-ODS services, and co-occurring mental health and substance use disorder treatment. Additional analyses focused on populations experiencing homelessness or housing instability, justice involvement including diversion and forensic programs, reentry from incarceration, acute psychiatric inpatient care, and individuals dually eligible for Medicare and Medi-Cal.

The County also reviewed Lanterman-Petris-Short (LPS) Act reporting related to involuntary treatment episodes, Department of State Hospital placements, and community-based restoration programs to assess demand across the crisis continuum of care.

The County recognizes limitations related to cross-system data sharing with hospitals, corrections, probation, and child welfare partners. As a result, some data rely on EHR intake fields or manual counts provided by partner agencies. Despite these limitations, the combined data sources provided a comprehensive local foundation to inform BHSA planning and priority population identification.

7. If desired, provide documentation on the local data used during the planning process (add/subtract supporting document bullets as needed):

Local CARE Act Implementation

1. Identify the specific service components within your 3-year Integrated Plan that will support CARE participants. Explain how the county will ensure these individuals receive priority access and

specialized coordination within the broader behavioral health continuum, including housing if appropriate.

Under the BHSA 3-year Integrated Plan, the county supports Community Assistance, Recovery, and Empowerment (CARE) Act participants with FSP-ICM and BHSS ASOC funding components by providing a dedicated team of service providers and leveraging existing resources to include Full-Service Partnerships (FSP), integrated dual-diagnosis substance use services, and mobile crisis response teams. To ensure priority access, the county established expedited engagement and assessment procedures, and contractual mandates for community providers to fast-track referrals for CARE participants. Specialized coordination is managed by the CARE Act treatment team that bridges the gap between the participant, behavioral health and housing providers, and the court. Participants receive individualized treatment plans to meet their needs that can include medication support services, individual counseling, therapy, psychosocial rehabilitation, crisis intervention and peer support services with the goal of fostering long-term recovery. Furthermore, the county guarantees priority placement into a tiered housing continuum, funded with BHSA Housing Intervention dollars under rental subsidies, operating subsidies, housing transition services, and tenancy sustaining services. Supports include residential care facilities, transitional and permanent supported housing, and Behavioral Health Bridge Housing at the Hope Housing Marina program which helps homeless / at risk of homeless with serious mental illness and moderate to severe substance use disorders transition into housing and stabilize while being connected to on-site services and help in their transition to secure long-term residential and clinical stability.

2. Describe how CARE referral pathways will be integrated into existing referral and service pathways within the county behavioral health system.

The entire CARE pathway is seamlessly integrated into our current referral system. Our internal Behavioral Health treatment teams serving those 18 years of age or older have been trained on CARE eligibility criteria by our specialized CARE team. We have set up a consultation model so internal treatment teams can request a case consultation to review CARE eligibility criteria with the team, and our CARE team can move forward with filing petitions in appropriate cases to expedite the process. Information is tracked in our Electronic Health Record (Avatar) system for real-time cross-departmental visibility. We leverage existing systems and workflows and utilize existing mobile crisis units to identify candidates or re-link active persons of care to treatment. To maximize community awareness and seamless entry, we partner closely with external partners / stakeholders such as hospitals, public guardian, county contracted providers, community-based organizations, law enforcement and other first responders, the county jail and their embedded treatment provider. We strive to improve communication and coordination with state entities such as CDCR and DSH around the filing of CARE petitions. We have a dedicated page on our public-facing website that provides information on CARE and has a secure referral mechanism for community members, partners or other interested stakeholders to provide our team information or make a referral to our team to follow-up on. We provided numerous presentations to community, partners, providers, other interested stakeholders leading up to the CARE go-live on 12/1/2024 and continue this work to date. Once identified, CARE participants are connected through the county's existing access, assessment, treatment,

housing, crisis, and care coordination pathways, allowing CARE services to function as an enhancement to existing behavioral health workflows rather than a separate service system.

3. Describe the process for identifying and redirecting individuals who are potentially eligible for CARE to alternative pathways when a formal petition is not required or appropriate. For individuals redirected from CARE, describe how the county will confirm and document successful connection to services.

To identify and redirect individuals who are potentially eligible for CARE to alternative pathways when a formal petition is not required or appropriate, the county utilizes a supportive "warm hand-off" approach. If an individual is determined to be ineligible for CARE court or if a formal petition is deemed inappropriate, the county ensures they are never left to navigate the system alone; instead, dedicated CARE staff immediately step in to link them directly to appropriate level of care resources. This redirection process includes scheduling appointments and supporting linkage of individuals with the Mental Health Plan, Managed Care Plan, and/or DMC-ODS system as clinically indicated. The team also provides referrals and linkages to additional social service and housing resources as appropriate. To confirm and document a successful connection to services, the county tracks each individual's transition through to their initial intake, maintaining a rigorous standard of accountability that has successfully connected every single individual not accepted into the CARE program to an appropriate form of mental health treatment to date.

Statewide Behavioral Health Goals

Population-Level Health Measures

The statewide behavioral health goals and associated population-level behavioral health measures must be used in the county Behavioral Health Services Act (BHSA) planning process and should inform resource planning and implementation of targeted interventions to improve outcomes for the fiscal year(s) being addressed in the IP. For more information on the statewide behavioral health goals, please see the Policy Manual Chapter 2, Section C.

Please review your county's status on each population-level behavioral health measure, including the primary measures and supplemental measures for each of the 14 goals. All measures are publicly available, and counties are able to review their status by accessing the measures via DHCS-provided instructions and the County Population-Level Behavioral Health Measure Workbook.

As part of this review, counties are required to evaluate disparities related to the six priority statewide behavioral health goals. Counties are encouraged to use their existing tools, methods, and systems to support this analysis and may also incorporate local data sources to strengthen their evaluation.

Please note that several Phase 1 measures include demographic stratifications – such as race, sex, age, and spoken language – which are included in the prompts below.

Counties may also use local data to conduct additional analyses beyond these demographic categories to strengthen their evaluation and better understand community needs.

For related policy information, refer to **E.6.1 Population-level Behavioral Health Measures**.

Priority Statewide Behavioral Health Goals for Improvement

Counties are required to address the six priority statewide behavioral health goals in this section. Cities should utilize data that corresponds to the county they are located within. As such, the City of Berkeley should use data from Alameda County and Tri-City should use data from Los Angeles County. For related policy information, refer to **E.6.2 Primary and Supplemental Measures**.

Access to Care: Disparities Analysis

1. For any disparities observed, please provide a written summary of your findings, including the measures and population groups experiencing disparities and a description of the data that supported your analysis: **Across behavioral health service penetration measures, county rates vary in comparison to statewide averages, with differences observed by age, race/ethnicity, sex, and written language. For Specialty Mental Health Services (SMHS), the children and youth rate (3.7%) is below the statewide rate (4.2%), while the adult rate (3.9%) is slightly above (3.8%). Lower penetration is observed among younger children (0–11) and older adults (69+). Asian/Pacific Islander and Hispanic individuals have lower rates than other groups, as do males compared to females. Using written language data, Spanish-speaking individuals have lower penetration than English-speaking individuals. For Non-Specialty Mental Health Services (NSMHS), the children and youth rate (16.6%) is above the statewide average (15.5%), while the adult rate (8.5%) is below (10.6%). Lower penetration is seen among children ages 6–11, young adults (18–20), and older adults (69+). Asian/Pacific Islander, Black, and Hispanic individuals have lower rates than White individuals. Among adults, females have higher penetration than males, while youth rates are similar by sex. Spanish-speaking individuals have lower rates than English-speaking individuals. For Drug Medi-Cal Organized Delivery System (DMC-ODS) services, both children and youth (0.2%) and adults (1.5%) have rates below statewide averages. Within available data, Asian/Pacific Islander and Hispanic youth have lower penetration rates, while Native American and White youth have higher rates. Overall, lower service penetration is observed among Asian/Pacific Islander, Hispanic, and Spanish-speaking populations, as well as among younger children and older adults. Findings should be interpreted cautiously given data limitations and variation in reporting.**
   For several required indicators, including Drug Medi-Cal penetration rates, homelessness, institutionalization measures, conservatorships, and follow-up after emergency department visits for substance use, demographic disparity data were not available through the source

datasets used for this analysis. In these cases, the limitation reflects that the source data either do not report disparities at the required level of detail or the County does not have access to the underlying data needed to produce reliable demographic subgroup analyses. As a result, the County was unable to assess disparities across demographic groups for these measures using a methodology that would be consistent with statewide reporting standards and comparable to analyses conducted by other counties. This limitation reduces the County's ability to fully evaluate equity differences for certain populations and should be considered when interpreting the findings. During the BHSA implementation period, Monterey County Behavioral Health will continue working with state agencies, local partners, and available data systems to identify opportunities to obtain more detailed population-level information and strengthen future equity analyses as additional data become available.

Access to Care: Cross-Measure Questions

1. Please describe what programs, services, partnerships, or initiatives the county is planning to strengthen or implement beginning July 1, 2026 that may increase your county's level of access to care. In your response, please describe how you plan to address measures where your status is below the statewide average or median, within the context of local needs. Additionally, please refer to any data that was used to inform new programs, services, partnerships, or initiatives the county is implementing (e.g., developing an intervention targeting a sub-population in which data demonstrates they have poorer outcomes): **Using BHSA funding, Monterey County Behavioral Health will support a coordinated set of outpatient, crisis, FSP, and community-based services to improve access to behavioral health care, particularly for populations with lower service penetration and higher unmet need. County data indicate access gaps among children and youth, Spanish-speaking residents, adults with SMI and SUD, and individuals who frequently rely on crisis or ED settings for care. To address these gaps, Monterey County Behavioral Health will fund outpatient mental health services across multiple regions that support early identification, timely engagement, and linkage to ongoing care. These services will incorporate bilingual and culturally responsive approaches to address disparities observed among Latino and other underserved populations. Monterey County Behavioral Health will continue to fund FSP and intensive care coordination programs for adults with the highest levels of need. These programs emphasize community-based engagement, individualized service planning, and coordination with housing, medical, and social service partners. Local data showing elevated crisis utilization and repeated ED use among individuals with complex behavioral health needs informed this approach. BHSA funding will also support crisis response and follow-up services that provide assessment, stabilization, and linkage to outpatient care following behavioral health crises. Post-hospital care transition teams will engage individuals discharged from inpatient and ED settings across regions to support medication continuity, appointment follow-through, and warm handoffs to outpatient and FSP services. Workforce training and system-level supports will promote**

consistent practice and coordination across access points, including outpatient, crisis, and community-based settings. These strategies are informed by analysis of service penetration rates, crisis and ED utilization, and community and stakeholder input, and are intended to support timely access to care and equitable service delivery countywide.

Homelessness: Disparities Analysis

1. For any disparities observed, please provide a written summary of your findings, including the measures and population groups experiencing disparities and a description of the data that supported your analysis: **Across homelessness-related measures, county rates are generally above statewide averages, with some variation by age, grade level, and race/ethnicity. For the Point-in-Time (PIT) Count, the overall homelessness rate (61.3 per 10,000) is higher than the statewide rate (48.0), as are the rates for people experiencing homelessness with serious mental illness (15.5 vs. 11.5) and substance use disorder (12.7 vs. 11.0). The rate of people accessing Continuum of Care (CoC) services is lower (62.3 vs. 91.2), suggesting differences in service engagement or availability. For the Percent of K–12 Public School Students Experiencing Homelessness, the county rate (16.8%) is substantially higher than the statewide rate (5.3%). Within this measure, differences are observed by grade level, with higher rates among younger students (Transitional Kindergarten–Grade 6, 21.1–24.8%)**

compared with middle and high school students (Grades 7–12, 8.4–10.8%). By race and ethnicity, American Indian or Alaska Native (25.1%) and Hispanic (19.0%) students have higher rates of homelessness than other groups, while White (4.0%) and Asian/Pacific Islander (7.2%) students have lower rates. Overall, data show higher rates of homelessness across multiple measures compared to statewide averages, with notable differences by grade level and race/ethnicity among K–12 students. These findings should be interpreted cautiously given potential differences in reporting methods, service access, and regional housing conditions.

Homelessness: Cross-Measure Questions

1. Please describe what programs, services, partnerships, or initiatives the county is planning to strengthen or implement beginning July 1, 2026 that may reduce your county's level of homelessness in the population experiencing severe mental illness, severe SUD, or co-occurring conditions. In your response, please describe how you plan to address measures where your status is below the statewide average or median, within the context of local needs. Additionally, please refer to any data that was used to inform new programs, services, partnerships, or initiatives the county is implementing (e.g., developing an intervention targeting a sub-population in which data demonstrates they have poorer outcomes): **Beginning July 1, 2026, Monterey County Behavioral Health will use BHSA funding and local data to strengthen housing-linked behavioral health services, care coordination, and cross-system partnerships intended to reduce homelessness among individuals experiencing serious mental illness (SMI), substance use disorders (SUD), and co-occurring conditions.**

   Monterey County Behavioral Health used Point-in-Time (PIT) Count data, Continuum of Care (CoC) utilization data, emergency department and crisis utilization trends, and local indicators of homelessness among adults and youth to identify areas where local homelessness and behavioral health needs exceed statewide averages or where disparities are present. Data indicating elevated homelessness rates among individuals with SMI and SUD, as well as lower CoC service utilization rates, identified the need to strengthen outreach, engagement, and coordination across behavioral health, housing, and community-based systems. In response to these findings, Monterey County Behavioral Health plans to strengthen partnerships with housing providers, CoC partners, crisis providers, hospitals, and community-based organizations to improve access to housing-linked behavioral health services and continuity of care.

   Local data also identified higher rates of homelessness and behavioral health needs among younger populations and among Hispanic and American Indian or Alaska Native individuals. These findings will be used to inform outreach, engagement, and care coordination

strategies intended to improve access to services for populations experiencing disparities or who have historically been underrepresented within behavioral health and housing systems.

To address the identified needs reflected in local data, Monterey County Behavioral Health will continue funding intensive, community-based behavioral health services that support housing stability for individuals with the highest levels of need. Full Service Partnership (FSP) and care coordination programs will focus on outreach, linkage to treatment, ongoing service engagement, and coordination with housing and supportive service providers for individuals experiencing homelessness or at risk of homelessness. Monterey County Behavioral Health also plans to strengthen coordinated approaches across outpatient, crisis, and housing-related services to support transitions from crisis settings and emergency departments into stable housing and ongoing behavioral health care.

Monterey County Behavioral Health will continue to use available local and statewide data to monitor housing stability outcomes, service utilization, and disparities across populations in order to assess program effectiveness, guide future resource allocation, and inform ongoing adjustments to programs, services, partnerships, and initiatives.

Institutionalization

Per Per 42 CFR 435.1010, an institution is “an establishment that furnishes (in single or multiple facilities) food, shelter, and some treatment or services to four or more persons unrelated to the proprietor." Institutional settings are intended for individuals with conditions including, but not limited to, behavioral health conditions.

Care provided in inpatient and residential (i.e., institutional) settings can be clinically appropriate and is part of the care continuum. Here, institutionalization refers to individuals residing in these settings longer than clinically appropriate. Therefore, the goal is not to reduce stays in institutional settings to zero. The focus of this goal is on reducing stays in institutional settings that provide a Level of Care that is not – or is no longer – the least restrictive environment.

Institutionalization: Disparities Analysis

1. For any disparities observed, please provide a written summary of your findings, including the measures and population groups experiencing disparities and a description of the data that supported your analysis: **Across institutionalization and crisis service utilization measures, data show variation in service use across age, race/ethnicity, and language groups, though findings should be interpreted with caution due to limited subgroup data availability. For SMHS Crisis Residential Treatment Services (Adults), the county's utilization (41.0 days per beneficiary) is above the statewide rate (22.8). Within this measure, higher utilization is observed among adults ages 33–44 (42.35 days) and 57–68 (43.65 days) compared with younger groups. By race and ethnicity, White adults (45.55 days) have higher utilization than Hispanic adults (35.69 days). Utilization by sex is similar for males and females, and by written language, English-speaking adults (41.0 days) show higher utilization than the statewide average, while data for Spanish speakers were not available. For SMHS Crisis Intervention (Adults), the county's utilization (124.0 minutes per beneficiary) is below the statewide rate (240.1). Within this measure, lower utilization is observed among adults ages 45–56 (145.98 minutes). By race and ethnicity, Hispanic (161.74 minutes) and "Other" (158.20 minutes) adults have lower utilization than White (204.03 minutes) and Black (207.73 minutes) adults. Females (166.01 minutes) receive slightly fewer minutes than males (171.38 minutes), and Spanish-speaking adults (148.59 minutes) receive fewer minutes than English-speaking adults (174.13 minutes). Overall, while county-level utilization varies by measure, subgroup differences are most evident across age, race/ethnicity, and language, with generally lower utilization among Hispanic and Spanish-speaking adults, as well as some middle-age groups. These results highlight patterns worth further review to better understand access and service engagement factors.**

Institutionalization: Cross-Measure Questions

2. Please describe what programs, services, partnerships, or initiatives the county is planning to strengthen or implement beginning July 1, 2026 that may reduce your county's rate of institutionalization. In your response, please describe how you plan to address measures where your status is below the statewide average or median, within the context of local needs. Additionally, please refer to any data that was used to inform new programs, services, partnerships or initiatives the county is implementing (e.g., enhancing crisis response services targeting a sub-population in which data demonstrates they have poorer outcomes): **Using BHSA funding, Monterey County Behavioral Health will support community-based, crisis, and**

follow-up services intended to reduce avoidable institutionalization among adults experiencing SMI and co-occurring SUD. County data show higher utilization of Crisis Residential Treatment services compared to statewide averages, alongside lower utilization of Crisis Intervention services, indicating opportunities for earlier intervention and stabilization in less restrictive settings. To address these patterns, Monterey County Behavioral Health will continue to fund outpatient, crisis response, and intensive care coordination programs that support assessment, stabilization, and linkage to ongoing community-based care. Crisis intervention and follow-up services will support continuity following behavioral health crises and are intended to reduce reliance on extended crisis residential stays. FSP and intensive case management services will focus on individuals with repeated crisis utilization or prolonged stays in institutional settings. These programs emphasize individualized service planning, community-based outreach, and coordination with medical, housing, and social service partners. Local utilization data indicating higher crisis residential use among middle-aged and older adults informed this approach. Monterey County Behavioral Health will also support culturally responsive engagement approaches to address lower crisis intervention utilization observed among Hispanic and Spanish-speaking adults. Workforce training and system coordination will promote consistent practice across access points, including outpatient, crisis, and residential settings.

The state-provided data did not include age-group analysis for Crisis Residential Treatment or Crisis Intervention utilization; therefore, MCBH cannot confirm from the available state dataset whether the observed pattern is consistent across all age groups. This limits the County's ability to determine whether lower Crisis Intervention utilization is more pronounced among specific populations, including children/youth, adults, or older adults. MCBH will continue to monitor available state and local data and will assess opportunities to review crisis utilization by age group as local reporting capacity and state-provided measures evolve.

To strengthen earlier intervention and stabilization in less restrictive settings, MCBH will continue implementing Early Intervention programs that support crisis prevention, timely access, and linkage to care. These include Behavioral Health Crisis, Dispatch, and Mobile Response Services; Access Post-Hospital/Crisis Follow-Up; MCHOME Homeless Outreach & Engagement; 211 referral and linkage services; Access to Treatment regional programs; and early childhood, child welfare, youth, and family-serving programs designed to identify needs earlier and connect individuals to appropriate supports.

Justice Involvement: Disparities Analysis

1. For any disparities observed, please provide a written summary of your findings, including the measures and population groups experiencing disparities and a description of the data that supported your analysis: **Across justice-involvement measures, county rates show differences when compared to statewide averages, with several demographic groups exhibiting variation in arrest and recidivism patterns. For adult and juvenile arrest rates, the county's adult arrest rate (2,085.5 per 100,000) is below the statewide average (2,440.2), while the juvenile arrest rate (530.8 per 100,000) is above the statewide rate (371.5). Within this measure, differences are observed by age, with young adults ages 20–39 (3,190–3,506 per 100,000) showing higher arrest rates than older adults (1,521 per 100,000 ages 40–69). Differences are also seen by race and ethnicity, with Black residents (4,539 per 100,000) having higher arrest rates than Hispanic (1,774 per 100,000) and White (1,275 per 100,000) residents. By sex, both adults and**

youth show higher arrest rates among males (3,150 per 100,000 adults; 655 per 100,000 youth) compared with females (820 per 100,000 adults; 243 per 100,000 youth). For the Adult Recidivism Conviction Rate, the county's rate (45.4%) is higher than the statewide rate (39.6%). Within available data, differences are observed by age, with adults ages 20–44 (51.9–43.6%) showing higher recidivism rates than older adults. Differences are also present by race and ethnicity, with Black residents (50.0%) having higher recidivism rates than Hispanic (47.1%) and White (36.8%) residents. By sex, males (45.6%) show higher recidivism rates than females (42.4%). For the Incompetent to Stand Trial (IST) rate, the county (23.0 per 100,000) is above both the statewide average (14.3) and median (17.7). Demographic subgroup data were not available for this measure, so no disparities could be assessed.

Justice Involvement: Cross-Measure Questions

1. Please describe what programs, services, partnerships, or initiatives the county is planning to strengthen or implement beginning July 1, 2026 that may reduce your county's level of justice-involvement for those living with significant behavioral health needs. In your response, please describe how you plan to address measures where your status is below the statewide average or median, within the context of local needs. Additionally, please refer to any data that was used to inform new programs, services, partnerships or initiatives the count is implementing (e.g., developing an intervention targeting a sub-population in which data demonstrates they have poorer outcomes): **Using BHSA funding, Monterey County Behavioral Health will support community-based behavioral health services and cross-system coordination intended to reduce justice involvement among individuals experiencing SMI, SUD, or co-occurring conditions. Local data show elevated juvenile arrest rates, higher adult recidivism compared to statewide averages, and an Incompetent to Stand Trial rate above both the statewide average and median, indicating opportunities for earlier intervention and diversion. To address these trends, Monterey County Behavioral Health will continue to fund outpatient, crisis, and intensive care coordination services that support identification of behavioral health needs, stabilization, and continuity of care for individuals at risk of justice involvement. These services support follow-up after crises and coordination across behavioral health, social services, and community partners to reduce escalation into the justice system. FSP and intensive case management programs will focus on individuals with repeated justice contact, including young adults and adults with complex behavioral health needs. These programs emphasize sustained engagement, individualized service planning, and coordination with housing, medical, and reentry-related supports. Local arrest and recidivism data indicating higher rates among young adults and males informed this approach. Monterey County Behavioral Health will also support culturally responsive engagement approaches to address disparities observed among Black residents and other disproportionately impacted groups. Workforce training and system coordination will promote consistent screening, referral, and follow-up across access points, including crisis services and community-based programs. These strategies are informed by analysis of arrest**

rates, adult recidivism conviction rates, and Incompetent to Stand Trial data and are intended to support reduced justice involvement through timely access to community-based behavioral health services.

Monterey County Behavioral Health will also continue supporting the Community Crisis Line, 988 coordination, crisis dispatch services, and countywide mobile crisis response teams serving both youth and adults. These services provide opportunities to de-escalate crises, stabilize individuals in the community, and connect them to behavioral health services before justice system involvement occurs.

Monterey County Behavioral Health will continue coordinating behavioral health services across juvenile justice, adult justice, court, and reentry settings to support early identification of behavioral health needs and strengthen continuity of care during transitions back into the community. The County provides direct behavioral health services within juvenile justice settings and collaborates with behavioral health providers serving individuals in the adult jail system to support assessment, treatment engagement, discharge planning, and connection to community-based services. These efforts include coordination with County Access programs, diversion initiatives, court-based collaborations, and CalAIM Justice-Involved Behavioral Health Linkages activities designed to improve continuity of care and reduce gaps in service access following release from institutional settings. Through these partnerships, the County seeks to strengthen pathways to treatment, housing, recovery supports, and other community-based resources for justice-involved individuals with significant behavioral health needs.

Removal of Children from Home: Disparities Analysis

1. For any disparities observed, please provide a written summary of your findings, including the measures and population groups experiencing disparities and a description of the data that supported your analysis: **For Children in Foster Care, the county's rate (149.2 per 100,000) is below the statewide average (525.1). Within this measure, differences are observed by age, with infants under 1 year (394 per 100,000) having higher foster care rates than older age groups (72–190 per 100,000). Differences are also present by sex, as female children (134 per 100,000) have slightly higher rates than male children (115 per 100,000). For Open Child Welfare Case SMHS Penetration Rates, the county's rate (45.9%) is slightly above the statewide rate (43.0%). Within this measure, younger children ages 0–2 (27.2%) and young adults ages 18–20 (31.6%) have lower penetration rates than other age groups (46.1–61.4%). Differences are also observed by race and ethnicity, with Black children (60.1%) showing higher penetration rates than Hispanic (44.2%) and White (56.9%) children. By sex, males (41.6%) have lower penetration rates than females (50.2%). For Child Maltreatment Substantiations, the county's substantiation rate (2.2 per 1,000) is below the statewide rate (5.7). Within available data, infants under 1 year (7.8 per 1,000) have higher substantiation rates than older children (1.7–2.4 per 1,000), though still below statewide rates for infants. Differences are also observed by race and ethnicity, with Black children (10.3 per 1,000) having higher substantiation rates than Latino (2.3 per 1,000) and White (2.0 per 1,000) children. Substantiation rates are similar by sex.**

Removal of Children from Home: Cross Measure Questions

1. Please describe what programs, services, partnerships, or initiatives the county is planning to strengthen or implement beginning July 1, 2026 that may reduce your county's level of the removal of children from home. In your response, please describe how you plan to address measures where your status is below the statewide average or median, within the context of local needs. Additionally, please refer to any data that was used to inform new programs, services, partnerships or initiatives the count is implementing (e.g., developing an intervention targeting a sub-population in which data demonstrates they have poorer outcomes): **Using BHSA funding, Monterey County Behavioral Health will support early intervention, outpatient, and family-centered behavioral health services intended to promote child and family stability and reduce the need for removal of children from their homes. County data show foster care**

entry and child maltreatment substantiation rates below statewide averages, while SMHS penetration among children involved in the child welfare system varies by age, race and ethnicity, and sex, indicating opportunities to support early engagement and continuity of care. To address these patterns, Monterey County Behavioral Health will continue to fund outpatient mental health and early intervention services for children, youth, and families, with a focus on timely access, caregiver engagement, and coordination with child welfare partners. These services support identification of behavioral health needs and coordination of care, particularly for infants and young children who show higher rates of foster care placement and substantiated maltreatment. Monterey County Behavioral Health will also support coordination between behavioral health providers and child welfare services to improve access to SMHS for children with open child welfare cases. FSP and intensive care coordination programs will focus on children and transition-age youth with complex needs, emphasizing individualized service planning and family-centered approaches. Local data showing lower SMHS penetration among children ages 0–2 and youth ages 18–20 informed this approach. Culturally responsive and trauma-informed practices will be supported to address disparities observed among Black children and other disproportionately impacted groups. Workforce training and cross-system collaboration will promote consistent referral, engagement, and follow-up across behavioral health and child welfare settings. These strategies are informed by foster care, SMHS penetration, and child maltreatment data and are intended to support family stability through coordinated behavioral health services.

Untreated Behavioral Health Conditions: Disparities Analysis

1. For any disparities observed, please provide a written summary of your findings, including the measures and population groups experiencing disparities and a description of the data that supported your analysis: **For Follow-Up After Emergency Department Visits, the county's follow-up rate for substance use (FUA-30) is above the statewide average (41.4% vs. 28.8%), while the mental illness follow-up rate (FUM-30) is comparable to statewide levels (37.9% vs. 38.2%). Demographic subgroup data were not available for these measures, so no disparities could be assessed. For the Adults with Unmet Need for Mental Health or Substance Use Services measure, the county's rate (65.4%) is above both the statewide average (48.4%) and median (50.5%). Within this measure, differences are observed by age, with adults ages 18–24 (69.8%) reporting higher unmet need than adults ages 25–64 (47.5%) and older adults ages 65+ (43.7%). Differences are also seen by sex, as males (60.1%) report higher unmet need than females (47.3%). By race and ethnicity, available data show variation, with Asian/Pacific Islander (65.3%) and Hispanic (57.4%) adults reporting higher unmet need than Black (37.0%) and White (38.1%) adults.**

Untreated Behavioral Health Conditions: Cross-Measure Questions

1. Please describe what programs, services, partnerships, or initiatives the county is planning to strengthen or implement beginning July 1, 2026, that may decrease your county's level of untreated behavioral health conditions. In your response, please describe how you plan to address measures where your status is below the statewide average or median, within the context of local needs. Additionally, please refer to any data that was used to inform new programs, services, partnerships, or initiatives the county is implementing (e.g., developing an intervention targeting a sub-population in which data demonstrates they have poorer outcomes): **The Follow-Up After Hospitalization measures (FUA and FUM) are quality measures that assess whether individuals receive timely follow-up care after a psychiatric hospitalization or emergency department visit for a mental health or substance use condition. These measures are intended to support continuity of care, reduce avoidable crises, and improve recovery outcomes.**
Consistent with the CalMHSA Data Explainer Series, these measures are shared accountability measures between the county Mental Health Plan (MHP) and Managed Care Plans (MCPs). Performance depends on coordinated efforts across hospitals, behavioral

health providers, primary care providers, care managers, and health plans to ensure members receive appropriate follow-up services within required timeframes.
Because responsibility for care transitions and follow-up services is shared across delivery systems, successful performance on FUA and FUM measures requires strong collaboration, timely communication, and coordinated outreach between Managed Care Plans and Mental Health Plans.
Using BHSA funding, Monterey County Behavioral Health will support early identification, outreach, and access to behavioral health services intended to reduce the prevalence of untreated mental health and substance use conditions. County data show that while follow-up after ED visits for substance use and mental illness is comparable to or exceeds statewide averages, a high proportion of adults report unmet behavioral health needs, particularly young adults, males, and Asian/Pacific Islander and Hispanic residents. To address unmet need, Monterey County Behavioral Health will continue to fund outpatient mental health and SUD services that support timely access, early engagement, and continuity of care. These services are intended to reduce delays between identification of need and initiation of treatment, particularly for populations reporting higher unmet need. Monterey County Behavioral Health will also support crisis response, ED follow-up, and care coordination activities that promote timely linkage to outpatient and ongoing services following acute episodes. Local FUA-30 and FUM-30 performance informed continued use of follow-up and engagement strategies that support treatment initiation and retention. Outreach and engagement efforts will serve all populations, but prioritize populations with elevated unmet need, including young adults and underserved racial and ethnic groups, through culturally responsive and community-based approaches. Workforce training and system coordination will promote consistent screening, referral, and follow-up across access points. These strategies are informed by ED follow-up measures and self-reported unmet need data and are intended to support reduced untreated behavioral health conditions through improved access, engagement, and continuity of care across the system.

County-Selected Statewide Population Behavioral Health Goals

For related policy information, refer to **3.E.6 Statewide Behavioral Health Goals**.

Based on your county's performance or inequities identified, select **at least one additional goal** to improve on as a priority for the county for which your county is performing below the statewide rate/average on the primary measure(s). For each county-selected goal, provide the information requested below.

1. Goal #1 (select one)
   ☐ Care Experience
   ☐ Engagement in School
   ☐ Engagement in Work
   ☒ **Overdose**
   ☐ Prevention and Treatment of Co-Occurring Physical Health Conditions
   ☐ Quality of Life
   ☐ Social Connection
   ☐ Suicides
   a. Please describe why this goal was selected: **Through the BHSA Community Planning Process, the County assessed the statewide population behavioral health goals to determine which goal is best suited to reflect system-wide change as BHSA is**

implemented. The County prioritized goals that aligned with the strategic priorities of system partners and those supported by existing measurement infrastructure that is well-established, regularly updated, and capable of capturing progress across multiple points of the Behavioral Health Continuum of Care. Based on this assessment, the County selected Reduce Overdoses for inclusion in the Integrated Plan.

b. What disparities did you identify across demographic groups or priority populations among the Additional Statewide Behavioral Health Goals? For any disparities observed, please provide a written summary of your findings, including the measures and population groups experiencing disparities and a description of the data that supported your analysis: **For all drug-related overdose deaths, Monterey County's rate (31.6 per 100,000) is higher than the statewide rate (28.8 per 100,000). Death rates are low from ages 0–14, then rise in late adolescence and young adulthood, peaking at 25–29 (52.7 per 100,000) and 35–39 (73.6 per 100,000). Adults from the mid-twenties through midlife experience the highest overdose mortality. By race and ethnicity, rates are highest among Black and White residents and lower among Hispanic and Asian/Pacific Islander residents, indicating a need to focus prevention and treatment in Black and White communities while maintaining access for other groups. Rates for Alaskan Native/American Indian residents were not available at the county level. Males have higher overdose death rates than females (46.5 vs. 14.8), so men should be a key focus for outreach and engagement. For all drug-related overdose emergency department (ED) visits, Monterey County's rate (145.4 per 100,000) is slightly higher than the statewide rate (143.8). ED visit rates are highest for ages 25–29 (316.2 per 100,000), 30–34 (244.8 per 100,000), and 35–39 (217.3 per 100,000), with additional peaks among very young children and adolescents/young adults (183.0 for ages 0–4; 202.7 for 15–19; 169.6 for 20–24). Nonfatal overdoses occur across the lifespan but are most concentrated in the late twenties and early thirties. By race and ethnicity, ED visit rates are highest among Black residents (about 737.6) per 100,000, followed by Alaskan Native/American Indian (about 378.6 per 100,000) and White residents (about 163.6 per 100,000), with lower rates among Hispanic (about 131.6) and Asian/Pacific Islander residents (about 47.7 per 100,000). Males also have higher overdose ED visit rates than females (179.2 vs. 106.5), highlighting the need to tailor harm reduction, ED follow-up, and treatment engagement strategies for men in the highest-risk groups.**

The Perception of Functioning Domain Score (CPS) and Perception of Social Connectedness Domain Score (CPS) measures were not available through the data sources provided for the Integrated Plan and therefore could not be reported. MCBH recognizes the importance of these indicators, particularly for older adults and individuals with disabilities, and will continue to monitor opportunities to incorporate these measures into future planning and reporting efforts as data become available.

MCBH will continue supporting services that promote community integration, social connection, recovery, and independent functioning across the behavioral health continuum.

c. Please describe what programs, services, partnerships, or initiatives the county is planning to strengthen or implement beginning July 1, 2026 that may improve your county's level of the selected goal and refer to any data that was used to make this decision (e.g., developing an intervention targeting a sub- population in which data demonstrates they have poorer outcomes): **Monterey County Behavioral Health is implementing a continuum of substance use prevention, treatment, and harm-reduction initiatives that prioritize low-barrier access and populations at highest risk of overdose. Drug Medi-Cal Organized Delivery System (DMC-ODS) provides a spectrum of substance use disorder services for Medi-Cal–eligible youth and adults, including screening, outpatient and residential treatment, withdrawal management, medication-assisted treatment (MAT), case management, and recovery supports with a focus on harm reduction and rapid connection to care. Substance Use Prevention and Early Intervention (PEI) programs, supported by the Substance Use Block Grant (SUBG) and Opioid Settlement Funds (OSF), deliver school-embedded and community-based prevention for children, adolescents, and transition-age youth, offering psychoeducation, skill-building, and evidence-based interventions that strengthen protective factors and reduce progression to substance use disorder and overdose. The Street Medicine and Substance Use Response Team extends overdose prevention and treatment linkage into encampments, shelters, and other non-traditional settings, bringing medical care, harm-reduction services, and connections to MAT directly to people experiencing homelessness, co-occurring conditions, and repeated non-fatal overdoses who face the greatest barriers to clinic-based care. The Emergency Room Substance Use Navigator Program embeds navigators in the hospital emergency department to engage individuals at the point of overdose or substance-related crisis, provide bedside screening, brief intervention, warm handoffs to MAT, and referrals to ongoing substance use and mental health services with short-term follow-up. These strategies will be implemented in collaboration with culturally responsive providers and community-based organizations to help ensure overdose prevention, treatment, and recovery services are accessible and responsive to the needs of diverse populations disproportionately impacted by substance use disorders and overdose. MCBH will monitor available indicators including overdose deaths, emergency department visits related to substance use, follow-up after emergency department visits for substance use, engagement in treatment services, utilization of DMC-ODS services, and other available population health measures to assess progress and inform ongoing quality improvement efforts.**

5. Please describe and provide documentation (such as meeting minutes) to support how diverse stakeholder viewpoints were incorporated into the development of the Integrated Plan, including any community-identified strengths, needs, and priorities:

A Commitment to Meeting People Where They Are

The County of Monterey implemented a culturally and linguistically responsive engagement strategy to reach communities that are traditionally underserved or underrepresented in behavioral health planning. Outreach included the distribution of translated and culturally appropriate materials and surveys, including in non-U.S. and Indigenous languages, as well as small-group and one-on-one assistance to support individuals who needed help reading, understanding, or completing materials. To further reduce barriers to participation, County

partners conducted outreach directly in community settings, including onsite engagement with farmworkers at agricultural worksites.
In-person engagement was a central feature of this approach. More than half of all BHSA stakeholder engagements took place face-to-face, allowing County partners to meet people in familiar, accessible environments and support real-time dialogue. These in-person interactions helped build trust, clarify complex policy changes, and strengthen the quality of feedback received, particularly from individuals and families with lived experience.

Stakeholder Engagement Through the Behavioral Health Transformation (BHT) Collaborative
In response to countywide stakeholder engagement activities conducted in early 2025, Monterey County Behavioral Health Services established the Behavioral Health Transformation (BHT) Collaborative as the County's primary forum for stakeholder engagement and system alignment for Behavioral Health Services Act (BHSA) implementation. Contacts from all required BHSA stakeholder groups were invited to participate, ensuring broad and inclusive representation across the behavioral health system.
The BHT Collaborative meets monthly to share BHSA updates, identify implementation challenges, and co-develop solutions related to workforce capacity, housing and crisis services, contracting readiness, service redesign, data and reporting, and equity-driven access. Stakeholder input is gathered through facilitated discussions and workgroups, with structured feedback used to inform Integrated Plan development and implementation. Through this structure, the County of Monterey has established a durable, community-centered engagement process that aligns statutory requirements with community priorities and operational realities.

Cross-County Collaboration and Learning
To strengthen BHSA implementation and stakeholder engagement, the County of Monterey participates in an ongoing cross-county learning partnership with Ventura County and Bay Area BHSA coordinators. These monthly coordination sessions provide a structured forum to exchange best practices, troubleshoot implementation challenges, and share tools related to community engagement, fiscal planning, workforce development, and BHSA compliance. This collaboration enables the County of Monterey to benchmark its approach against peer counties, rapidly incorporate proven strategies, and remain aligned with evolving state guidance. Through this peer-to-peer network, the County enhances consistency, accountability, and innovation in its local BHSA implementation while benefiting from the collective experience of multiple regions.

   Collaboration: Behavioral Health coordinated with the LHJ and hospital partners participating in the CHNA process to support alignment of behavioral health priorities with identified community health needs, including mental health, substance use, housing instability, and access to care. Data-sharing: Behavioral health–related data and system insights were incorporated into the CHNA to inform identification of community needs, service gaps, and populations experiencing disparities, particularly those affected by untreated behavioral health conditions, substance use, and co-occurring physical and behavioral health needs.
   Stakeholder activities: Behavioral Health participated in stakeholder engagement activities conducted as part of the CHNA process, including community input and partner engagement efforts, which helped inform priority-setting and contextual understanding of behavioral health needs relevant to Integrated Plan development.

1. Has the county considered either the LHJ's most recent CHA/CHIP or strategic plan in the development of its IP? Additional information regarding engagement requirements with other local program planning processes can be found in Policy Manual Chapter 3, Section B.2.3
   ☒ **Yes** ☐ No
   a. If yes, provide a brief description of how the county has considered the LHJ's CHA/CHIP or strategic plan when preparing its IP: **The CHNA provided behavioral health–relevant data and community input on priority needs, including access to care, mental health and substance use conditions, housing instability, overdose risk, and co-occurring physical and behavioral health challenges. CHNA findings and associated implementation priorities informed the county's understanding of population needs, service gaps, and cross-system impacts. These insights were used to support**

alignment of Integrated Plan priorities with broader countywide health conditions while maintaining Behavioral Health's statutory responsibilities under BHSA.

b. If not, please explain why the county did not consider the LHJ's CHA/CHIP or strategic plan when preparing its IP: **N/A**

Medi-Cal Managed Care Plan (MCP) Community Reinvestment

For related policy information, refer to B.2 Considerations of Other Local Program Planning Processes.

1. Please list the Managed Care Plans (MCP) the county worked with to inform the MCPs' respective community reinvestment planning and decision-making processes: **Central California Alliance for Health**
2. Which activities in the MCP Community Reinvestment Plan submissions address needs identified through the Behavioral Health Services Act community planning process and collaboration between the county, MCP, and other stakeholders on the county's Integrated Plan?
   The MCP Community Reinvestment Plan (CRP) is only required if the MCP reports net profits. The Central California Alliance for Health (CCAH) anticipates further direction from DHCS on the need for a CRP in early 2026. The County will monitor further guidance from the state and collaborate with CCAH accordingly.

Online distribution included four mass mailout rounds using Email and Mailchip with County listservs, adding a BHSA resource webpage to the MCBH website, as well as five separate Facebook and Instagram posts.*** **MCBH posted public comment flyers across County of Monterey bulletin boards, an employee newsletter, and provided handouts at four community events and at the County clinic. Additionally, MCBH facilitated eight separate presentations, providing an overview of the Integrated Plan and inviting participation in the public comment process.**
6. Please describe stakeholder input in the table below. Please add each stakeholder group into their own row in the table.

Table 7. Stakeholder Input

Stakeholder group	Summarize the substantive revisions recommended by this stakeholder during the comment period
Area Agency on Aging	Representatives from the Area Agency on Aging (AAA) recommended that the Integrated Plan include a more explicit, age-specific behavioral health strategy for adults age 65 and older, including culturally and linguistically responsive strategies for Spanish-speaking older adults and other older adults experiencing access barriers. Recommended revisions included creating an Older Adult Specialty Track within BHSS; adding geriatric-focused access and outpatient teams across county regions; expanding home-based and telehealth services for mobility-limited older adults; incorporating or coordinating caregiver support, peer support, support groups, short-term therapy, bilingual psychoeducation, medication reconciliation, cognitive screening, and fall-risk assessment; establishing an Older Adult FSP track and geriatric ACT team; prioritizing older adults with high crisis utilization, housing instability, or medical complexity; adding

	benefits navigation, primary care coordination, step-up/step-down supports, and older adult-focused IPS pathways; developing an older adult crisis response model with RN-led triage, dementia-capable crisis intervention, medication review, brief therapy, psychoeducational groups, and post-crisis or post-ED linkage; expanding field-based and telehealth DMC-ODS/MAT access for older adults in senior housing, rural areas, and mobility-limited settings; and establishing an Older Adult Housing Priority Pathway that includes RCFE/Board and Care placements, housing subsidies, tenancy supports, and partnerships with Social Services and senior service providers. Representatives from the AAA also requested that the Integrated Plan preserve or identify funding for older adult-specific peer counseling and prevention-oriented supports, including the bilingual Senior Peer Counseling Program at Alliance on Aging and other community-based organizations like NAMI. Commenters described this type of peer-delivered support as important for older adults experiencing grief, loneliness, loss of independence, social isolation, depression, and suicide-risk concerns, and expressed concern that loss of these services could increase reliance on crisis intervention, emergency departments, hospitalizations, or other higher-intensity services. Representatives from the AAA further recommended adding age- and language-stratified accountability measures related to older adult penetration rates, Spanish-language disparities, cognitive screening, caregiver engagement, FSP enrollment and retention, crisis response, post-ED follow-up, DMC-ODS/MAT access and retention, housing placements and tenancy retention, ED utilization after placement, telehealth no-shows, caregiver trainings, and participation in peer support, therapy, support groups, and other early support services.
Community-Based Organizations Serving Culturally and Linguistically Diverse Constituents	Representatives from community-based organizations serving culturally and linguistically diverse constituents recommended that the Integrated Plan preserve, prioritize, and expand culturally responsive, community-rooted behavioral health services, including Community-Defined Evidence Practices (CDEPs), prevention and early intervention services, peer-led family support, outreach, education, navigation, support groups, wraparound behavioral health models, and other community-based supports serving historically underserved communities, including African American residents, children, youth, families, individuals experiencing homelessness or housing instability, individuals involved in child welfare systems, older adults, and individuals

	living with mental health and substance use disorder needs. Representatives from these organizations requested that the Integrated Plan explicitly recognize and support culturally congruent, trauma-informed, community-defined behavioral health models such as The Village Project, Emanyatta Saturday School, NAMI Monterey County, Alliance on Aging programs, and other peer and family support programs, and expressed concern that changes associated with BHSA implementation, including narrower eligibility and reduced prevention and early intervention funding, could reduce access to trusted community-based supports and increase reliance on crisis intervention, hospitalization, incarceration, emergency services, homelessness systems, and other higher-intensity systems of care. Recommended revisions included identifying replacement, braided, coordinated, or alternative funding strategies to preserve prevention and early intervention programs and other community-based behavioral health supports; formally recognizing Community-Defined Evidence Practices as part of the behavioral health continuum; prioritizing disparity reduction and culturally responsive service delivery in implementation and funding decisions; strengthening outreach and engagement for underserved populations, including African American residents, older adults, South County communities, Indigenous language speakers, Spanish-speaking residents, and unhoused individuals; investing in transportation, interpretation, support groups, and meaningful community participation opportunities; expanding contracting pathways and Medi-Cal-aligned opportunities for community-based organizations, including Enhanced Care Management and Community Supports; strengthening partnerships with trusted community-based providers and faith-based institutions; involving trusted behavioral health providers in housing-related planning and implementation efforts; protecting peer-led family support, education, outreach, navigation, prevention-oriented services, and support groups as part of the continuum of care; and implementing BHSA changes in a phased and thoughtful manner to avoid disruption of services and community-based infrastructure. Representatives from community-based organizations also requested that implementation and contracting processes avoid creating excessive administrative, billing, monitoring, documentation, or reporting burdens that could unintentionally weaken community-based support systems, culturally responsive providers, and early

	intervention access points. Additional comments recommended stronger operational specificity regarding implementation strategies, cross-system coordination, co-occurring disorder treatment approaches, housing coordination, and data-sharing infrastructure; improved demographic and disparity data collection and transparency; clearer accountability measures and timelines tied to identified disparities and unmet needs; stronger workforce development strategies for serving older adults, infants, toddlers, and underserved communities; preservation of older adult behavioral health and peer counseling services; and clearer planning related to continuity of care for individuals and families who may no longer qualify under revised BHSA eligibility structures. Representatives from community-based organizations further requested more interactive and accessible community engagement opportunities, including Spanish-language information and greater opportunities for community participation in behavioral health planning and implementation discussions.
Continuums of Care / Homeless Service Provider Community	Representatives from the Continuum of Care, the homeless service provider community, and County homelessness leadership recommended that the Integrated Plan strengthen coordination between behavioral health and homelessness response systems by increasing outreach and engagement efforts for individuals experiencing homelessness and embedding behavioral health services within housing settings. Stakeholders recommended development of comprehensive, field-based multidisciplinary outreach models serving unsheltered individuals and encampment populations, including teams composed of behavioral health clinicians, street outreach workers, peer support specialists, substance use disorder providers, and street medicine staff that could connect individuals to Medication-Assisted Treatment (MAT), bridge housing, interim housing, Coordinated Entry, public benefits, Full Service Partnerships, and other housing and treatment supports. Representatives from the Continuum of Care also recommended expanding the County's housing and treatment infrastructure through acquisition and conversion of vacant or underutilized properties into Permanent Supportive Housing (PSH), adaptive reuse and hotel or motel conversion projects, shared housing models, scattered-site and master leasing approaches, recovery-oriented housing, tiny homes, ADUs, safe parking, emergency shelter and interim housing strategies, and expansion of residential treatment services in South County, including consideration of converting the Sendero Interim Housing site into a

DRAFT

	residential treatment facility. Stakeholders recommended restoring Housing Interventions funding toward the State's recommended 30 percent baseline over time and requested that the Integrated Plan include a formal Housing Restoration Strategy with measurable benchmarks, reassessment timelines, public reporting expectations, and clearer explanation of how transferred Housing Intervention funds are intended to stabilize the broader behavioral health system. Additional recommendations included stronger alignment with the Lead Me Home Plan to End Homelessness; formal integration with existing homelessness response infrastructure including Coordinated Entry, HMIS, case conferencing systems, CARS, and homelessness outcome tracking systems; avoiding creation of parallel referral systems; entering into data-sharing agreements with the Coalition of Homeless Service Providers; and strengthening integration and coordination across housing, homelessness, healthcare, behavioral health, managed care, and institutional systems. Stakeholders further recommended stronger operational integration between BHSA and CalAIM-related housing and behavioral health resources, including Enhanced Care Management, Housing Transition Navigation Services, Housing Deposits, Housing Tenancy and Sustaining Services, Transitional Rent, BH-CONNECT initiatives, and managed care coordination through Central California Alliance for Health. Recommended revisions also included stronger operational planning for justice reentry, hospital discharge, and institutional transitions; clearer pathways for same-day behavioral health linkage, housing navigation, transportation coordination, medication continuity, recuperative care transitions, and warm handoffs into behavioral health and housing services; and adoption of "no discharge to homelessness" principles where feasible. Stakeholders additionally recommended a phased interoperability and shared accountability roadmap across Behavioral Health electronic health records, county clinics, hospitals, HMIS, jail health systems, probation, child welfare, and managed care systems; stronger use of peer supports, Community Health Workers (CHWs), and lived-experience workforce pathways; expanded cross-sector workforce development and shared practice standards related to Housing First, trauma-informed care, harm reduction, coordinated care, and housing stabilization; and stronger recovery-oriented employment, education, and economic mobility strategies through partnerships with workforce systems, educational institutions, employers, and supported employment

	programs. Representatives from the Continuum of Care and homelessness response systems also recommended clearer governance structures, implementation ownership, stakeholder representation, implementation leadership roles, measurable performance metrics, public dashboards, accountability frameworks, and regular public reporting regarding housing outcomes, behavioral health outcomes, justice-system outcomes, workforce development, equity outcomes, and implementation progress. Additional comments recommended stronger engagement with housing authorities and affordable housing partners; dedicated housing outreach and engagement infrastructure for unsheltered and high-barrier populations; stronger integration of housing-first practices and homelessness prevention approaches; and additional funding and coordination strategies to support highly vulnerable individuals and families experiencing homelessness or housing instability, including individuals who may not yet meet BHSA serious mental illness or substance use disorder eligibility criteria.
Eligible Adults and Older Adults	Public comments from eligible adults and older adults with lived experience emphasized the importance of maintaining accessible, recovery-oriented behavioral health services and supports that help individuals achieve stability, reduce isolation, manage symptoms, and remain connected to community. Comments from individuals with lived experience consistently highlighted housing stability as foundational to recovery, particularly for individuals living with serious mental illness, substance use disorder needs, trauma, anxiety, depression, PTSD, grief, and social isolation. Stakeholders recommended preserving and strengthening peer-led services, support groups, drop-in and wellness centers, community gathering spaces, counseling, outreach, food access, transportation assistance, employment and volunteer opportunities, recreational and social activities, and culturally responsive support services. Participants described OMNI Wellness Center, Peer Partners for Health, and other peer and community-based behavioral health programs as important sources of companionship, structure, emotional support, coping skills, symptom management, socialization, connection to services, recovery support, and safe spaces where individuals feel accepted and supported. Representatives from eligible adults and older adults also recommended preserving older adult-specific behavioral health services and peer counseling programs; expanding behavioral health approaches specifically designed for

DRAFT

	older adults; improving opportunities for meaningful community participation and engagement in planning processes; increasing Spanish-language information and accessibility; and ensuring that behavioral health services remain easy to access before individuals reach crisis levels. Additional comments from individuals with lived experience emphasized concerns that reductions in prevention, peer support, early intervention, support groups, and community-based recovery services could negatively affect stability, recovery, housing retention, social connection, and overall well-being for individuals currently relying on these services and supports.
Families of Eligible Children, Youth, Adults, and Older Adults	Public comments from families of eligible children and youth, eligible adults, and eligible older adults emphasized the importance of maintaining access to behavioral health services and supports that help children, youth, and families remain engaged in care and achieve positive outcomes. Family members recommended preserving transportation and interpretation services that support access to treatment, maintaining coordinated and team-based approaches to care, and protecting behavioral health services that families described as contributing to improved stability, school functioning, and long-term outcomes for children and youth receiving treatment and medication support.
Health Care Organizations, Including Hospitals	Representatives from health care organizations, including hospitals, recommended that the Integrated Plan include more specific, measurable, achievable, relevant, and time-bound planning related to housing, emphasizing the importance of stable housing in supporting behavioral health outcomes. Representatives from healthcare organizations also recommended strengthening coordination and communication across medical, behavioral health, correctional, and primary care systems through improved interoperability and integration of electronic medical record systems across relevant agencies and care settings, including Monterey County Behavioral Health, Natividad and affiliated clinics, and the county jail. Additional recommendations from healthcare stakeholders included improving continuity of care during transitions between service settings, strengthening whole-person care coordination involving primary care providers and advanced practice clinicians, and increasing system efficiency and stability for individuals living with serious mental illness.
Higher Education Partners	Representatives from higher education partners recommended that the Integrated Plan include greater operational specificity regarding cross-system coordination among behavioral health,

DRAFT

	housing, healthcare, justice, and social service systems, including clarification of lead entities, referral pathways, decision-making structures, shared performance indicators, discharge planning processes, and coordination roles across agencies and care settings. Representatives from higher education partners recommended aligning implementation with existing state and local coordination models and frameworks, including CalAIM and other structured cross-system coordination approaches. Additional recommendations included more explicitly integrating housing stability, caregiver supports, transportation, childcare, economic stressors, and other upstream determinants of health into the behavioral health continuum; strengthening coordination among Full Service Partnerships, Enhanced Care Management, housing systems, and community supports; expanding strategies to address housing supply constraints through approaches such as acquisition and conversion, landlord incentives, master leasing, accessory dwelling units, shared housing, and partnerships with housing authorities and nonprofit developers; clarifying how BHSA-funded housing resources will align with existing coordinated housing and prioritization systems; strengthening reentry planning and coordination for justice-involved individuals with behavioral health needs; and developing a phased cross-system data infrastructure strategy that includes data-sharing agreements, interoperable systems, shared reporting metrics, dashboards, and outcome monitoring across behavioral health, homelessness, healthcare, correctional, and social service systems. Stakeholders also recommended improving transparency regarding how Community Program Planning Process feedback informed funding and policy decisions, including clearer linkage between community priorities and resulting plan actions. Additional comments from higher education partners recommended increasing access to therapists, culturally relevant services, and language access supports; establishing clearer accountability structures with defined benchmarks, baseline measures, timelines, annual milestones, and responsible reporting entities; and preserving peer-led family support, education, outreach, and support services provided through organizations such as NAMI Monterey County for individuals and families affected by serious mental illness.
Local Education Agencies	Representatives from local education agencies recommended strengthening the Integrated Plan's focus on housing, behavioral health, and family stability as interconnected factors affecting student well-being, educational outcomes, and school stability.

DRAFT

	Representatives from local education agencies recommended increasing the specificity of the County's housing strategy; establishing clearer benchmarks, timelines, and decision points for restoration of Housing Interventions funding over the three-year plan period; and recognizing student and family homelessness as a central behavioral health and community stability issue. Additional recommendations from local education agencies included stronger alignment and coordination with existing homelessness and housing systems, including the Lead Me Home Plan to End Homelessness, Coordinated Entry, HMIS, and cross-system case conferencing structures, along with clearer expectations for discharge planning and coordination across hospitals, correctional systems, child welfare systems, schools, and behavioral health providers. Stakeholders also recommend expanding the County's housing strategy to incorporate housing production, acquisition and conversion efforts, rental subsidies, safe parking programs, accessory dwelling units, shared housing models, family-based stabilization supports, and other interim and long-term housing solutions. Representatives from local education agencies further recommended protecting Prevention and Early Intervention services during the transition from MHSA to BHSA; strengthening support for children and families experiencing housing instability, behavioral health needs, and barriers to healthcare access; and providing additional opportunities for Board review, policy direction, and refinement of the Integrated Plan prior to final approval.
Providers of Mental Health and Substance Use Disorder Treatment Services	Providers of mental health services and substance use disorder treatment services expressed support for the goals of the Behavioral Health Services Act while recommending that the Integrated Plan strengthen and preserve prevention and early intervention services, culturally responsive community-based behavioral health supports, and peer and family support services during the transition from MHSA to BHSA. Providers expressed concern that BHSA implementation changes, including narrower eligibility and funding shifts, could reduce access to prevention-focused and community-based services and increase reliance on crisis systems, emergency departments, child welfare systems, justice systems, hospitalization, and other higher-acuity behavioral health interventions. Recommended revisions included formally recognizing and funding Community-Defined Evidence Practices and other culturally grounded behavioral health models as part of the behavioral health continuum; strengthening disparity reduction

	strategies; expanding contracting pathways and Medi-Cal-aligned opportunities for community-based organizations; identifying replacement, braided, coordinated, or alternative funding sources to sustain prevention and early intervention programs and other impacted services; implementing BHSA changes gradually to reduce disruption of services; and preserving peer-led family support, outreach, education, support groups, navigation, and other community-based behavioral health supports. Providers specifically highlighted concerns regarding potential reductions or elimination of programs serving uninsured, undocumented, and vulnerable residents, including outpatient therapy, parenting support, and other prevention-oriented behavioral health services intended to stabilize individuals and families before crises escalate. Additional recommendations from providers included increasing access to therapists, culturally relevant services, transportation, interpretation, and language access supports; improving accessibility and usability of the Integrated Plan and community engagement process; providing clearer specificity regarding implementation strategies, benchmarks, and accountability measures; strengthening services and outreach for South County and North County communities; protecting support groups and youth-focused services; improving accessibility of behavioral health facilities and infrastructure; and maintaining behavioral health services that stakeholders described as contributing to improved family stability, educational outcomes, and long-term community well-being. Additional comments from providers recommended strengthening peer-directed wellness and recovery models; expanding the use of peer providers and community-based navigators within behavioral health access, reentry, and engagement processes; improving continuity of care and warm handoff strategies for justice-involved and high-acuity individuals; reducing administrative and intake barriers that may interfere with treatment engagement following release from custody or crisis events; and strengthening operational approaches to forensic behavioral health coordination and reentry stabilization services.
Public Safety Partners	Representatives from public safety partners recommended that the Integrated Plan strengthen behavioral health crisis response and coordination involving law enforcement, EMS, hospitals, and other first responder systems. Representatives from public safety partners recommended development of a local mental health treatment facility or expanded local treatment capacity for minors

DRAFT

	requiring extended psychiatric holds or inpatient behavioral health treatment in order to reduce out-of-county placements, transportation burdens, reunification challenges for families, and associated financial impacts. Additional recommendations from public safety partners included adding law enforcement and first responder behavioral health training related to crisis response, emergency mental health protocols, and coordination between EMS and law enforcement agencies; improving consistency and alignment between law enforcement and EMS mental health policies and procedures; clarifying roles and responsibilities during behavioral health emergencies and 5150-related responses; strengthening oversight and review of behavioral health crisis response practices; and improving coordination, documentation, transportation practices, and data collection related to behavioral health emergency responses and involuntary psychiatric holds.
Youths or Youth Mental Health or Substance Use Disorder Organizations	Public comments from youth and youth mental health or substance use disorder organizations recommended that the Integrated Plan maintain and strengthen youth behavioral health awareness, prevention, and early intervention supports within schools and community settings, including youth education, open discussion of mental health topics, and accessible support systems that allow students to recognize symptoms, seek help early, and connect peers to behavioral health support before conditions escalate. Representatives from youth-serving organizations also recommended increasing the Plan's focus on children ages 0–5 and their families, including adding more specific data on young children in the populations served section; identifying the impacts of MHSA-to-BHSA funding changes on early childhood and family-serving programs; and strengthening strategies to address disparities affecting young children and families. Additional recommended revisions from youth-serving stakeholders included addressing access barriers for Indigenous language speakers separately from Spanish-speaking residents; identifying geographic disparities in access to care, including South County resource gaps; highlighting families with children ages 0–5 experiencing homelessness as a population of focus; partnering with communities most impacted by disparities, including African American families with young children, to co-develop implementation and funding strategies; and adding workforce training focused on the unique behavioral health and developmental needs of infants and toddlers.

DRAFT

General Community Members	Public comments from the general public emphasized the importance of protecting and maintaining funding for mental health services and supports and recommended that behavioral health resources continue reaching individuals and communities in need of care. Members of the public expressed support for continued investment in counseling, crisis response, treatment, recovery, and community-based behavioral health services that help prevent hospitalization, incarceration, and individuals falling through service gaps. General public comments also recommended protecting and prioritizing prevention and early intervention programs during the transition from MHSA to BHSA, expressing concern that stricter eligibility requirements and reductions in lower-acuity services could delay access to care until individuals experience crisis-level conditions. Additional comments from members of the public recommended ensuring behavioral health services remain accessible, culturally responsive, stigma-free, and easy to navigate for community members before crises escalate; maintaining supports for youth, transitional age youth, underserved populations, and adults experiencing behavioral health challenges; and strengthening psychiatric leadership and clinical oversight within Behavioral Health planning and implementation processes, including concerns regarding development and implementation of the Integrated Plan without a permanent Medical Director.
Monterey County Board of Supervisors	Public comments from the Monterey County Board of Supervisors recommended that the Integrated Plan more clearly explain how Monterey County will use BHSA as an opportunity to redesign the behavioral health system rather than attempting to preserve the prior MHSA structure unchanged. Supervisors emphasized the need for greater clarity on how BHSA, Realignment, Medi-Cal, opioid settlement funds, local funds, increased productivity revenue, and other funding sources are reflected in the Integrated Plan, including whether non-BHSA or increased revenue sources could help sustain prevention, early intervention, and community-based services no longer aligned with BHSA funding rules. Members of the Board of Supervisors recommended adding clearer framing or explanatory material to help the public understand the purpose, limits, and context of the Integrated Plan; identifying which services and contracts are being maintained through BHSS and other funding sources; and clarifying how the transition from MHSA to BHSA will affect existing programs, staffing, service capacity, and populations with serious mental illness and substance use disorder needs. Supervisors also recommended

	strengthening the housing section by providing more specific implementation detail, including how Housing Interventions dollars will be spent, how the County will partner with housing and homelessness system agencies, whether and how the County will restore Housing Interventions funding toward the 30 percent baseline over time, and what decision points or benchmarks will guide future funding shifts. Additional housing recommendations from Supervisors included stronger alignment with the Lead Me Home Plan, HMIS, Coordinated Entry, case conferencing, discharge planning, universal or streamlined housing application pathways, housing navigation, family stabilization supports, Flexible Housing Subsidy Pool models, and a broader housing continuum that could include rental subsidies, capital development, acquisition, operating supports, safe parking, tiny homes or sleeping cabins, ADUs/JADUs, shared housing, room-and-board or license-exempt models, and family-hosted stabilization supports where appropriate. Supervisors further recommended deeper cross-system coordination with the County's homelessness response system, affordable housing partners, hospitals, Natividad, county clinics, jail health services, probation, corrections, child welfare, public safety, cities, and community-based organizations. Comments from Supervisors requested stronger data-sharing and interoperability strategies, including clearer next steps, timelines, responsible departments, and milestones for improving coordination across electronic health records, HMIS, jail health, hospitals, clinics, managed care, probation, corrections, and child welfare. Supervisors also recommended more explicit planning for justice-involved BHSA-eligible individuals, including individuals exiting jail or other institutional settings, with attention to placement barriers, reentry, discharge planning, family reunification, caregiver support, and alignment with criminal justice population needs. Additional comments emphasized the need for broader and more meaningful stakeholder engagement during implementation, including clearer identification of which stakeholder groups and implementation partners will be included moving forward, how the Behavioral Health Commission and Behavioral Health Transformation Collaborative will participate, and how stakeholder input will shape implementation decisions. Supervisors also recommended greater transparency regarding public hearing dates, governance roles, stakeholder participation, and future planning processes, while acknowledging that the Integrated Plan is a state-required planning

	document that may need to preserve flexibility and be updated as implementation, funding, and community needs evolve.

**Duplicate if needed

7. Please describe any substantive recommendations made by the local behavioral health board that are not included in the final Integrated Plan or update. If no substantive revisions were recommended by stakeholders during the comment period, please input N/A.
    a. Recommendation: **Consider re-instating funding for programs for underserved racial and ethnic populations such as those offered by the Center for Community Advocacy and The Village; and for agencies serving older adults such as the Alliance on Aging and the Senior Companions program.**
    MCBH Response: MCBH recognizes the important role that community-based organizations play in promoting behavioral health, strengthening community connections, and addressing local needs through culturally responsive and trusted services. While some of these services may no longer align with BHSA funding requirements, MCBH acknowledges their value to the communities they serve and remains committed to supporting their long-term sustainability. As part of ongoing implementation efforts, MCBH will continue to share information, facilitate connections, and support opportunities for community-based organizations to pursue alternative funding sources, including programs administered by the California Department of Public Health and community-based services and supports available through Central California Alliance for Health (CCAH). MCBH will also continue engaging these partners in planning and coordination efforts to help strengthen the broader behavioral health continuum of care in Monterey County.
    b. Recommendation: **Provide age-specific analysis and reporting for older adults whenever possible, recognizing older adults as a BHSA priority population and a historically underserved group.**
    MCBH Response: MCBH appreciates this recommendation and agrees that greater visibility into the behavioral health needs and experiences of older adults would strengthen planning and transparency efforts. While the Integrated Plan reflects statewide data sources and the data structure required by the state, the County recognizes the value of disaggregating adult populations into more specific age groups, including older adults. The County is hopeful that future enhancements to the Behavioral Health Outcomes, Accountability, and Transparency Reporting (BHOATR) framework, as well as improvements to state-provided population and service utilization data, will support more detailed age-based analyses.
    c. Recommendation: **Describe how MCBH plans to improve care experience, including planned strategies and methods for monitoring progress.**
    MCBH Response: MCBH understands the importance of care experience in specialty treatment services. During development of the Integrated Plan, MCBH utilized

available data, stakeholder feedback, and input from the Behavioral Health Transformation Collaborative to identify a limited number of priority areas for enhanced local planning focus. Although care experience remains important to MCBH's ongoing quality improvement efforts, it was not selected through this process as a priority area requiring additional goal-setting, disparity analysis, or new implementation strategies during the FY 2026-2029 planning period. MCBH will continue to monitor available care experience data and may consider additional planning activities in future Integrated Plan updates as priorities, data availability, and community needs evolve.

d. Recommendation: **Provide additional information regarding Monterey County's plans for participation in a Flexible Housing Subsidy Pool, including anticipated decision-making considerations, implementation factors, and interim approaches to housing coordination if participation is not currently planned.**
MCBH Response: MCBH appreciates the recommendation. At this time, the County has not established an expected timeline or decision point regarding participation in a Flexible Housing Subsidy Pool. The County will continue implementing Housing Interventions through the approaches described in the Integrated Plan while coordinating with housing, healthcare, homelessness response, and other system partners. The recommendation will be taken under advisement and considered as part of ongoing Housing Interventions planning, implementation, and coordination efforts throughout the BHSA implementation period.

e. Recommendation: **Provide additional information regarding planned strategies, staffing, timelines, and milestones to address health information exchange (HIE), interoperability, and data analytics capacity needs that support BHSA reporting, performance monitoring, and equity analysis.**
MCBH Response: MCBH appreciates the recommendation and recognizes the importance of health information exchange, interoperability, data analytics, reporting infrastructure, and equity monitoring in supporting successful BHSA implementation. The Integrated Plan template does not include a section dedicated to operational implementation plans, staffing models, timelines or milestones related to health information exchange, interoperability, or analytics infrastructure. These activities are being addressed through ongoing planning, coordination and implementation efforts involving MCBH, providers, managed care partners, technology vendors, and other system partners. As BHSA implementation progresses and state reporting requirements continue to evolve, MCHB will assess and refine workforce, technology, and data infrastructure needs to support reporting, performance monitoring, quality improvement, and equity analysis. Considerations related to interoperability, data-sharing capabilities, analytics capacity and reporting infrastructure will continue to inform implementation planning throughout the BHSA implementation period.

f. Recommendation: **Improve transparency regarding projected service volumes by clarifying whether planned-to-serve counts represent duplicated or unduplicated individuals and whether projections are annual or across the full plan period. Consider providing more detailed age-group reporting, particularly distinguishing adults and older adults, to better understand how planned services align with identified disparities and unmet needs.**
MCBH Response: MCBH agrees that more detailed service projections and age-group reporting may strengthen future planning and accountability efforts. The current Integrated Plan reflects the reporting structure and data available during plan development. While MCBH does not plan to revise the current Integrated Plan to further disaggregate projected service counts, the County will continue working with providers to improve the consistency, accuracy, and interpretability of projected service utilization information. MCBH will also explore opportunities to provide more detailed age-group reporting, including distinctions between adults and older adults, in future planning and reporting processes, including the Behavioral Health Outcomes, Accountability, and Transparency Report (BHOATR) and future Integrated Plans, where state reporting requirements, templates, and available data systems support such reporting.

g. Recommendation: **Restoring Housing Interventions funding toward the statutory 30 percent allocation and requested a clearer long-term housing investment strategy.**
MCBH Response: MCBH recognizes the critical role that housing plays in behavioral health recovery and community stability. At the same time, BHSA implementation requires consideration of the full behavioral health continuum, including prevention **and early intervention services, outpatient treatment, intensive community-based services, crisis response, residential care, workforce needs, and housing supports. The County believes additional planning, analysis, and collaboration with behavioral health providers, housing partners, health care organizations, homelessness response partners, and other community stakeholders are needed to fully evaluate the potential impacts of future funding changes across the broader system of care. During the three-year implementation period, MCBH will continue assessing community needs, service utilization patterns, housing needs, system capacity, and available funding opportunities to help inform future decisions regarding long-term alignment with the BHSA funding framework.**

h. Recommendation: **Increase transparency regarding stakeholder engagement by clearly documenting which stakeholder groups participated in the planning process, how and when engagement occurred, key concerns and recommendations raised, how stakeholder input influenced the Integrated Plan, and the membership and participation of the Behavioral Health Transformation Collaborative.**
MCBH Response: MCBH agrees that transparency regarding stakeholder engagement

is important. The Community Planning Process section of the Integrated Plan documents a broad and extensive engagement effort that included community members, individuals with lived experience, family members, providers, healthcare organizations, public agencies, housing and homelessness partners, educational partners, public safety representatives, and other required stakeholder groups. The Integrated Plan also includes summaries of stakeholder engagement activities, participating organizations, public comments received, and substantive revisions recommended during the public comment period.

While MCBH does not plan to revise the current Integrated Plan to include the additional stakeholder engagement matrix described in the recommendation, the County recognizes the value of further documenting how stakeholder input informed planning decisions and implementation priorities. This recommendation will be used to inform future Community Planning Process activities, stakeholder engagement documentation, and data collection efforts for future Integrated Plans. MCBH will continue working to strengthen transparency regarding stakeholder participation, feedback received, and the ways in which community and system partner input informs behavioral health planning and implementation efforts.

i. Recommendation: **Identify additional funding sources and transition strategies to preserve effective Prevention and Early Intervention (PEI) programs that may be impacted by the transition from MHSA to BHSA, particularly programs serving individuals at the lowest levels of intervention and populations experiencing unmet behavioral health needs.**

MCBH Response: MCBH recognizes the important role that Prevention and Early Intervention programs have played in supporting community members before behavioral health needs escalate to higher levels of care. The transition from MHSA to BHSA reflects significant statewide policy and funding changes that affect how prevention, early intervention, specialty behavioral health services, and housing-related supports are funded and organized. Throughout the planning process, MCBH has prioritized continuity of care and has worked closely with providers and system partners to identify alternative funding sources and prepare for these changes. The County recognizes that implementation is occurring within a broader environment that includes significant pressures on both behavioral health and housing systems, including funding uncertainty for some shelter and interim housing programs, existing housing shortages, and substantial waitlists for housing resources. The County will continue working with its contracted provider network and community partners to assess program continuity, identify service and housing gaps that may emerge during implementation, and explore opportunities to support effective community-based services and housing resources through available funding sources and partnerships. MCBH remains committed to supporting providers and communities throughout the

transition and will continue monitoring implementation impacts as part of ongoing BHSA planning, housing coordination, and implementation efforts.

j. Recommendation: **Consider a broader range of housing models and housing continuum options, including safe parking, tiny homes or sleeping cabins, accessory dwelling units (ADUs/JADUs), shared housing, room-and-board arrangements, license-exempt housing models, and family-supported housing approaches, where clinically and operationally appropriate for BHSA-eligible individuals.**
MCBH Response: MCBH appreciates the recommendation and recognizes the potential value of a diverse range of housing models in addressing the varying needs of individuals experiencing homelessness or housing instability. The County acknowledges that housing solutions may extend beyond traditional supportive housing approaches and that innovative housing models may play an important role within the broader community housing continuum. While MCBH does not plan to revise the current Integrated Plan to incorporate specific commitments regarding these housing models, the County remains interested in ongoing collaboration with housing providers, homelessness response partners, local governments, healthcare organizations, and other community stakeholders to explore opportunities that may strengthen housing access and stability for BHSA-eligible individuals. These concepts will be taken under advisement and may inform future planning, partnership development, and housing system coordination efforts as local needs, resources, and implementation opportunities continue to evolve.

County Behavioral Health Services Care Continuum

The Behavioral Health Care Continuum is composed of two distinct frameworks for substance use disorder and mental health services. These frameworks are used for counties to demonstrate planned expenditures across key service categories in their service continuum. Questions on the Behavioral Health Care Continuum are in the Integrated Plan Budget Template.

County Provider Monitoring and Oversight

Cities submitting their Integrated Plan independently from their counties do not have to complete the Medi-Cal Quality Improvement Plan questions or Question 1 under All BHSA Provider Locations. Otherwise, all fields must be completed unless marked as optional. For related policy information, refer to **6.C.2 Securing Medi-Cal Payment**.

Medi-Cal Quality Improvement Plans

1. For Specialty Mental Health Services (SMHS) or for integrated SMHS/Drug Medi-Cal Organized Delivery System (DMC-ODS) contracts under Behavioral Health Administrative Integration, please upload a copy of the county's current Quality Improvement Plan (QIP) for State Fiscal Year (SFY) 2026-2027 (enter file name here): QI Workplan FY 26-27.docx

2. Does the county operate a standalone DMC-ODS program (i.e., a DMC-ODS program that is not under an integrated SMHS/DMC-ODS contract)?
   ☒ **Yes** ☐ No
   a. If yes, for standalone DMC-ODS, please upload a copy of the county's current QIP for SFY 2026-2027 (enter file name here):

Contracted BHSA Provider Locations

1. As of the date this report is submitted, in Table 8, please provide the total number of contracted Behavioral Health Services Act (BHSA) provider locations offering non-Housing services for SFY 2025-26, i.e., BHSA-funded locations that are (i) not owned or operated by the county, and (ii) offer BHSA services other than Housing Interventions services.[1]

Table 8. Contracted BHSA Provider Locations Offering Non-Housing Services

Services Provided	Number of Contracted BHSA Provider Locations
Mental Health (MH) services only	**50**
Substance Use Disorder (SUD) services only	**0**
Both MH and SUD services	**0**

2. Among the county's contracted BHSA provider locations, please identify the number of locations that also participate in the county's Medi-Cal Behavioral Health Delivery System (BHDS) (including SMHS and Drug MC/DMC-ODS) for SFY 2025-26.

Table 9. Contracted BHSA Provider Locations that Participate in Medi-Cal BHDS

Services Provided	Number of Contracted BHSA Provider Locations
SMHS only	**41**
DMC/DMC-ODS only	**0**
Both SMHS and DMC/DMC-ODS systems	**0**

All BHSA Provider Locations

For related policy information, refer to B.2 Considerations of Other Local Program Planning Processes.

[1] Note: A provider location should be counted if it offers both Housing Interventions and mental health (MH) or substance use disorder services (SUD); provider location that contracts with the county to provide both mental health and substance use disorder services should be counted separately.

1. Among the county's BHSA-funded SMHS provider locations (county-operated and contracted) that offer services/Levels of Care that may be covered by Medi-Cal MCPs as non-specialty mental health services (NSMHS), what percentage of BHSA funded SMHS providers contract with at least one MCP in the county for the delivery of NSMHS?[2] **38%**
    a. If the estimate is less than 60%, please describe the county's plans to enhance rates of MCP contracting starting July 1, 2027, and over the subsequent two years among the BHSA provider locations that are providing services that can/should be reimbursed by Medi-Cal MCPs: **The County of Monterey will provide guidance to BHSA-funded providers and other community-based organizations regarding MCP billing requirements and encourage participation in MCP contracting where clinically appropriate and operationally feasible. These efforts are intended to improve coordination of care, reduce duplication of funding streams, and ensure BHSA resources are reserved for individuals who meet SMHS medical necessity criteria, while supporting integrated and fiscally responsible service delivery.**
2. To maximize resource efficiency, counties must, as of July 1, 2027, (with certain exceptions) require their BHSA providers to:
    - Check whether an individual seeking services eligible for BHSA funding is enrolled in Medi-Cal and/or a commercial health plan, and if uninsured, refer the individual for eligibility screening;
    - Bill the Medi-Cal Behavioral Health Delivery System for covered services for which the provider receives BHSA funding; and
    - Make a good faith effort to seek reimbursement from Medi-Cal Managed Care Plans (MCPs) and commercial health plans for covered services for which the provider receives BHSA funding.

    a. Does the county wish to describe implementation challenges or concerns with these requirements?
    ☐ Yes ☒ **No**
        i. If yes, please describe any implementation challenges or concerns with the requirements for BHSA providers: **N/A**
3. Counties must monitor BHSA-funded providers for compliance with applicable requirements under the Policy Manual, the county's BHSA contract with DHCS, and state law and regulations. Effective SFY 2027-2028, counties must (1) adopt a monitoring schedule that includes periodic site visits and (2) preserve monitoring records, including monitoring reports, county-approved provider Corrective Action Plans (CAPs), and confirmations of CAP resolutions. Counties shall supply these records at any time upon DHCS's request. DHCS encourages counties to adopt the same provider monitoring schedule as under Medi-Cal: annual monitoring with a site visit at least

[2] Note: DHCS will provide each county with a list of their SMHS providers that also contract with MCPs. Counties will then calculate a final percentage after excluding SMHS providers that do not offer any services that may be covered as NSMHS.

once every three years. For providers that participate in multiple counties' BHSA programs, a county may rely on monitoring performed by another county.

Does the county intend to adopt this recommended monitoring schedule for BHSA- funded providers that:

a. Also participate in the county's Medi-Cal Behavioral Health Delivery System? (Reminder: Counties may simultaneously monitor for compliance with Medi-Cal and BHSA requirements)

☐ Yes ☒ **No**

i. If not, please describe how the county will monitor these providers for compliance with BHSA requirements:

Beginning SFY 2027–2028, Monterey County Behavioral Health (MCBH) will implement a provider monitoring schedule for BHSA-funded providers that includes quarterly data review, annual program monitoring, and site visits at least once every three years. Monitoring activities will include review of BHSA Compliance Forms completed by providers; collection and analysis of participant engagement, process, and outcome performance data; and review of compliance with applicable BHSA requirements, state law, regulations, and county contract requirements.

MCBH's Quality Improvement (QI) Department will continue conducting program monitoring in accordance with County Policy 422, Utilization Review, while incorporating BHSA-specific monitoring requirements into the existing monitoring structure. When compliance issues are identified, providers will be required to implement corrective action plans (CAPs), and MCBH will monitor resolution of identified issues. Monitoring records, including monitoring reports, county-approved CAPs, and documentation of CAP resolution, will be maintained and made available to DHCS upon request.

b. Do not participate in the county's Medi-Cal Behavioral Health Delivery System?

☐ Yes ☒ **No**

i. If not, please describe how the county will monitor these providers for compliance with BHSA requirements:

Beginning SFY 2027–2028, Monterey County Behavioral Health (MCBH) will implement a provider monitoring schedule for BHSA-funded providers that do not participate in the County's Medi-Cal Behavioral Health Delivery System. Monitoring activities will include quarterly data review, annual program monitoring, and site visits at least once every three years.

Monitoring of non-Medi-Cal BHSA-funded providers will be conducted by a BHSA Monitoring Analyst and will include review of BHSA Compliance Forms; collection and analysis of participant engagement, process, and outcome performance data; and review of compliance with applicable BHSA requirements, state law, regulations, and county contract requirements. When compliance issues are identified, providers will be required to implement corrective action plans (CAPs), and MCBH will monitor resolution of identified issues.

Monitoring records, including monitoring reports, county-approved CAPs, and documentation of CAP resolution, will be maintained and made available to DHCS upon request.

Full Service Partnership Program

DHCS will provide counties with information to complete the estimated fields for eligible population and practitioners/teams needed for each EBP. The estimated numbers of teams/practitioners reflect the numbers needed to reach the entire eligible population (i.e., achieve a 100 percent penetration rate), and DHCS recognizes that counties will generally not be able to reach the entire eligible population, in consideration of BHSA funding availability. These projections are not binding and are for planning purposes only. In future guidance, DHCS will provide more information on the number of teams counties must implement to demonstrate compliance with BHSA FSP requirements. For related policy information, refer to **7.B.3 Full Service Partnership Program Requirements** and **7.B.4 Full Service Partnership Levels of Care**.

Full Service Partnership (FSP) Program Overview

Please provide the following information about the county's BHSA FSP program.

1. Will any of the estimated number of practitioners the county plans to utilize (provided above) be responsible for providing more than one EBP?
   ☐ Yes ☒ No
   a. If yes, please describe how the estimated practitioners will provide more than one EBP:
   N/A
2. Please describe how the county is employing a whole-person, trauma-informed approach, in partnership with families or an individual's natural supports:
   The County of Monterey employs a whole-person, trauma-informed approach to Full Service Partnership services that recognizes the interconnected nature of behavioral health, physical health, housing stability, and social and community supports. Services are delivered in a manner that emphasizes safety, trust, respect, and choice, and are responsive to the lived experiences and strengths of individuals and families served.
   FSP services are designed to engage individuals in their communities and address needs across multiple life domains, including mental health, substance use, physical health, housing, and social supports. Providers are expected to use trauma-informed practices that minimize re-traumatization, promote engagement, and adapt services to meet individuals where they are.

DRAFT

The County supports active partnership with families and individuals' natural supports, consistent with client preference and consent. Families, caregivers, and other natural supports are engaged in service planning, care coordination, and ongoing support to promote stability and recovery. For children, youth, and families, this includes family-driven planning and coordination across systems that support youth and caregivers.
Coordination with community-based organizations, physical health providers, housing partners, and other system partners further supports a whole-person approach. Through these practices, the County of Monterey promotes integrated, person-centered services that support recovery, wellness, and long-term stability.

3. Please describe the county's efforts to reduce disparities among FSP participants:
The County of Monterey is committed to reducing disparities among Full Service Partnership participants by promoting equitable access to services and culturally and linguistically responsive care. Equity considerations are incorporated into program design, service delivery expectations, and ongoing implementation activities.
The County supports outreach and engagement strategies that are responsive to the cultural, linguistic, geographic, and socioeconomic diversity of the community. This includes adapting engagement approaches, service locations, and service delivery methods to reduce barriers related to language access, transportation, housing instability, and stigma.
The County of Monterey emphasizes the inclusion of peer and family support roles and values lived experience as a critical component of service delivery. These roles support trust-building and engagement, particularly for individuals from historically underserved communities.
The County also uses available data and stakeholder input to identify disparities in access, engagement, and outcomes among FSP participants. Information from service utilization data, community input, and provider feedback is used to inform adjustments to outreach strategies, training priorities, and partnerships with community-based organizations, supporting continuous improvement and equity across FSP services.

   The County of Monterey provides ongoing engagement services for individuals receiving Full Service Partnership Intensive Case Management through consistent, relationship-based, and community-centered practices. Engagement is treated as a continuous process that supports access, retention, and meaningful participation in services. FSP ICM teams maintain regular contact using flexible, individualized strategies that reflect client needs, preferences, and circumstances, including community-based contacts, flexible scheduling, and outreach in settings identified by the individual.

   Engagement activities are integrated with service planning and care coordination. Staff work collaboratively with individuals to identify goals, address barriers to participation, and adjust services as needs change. When individuals experience periods of disengagement, teams use respectful and persistent re-engagement approaches that prioritize trust, choice, and continuity of care. Ongoing engagement is further supported through multidisciplinary team structures, inclusion of peer support roles, and coordination with housing, physical health, and community-based partners to promote stability and recovery.

6. Please describe how the county will comply with the required FSP levels of care (e.g., transition FSP ICM teams to ACT, stand up new ACT teams and/or stand up new FSP ICM teams, etc.):
   The County of Monterey will comply with required Full Service Partnership levels of care by ensuring that FSP services are delivered at the appropriate intensity to meet individual needs and are aligned with evidence-based practices and defined levels of care. The County will differentiate service expectations for Full Service Partnership Intensive Case Management and Assertive Community Treatment and will align staffing, team structure, and service delivery accordingly.
   The County will assess existing FSP ICM capacity and community need to determine the appropriate mix of FSP ICM and ACT services. As needed, this may include transitioning FSP

ICM teams to ACT models, standing up new ACT teams, and or establishing additional FSP ICM teams to maintain a balanced continuum of care. Decisions will be guided by clinical need, provider readiness, and fidelity requirements.

Medications for Addiction Treatment (MAT) Details

Please describe the county's approach to enabling access to same-day medications for addiction treatment (MAT) to meet the estimated population needs before July 1, 2029.

1. Describe how the county will assess the gap between current county MAT resources (including programs and providers) and MAT resources that can meet estimated needs:
   To understand where existing MAT resources may fall short of meeting community needs, the County of Monterey Behavioral Health will take a practical, implementation-focused look at how current programs and providers are functioning in relation to expected demand. This will include considering provider capacity, geographic availability, utilization patterns, and timeliness of access alongside available information on substance use disorder prevalence and anticipated referrals from AFBI and other access points. These insights will be used to inform ongoing contracting, referral coordination, and operational adjustments to support sufficient access to MAT services.

2. What additional non-BHSA resources (e.g., county partnerships, vouchers, data sharing agreements) or funding sources will the county behavioral health system utilize (local, state, and federal) to expand supply and/or increase access to housing for BHSA eligible individuals? **The county behavioral health system will leverage a range of non-BHSA resources, contracted and County partnerships, and other funding sources to expand housing supply and increase access for BHSA-eligible individuals. These include state funding programs such as the Behavioral Health Bridge Housing Program (including any future competitive rounds), and the Community Care Expansion (CCE) Grant, with prior awards supporting capital and operating stabilization of residential care facilities. Partnerships with the CoC facilitated Coalition of Homeless Services Providers, specifically the Lead Me Home Leadership Council, County of Monterey Medi-Cal Managed Care Plan, Central California Alliance for Health, will support ongoing coordination with local homelessness response infrastructure, including housing navigation, case conferencing, data-sharing efforts where appropriate, interim housing supports, discharge planning and transition coordination across hospitals, correctional settings, probation, child welfare, and other institutional partners, and pathways to permanent housing for BHSA-eligible individuals. Additional resources include federal Community Development Block Grant (CDBG) funding, local housing developers and nonprofit operators, Interim, Inc. and other supportive housing providers, and housing navigation and low-barrier housing partners. The county will also utilize programs through Monterey County Works and Monterey-Salinas Transit to further support housing access and stability.**

3. How will BHSA Housing Interventions intersect with those other resources and supports to strengthen or expand the continuum of housing supports available to BHSA eligible individuals? **Coalition of Homeless Services Providers (the Lead Me Home Leadership Council): Coordinate BHSA Housing Interventions with the Lead Me Home initiative and associated homelessness response strategies to strengthen alignment between behavioral health, housing, and homeless service systems. Support collaborative housing navigation, case conferencing, housing placement, and system coordination efforts that improve access to housing opportunities and promote long-term housing stability for BHSA-eligible individuals.**

Behavioral Health Bridge Housing Program (including any future competitive rounds): Coordinate interim and bridge housing resources with BHSA Housing Interventions to stabilize placements and support transitions from crisis or interim settings into longer-term residential and supportive housing options without disruption to care or housing stability. These efforts will strengthen continuity of care, support hospital discharge planning and

justice reentry efforts, and promote seamless pathways from crisis response and interim housing to recovery-oriented and permanent housing opportunities.

Community Care Expansion (CCE) Grant (prior awards supporting capital and operating stabilization of RCFs): Build on prior CCE-funded capital and operating stabilization of residential care facilities by aligning BHSA Housing Interventions to help preserve capacity, prevent closures, and support long-term financial sustainability beyond time-limited grant periods. These efforts will help sustain residential care resources that support recovery, community integration, and housing stability for BHSA-eligible individuals.

Central California Alliance for Health (County of Monterey Medi-Cal Managed Care Plan): Coordinate BHSA Housing Interventions with CalAIM Enhanced Care Management, Community Supports (where offered), Transitional Rental Assistance, and workforce and equity initiatives to reduce operational strain on housing providers, improve care coordination, and strengthen housing stability for Medi-Cal beneficiaries. Coordination across these resources will help support housing navigation, transitions between levels of care, and access to housing-related services that promote long-term stability and recovery.

Community Development Block Grant (CDBG) funding: Align CDBG-funded ADA accessibility and health and safety improvements with BHSA Housing Interventions to ensure rehabilitated units remain usable, accessible, and financially viable for BHSA-eligible individuals, including older adults and individuals with physical limitations.

County of Monterey Continuum of Care (CoC): Coordinate housing interventions with CoC-funded permanent supportive housing, HMIS-informed planning efforts, and other HUD resources to strengthen pathways between interim, residential, and permanent housing options for BHSA-eligible individuals experiencing homelessness or housing instability. MCBH will coordinate with the Continuum of Care to support referral processes, housing navigation activities, case conferencing efforts, and housing outcome tracking for BHSA-eligible individuals experiencing homelessness, chronic homelessness, or risk of homelessness. These efforts are intended to strengthen alignment between behavioral health services, housing resources, and homelessness response systems while supporting ongoing planning and coordination regarding future housing system integration opportunities.

Local housing developers, nonprofit operators, and supportive housing providers: Partner with developers and nonprofit operators to advance facility acquisition, conversion, and development strategies identified in the RCFI study, while using BHSA Housing Interventions to support operating sustainability, referrals, and access for BHSA-eligible populations.

Coordination with housing partners may include exploration of adaptive reuse, recovery-oriented housing, shared housing, master leasing, and other housing approaches that strengthen the local housing continuum.

Housing navigation and low-barrier housing partners: Coordinate BHSA Housing Interventions with housing navigation and low-barrier housing options to improve access for individuals who face barriers to traditional residential care facilities, including individuals with co-occurring substance use disorders. These partnerships will support engagement of individuals experiencing homelessness, including those living in unsheltered settings, and help connect them to housing opportunities that promote stability, recovery, and long-term community integration.

Monterey County Works: Align workforce development and training resources with BHSA Housing Interventions to strengthen staffing capacity at residential care facilities and supportive housing settings. By supporting workforce recruitment, training, and retention efforts, these partnerships will help preserve housing and treatment capacity, reducse service disruptions, and program long-term stability and continuity of care for BHSA-eligible individuals.

Monterey-Salinas Transit programs: Coordinate housing placements supported by BHSA Housing Interventions with transit programs (e.g., taxi vouchers, navigation support) to improve access to behavioral health services, medical appointments, employment, education, and other community resources. These efforts will help reduce transportation barriers, improve access for individuals living in underserved areas, support community integration, and promote housing stability and successful placement outcomes.

Lastly, and consistent with BHSA requirements, Monterey County Behavioral Health will implement the Individual Placement and Support (IPS) model of supported employment to fidelity funded with both non-BHSA and BHSA Full Service Partnership dollars. IPS services are intended to help individuals with serious mental illness and co-occurring conditions obtain and maintain competitive employment while receiving behavioral health services. In addition to supporting recovery and community integration, IPS is expected to strengthen economic stability by increasing access to earned income, employment opportunities, and workplace supports. MCBH recognizes that economic security can be an important contributor to long-term housing stability and retention. Through implementation of IPS and coordination with housing, benefits, and supportive service partners, the County will support individuals in pursuing employment goals that may strengthen their ability to obtain and maintain stable housing over time.

4. What is the county behavioral health system's overall strategy to promote permanent housing placement and retention for individuals receiving BHSA Housing Interventions? **Monterey County Behavioral Health's overall strategy to promote permanent housing placement and retention for individuals receiving BHSA Housing Interventions is to strengthen the stability and continuity of housing options across the behavioral health housing continuum. The County will focus on preserving and expanding viable housing capacity, reducing barriers that contribute to housing disruption, and supporting alignment between housing, services, and system partners.**

In alignment with one of the top goals of the Lead Me Home Plan, a central component of this strategy is the preservation and expansion of permanent supportive housing opportunities for individuals with serious mental illness, substance use disorder needs, co-occurring conditions, and histories of homelessness. The County currently partners with housing providers such as Interim, Inc. and Front Street to support a continuum of housing opportunities that include permanent supportive housing, transitional housing, and residential care settings. Through these partnerships, BHSA Housing Interventions will support housing access, housing retention, housing navigation, tenancy sustaining services, rental subsidies, operating subsidies, and coordination with behavioral health services.

Recognizing the significant housing shortage and limited availability of affordable and supportive housing options within Monterey County, the County has intentionally designed its Housing Interventions strategy to include a combination of rental subsidies, operating subsidies, housing navigation and tenancy supports, participant assistance funds, and capital development investments. This balanced approach is intended to address both immediate housing access needs and longer-term housing capacity challenges. Rental subsidies, operating subsidies, and housing support services help individuals obtain and maintain housing in the near term, while capital development investments help preserve and expand housing opportunities available to future BHSA-eligible individuals. Together, these investments are intended to maximize the impact of limited Housing Interventions resources by supporting both immediate housing stability and long-term expansion of the local behavioral health housing continuum.

The County will also utilize BHSA Housing Interventions to preserve existing housing capacity and support future housing development opportunities. This includes planned investments in capital development projects designed to expand housing resources available to BHSA-eligible individuals and strengthen the long-term sustainability of the local behavioral health housing continuum.

By combining housing infrastructure investments, supportive housing partnerships, behavioral health services, and housing stability supports, the County seeks to promote successful transitions from homelessness, crisis settings, institutional care, and housing instability into long-term community living. This approach emphasizes housing stability,

recovery, community integration, and long-term sustainability while maintaining flexibility to adapt to emerging needs, available resources, and evolving state guidance.

5. What actions or activities is the county behavioral health system engaging in to connect BHSA eligible individuals to and support permanent supportive housing (PSH) (e.g., rental subsidies for individuals residing in PSH projects, operating subsidies for PSH projects, providing supportive services to individuals in other permanent housing settings, capital development funding for PSH)? **County of Monterey Behavioral Health supports connection to permanent supportive housing by coordinating behavioral health services, housing referrals, and care transitions for individuals with serious mental illness and related needs. The County recognizes that stable housing outcomes depend on effective pathways from residential and interim settings into permanent housing options, particularly for individuals who face barriers to traditional placements. Current service contracts, including those supporting community-based and field-based behavioral health services, provide infrastructure for outreach, engagement, care coordination, and ongoing support that facilitate successful linkage to PSH and continuity of care once housed.**

   In addition to rental subsidies, operating subsidies, and supportive housing services, MCBH is utilizing BHSA Housing Interventions to support strategic capital development investments intended to expand long-term housing capacity for BHSA-eligible individuals. Planned projects include the development of additional board-and-care capacity and recovery-oriented housing opportunities designed to serve individuals with significant behavioral health needs who face substantial barriers to obtaining and maintaining stable housing. These investments are intended to preserve and expand the local behavioral health housing continuum, increase access to supportive housing settings, and create additional pathways from homelessness, institutional settings, and housing instability into long-term community-based housing. MCBH will continue coordinating these efforts with housing providers, homelessness response partners, healthcare organizations, and other community stakeholders to maximize the impact of limited capital resources and leverage additional housing development opportunities where feasible.

6. Please describe how the county behavioral health system will ensure all Housing Interventions settings provide access to clinical and supportive behavioral health care and housing services: **County of Monterey Behavioral Health's approach to Housing Interventions emphasizes integration of housing with access to clinical and supportive behavioral health services. Housing stability is closely linked to the availability of coordinated mental health services, case management, and culturally responsive supports. Through contracted behavioral health providers and system partnerships, the County supports service models that include assessment, treatment, care coordination, and linkage to community resources, helping ensure individuals in Housing Interventions settings can access appropriate clinical and supportive services while maintaining flexibility to adapt service delivery based on setting type, individual need, and evolving state guidance.**

Eligible Populations

1. Please describe how the county behavioral health system will identify, screen, and refer individuals eligible for BHSA Housing Interventions: **County of Monterey Behavioral Health will identify, screen, and refer individuals eligible for BHSA Housing Interventions through routine behavioral health service delivery, outreach, and care coordination activities. Individuals are identified through clinical assessment, field-based engagement, and ongoing contact with county-operated and contracted behavioral health providers. Screening processes incorporate clinical need, functional impairment, housing status, and service history to determine appropriateness for Housing Interventions. Referrals are coordinated through care teams and system partners to support timely connection to housing resources and ongoing behavioral health services, with flexibility to adapt referral pathways based on individual needs, available housing options, and evolving state guidance. MCBH will utilize culturally responsive engagement and referral approaches tailored to the needs of population groups with elevated unmet behavioral health and housing needs, including older adults and other priority populations, and will monitor and report implementation progress across age groups throughout the plan period to help ensure equitable access to Housing Interventions.**
2. Will the county behavioral health system provide BHSA-funded Housing Interventions to individuals living with a substance use disorder (SUD) only?

   ☐ Yes ☒ **No**

   a. If not, please indicate why the county behavioral health system will not provide BHSA funded Housing Interventions to individuals living with a SUD only and include data to support (select all that apply):

      i. ☐ Insufficient need (i.e., individuals living with an SUD only have sufficient access to housing, there is a limited number of individuals with an SUD only who are unhoused)

         If selected, please explain why there is insufficient need to provide BHSA-funded Housing Interventions living with a SUD only: N/A

      ii. ☐ Insufficient resources

         If selected, please explain why there are insufficient resources to provide BHSA-funded Housing Interventions to individuals living with an SUD only: N/A

      iii. ☒ Other

         If selected, other than insufficient need or insufficient resources, please explain why the county is not providing BHSA-funded Housing Interventions to individuals living with a SUD only: **During the initial BHSA implementation period, Housing Intervention resources are not being deployed specifically for individuals with an SUD diagnoses without a co-occurring serious mental illness. Given the**

abbreviated planning and implementation timeframe associated with BHSA transition, the County prioritized continuation and stabilization of existing housing interventions while initiating targeted planning for additional populations.

This does not preclude the continuation of existing SUD population-focused housing programs, such as Hope Housing Marina. The County is actively convening planning discussions with SUD providers and system partners to better understand the housing needs, service models, and funding coordination considerations for SUD-only populations, including coordination with MCP TRA and other housing supports. These discussions will inform future BHSA planning cycles and potential expansion of Housing Intervention strategies in subsequent years.

iv. Please upload supporting data (enter supporting document file name): **N/A**

3. What actions or activities did the county behavioral health system engage in to consider the unique needs of eligible children and youth in the development of the county's Housing Interventions services (e.g., review data, engage with stakeholders, analyze research, etc.) who are:
   a. In, or at-risk of being in, the juvenile justice system: County of **Monterey Behavioral Health considered the unique needs of diverse populations in the development of Housing Interventions through a combination of data review, community and system partner engagement, and cross-system planning activities that have been implemented to support BHSA transition and Integrated Plan development. This work drew on findings from the Community Program Planning Process (CPPP), Community Health Needs Assessment (CHNA), BHSA Transition Plan, stakeholder collaboration activities, and system partner forums to identify housing access barriers, service gaps, and equity considerations relevant to individuals with behavioral health needs across the County.**

   In considering the needs of children and youth involved in the juvenile justice system, the County reviewed stakeholder input and system partner perspectives highlighting the intersection of housing instability, justice involvement, and behavioral health needs. Engagement with cross-system partners emphasized the importance of housing options that support continuity of care, reduce system involvement, and align with developmentally appropriate and family-centered supports for youth transitioning between systems.

   These planning and engagement activities informed the County's approach to Housing Interventions by ensuring that population-specific needs, access barriers, and equity considerations were meaningfully considered within a flexible and integrated framework. This approach supports the development of housing

interventions that can adapt to diverse needs while strengthening coordination across behavioral health, housing, and other systems serving BHSA-eligible individuals.

b. Lesbian, Gay, Bisexual, Transgender, Queer, Plus (LGBTQ+): County of **Monterey Behavioral Health considered the unique needs of diverse populations in the development of Housing Interventions through a combination of data review, community and system partner engagement, and cross-system planning activities that have been implemented to support BHSA transition and Integrated Plan development. This work drew on findings from the Community Program Planning Process (CPPP), Community Health Needs Assessment (CHNA), BHSA Transition Plan, stakeholder collaboration activities, and system partner forums to identify housing access barriers, service gaps, and equity considerations relevant to individuals with behavioral health needs across the County.**

For LGBTQ+ children and youth, the County reviewed CPPP data and stakeholder input identifying heightened risks related to housing instability, discrimination, and barriers to culturally responsive services. These insights informed consideration of housing interventions that emphasize safety, inclusivity, and access to affirming behavioral health supports, particularly for youth who may be disconnected from family or traditional support systems.

These planning and engagement activities informed the County's approach to Housing Interventions by ensuring that population-specific needs, access barriers, and equity considerations were meaningfully considered within a flexible and integrated framework. This approach supports the development of housing interventions that can adapt to diverse needs while strengthening coordination across behavioral health, housing, and other systems serving BHSA-eligible individuals.

c. In the child welfare system: County of **Monterey Behavioral Health considered the unique needs of diverse populations in the development of Housing Interventions through a combination of data review, community and system partner engagement, and cross-system planning activities that have been implemented to support BHSA transition and Integrated Plan development. This work drew on findings from the Community Program Planning Process (CPPP), Community Health Needs Assessment (CHNA), BHSA Transition Plan, stakeholder collaboration activities, and system partner forums to identify housing access barriers, service gaps, and equity considerations relevant to individuals with behavioral health needs across the County.**

In addressing the needs of children and youth involved in the child welfare system, the County considered input from system partners and community stakeholders describing the housing challenges faced during placement transitions, reunification efforts, and aging out of care. Planning activities emphasized the importance of coordination across child-serving systems and housing interventions that support stability, continuity of services, and alignment with behavioral health and family

supports.

These planning and engagement activities informed the County's approach to Housing Interventions by ensuring that population-specific needs, access barriers, and equity considerations were meaningfully considered within a flexible and integrated framework. This approach supports the development of housing interventions that can adapt to diverse needs while strengthening coordination across behavioral health, housing, and other systems serving BHSA-eligible individuals.

4. What actions or activities did the county behavioral health system engage in to consider the unique needs of eligible adults in the development of the county's Housing Interventions services (e.g., review data, engage with stakeholders, analyze research, etc.) who are:
   a. Older adults: **County of Monterey Behavioral Health considered the unique needs of diverse populations in the development of Housing Interventions through a combination of data review, community and system partner engagement, and cross-system planning activities that have been implemented to support BHSA transition and Integrated Plan development. This work drew on findings from the Community Program Planning Process (CPPP), Community Health Needs Assessment (CHNA), BHSA Transition Plan, stakeholder collaboration activities, and system partner forums to identify housing access barriers, service gaps, and equity considerations relevant to individuals with behavioral health needs across the County.**

      For older adults, the MCBH reviewed CPPP findings and community feedback highlighting accessibility barriers, limited housing options, and the need for integrated behavioral health and supportive services. These considerations informed planning for housing interventions that address mobility, health complexity, and the importance of stable, accessible housing environments that support aging with dignity and continued community connection.

      These planning and engagement activities informed the County's approach to Housing Interventions by ensuring that population-specific needs, access barriers, and equity considerations were meaningfully considered within a flexible and integrated framework. This approach supports the development of housing interventions that can adapt to diverse needs while strengthening coordination across behavioral health, housing, and other systems serving BHSA-eligible individuals.

   b. In, or are at risk of being in, the justice system: County of **Monterey Behavioral Health considered the unique needs of diverse populations in the development of Housing Interventions through a combination of data review, community and system partner engagement, and cross-system planning activities that have been implemented to support BHSA transition and Integrated Plan development. This work drew on findings from the Community Program Planning Process (CPPP), Community Health Needs Assessment (CHNA), BHSA Transition Plan, stakeholder collaboration activities, and system partner forums to identify housing access barriers, service gaps, and equity**

considerations relevant to individuals with behavioral health needs across the County. In considering justice-involved adults, the County incorporated stakeholder input and system partner perspectives emphasizing the role of housing stability in reducing recidivism and supporting behavioral health recovery. Planning activities highlighted the need for housing interventions that facilitate reentry, support continuity of care, and coordinate with justice, housing, and behavioral health partners to address complex service needs.

These planning and engagement activities informed the County's approach to Housing Interventions by ensuring that population-specific needs, access barriers, and equity considerations were meaningfully considered within a flexible and integrated framework. This approach supports the development of housing interventions that can adapt to diverse needs while strengthening coordination across behavioral health, housing, and other systems serving BHSA-eligible individuals.

c. In underserved communities: County of **Monterey Behavioral Health considered the unique needs of diverse populations in the development of Housing Interventions through a combination of data review, community and system partner engagement, and cross-system planning activities that have been implemented to support BHSA transition and Integrated Plan development. This work drew on findings from the Community Program Planning Process (CPPP), Community Health Needs Assessment (CHNA), BHSA Transition Plan, stakeholder collaboration activities, and system partner forums to identify housing access barriers, service gaps, and equity considerations relevant to individuals with behavioral health needs across the County. For adults in underserved communities, including those facing geographic, cultural, linguistic, or economic barriers, the County reviewed data and engagement findings identifying disparities in access to housing and behavioral health services. These insights informed consideration of housing interventions that promote equity, improve access in underserved regions, and support culturally and linguistically responsive approaches aligned with community-identified needs.**

These planning and engagement activities informed the County's approach to Housing Interventions by ensuring that population-specific needs, access barriers, and equity considerations were meaningfully considered within a flexible and integrated framework. This approach supports the development of housing interventions that can adapt to diverse needs while strengthening coordination across behavioral health, housing, and other systems serving BHSA-eligible individuals.

Local Housing System Engagement

1. How will the county behavioral health system coordinate with the Continuum of Care (CoC) and receive referrals for Housing Interventions services? **The County of Monterey Behavioral Health system will coordinate with the local Continuum of Care through ongoing communication, information sharing, and alignment of referral pathways. Referrals for Housing Interventions**

may be received through existing homeless response system processes, care coordination activities, and collaboration with providers and partners engaged in CoC-supported services. Coordination will focus on ensuring referrals are appropriate, timely, and aligned with eligibility criteria and available housing resources, while maintaining flexibility to adapt processes as local systems and state guidance evolve.

2. Please describe the county behavioral health system's approach to collaborating with the local CoC, Public Housing Agencies, Medi-Cal managed care plans (MCPs), Enhanced Care Management (ECM) and Community Supports providers, as well as other housing partners, including existing and prospective PSH developers and providers in your community in the implementation of the county's Housing Interventions:
    a. Local CoC: **The County of Monterey Behavioral Health system's approach to collaborating with the local CoC emphasizes alignment of housing priorities, coordination across systems, and shared understanding of roles related to housing and behavioral health services. Collaboration may include participation in cross-system discussions, alignment of planning efforts, and coordination around housing availability and service needs. This approach supports a coordinated housing continuum while allowing the County to adapt collaboration activities based on capacity, resources, and local needs.**
    b. Public Housing Agency: **The County of Monterey Behavioral Health system will collaborate with Public Housing Agencies through information sharing, coordination around housing resources, and alignment of housing supports for BHSA-eligible individuals. This collaboration may include coordination related to housing opportunities, tenant support needs, and referral processes, as appropriate. The County's approach is intended to support access to housing while maintaining flexibility to respond to evolving housing availability and program requirements.**
    c. MCPs: **The county behavioral health system will collaborate with Medi-Cal managed care plans to support coordination between housing interventions and Medi-Cal-covered benefits. This collaboration will focus on aligning roles related to care coordination, service access, and housing-related supports, while ensuring BHSA Housing Interventions complement and do not duplicate Medi-Cal benefits. Ongoing communication will support shared understanding of eligibility, service boundaries, and opportunities for coordination.**
    d. ECM and Community Supports Providers: **The county behavioral health system's approach includes coordination with ECM and Community Supports providers to align housing-related activities with care management and supportive services.**
    e. Other (e.g., CalWORKS/TANF housing programs, child welfare housing programs, PSH developers and providers, etc.): **The county behavioral health system will collaborate with housing partners, including permanent supportive housing developers, nonprofit housing providers, and supportive housing operators, to support the implementation**

of Housing Interventions. Collaboration may include coordination related to housing development opportunities, service integration, referrals, and ongoing communication about housing needs and system capacity. This approach supports alignment across housing and behavioral health systems while allowing flexibility in how partnerships evolve over time.

3. How will the county behavioral health system work with Homekey+ and supportive housing sites to provide services, funding, and referrals that support and house BHSA eligible individuals? **The county behavioral health system will work with Homekey+ and supportive housing sites through coordination of referrals, alignment of behavioral health services, and communication regarding housing availability and resident support needs. BHSA Housing Interventions may be used, as appropriate, to complement existing housing resources by supporting access to services and housing stability. This approach emphasizes coordination rather than prescriptive program design and allows the County to adapt to changing housing and funding conditions.**
4. Did the county behavioral health system receive Homeless Housing Assistance and Prevention Grant Program (HHAP) Round 6 funding?

   ☒ **Yes** ☐ No

   a. If yes, how will the county coordinate the use of HHAP dollars to support the housing needs of BHSA eligible individuals in your community? **The County will coordinate the use of HHAP dollars to support the housing needs of BHSA-eligible individuals by aligning HHAP-funded activities with BHSA Housing Interventions and broader system planning. This includes using HHAP funds to enhance access to permanent housing, strengthen connections between outreach and housing placement, and support stable housing outcomes for individuals experiencing or at risk of homelessness. Coordination will be pursued through cross-system communication, alignment with continuum-wide priorities, and referral pathways that complement BHSA-focused housing resources, while maintaining flexibility to respond to changing local needs and available funding.**

3. How will the county behavioral health system identify, confirm eligibility, and refer Medi-Cal members to housing-related Community Supports covered by MCPs (including Transitional Rent)?
   County of Monterey Behavioral Health will identify Medi-Cal members who may benefit from housing-related Community Supports through routine engagement, outreach, and assessment activities that inform individualized care planning. Eligibility will be reviewed and confirmed in alignment with DHCS guidance and applicable BHSA policy requirements. Referrals will be coordinated with CCAH through collaborative and efficient referral processes across relevant county departments, recognizing that CCAH is responsible for authorizing, delivering, and reimbursing Community Supports, including housing-related assistance such as transitional rent or housing deposits.
4. Please describe coordination efforts and ongoing processes to ensure the county behavioral health contracted provider network for Housing Interventions is known and shared with MCPs serving your county:
   County of Monterey Behavioral Health maintains ongoing coordination with Medi-Cal managed care plans through established communication and collaboration structures that support shared understanding of services, providers, and system priorities. These efforts include regular meetings with MCP partners to exchange information, provide updates, and discuss care coordination, referral needs, collaboration effectiveness, and opportunities to address service overlap or gaps. Through these processes, the County shares information about its behavioral health service array and contracted provider network, including housing-related services, and communicates updates as new programs or services are implemented.

   In addition, information about the County's behavioral health services and contracted providers is made available through publicly accessible resources, which are shared with MCP partners to support awareness and coordination. Ongoing engagement at both operational and executive levels provides opportunities to align understanding of available services and strengthen collaboration over time. This approach supports transparency and coordination while allowing flexibility as service offerings and Housing Interventions continue to evolve.

6. What processes does the county behavioral health system have in place to ensure Medi-Cal members living with significant behavioral health conditions do not experience gaps in service once any of the MCP housing services are exhausted, to the extent resources are available? **County of Monterey Behavioral Health will use care coordination, ongoing engagement, and cross-system communication to help minimize gaps in behavioral health services when time-limited Medi-Cal housing supports end. As appropriate and to the extent resources are available, the County will support continuity of care through coordination with providers, CCAH, and housing partners, and by considering other available behavioral health and housing resources.**

The County is monitoring DHCS guidance and emerging implementation models and will consider participation in future planning cycles once roles, governance structures, and operational processes are sufficiently established to support effective implementation.**

Behavioral Health Services Fund: Innovative Behavioral Health Pilot and Projects

For each innovation program or pilot provide the following information.

1. Does the county's plan include the development of innovative programs or pilots? (If Yes, proceed to following questions)
   ☒ **Yes** ☐ No
   a. What Behavioral Health Services Act (BHSA) component will fund the innovative program? (Select one)
      i. ☐ Housing Interventions
      ii. ☐ Full Service Partnership
      iii. ☒ Behavioral Health Services and Supports
   b. Please describe how the innovation program or pilot will help build the evidence base for the effectiveness of new statewide strategies: The Rainbow Connections Innovation pilot, funded by encumbered MHSA Innovation funds, is developing a system of care to serve the needs of LGBTQ youth, TAY and their families through an adapted version of the evidence-based Positive Behavioral Interventions and Supports (PBIS) model. Services offered through this program primarily align at the level of Early Intervention with focused identity-affirming outreach to at-risk and in-need populations, family psychoeducation and support, care management, and clinical care coordination. Additionally, a major component of this program is the development of peer supports for youth and TAY, and

workforce, education and training for mental and physical health clinicians, school staff and faculty, and other professionals responsible for the wellbeing and development of youth to become familiar with the issues faced by LGBTQ youth and to become enabled to make meaningful referrals to care. This multi-pronged approach to deliver culturally responsive care can then be scalable and replicable across other counties to similarly serve LGBTQ populations or other distinct BHSA eligible populations.

c. Please describe intended outcomes of the project: The intended outcomes of the Rainbow Connections project include increased engagement of LGBT youth and their families in behavioral health services, improved perceptions of cultural responsiveness within county-supported programs, and reduced barriers to accessing timely support. The project aims to strengthen protective social and family connections, enhance early intervention through peer connections and gender-affirming training for professionals and adults, reduce negative outcomes such as suicide, substance abuse and homelessness, and improve participant-reported wellbeing and community belonging. In addition, the project seeks to generate clear learnings about which outreach methods, peer-support structures, and service pathways are most effective for this population, ultimately informing future programming and guiding recommendations for sustainable, longer-term system improvements for LGBTQ and other identified BHSA eligible populations.

2. Does the county's plan include the development of innovative programs or pilots? (If Yes, proceed to following questions)

☒ Yes ☐ **No**

a. What Behavioral Health Services Act (BHSA) component will fund the innovative program? (Select one)

i. ☐ Housing Interventions
ii. ☐ Full Service Partnership
iii. ☒ Behavioral Health Services and Supports

b. Please describe how the innovation program or pilot will help build the evidence base for the effectiveness of new statewide strategies: The Psychiatric Advance Directives (PADs) Phase II pilot, funded by encumbered MHSA Innovation funds, expands on the Phase I of the PADs project wherein a digital PAD was developed and successfully piloted within select populations. In Phase II, access to the digital PAD platform is expanded to BHSA eligible adult populations throughout the county, with additional and complimentary workforce education and training efforts being performed for first responder, law enforcement, emergency department and other crisis response professionals. The PADs program contributes to the evidence base of BHSA statewide strategies by increasing peer workforce capacity, creating an additional supportive practice to wraparound models, and improving the quality of care and outcomes during crisis response. Findings from this project will inform statewide replication of the use of PADs to reduce involuntary

hospitalization, justice involvement and homelessness among individuals with serious mental illness.

c. Please describe intended outcomes of the project: The PADs Phase II program supports a statewide movement to create a standardized, sustainable PAD process. The goal of the Innovation project is to help counties improve access to personal, health, and daily life care, the appropriateness and quality of care, preservation of the individual's life goals and preferences, and to improve positive outcomes for people at risk of involuntary care, homelessness, unnecessary hospitalizations, and involvement with the criminal justice systems, at all stages of life.

Workforce Strategy

Maintain an Adequate Network of Qualified and Culturally Responsive Providers

The county must ensure its county-operated and county-contracted behavioral health workforce is well-supported and culturally and linguistically responsive with the population to be served. Through existing Medi-Cal oversight processes, the Department of Health Care Services (DHCS) will assess whether the county:

1. Maintains and monitors a network of providers that is sufficient to provide adequate access to services and supports for individuals with behavioral health needs; and
2. Meets federal and state standards for timely access to care and services, considering the urgency of the need for services.
3. The county must ensure that Behavioral Health Services Act (BHSA)-funded providers are qualified to deliver services, comply with nondiscrimination requirements, and deliver services in a culturally competent manner. Effective FY 2027-2028, DHCS encourages counties to require their BHSA providers to comply with the same standards as Medi-Cal providers in these areas (i.e. requiring the same standards regardless of whether a given service is reimbursed under BHSA or Medi-Cal), as described in the Policy Manual.
    a. Does the county intend to adopt this recommended approach for BHSA- funded providers that also participate in the county's Medi-Cal Behavioral Health Delivery System?
    ☐ Yes ☒ **No**
        i. If not, please describe how the county will ensure that BHSA-funded providers are qualified to deliver services, comply with nondiscrimination requirements, and deliver services in a culturally competent manner**: The County does not intend to adopt a uniform requirement that BHSA-funded providers comply with all Medi-Cal provider standards solely based on funding source. Instead, the County will ensure that BHSA-funded providers are qualified to deliver services, comply**

with nondiscrimination requirements, and deliver services in a culturally competent and linguistically responsive manner through established contracting and oversight procedures. These procedures include review and verification of provider qualifications and organizational capacity at the onset of agreements, incorporation of nondiscrimination and cultural responsiveness requirements into contract terms, and periodic monitoring throughout the agreement period to ensure continued alignment with applicable requirements and community needs.

b. Does the county intend to adopt this recommended approach for BHSA- funded providers that do not participate in the county's Medi-Cal Behavioral Health Delivery System?

☐ Yes ☒ **No**

i. If not, please describe how the county will ensure that BHSA-funded providers are qualified to deliver services, comply with nondiscrimination requirements, and deliver services in a culturally competent manner**: The County does not intend to require BHSA-funded providers that do not participate in the Medi-Cal Behavioral Health Delivery System to meet all Medi-Cal provider standards. The County will ensure provider qualification, compliance with nondiscrimination requirements, and culturally competent service delivery through provider-specific contracting, onboarding, and monitoring processes. The County will work collaboratively with each provider to establish clear expectations related to nondiscrimination, cultural and linguistic responsiveness, and service quality at the initiation of agreements and will conduct periodic reviews throughout the contract term to support ongoing compliance and alignment with BHSA requirements.**

These include limited staffing with expertise in health information exchange (HIE), data sharing, and interoperability, as well as limited data analytics capacity. The County also has ongoing gaps in general administrative support, including contract management, fiscal processing, and program administration, which affect day-to-day operations for BHSA-funded programs.**

5. How does the county expect workforce needs to shift over the next three fiscal years given new and forthcoming requirements, including implementation of new evidence-based practices under Behavioral Health Transformation (BHT) and Behavioral Health Community-Based Organized Networks of Equitable Care and Treatment (BH-CONNECT)? **Over the next three fiscal years, the County anticipates shifts in workforce needs driven by new and forthcoming requirements under Behavioral Health Transformation (BHT) and BH-CONNECT. There will be increased demand for staff trained in evidence-based practice (EBP) fidelity and team-based service models, including peer specialists, employment specialists, and program supervisors**

responsible for operationalizing fidelity standards and outcomes monitoring. The County also anticipates greater need for field-based staff to support community-centered and mobile service delivery models. In addition, expanded administrative and support capacity will be needed, including quality improvement and data analytics staff, training and workforce development infrastructure, and personnel with documentation and claims expertise to support tracking of outcomes and EBP delivery.

4. Please describe intended outcomes of the program or service: **Behavioral Health Crisis, Dispatch, and Mobile Response Services is a coordinated early intervention program that supports individuals experiencing behavioral health**

crises through both system coordination functions and direct client-facing crisis response services.

The program includes Access and Linkage activities such as screenings, assessments, referrals, and crisis call coordination, dispatch, and professional triage to ensure timely routing of individuals to appropriate levels of care. These functions support rapid identification of behavioral health needs and facilitate connection to appropriate crisis and treatment services.

The program also includes direct Treatment Services and Supports, including crisis intervention and mobile response services that prevent, respond to, and stabilize behavioral health crises, including situations involving risk of suicide or acute psychiatric distress. Services are delivered in real time to de-escalate crises, provide immediate clinical support, and connect individuals to ongoing behavioral health treatment and services.

These combined system coordination and direct service activities are designed to reduce reliance on emergency departments, law enforcement, and inpatient hospitalization by providing timely behavioral health crisis intervention and linkage to ongoing care.

Table 21. Estimated Number of Individuals Served in Early Intervention Programs by Plan Year

Plan Period by FY	Projected Number of Individuals Served
FY 2026 - 2027	**7,739**

FY 2027 - 2028	**7,739**
FY 2028 - 2029	**7,739**

a. Please describe any data or assumptions the county used to project the number of individuals served through EI programs:
The projected number of individuals served through Early Intervention crisis services is based on recent crisis system utilization data from Calendar Year 2025. During this period, the County of Monterey recorded approximately 7,739 calls to crisis lines, including the Community Crisis Line operated by the Family Service Agency of the Central Coast (6,949 calls) and the Seneca Crisis Warm Line serving children and youth (790 calls). These crisis lines serve as the primary entry points for telephonic crisis intervention, screening, assessment, referral, and linkage to mobile crisis services when appropriate.

Because crisis services are recorded as calls and responses rather than unique individuals, the county used the total number of crisis line contacts as a proxy for individuals served through Early Intervention crisis services. In addition to telephonic crisis intervention, some calls result in mobile crisis field responses, including approximately 1,839 in-person mobile crisis responses in CY 2025 across Seneca Children and Youth Mobile Response Teams, Sierra Mental Wellness Group mobile crisis teams, and Monterey County Behavioral Health mobile crisis teams.

The county assumes that overall crisis system utilization will remain relatively stable over the three-year plan period. Therefore, the CY 2025 crisis call volume of 7,739 contacts was used as the projected annual number of individuals served through this Early Intervention crisis services program for FY 2026-2027 through FY 2028-2029.

1. BHSA County Policy Manual section 6.B.5 states counties may use up to seven percent of Housing Interventions component funds on outreach and engagement. The amount of funds transferred out of the Housing Interventions component into another funding component must be decreased by a corresponding amount. Counties are not required to use Housing Intervention component funding for outreach and engagement, or other funding transfer requests. 4. BHSA Policy Manual Ch. 6 § B.7.3 states that MHSA WET or CFTN funds transferred into BHSA BHSS will remain WET or CFTN funds and will not be subject to the suballocation requirements. Counties may set aside BHSS funds for WET and CFTN; the reversion period for these specific funds is ten years. All transfers into WET and CFTN are irrevocable and cannot be transferred out of WET and CFTN. Counties may continue to keep separate fund accounts to track their WET and CFTN funds.
5. BHSA Policy Manual Ch. 6 § B.8.2.2 states that the share of indirect costs attributed to BHSA funding should be in proportion to the extent the BHSA program benefits from the support activity. Proportional administrative and indirect costs will be verified through the Behavioral Health Outcomes Accountability and Transparency Report (BHOATR). Counties should ensure that their cost-allocation methodology complies with 2 CFR 200 and appropriately distributes costs in proportion.

Instructions

Counties shall report their projected spending for Behavioral Health Services Act (BHSA) plan administration in Tab Eight.

Row 27: the total dollar-amount of BHSA component allocations dedicated to improvement and monitoring activities, including plan operations, quality and outcomes, data reporting pursuant to W&I Code § 5963.04, and monitoring of subcontractor compliance for all county behavioral health programs, including, but not limited to, programs administered by a Medi-Cal behavioral health delivery system, as defined in subdivision (i) of Section 14184.101, and programs funded by the Projects for Assistance in Transition from Homelessness grant, the Community Mental Health Services Block Grant, and other Substance Abuse and Mental Health Services Administration grants by year. Under W&I Code § 5892 (e)(2)(B), the total amount shall equal 2% or less of total projected annual revenues of the local behavioral health services fund for counties with a population over 200,000 or 4% of the total projected annual revenues of the local behavioral health services fund for counties with a population of less than 200,000. Any costs that exceed that amount will be included in the governor's budget. Administrative costs for improving and monitoring will only be reported on this tab, not the BHSA component tabs.

Row 28: input amounts of BHSA component allocations dedicated to county Integrated Plan annual planning costs, including stakeholder engagement in planning and local Behavioral Health Board activities by year. Under W&I Code § 5892 (e)(1)(B), this amount shall be 5% or less of total projected annual revenues of the local behavioral health services fund. Any costs that exceed that amount will be included in the governor's budget. Planning costs will only be reported on this tab, not the BHSA component tabs.

Row 29: input total dollar amount of new and ongoing county and behavioral health agency administrative costs to implement W&I Code § 5963-5963.06 and § 14197.71.

Row 30: select your county population size. This will ensure the formatting in the Admin Spending Overages section presents accurately.

BHSA Three-Year Integrated Plan (IP)

BEHAVIORAL HEALTH
Avanzando Juntos Forward Together

BHSA Three-Year Integrated Plan: Overview

Established through **Proposition 1** and **Senate Bill 326**, the Behavioral Health Services Act (BHSA) replaces the MHSA framework and requires every California county to develop and submit a **Three-Year Integrated Plan** using standardized templates established by DHCS for FYs 2026/27 through 2028/29.

What is the Integrated Plan?

The BHSA Integrated Plan is a systemwide planning and accountability framework that demonstrates how counties align behavioral health services, funding strategies, statewide goals, and local priorities across the continuum of care.

It is NOT a comprehensive inventory of all behavioral health programs and services. Rather, it documents county alignment with new service delivery, eligibility, and funding requirements under the BHSA.

The Plan was developed using required DHCS Integrated Plan and Budget Templates, consistent with statewide BHSA planning and reporting requirements, and informed by County of Monterey's Community Planning Process.

Key areas of BHSA transformation include:

- **Funding structure and service categories**
- **Housing interventions and accountability**
- **Integrated behavioral health planning across mental health and substance use disorder systems**
- **Statewide consistency, transparency, and outcomes**

Public Comments & Behavioral Health Commission recommendations

#	REVISION
1	In the Housing Interventions responses, MCBH identified the Coalition of Homeless Services Providers and the Lead Me Home Leadership Council as key partners. The revised language describes coordination with Lead Me Home strategies, housing navigation, case conferencing, housing placement, appropriate data-sharing efforts, interim housing supports, and pathways to permanent housing for BHSA-eligible individuals.
2	In the County of Monterey Continuum of Care section, MCBH added coordination with CoC-funded permanent supportive housing, HMIS-informed planning, HUD resources, referral processes, housing navigation, case conferencing, and housing outcome tracking for individuals experiencing homelessness, chronic homelessness, or risk of homelessness.

Draft Integrated Plan Revisions 3-5

#	REVISION
3	The CoC coordination language was revised to commit to HMIS-informed planning and coordination with CoC partners without stating that all BHSA Housing Interventions will be routed through Coordinated Entry. The IP also notes continued planning with system partners around future housing system integration opportunities.
4	The Behavioral Health Bridge Housing section was revised to describe how interim and bridge housing resources will coordinate with BHSA Housing Interventions to stabilize placements and support transitions from crisis or interim settings into longer-term residential and supportive housing. The revised language also references continuity of care, hospital discharge planning, justice reentry, and movement from crisis response and interim housing into recovery-oriented and permanent housing opportunities.
5	The Community Care Expansion section now explains how prior CCE-funded capital and operating stabilization of residential care facilities will align with BHSA Housing Interventions to preserve capacity, reduce closure risk, support long-term financial sustainability, and maintain residential care resources that support recovery, community integration, and housing stability.

Draft Integrated Plan Revisions 6-9

#	REVISION
6	The Central California Alliance for Health section was revised to include CalAIM Enhanced Care Management, Community Supports, Transitional Rental Assistance, workforce and equity initiatives, housing navigation, transitions between levels of care, and access to housing-related services that support stability and recovery.
7	The local housing developers, nonprofit operators, and supportive housing providers section was revised to include facility acquisition, conversion, and development strategies. The IP also now references exploration of adaptive reuse, recovery-oriented housing, shared housing, master leasing, and other housing approaches that may strengthen the local housing continuum.
8	The housing navigation and low-barrier housing partners section was revised to describe engagement of individuals experiencing homelessness, including those living in unsheltered settings, and connection to housing opportunities that support stability, recovery, and long-term community integration.
9	The Monterey County Works section was revised to describe workforce development and training resources that strengthen staffing capacity in residential care facilities and supportive housing settings. The revised language includes recruitment, training, retention, preservation of housing and treatment capacity, reduced service disruptions, long-term stability, and continuity of care.

Draft Integrated Plan Revisions 10-12

#	REVISION
10	The Monterey-Salinas Transit section was revised to describe coordination between housing placements and transit programs to improve access to behavioral health services, medical appointments, employment, education, and other community resources. The IP also now references reducing transportation barriers, improving access for individuals in underserved areas, supporting community integration, and promoting successful housing placements.
11	The overall Housing Interventions strategy response was revised to describe a balanced approach that includes rental subsidies, operating subsidies, housing navigation, tenancy supports, participant assistance funds, and capital development investments. The revised language explains that this mix addresses both immediate housing access needs and longer-term housing capacity challenges.
12	The overall Housing Interventions strategy response was revised to identify Permanent Supportive Housing as a central component of MCBH's housing strategy. The IP now names housing partners and describes support for permanent supportive housing, transitional housing, residential care settings, housing access, housing retention, housing navigation, tenancy sustaining services, rental subsidies, operating subsidies, and coordination with behavioral health services.

Draft Integrated Plan Revisions 13-15

#	REVISION
13	The Housing Interventions strategy response now describes planned capital development investments intended to expand housing resources for BHSA-eligible individuals and strengthen the long-term sustainability of the local behavioral health housing continuum. Additional language was developed for the PSH and capital development response describing strategic investments in board-and-care capacity and recovery-oriented housing opportunities.
14	The Housing Interventions overall strategy response was revised to explain that rental subsidies, operating subsidies, participant assistance funds, and housing support services help individuals obtain and maintain housing in the near term, while capital development investments help preserve and expand housing opportunities for future BHSA-eligible individuals.
15	The Housing Interventions identification, screening, and referral response was revised to state that MCBH will use population-specific and culturally responsive engagement and referral approaches for older adults and other groups with elevated unmet behavioral health and housing needs. The IP also now states that MCBH will monitor and report implementation progress across age groups during the plan period.

Draft Integrated Plan Revisions 16-18

#	REVISION
16	The non-BHSA housing resources response was revised to include discharge planning and transition coordination across hospitals, correctional settings, probation, child welfare, and other institutional partners as part of housing navigation, interim supports, and pathways to permanent housing for BHSA-eligible individuals.
17	The IPS supported employment response was revised to describe implementation of the Individual Placement and Support model to fidelity as part of the Full-Service Partnership continuum. The revised language connects IPS to competitive employment, earned income, workplace supports, economic stability, recovery, community integration, and long-term housing stability.
18	Disparity analysis language was added to explain that some demographic disparity data were not available through the source datasets used for the analysis. The IP now notes that some source data either do not report disparities at the required level of detail or are not accessible to the County in a way that allows reliable subgroup analysis, limiting the County's ability to fully assess disparities for those measures.

Draft Integrated Plan Revisions 19-21

#	REVISION
19	Data limitation language was added stating that the Perception of Functioning Domain Score and Perception of Social Connectedness Domain Score were not available through the data sources provided for the Integrated Plan. The IP also now states that MCBH will monitor opportunities to incorporate these measures into future planning and reporting as data become available and will continue supporting services that promote community integration, social connection, recovery, and independent functioning.
20	The crisis utilization discussion was revised to state that state-provided data did not include age-group analysis for Crisis Residential Treatment or Crisis Intervention utilization. MCBH also added specific Early Intervention strategies, including Behavioral Health Crisis, Dispatch, and Mobile Response Services; Access Post-Hospital/Crisis Follow-Up; MCHOME Homeless Outreach & Engagement; 211 referral and linkage services; regional Access to Treatment programs; and early childhood, child welfare, youth, and family-serving programs.
21	The IP now includes monitoring language identifying crisis line volume, mobile crisis response volume, response and linkage timeliness where available, post-crisis follow-up contacts, completed referrals, engagement in ongoing services, and trends in higher-acuity utilization such as Crisis Residential Treatment, emergency department use, hospitalization, and repeat crisis episodes.

Draft Integrated Plan Revisions 22-24

#	REVISION
22	The Justice-Involvement cross-measure response was revised to describe outpatient, crisis, intensive care coordination, FSP, and intensive case management services that support identification of behavioral health needs, stabilization, continuity of care, and reduced justice involvement for individuals with SMI, SUD, or co-occurring conditions.
23	The Justice-Involvement response now describes behavioral health services across juvenile justice, adult justice, court, and reentry settings. It also states that the County provides direct behavioral health services in juvenile justice settings and collaborates with adult jail behavioral health providers to support assessment, treatment engagement, discharge planning, and connection to community-based services.
24	The Justice-Involvement response was revised to identify coordination with County Access programs, diversion initiatives, court-based collaborations, and CalAIM Justice-Involved Behavioral Health Linkages activities designed to improve continuity of care and reduce service gaps after release from institutional settings.

Draft Integrated Plan Revisions 25-27

#	REVISION
25	The Justice-Involvement response now describes continued support for the Community Crisis Line, 988 coordination, crisis dispatch services, and countywide mobile crisis response teams serving youth and adults. The revised language explains that these services help de-escalate crises, stabilize individuals in the community, and connect people to behavioral health services before justice system involvement occurs.
26	The overdose response was revised to state that overdose prevention, treatment, and recovery strategies will be implemented with culturally responsive providers and community-based organizations. The IP also now identifies monitoring indicators, including overdose deaths, emergency department visits related to substance use, follow-up after emergency department visits for substance use, engagement in treatment services, DMC-ODS utilization, and other available population health measures.

CSA 74 History/Background

History

The County Codes for CSA-74 are found at Chapter 15.29. In "Section 15.29.05 - Intent" it in part states the following:

> *"It is the intent of the Board of Supervisors of the County of Monterey to provide for the continued funding of the Monterey County Emergency Medical Services System, including paramedic, ambulance, and related services…"*

The following is an abbreviated history of CSA-74.

1988 November 1988, the County sponsored a ballot measure (an "advisory election") on the following question: "Shall the Board pursue the establishment of a countywide paramedic Emergency Medical Services program, which…will be financed by a benefit assessment on the real property within the county not to exceed twelve dollars for basic services and, if requested by a city, district, or zone, five dollars for discretionary supplemental services annually for each benefit unit?" The voters approved a measure by a 67.1% majority, and the board subsequently established CSA-74. Five-dollar supplemental assessment ("zones") were established for the following jurisdictions:

A	City of Salinas	May 1989
B	Mid-Carmel Valley Fire Protection District	May 1989
C	North County Fire Protection District	Dec. 1991
D	City of Monterey	Nov. 1994
E	Carmel Valley Fire Protection District	Nov. 1996

1989 In March of 1989, the Board of Supervisors forms CSA 74.
In May of 1989, the Board of Supervisors amended the ordinance governing CSA 74 as the language authorizing the five-dollar supplemental assessments by cities and districts, had been left out.

Annual hearings were held by the Board of supervisors to set the rates for all CSA's. The initial assessment fee for CSA-74 was set at $9.10 per unit.

1994 Since its inception, CSA 74 has had a fund balance that has been rolled over annually. The "roll over funds" were available due to unfilled positions (salary savings) and incomplete project money. The EMS Agency considered the rollover funds as part of its revenue source. This enabled the Board and the EMS Agency to keep the service fees to the public at the lowest possible level. As of the end of fiscal year 1992-93 the rollover funds would be exhausted. In order to continue providing the same level of service in 1993-94, it would be necessary for the Board of Supervisors to increase the service fee.

The Monterey County Board of supervisors increased CSA-74 per unit assessment rate from $9.10 to 11.90, for fiscal year 1993-94.

1996 In November 1996, California voters approved Proposition 218 (the "Right to Vote on Taxes Act"). This amended the state constitution to say that no property related "fee or charge may be imposed for general governmental services including, but not limited to, police, fire, ambulance or library services, where the service is available to the public at large in substantially the same manner as it is to property owners."

Under Proposition 218, a special tax may be used for such purposes if it is approved by a two-thirds vote of the electorate. Unfortunately, the CSA-74 charge was called a "benefit assessment" and not a "special tax."

1997 Bill Rentz, Deputy County Counsel promptly sought and obtained judicial permission (validation) for the County to continue to levy the CSA-74 charges until our primary ambulance contract expired on January 1, 2001. Before then, we were required to seek a two-thirds voter approval to change the CSA-74 levy to a special tax.

2000 On March 7, 2000, voters approved a measure to change CSA-74 from a "benefit assessment" to a "special tax" by a 70.9% majority. Other jurisdictions ran similar measures on the same ballot. The results are as follows:

City of Monterey	72.7%	Passed
City of Salinas	53.1%	Failed
City of Gonzales	70.8%	Passed
City of Soledad	65.1%	Failed
Soledad Rural Fire District	74.5%	Passed

The Monterey County Board of Supervisors through a public hearing process set the CSA-74 per unit assessment rate at its maximum allowable of $12.00 for fiscal year 2000-01.

EMS AGENCY DIRECTOR'S MESSAGE

Honorable Chair and Members of the Board of Supervisors,

Our EMS Agency team may be small, but it is exceptionally dedicated. This strength is rooted in a deep commitment to the EMS System and to enhancing the care provided to our residents and visitors. Every member of the EMS Agency team consistently demonstrates a willingness to invest the time and effort necessary to fulfill our role in supporting a healthy and safe community.

The team's commitment was especially evident over the past year. In addition to fulfilling our responsibilities as a regulatory agency, the EMS Agency undertook the complex task of completing a Request for Proposals (RFP) process while continuing to advance EMS System improvements. The RFP process alone required an extraordinary level of coordination and perseverance. Staff devoted countless hours to engaging stakeholders, drafting and refining numerous documents, and maintaining steady progress throughout the process.

This marked the EMS Agency's third attempt to secure an ambulance service provider for Monterey County's Exclusive Operating Area. Successfully establishing an agreement was critical—not only to maintain the existing level of service, but also to ensure continued growth and advancement of the EMS System.

The RFP process concluded successfully with the execution of a new agreement with American Medical Response (AMR), which will continue as the County's ambulance service provider under a framework of enhanced requirements and system improvements. In preparation for the February 1, 2026 start date, the EMS Agency team worked closely with AMR to ensure a smooth and effective transition to the new agreement.

Alongside the RFP effort, the team achieved several additional milestones. These included advancing the health data exchange between EMS providers and local hospitals, expanding the availability of advanced life support/paramedic services in the county, working to bring a second paramedic training program to the county, launching an online certification and accreditation system for EMTs and paramedics, and updating numerous EMS policies and treatment protocols. Equally important, the team strengthened existing partnerships and built new relationships through consistent collaboration and communication.

Looking ahead to 2026, the EMS Agency is focused on implementing several key initiatives, including a clinical quality scorecard, a 911 nurse navigation program, and public-facing data dashboards. Additional details on these efforts are outlined in the "Looking Ahead" section of this report. Each initiative is designed to support our overarching goal of ensuring the delivery of exceptional clinical care and appropriate resource utilization in a transparent and accountable manner.

Respectfully submitted,

Debra Hopgood
Acting Director/Bureau Chief

EMS AGENCY MEDICAL DIRECTOR'S MESSAGE

"Success is no accident. It is hard work, perseverance, learning, sacrifice, and most of all, love of what you are doing." - Pelé

In last year's presentation to the Board of Supervisors, the EMS Agency presented a video that highlighted the teamwork and complexity of the County of Monterey's EMS System by following its response to a single incident—a Mass Casualty Incident in King City—from beginning to end. We saw how the system's providers, agencies, and hospitals worked together to deliver exceptional care in a time of crisis. While the incident itself was tragic, the EMS System's response to the incident demonstrated the importance of an integrated system that trains and prepares for the unexpected, the difficult, and the overwhelming.

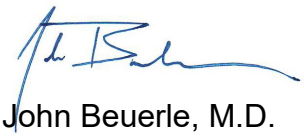
Last year was a big year for our EMS System. After seven years of work and two prior unsuccessful RFPs, the EMS Agency was finally successful in awarding a new ambulance service provider agreement for Monterey County's exclusive operating area. The contract was awarded to American Medical Response, the county's EOA provider since 2009. The amount of work that went into this RFP was extensive, requiring contributions from the entire team, but I want to specifically acknowledge the monumental efforts of both our outgoing Director Teresa Rios and our Acting Director Debra Hopgood in the success of this initiative.

The EMS Agency also laid the groundwork for the implementation of a 9-1-1 Nurse Navigation Program, designed to improve the management of non-life-threatening 9-1-1 calls by connecting callers with licensed nurses who can provide guidance and resources to address their needs. To improve service and efficiency, we also adopted an electronic system for the submission and processing of EMT certification and paramedic accreditation applications. The year of 2025 marked the 15-year anniversary of our STEMI System of Care, which focuses on the early identification and treatment of patients suffering a life-threatening heart attack, reducing mortality and improving outcomes for these critically ill patients.

Other developments included the implementation of paramedic advanced life support care in Pacific Grove, ongoing improvements in our Health Data Exchange program, EMS policy and protocol updates, and work to expand the capabilities and improve response times for interfacility transports requiring specialty care.

The EMS Agency is successful in its mission due to the hard work and dedication of its team: a small group of people who do big things. It is a privilege to be part of that team. I look forward to our continued collaboration with our many stakeholders during the years to come, and I am excited about our ongoing growth and evolution as a system that is committed to safeguarding the lives and well-being of the patients and communities we serve.

Sincerely,



John Beuerle, M.D.
EMS Medical Director

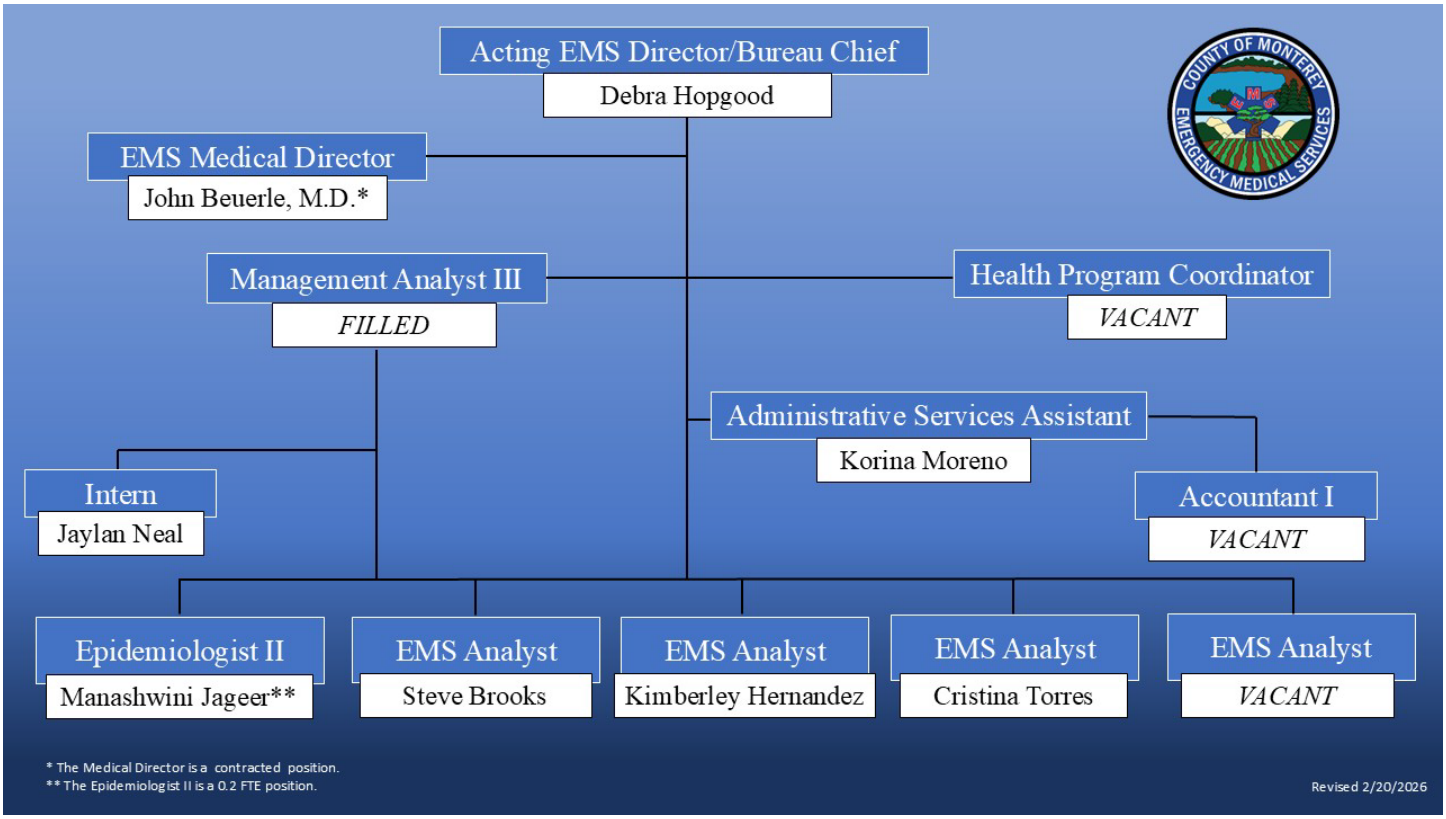
COUNTY OF MONTEREY EMS SYSTEM OVERVIEW

The County of Monterey Emergency Medical Services (EMS) System is comprised of ground and air ambulance providers, dispatch/communications centers, fire and rescue service providers, hospital emergency departments, specialty care centers for trauma, stroke, and heart attack patients, and the County of Monterey EMS Agency. The purpose of the EMS System is to provide high quality, patient-centered Emergency Medical Services with integrity, equity, dedication, expertise, effectiveness, efficiency, and collaboration at the forefront. The collaborative efforts of these EMS System partners strengthen our ability to provide emergency medical services to residents of and visitors to the County of Monterey.

THE COUNTY OF MONTEREY EMS AGENCY

The Emergency Medical Services Agency is a Bureau within the County of Monterey Health Department and is designated by the Board of Supervisors as the local Emergency Medical Services Agency (LEMSA) that oversees the delivery of emergency medical services (pre-hospital care) within the County of Monterey pursuant to California Health and Safety Code, Section 1797 et seq. The LEMSA ensures that regulations pertaining to the EMS system are carried out as intended by the California Emergency Medical Services Authority (EMSA). The role of the County of Monterey EMS Agency is defined by California statute to plan, implement, and evaluate the EMS System. Additionally, the statute requires the EMS Agency to have a licensed physician who serves as a medical director to provide medical control and to ensure medical accountability.

THE COUNTY OF MONTEREY EMS AGENCY ORGANIZATIONAL CHART



THE EMS AGENCY'S ROLE IN THE COUNTY OF MONTEREY EMS SYSTEM

A high performing EMS System consists of multiple organizations with a variety of functions working together to provide care to those suffering from a medical emergency. The EMS Agency is responsible for managing and coordinating these organizations to ensure that patients in our community receive a coordinated and appropriate EMS response when calling 9-1-1 and, ultimately, the best possible care from highly trained EMS professionals. However, the EMS Agency's responsibilities do not stop when a patient reaches the doors of the hospital. The EMS Agency is also responsible for ensuring that our local hospitals are prepared to appropriately receive patients from EMS and, when needed, provide online medical direction to EMS providers in the field. Additionally, the EMS Agency has the responsibility for designation and oversight of specialty care centers for the treatment of trauma, stroke, and ST elevation myocardial infarction (STEMI) patients in the County of Monterey.

We approach our role emphasizing the Triple Aim.

- *Implement efficient and effective structures, processes, and outputs.*
- *Measure clinical, operational, and financial performance indicators.*
- *Engage in continuous Quality Improvement.*
- *Embrace Just Culture concepts.*
- *Maintain transparency.*

EMS OPERATIONS

EMS operations include many of the logistical and practical considerations involved in ensuring that appropriately trained EMS personnel reach patients in need of medical assistance in a timely and safe manner. Ensuring the availability of highly trained EMS responders begins with the initial training received, continues with certification and accreditation processes, and is maintained through continuing education and training. Two key components of EMS operations are dispatch operations and field operations. Dispatch operations ensures that the needed resources arrive expeditiously while field operations involve the actual response to an incident by EMS System field personnel.

EMS System Personnel

The provision of Emergency Medical Services (EMS) is amazingly dynamic. EMS providers never know what types of illnesses or injuries they will encounter on their shift when they start the day. It is part of the appeal of the job knowing that each day will likely be different than any that came before.

While each day is different for each EMS provider, change in EMS systems is also inevitable. Some changes are related to research that shows a better way to provide a service or procedure, Other changes are due to new equipment that provides a better way to provide care for the patient. 2025 was no different as EMS personnel were authorized to perform a reintroduced procedure and also had to learn new and updated policies guiding their care for a variety of patient conditions.

Looking forward, 2026 will be a momentous year in that it will be the 60th anniversary of the establishment of EMS as an organized system. It is also the 40th anniversary of the first paramedics based in the County of Monterey providing advanced life support care.

Emergency Medical Responder (EMR)

Most EMS personnel who function at the EMR level are volunteers in the rural areas of the county. EMR training continues in these areas as a way to utilize people in a first responder role who would otherwise not volunteer with the local fire agency due to the time and other requirements to become an EMT.

Due to the time it may take for an ambulance to arrive in a rural area, EMRs have significant responsibility for patient care. EMRs are provided the greatest amount of tools permitted under State regulation. This exceeds the usual training for those at the EMR level. One example of this is that in the County of Monterey, EMRs are allowed to provide an auto-injector based antidote for organophosphate poisoning to other responders who may have been contaminated. Training in, and the use of, traction splints is also permitted under the scope of practice for EMRs functioning within the Monterey County EMS system as another example.

Currently, there is not a certification in California for EMRs. EMR is a training course that provides a course completion certificate to document the training. The EMS Agency is responsible for approving the training program, course content, and testing materials. It is through this approval process that the EMS Agency ensures that EMR-trained responders are capable of providing the level of care in which they have been trained.

Emergency Medical Technician (EMT)

EMTs working within the County of Monterey EMS system are authorized to provide care at a higher level than the basic statewide scope of practice. While functioning as part of the EMS system, EMTs are trained and equipped to provide treatment for severe allergic reactions through the use of an epinephrine auto-injector. They can also check the patient's blood sugar with a glucometer and

administer naloxone for suspected opioid overdose. EMTs employed by AMR and some fire districts have also been trained and are authorized to provide CPAP for breathing difficulty and place a supraglottic airway to help maintain an open airway for the unconscious patient that cannot maintain their own airway.

Paramedic

Paramedics have the greatest scope of practice and responsibilities. They provide care at the advanced life support (ALS) level. Paramedics are entrusted with assessment of the patient at an advanced level using their training and experience to assess the patient's condition and to properly use the tools provided to them such as a 12-lead EKG for assessing a patient's heart rhythm, end-tidal CO2 monitor for assessing a patient's respiratory status, and a glucometer for measuring the patient's blood sugar. After performing an assessment of the patient, the Paramedic is able to treat the patient with multiple medications, provide advanced airway placement to ensure a clear path to assist the patient's breathing, and even provide external cardiac pacing when the patient's heart beat is too slow.

EMT Certification

Certification of the EMT provides verification that the individual has completed the training requirements for certification and passed a criminal and medical background check to ensure that they have met the statutory and regulatory requirements for EMT certification. The EMS Agency requires each EMT to complete the California Department of Justice Live Scan criminal background check. The EMS Agency also performs a check with the National Practitioner Data Bank for potential concerns related to the provision of medical care and healthcare licenses and certificates. The EMS Agency is diligent in completing these tasks to fulfill our obligation to protect the health and safety of the public.

Paramedic Accreditation

Accreditation is an authorization for an individual who is licensed or certified to perform specific tasks and procedures which are included in the individual's scope of practice. This is different than licensure which generally ensures that the individual possesses the knowledge and competency for the level of licensure described. The California EMS Authority licenses Paramedics. Authorization to practice as a Paramedic in the County of Monterey is the accreditation process provided by the EMS Agency.

Initial accreditation requires the Paramedic to pass a written test on his/her knowledge of EMS policies and protocols and, while being evaluated by a field training officer, demonstrate his/her ability to capably and competently function in the prehospital environment. The EMS Agency also requires the Paramedic to have completed several nationally recognized courses. These include Advanced Cardiac Life Support (ACLS), Pediatric Advanced Life Support (PALS) or equivalent, and Prehospital Trauma Life Support (PHTLS) or equivalent.

To maintained continued accreditation, Paramedics must meet specified requirements which include annual EMS policy review, annual skills demonstration of specified procedures, and maintenance of current training in CPR, ACLS, PALS, and PHTLS or equivalent courses. The EMS Agency reviews each paramedic every two years from his/her initial accreditation to ensure that he/she continues to meet the training, skills maintenance demonstration, and policy review requirements.

Emergency Medical Technician (EMT) Training Programs

EMT training has come a long way in the last 50 or so years. What started out as a way to standardize training and skills for ambulance attendants in an 81-hour course is now a training course of at least 170 hours. While still holding on to the basics such as patient assessment and first aid practices, EMT training programs are teaching the life-saving skills of epinephrine auto-injector for severe allergic reactions, naloxone for drug overdose, tactical casualty care, and blood sugar monitoring. Not so long ago, this was the domain for paramedics. We have come a long way.

The two training programs in the County of Monterey have highly qualified instructional staff teaching our EMT programs. Not only are the instructors clinically proficient, but all primary instructors have completed a 40-hour course in teaching methods.

Both EMT programs are making use of technology to enhance the student experience. High-fidelity manikins provide amazing realism. Many people, new students and visitors alike, often mistake the manikins for people when they first enter the classroom.

The EMS Agency is responsible for approving and monitoring EMT training programs held within the County of Monterey. Training program approval is granted for up to four (4) years for programs that meet State and local requirements. Monterey Peninsula College (MPC) and Hartnell College offer EMT training programs. The EMS Agency conducted reviews of the two training programs in 2023.

In addition to conducting periodic reviews of the EMT training programs, EMS Agency staff often ask the new EMT applicants what they thought of their EMT training program. Invariably, the response is highly positive and the EMT applicants feel that their EMT training program gave them the foundation they need to function as an EMT.

Paramedic Training Program

The EMS Agency was asked to review and approve an application for a new paramedic training program in 2025. An established paramedic training program operated by NCTI (a branch of the AMR group of companies) in Santa Cruz County requested approval to operate in Monterey County after losing their training site in Santa Cruz. The EMS Agency provided the review and completed the approval process in an expedited manner. This quick action was crucial to allow the NCTI program to coordinate clinical and field internship placements of their students with the established paramedic training program run by the South Bay Regional Public Safety Training Consortium at Monterey Peninsula College (MPC).

The NCTI program completed their classroom training and are completing their field internships as the year came to a close. According to their lead instructor, the initial NCTI class consisted of some of the best and most motivated students he has ever had. This is high praise as this instructor had previously spent many years as the lead instructor and program director of a well-respected Bay Area paramedic training program.

The South Bay Consotium course at MPC continues to graduate students with an excellent rate of student success on the paramedic licensure exam. The students in this course are primarily employed by fire departments and districts. Upon completion of the course, they are put to work following their department's orientation to their new position.

Monterey County is fortunate to have two exceptional paramedic training program located here. These education institutions help provide training for local EMTs to advance to the paramedic level and provide some assistance with EMS staffing shortfalls and challenges.

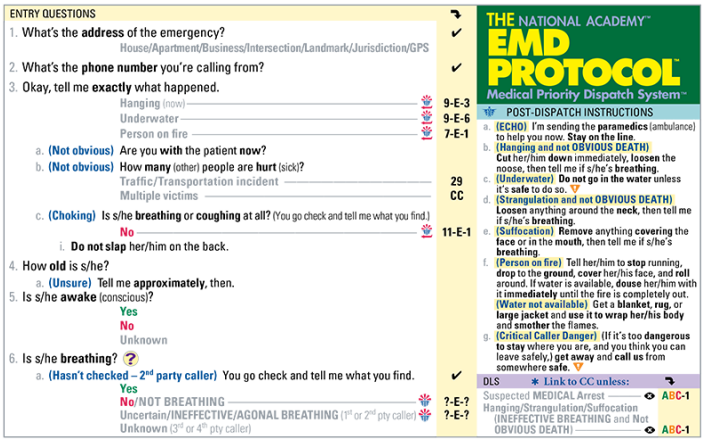
Emergency Medical Call Dispatch

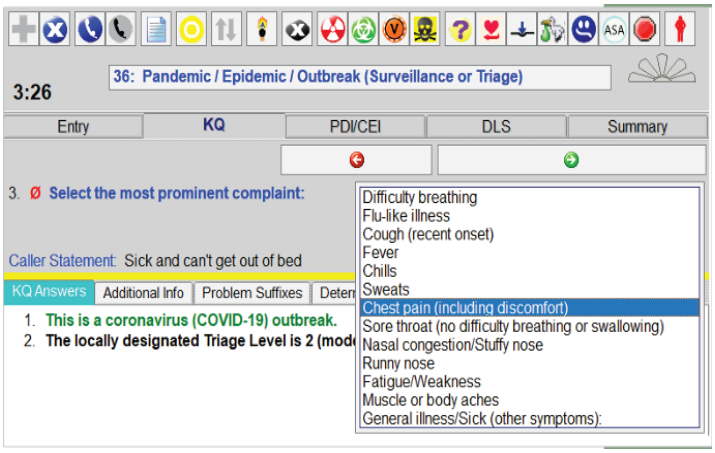
9-1-1 Call Receipt

Calling 9-1-1 is the first connection between the person needing emergency medical services and the EMS System. Monterey County Emergency Communications Department (MCECD) receives the majority of 9-1-1 calls placed in the County of Monterey. The California Highway Patrol (CHP) also maintains a dispatch center in the County of Monterey and receives a portion of 9-1-1 calls made by cell phone within the County of Monterey. Most of the 9-1-1 callers reporting a medical emergency are transferred to the EMS Dispatch Center, operated by AMR, the County's contracted ambulance service provider, for further processing. However, 9-1-1 calls such as those involving an active shooter or other dangerous situations may be retained by MCECD personnel as they gather information necessary for the safety of all emergency responders.

EMS Dispatch

The EMS Dispatch Center (EMS Dispatch) is operated by AMR, the County's ambulance services provider. The EMS Dispatch Center is staffed with dispatchers who are certified Emergency Medical Dispatchers (EMDs) who have been trained in the Medical Priority Dispatch System (MPDS). MPDS is a well-researched and unified system used to prioritize medical calls and dispatch appropriate aid to medical emergencies. The goal of MPDS is to prioritize the highest-acuity medical emergencies so they receive the fastest response from the closest available resources. EMDs use MPDS for caller interrogation to ensure that appropriate pre-arrival instructions are provided to assist the patient or reporting party until responders arrive. This may be through guidance in performing cardiopulmonary resuscitation (CPR), control of serious bleeding, childbirth, choking, or assistance with other types of medical emergencies.





Ambulance Services

A primary function of the EMS Agency is to ensure there are adequate and effective ambulance services throughout the County of Monterey. The current agreement with the designated ambulance services provider is effective until the end of January 2026. The ambulance services provider contract covers response to 9-1-1 calls, interfacility transports for patients who need continued medical monitoring during transport from one medical facility to another, and medical standby services at special events within the county.

Contract Compliance

The current agreement for ambulance services requires a high level of performance by American Medical Response (AMR). The EMS Agency meets with AMR to monitor performance and to address issues that could hinder performance. A Contract Compliance Working Group (CCWG) comprised of citizen representatives, EMS Agency staff, and AMR leadership, monitors AMR's performance by reviewing a wide range of metrics to maintain a system that delivers vital pre-hospital emergency medical services to the community.

QUALITY ASSURANCE AND IMPROVEMENT

EMS is a dynamic and ever-evolving field that requires the EMS Agency and its partner agencies to collaborate closely. This teamwork ensures that the communities we serve not only receive the highest quality care today but are also prepared for the changes that lie ahead. To achieve this, it's essential for the EMS Agency to have strong Quality Assurance (QA) and Quality Improvement (QI) programs in place. The goal is to make decisions based on data-driven evidence that prioritize the best interests of our patients. These principles guide everything the EMS Agency does, from reviewing EMS policies and protocols annually to creating local optional scope of practice (LOSOP) programs that enhance care options for the residents of Monterey County. Our QA and QI initiatives are vital in ensuring that the county's residents and visitors receive the best possible patient care and that our EMS providers are fully supported.

The EMS QA/QI program ensures that EMS professionals follow policies, regulations, and protocols and meet performance metrics that enable the best patient outcomes. The EMS Agency achieves this through case reviews during QI committee meetings, consistent data monitoring, and unusual occurrence reports. QA is about ensuring that EMS professionals are doing things the right way. For any QI program to be effective, a solid QA system must be in place to provide confidence that performance is at the expected level before any improvements are made.

The QI program focuses on assessing the impact of existing systems rather than evaluating individual

actions. It challenges the EMS Agency to ask: “What are we doing now?” and “Is there room for improvement?” This ongoing evaluation ensures that the services provided by the EMS Agency and our allied agencies meet not only the public’s needs and expectations but also clinical standards and best practices. Our Health Data Exchange (HDE) program provides in-field patient care information to hospitals and allows EMS providers to have access to patient outcomes from the hospital. Hospitals can now better understand the work field providers do, while EMS providers can accurately evaluate the care they provide, all while the EMS Agency evaluates the effectiveness of our policies, protocols, and guidance and the impact it has on patient care in the County of Monterey. Moving forward, the EMS Agency will take advantage of other programs like HDE to continue to lead and improve the EMS system.

Unusual Occurrence Reports

An important component of the EMS Agency’s quality assurance and improvement programs involves identifying improvement opportunities, whether individual or system-wide. The EMS Agency has established a process by which anyone can submit a report regarding an incident, situation, or concern relating to the EMS System. These submissions are known as Unusual Occurrence (UO) reports. EMS Agency personnel review all available information pertinent to the UO report, compile a summary of the UO, and draft recommendations for any needed actions based on their review.

Depending on the findings, actions may include identifying individual educational opportunities, performance improvement plans, disciplinary action, system-wide changes or training, or some combination of these items. Some reviews do not result in a need for action or may result in a recognition of clinical excellence.

Unusual Occurrence Reports are reviewed within a “Just Culture” framework, which focuses on evaluating the system surrounding individual actions to identify opportunities for improving processes and design. "Just Culture" refers to a system of shared accountability, where the EMS Agency is responsible for the systems we've put in place and for addressing EMS provider behaviors in a fair and just manner. In turn, EMS providers are accountable for the quality of their decisions and for reporting both errors and system vulnerabilities. The aim is to create an environment that prioritizes learning from mistakes to drive continuous quality improvement.

POLICY AND PROTOCOL DEVELOPMENT

It is the policies and treatment protocols that provide structure within the EMS System. These documents set standards for the medical care of the patient, direction for transport destination decisions, coordination and interactions between the various providers and organizations, and the management and coordination of the EMS System itself.

To ensure policies and protocols remain current, the EMS Agency, in collaboration with agency partners, reviews all existing policies and protocols regularly. The EMS Agency also develops new policies and protocols to ensure compliance with new, or changes in existing regulation, and to reflect best practices.

SPECIALTY CARE SYSTEMS

Within every EMS System, there are systems of specialty care designed to get patients with specific, serious conditions to a hospital capable of treating their condition. In the County of Monterey, the specific conditions addressed with specialty care systems are: ST Segment Elevation Myocardial Infarction (STEMI), Stroke, and Trauma.

EMSA, through its regulations, tasks the EMS Agency with:

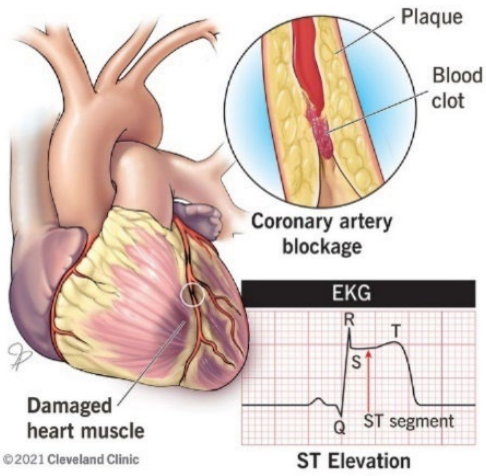
- Developing plans addressing the provision of specialty care services within the County of Monterey.
- Designating facilities to provide specialty care services. This designation process consists of the creation and adoption of standards for facilities related to topics such as staffing, personnel qualifications, facility and equipment availability, internal hospital written policy and procedure requirements, and quality improvement processes. Additionally, the EMS Agency conducts a review of written documentation and a site survey of the hospital. Once the EMS Agency has verified that a facility meets the established standards for a given specialty care service, the Agency works with the facility to implement a designation agreement. Specialty Care Centers must apply for redesignation on an established timeline.
- Ensuring that EMS providers are trained in the specialty care patient identification criteria, patient care methodologies, and treatment protocols.
- Developing a process for early notification of the facility of the impending arrival of a specialty care patient.
- Developing policies that provide a clear understanding of the structure of the specialty care system and the manner in which it utilizes the available resources.
- Collecting and analyzing data related to each specialty care service.
- Developing a process for periodic performance evaluation of each specialty care system.
- Developing and overseeing quality assurance/improvement (QA/QI) processes and committees for each specialty care system.
- Ensuring that specialty care service providers and other hospitals that treat specialty care patients participate in quality improvement processes.

The EMS Agency oversees QA/QI for the County of Monterey specialty care systems. Each specialty care system has its own QA/QI committee. Representatives from the STEMI, Stroke, and Trauma systems collaborate together in their respective committees to identify systemic issues and develop solutions to enhance system performance. The committees bring together representatives from the EMS system such as the MCECD, EMS Dispatch Center, first responder agencies, ground and air ambulance providers, law enforcement, the Coroner's Office, and representatives from the various specialty care and non-specialty care hospitals in the County of Monterey, to help improve the system and streamline communication among organizations. Each group reviews data specific to its specialty care area, provides input regarding policies, assists in the development of effective treatment protocols, serves as a forum for education, and functions as a peer review group by conducting regular case reviews. Information and improvements gleaned from the QA/QI meetings are communicated back to stakeholders throughout the EMS System.

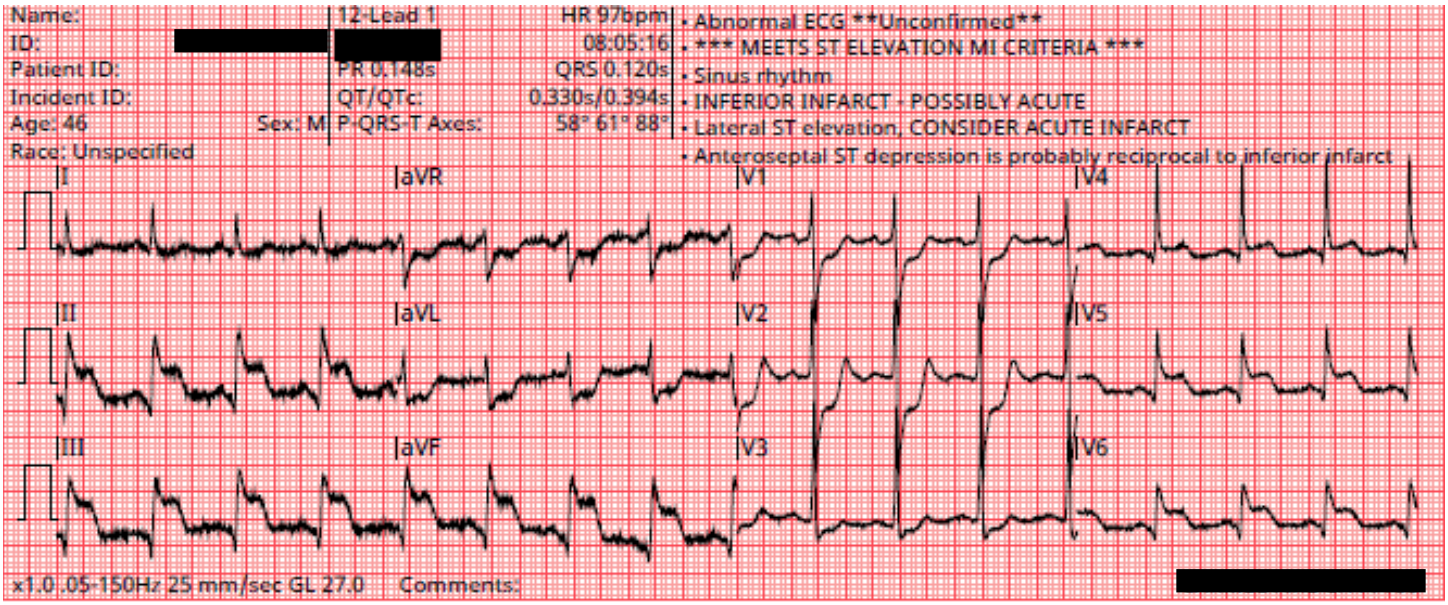
The specialty care systems in the County of Monterey are described below.

STEMI System of Care

STEMI is an acronym for S-T Elevation Myocardial Infarction (STEMI). A "STEMI" is a particular type of heart attack (The technical term is Myocardial Infarction) where the blockage of one or more arteries in the heart needs to be opened quickly. The heartbeat of the STEMI system is in quick recognition of the STEMI by the Paramedic, rapid transport of the patient, early notification to the hospital by the Paramedic, and prompt treatment in the Catheterization (Cath) Lab at the hospital.



Each of these components of the STEMI system are critical to obtaining the best outcome for the patient. Each component of the system must be performed quickly and acted upon promptly. Early recognition of a STEMI requires prompt application of a 12-Lead capable heart monitor. A 12-Lead EKG that shows STEMI must lead to early transport of the patient. The patient must be transported to a designated STEMI Center that has the staff and facilities to care for this patient. The Paramedic will transmit the EKG to the hospital and also contact the hospital to provide a “STEMI Alert”. At the designated STEMI Center, the ED physician needs to activate the Cath Lab team and interventional cardiologist so that the patient may be brought to the Cath Lab as soon after arrival as possible to have the blockage cleared.



Through the STEMI Quality Improvement (QI) process, the EMS Agency, along with local hospitals and paramedic service providers, reviews data related to the provision of STEMI care. The data shows that the County of Monterey STEMI system does well in getting STEMI patients into the cardiac catheterization lab by providing early notification from the paramedics to the hospital consistently leading to having a “Door to treatment” time of 90 minutes or less in 80% of patients. Data review shows that almost all patients who didn’t meet the benchmark needed aggressive care in the ED before they were stable enough to to to the cardiac cath lab. The EMS Agency also started measuring the first medical contact to treatment time in 2025. Closer review of this measure will take place in 2026.

Stroke System of Care

Stroke is a time-critical illness that occurs because the blood supply to part of the brain is interrupted resulting in the loss of brain cells that cannot be replaced. Stroke is a condition that directly affects the most critical area of a person. Therefore, time is critical to restore blood flow to prevent death of brain cells and to give the patient the best chance for recovery and ability to function as they did before the stroke. Most strokes are caused by the blockage of a blood vessel, multiple blood vessels, or by a blood clot. Some strokes are caused by a blood vessel breaking which both prevents blood flow beyond the break and causes bleeding into the brain. There are other causes of stroke such as a brain tumor, but they are less common.

In order to save brain cells after a stroke, the patient must be identified as having a stroke and receive the necessary care. This sounds easy, but many people wait to see if the symptoms go away before seeking assistance. Others will recognize that something is wrong and either contact their own physician or go to the hospital by private car. By going to the hospital by car, the patient risks going to a hospital where the patient may not receive the optimum care that a designated stroke center can provide.

EMS personnel are trained to recognize stroke using the acronym BEFAST to assess the patient for signs and symptoms of stroke. Balance disturbances, facial droop, and slurred speech are a couple of things EMS looks for to assess for a potential stroke. When a stroke is identified, the patient is usually transported emergently with lights and siren activated to get the patient to the hospital quickly. EMS will also ensure that the patient is transported to a designated Stroke Receiving Center that is prepared to rapidly move the patient to the CT scan for brain imaging. This is to help determine the cause of stroke. If the patient is determined to have a blockage as the cause of stroke, and the patient doesn't have another condition that precludes treatment, a medication that dissolves the clot is administered. A patient transported to a designated stroke center also receives the advantage of a continuum of care that includes multiple types of rehabilitation services to assist the patient in regaining as much functionality as possible.

Another benefit that EMS brings to the patient with stroke is the early notification provided to the Stroke Receiving Center so that the hospital is ready for the patient. The chart below highlights the benefit to the patient in getting into the CT scan by using EMS transport over self-transport.

	0-10 min	11-20 min	21-30 min	31-40 min	41-50 min	51-60 min	> 60 min
EMS	51	146	42	23	17	10	79
PVT	3	82	55	23	20	15	128

EMS data related to stroke showed that patients identified as potential stroke patients through the Emergency Medical Dispatch (EMD) call determinant and call prioritization process were transported from the scene faster by EMS than those patients who did not have an EMD determination of stroke. This was true whether or not the reported signs and symptoms of stroke were obvious to the person calling 911.

Trauma System of Care

The County of Monterey's trauma system of care was initiated in January 2015. Since that time, the County has provided specialty trauma care to thousands of patients with traumatic injuries. The County's system of EMS Dispatch and pre-arrival instructions, EMS field triage, rapid transport to a Trauma Center, and care by a dedicated and specially trained trauma team has resulted in lives saved and a reduction in disabilities associated with traumatic injuries.

Natividad is the Trauma Center designated by the EMS Agency to serve the County of Monterey. Natividad is accredited by the American College of Surgeons (ACS) as a Level II Trauma Center for adult patients. In November 2025, the ACS reviewed Natividad's delivery of trauma services and renewed their accreditation for another three year period. The EMS Agency is tasked with ensuring that Natividad provides care in a manner consistent with EMSA and ACS requirements.

Pediatric patients with critical or serious injuries are usually transported by air ambulance to a Pediatric Trauma Center in Santa Clara County.

The EMS Agency bases our trauma triage criteria on the National Guideline for the Field Triage of Injured Patients published by the ACS. This system categorizes the severity of the patient's injuries and helps ensure that patients with life-or-limb threatening injuries are rapidly identified and triaged to the closest, most appropriate Trauma Center. A similar triage system helps emergency department physicians at non-trauma center hospitals rapidly triage patients who arrive by means other than an ambulance and immediately transfer patients meeting trauma triage criteria to an appropriate Trauma Center.

DISASTER MANAGEMENT

California's disasters often have an impact on public health and the medical system. EMS is a key part of the countywide disaster management system. EMS providers are usually the first medical care teams to arrive at the scene of a disaster. Thus, EMS must be prepared to successfully respond to the public health and medical consequences of disasters.

The EMS Agency's Role in Disaster Management

The EMS Agency takes the lead in ensuring that EMS service provider agencies are prepared to respond to disasters and mass casualty incidents (MCIs) involving multiple patients. Advance preparations include building a robust system of mutual aid partners, regulating medical supply inventories, participation in training and exercise opportunities, and drafting and editing various disaster-related plans.

The EMS Agency provides staff to serve as an EMS Duty Officer. This position is on-call 24 hours per day, every day of the year. EMS Communications notifies the EMS Duty Officer of significant incidents providing the EMS Agency with situational awareness. The EMS Duty Officer confers with responding agencies and provides guidance as needed.

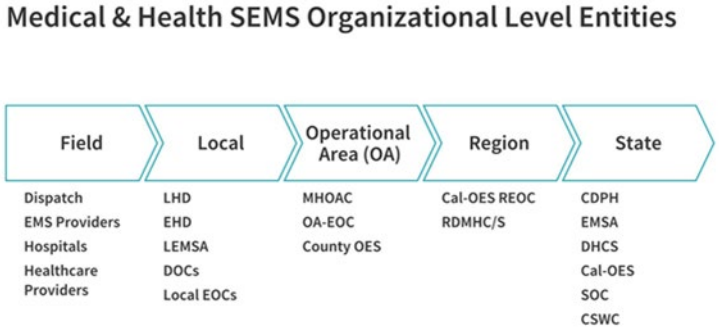
Depending on the scope and scale of the incident, the EMS Duty Officer may also decide to activate the Medical Health Operational Area Coordinator or MHOAC.

Medical Health Operational Area Coordinator (MHOAC)

The Medical Health Operational Area Coordinator (MHOAC) is a role with a set of duties defined by California Health and Safety Code Section 1797.153. These regulations task the MHOAC with responsibility for seventeen essential functions related to health and medical needs. During normal

operations, the MHOAC is responsible for collaborating with local and regional emergency planners to develop and maintain medical and health disaster plans. In the County of Monterey, the EMS Agency staffs the MHOAC position and maintains a 24-hour-per-day, 365-days-per-year single point of contact for the program.

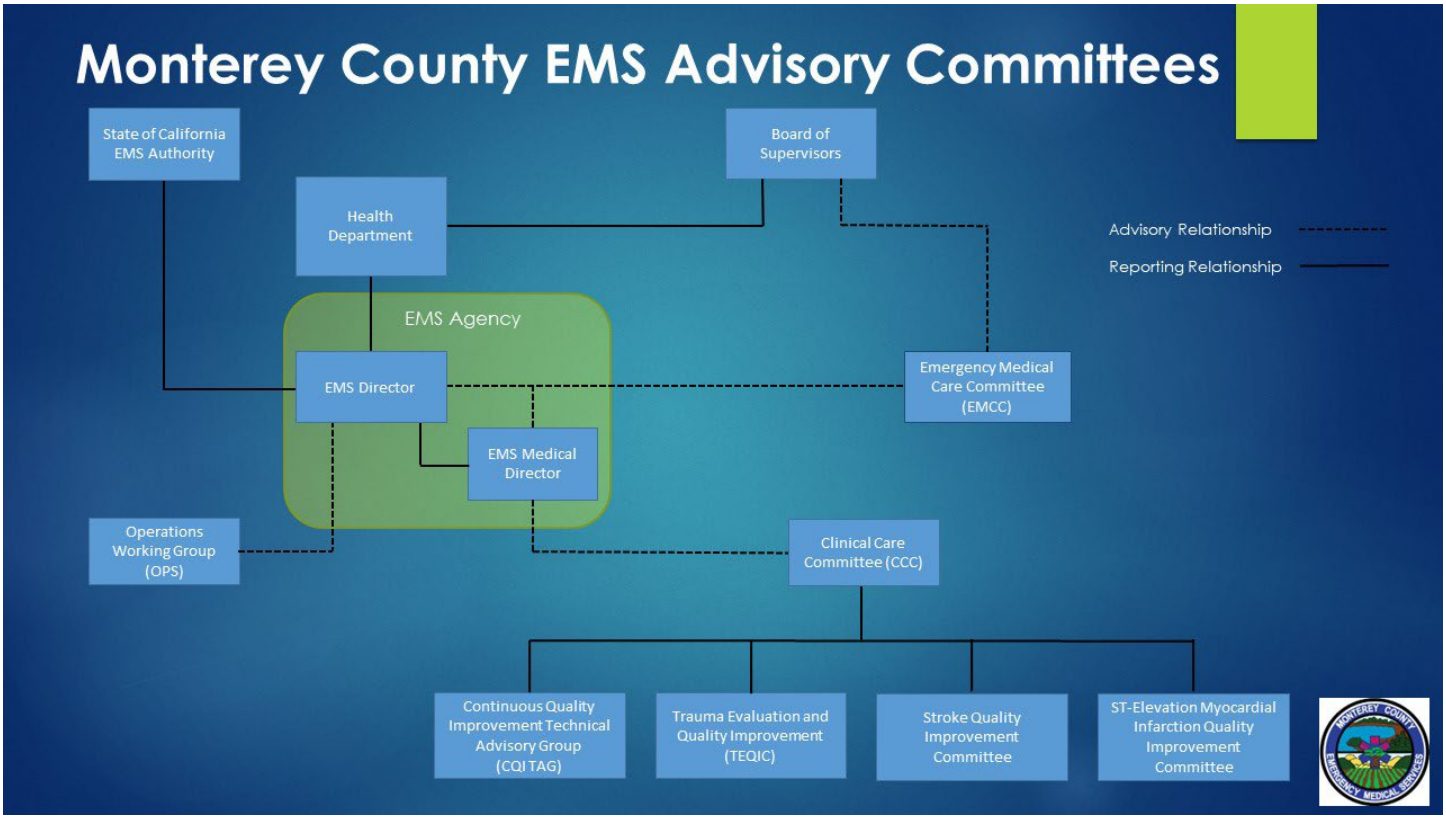
When the local Department of Emergency Management (DEM) activates the Emergency Operations Center (EOC) due to a declared emergency, the MHOAC role becomes one of heightened significance. In the event of a local, state, or federal declaration of emergency, the MHOAC performs essential functions within the Operations Branch of the EOC and becomes a primary point of contact for the coordination of medical and health resources between local, regional, and state authorities. Largely concerned with the procurement and distribution of necessary resources during emergencies and disasters, the MHOAC becomes increasingly vital to an effective emergency response the longer an emergency persists.



EMS ADVISORY COMMITTEES

There is one primary advisory committee to the EMS Agency, the Emergency Medical Care Committee (EMCC). Additionally, there is a clinical advisory committee, the Clinical Care Committee (CCC) and an operational advisory group, the Operations Working Group (OPS). These committees and working group are made up of members from various components of the EMS System, and in the case of the EMCC, members of the public. The EMS Agency seeks the wisdom, knowledge, and experience of individuals who provide the care and directly manage the response and care provided by their organizations, and those who live within the County of Monterey. Each member provides a unique perspective on EMS issues as a representative of his/her constituency. The varied viewpoints from our committee and working group members help ensure that the EMS Agency makes effective decisions with regards to policies, treatment protocols, and system function. The members of our committees and working group play an additional vital role in communicating system changes to other members of their constituencies.

The graphic below illustrates the relationships between EMSA, the Board of Supervisors, the EMS Agency, and the EMS Advisory Committees.



Emergency Medical Care Committee (EMCC)

The EMCC is a Board of Supervisors appointed committee whose purpose is to advise the Board of Supervisors and the EMS Director on EMS system issues. The EMCC receive regular reports regarding ambulance contract compliance, fire-based ambulance response times, ambulance patient off-load times, MHOAC activities, the EMS Plan, EMS training program reviews, and the Health Data Exchange.

The EMCC is comprised of individuals representing a broad constituency including hospital administrators, ED physicians, ALS and BLS fire agencies, law enforcement, County of Monterey Parks Department, the ambulance services contractor, Paramedics and EMTs, law enforcement, city managers, and the public. It is desired to have the three public representatives be from different areas of the County to represent the Monterey Peninsula, Northern Salinas Valley, and the South County area. Additionally, the Directors of the Department of Emergency Management and the Monterey County Emergency Communications Department serve as ex-officio, non-voting members of the EMCC.

The EMCC provides an annual report of its activities to the EMS Agency and to the County of Monterey Board of Supervisors.

The EMCC had a significant change in membership in 2025 as a couple of long-term members stepped down and were replaced with new members as shown in the EMCC Annual Report to the Board.

Clinical Care Committee (CCC)

The CCC has a clinical focus and serves as an advisory group to the EMS Medical Director and the EMS Director on medical control and other medical issues. This committee includes representatives from County of Monterey hospitals, first-responder agencies, ground and air ambulance providers, and law enforcement agencies. The CCC is where treatment protocols and policies are reviewed and our EMS stakeholders from the field and hospitals are able to provide their viewpoints and advice so that policies and protocols comply with regulations and reflect best practices. These efforts are undertaken to ensure that patients receive the best possible care from the EMS System.

Operations Working Group (OPS)

The OPS Working Group focuses on operational issues, system strategy, and coordination and serves as an advisory group to the EMS Agency Director. OPS is comprised of first-responder agencies, ground and air ambulance providers, law enforcement, a Emergency Communications Department (ECD) representative, a representative from a Paramedic Base Hospital, and Paramedic and EMT representatives from the County of Monterey EMS System. The EMS Medical Director serves as an ex-officio, non-voting member.

2025 EMS SYSTEM DATA

EMS SYSTEM PERSONNEL TRAINING

The number of students completing EMT training increased by nearly 30% in 2025. The number of students completing paramedic training increased by 83%. The significant increase in the number of paramedic students can be attributed to the establishment of a new second paramedic training program in Monterey County.

CERTIFICATION AND ACCREDITATION APPLICATIONS PROCESSED

Certification of EMTs and accreditation of paramedics are core functions of the EMS Agency. On average, the EMS Agency processes approximately 50 applications for EMT certification or paramedic accreditation each month. Each application is carefully reviewed to ensure each applicant has fulfilled the requirements to receive certification or accreditation. The EMS Agency received about 25 more applications, an approximately 8.5% increase, for EMT certification and recertification in 2025 than in 2024. The number of paramedic applications for initial and continued accreditation in Monterey increased by about 30 applications, an approximately 25% increase, in 2025 compared to 2024.

The increase in both EMT and paramedic applications were likely linked to the increased in the number of students completing initial EMT and paramedic training in Monterey County. As many EMS response agencies have faced staffing shortfalls in the recent years, we are hopeful that this is an encouraging sign for response agency staffing capabilities. Sufficient staffing is crucial to the provision of quality EMS care.

Health Department Performance Measure – Application Processing Times

State regulations require the EMS Agency to process applications for initial or continued EMT certification within 14 calendar days from the date of receipt of a completed application. EMSA has not instituted a time requirement for the processing of applications for paramedic accreditation. Internally, the EMS Agency utilizes 10 business days as our application processing standard for applications from both EMTs and Paramedics.

The EMS Agency established application processing time as one of our Performance Measures for the Health Department.

As illustrated in the following chart, the EMS Agency has performed well in completing application processing in a timely manner and meeting our Performance Measure goal of 90%. . Those applications that required more than 10 days to process were typically missing required documents that prevented prompt processing of the application.

The following table and chart demonstrate the EMS Agency's success in meeting this Performance Measure goal.

	Q1 2025	Q2 2025	Q3 2025	Q4 2025	2025
Total Applications	124	166	127	101	518

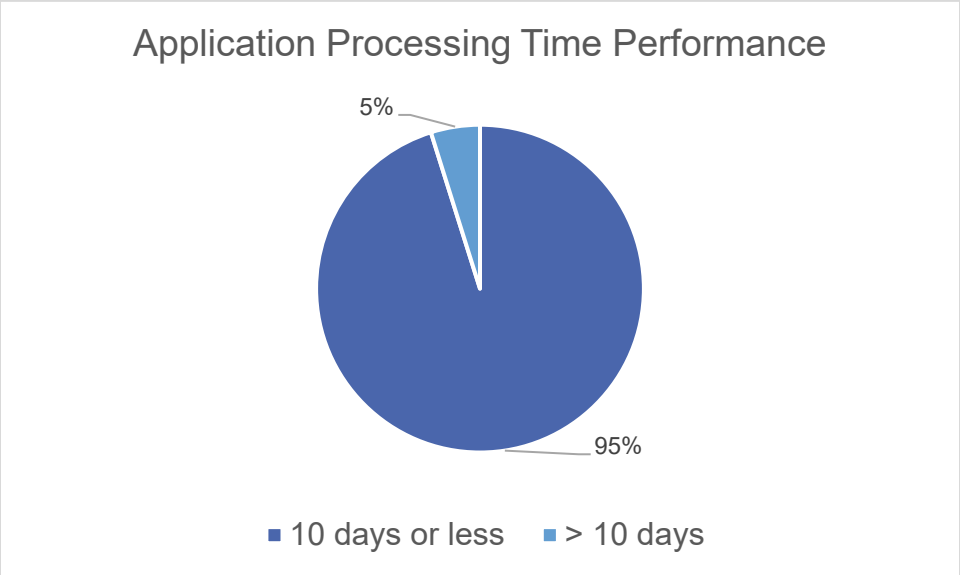
The first chart reflects applications processed during 2025 and does not include applications received in 2025, but processed in 2026. The second chart reflects all applications received in 2025 other than those applications that were returned or withdrawn.*



AMBULANCE SERVICES PROVIDER CONTRACT ADMINISTRATION

Factors that makes an ambulance services contract successful include establishing and maintaining consistent monitoring of key performance measures, as well as strong, close collaboration between the EMS Agency and the ambulance services provider. In this section, we highlight three of the key performance measures. These measures were selected because they are critical to ensuring timely and appropriate response to emergency medical calls to meet the needs of our community.

EMERGENCY MEDICAL CALL DISPATCH

In the County of Monterey, the contracted ambulance service provider is responsible for providing the dispatch services for emergency medical calls. The current contract for ambulance services requires the contractor's Emergency Medical Dispatchers to process calls for emergency medical services in 60 seconds or less. In that time, Dispatchers utilizing MPDS perform the call interrogation to prioritize calls and dispatch ambulances according to the acuity of the calls, thus ensuring that the highest acuity medical emergencies receive the fastest response from the closest available resources.

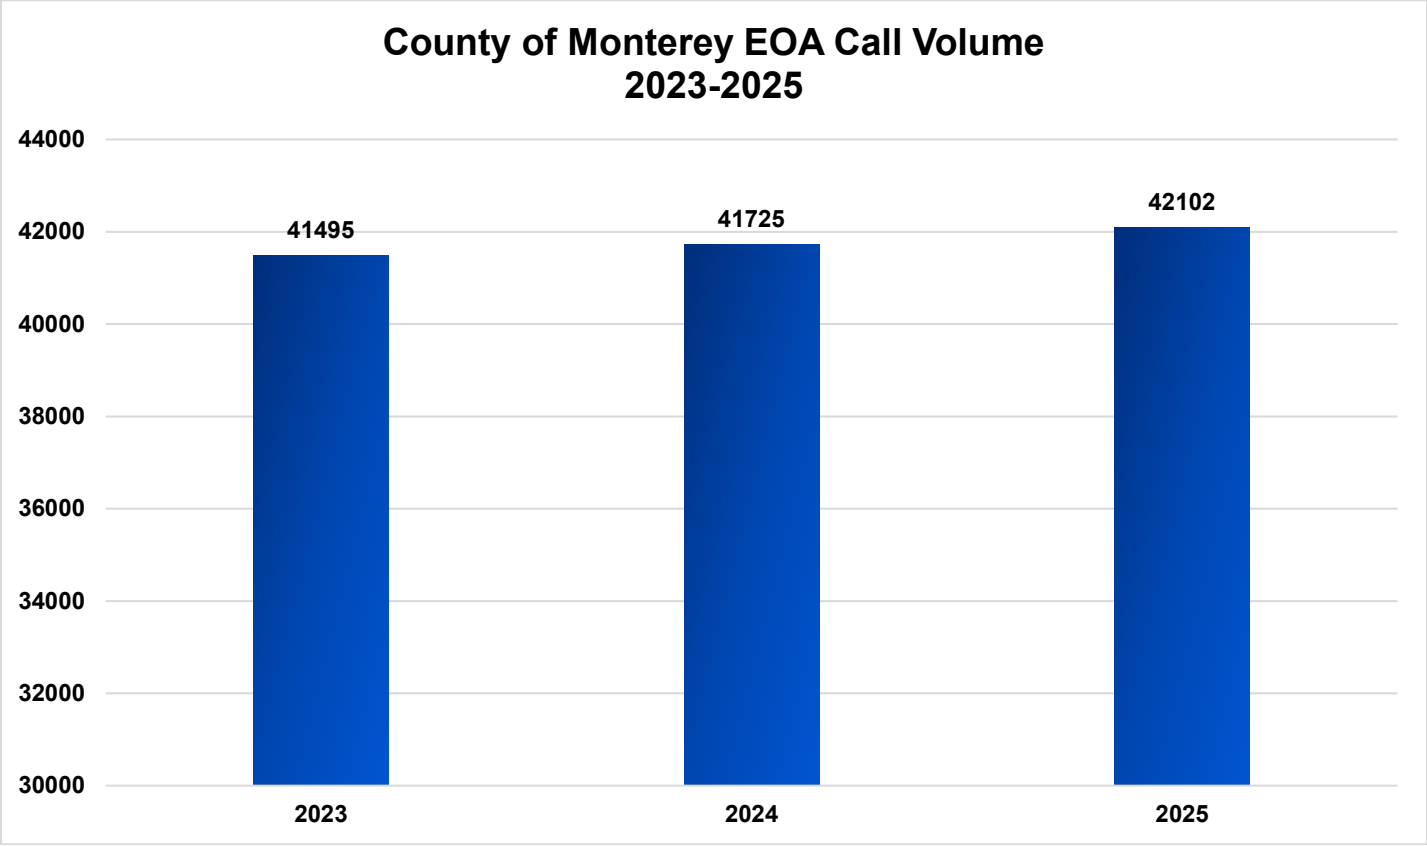
In 2025, Emergency Medical Dispatchers "EMD'd" 72% of emergency medical calls for service. In order for a call to be considered "EMD'd," it must have a determinant code. Determinant codes are assigned to calls after the dispatcher finishes questioning the caller. The determinant code indicates the type of medical emergency reported by a caller and categorizes the level of urgency based on the reported signs and symptoms. It helps dispatchers determine the appropriate response and resources needed.

Year	Total Calls	Number of Calls EMD'd	Percentage of Calls EMD'd
2021	31,740	21,690	68%
2022	33,377	23,904	72%
2023	35,293	25,436	72%
2024	34,676	25,515	74%
2025	35,170	25,219	72%

AMBULANCE SERVICES
Ambulance Call Volume

For the purpose of the provision of timely ambulance services, the county of Monterey has been divided into zones and specific performance requirements have been put in place to ensure timely response to emergency medical calls. The zones and their corresponding response time requirements take into consideration the acuity of the calls, the large geographic area that must be covered, and the difficulty in providing the services in the more remote, hard-to-serve areas. Given that changes such as population increases/decreases can directly affect the provision of emergency medical services (e.g., an increase in call volume/number of transports), the EMS Agency works with the contracted ambulance services provider to monitor the data regularly to ensure that, as local communities in different parts of the county change, the ambulance services continue to meet the needs of the community.

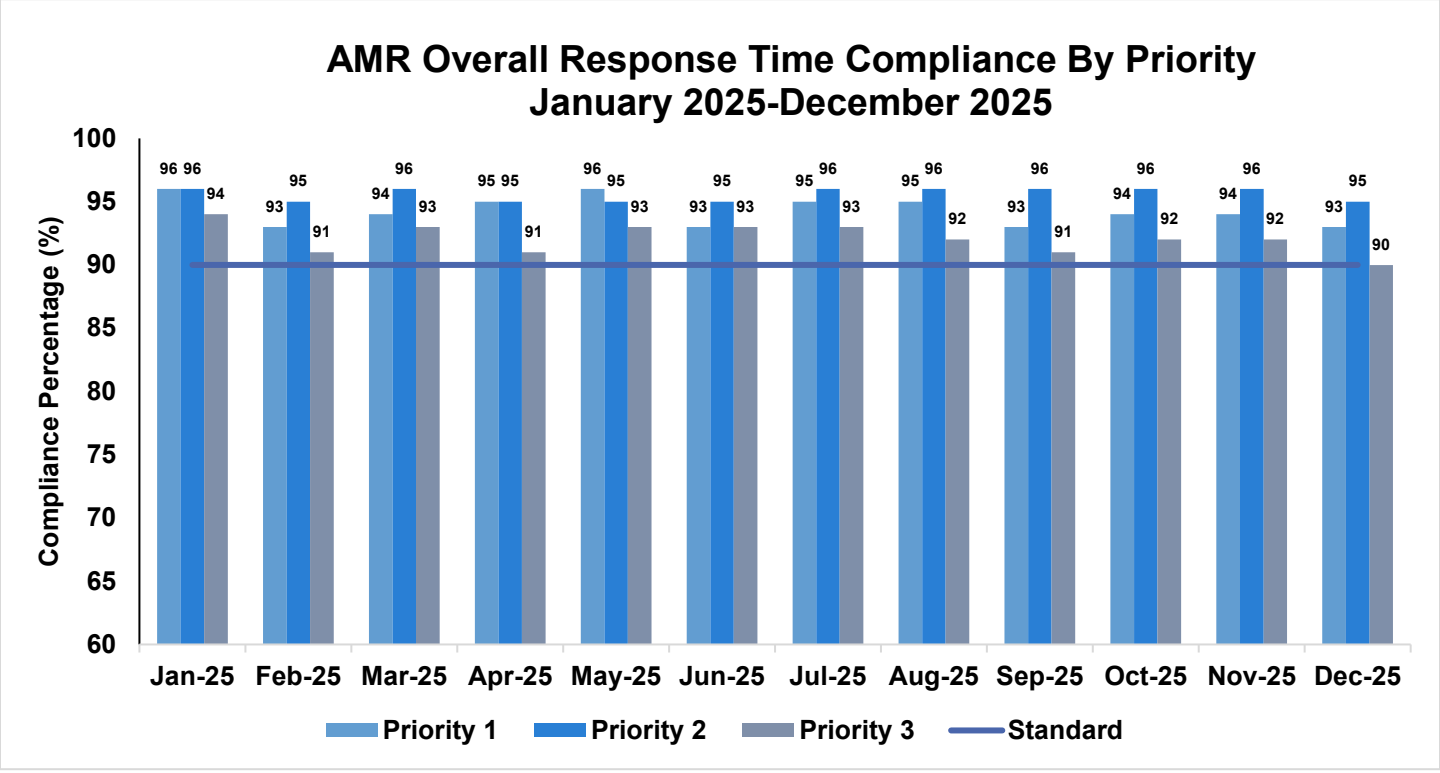
The chart below illustrates the total number of calls for emergency medical assistance received by AMR, the County's ambulance service provider, from 2023 to 2025. The chart shows that there has been a minor increase in call volume. Between 2023 and 2024, call volume increased by 230 calls or 0.6%. Similarly, between 2024 and 2025, call volume increased by 377calls or 0.9%.



Ambulance Response Times

The current agreement requires the ambulance services provider to achieve 90% or higher response time compliance for each priority within each zoneto be deemed compliant. The table below illustrates the ambulance service provider's overall response time compliance by month for all Priority 1, 2, and 3 calls (definitions below) in 2025. The Emergency Medical Dispatch caller interrogation process through the Medical Priority Dispatch System (MPDS) determines most response priorities. The data below shows that AMR met or exceeded overall response time compliance in 2025, which is the direct result of the close collaboration between the EMS Agency and AMR to improve the EMS system and ensure the efficient use of ambulance resources.

Priority	Definition
1	Life-threatening emergencies, e.g., cardiac arrests, choking, major hemorrhage, etc. Require the closest ambulance with a red lights and siren response. The ambulance is ***not*** divertible.
2	Non-life-threatening emergencies. Require an urgent red lights and siren response. The ambulance is divertible to a Priority 1.
3	Non-life-threatening emergencies. Require an immediate response with ***no*** red lights or siren. Ambulances assigned to a Priority 3 call may be diverted to a higher priority call.



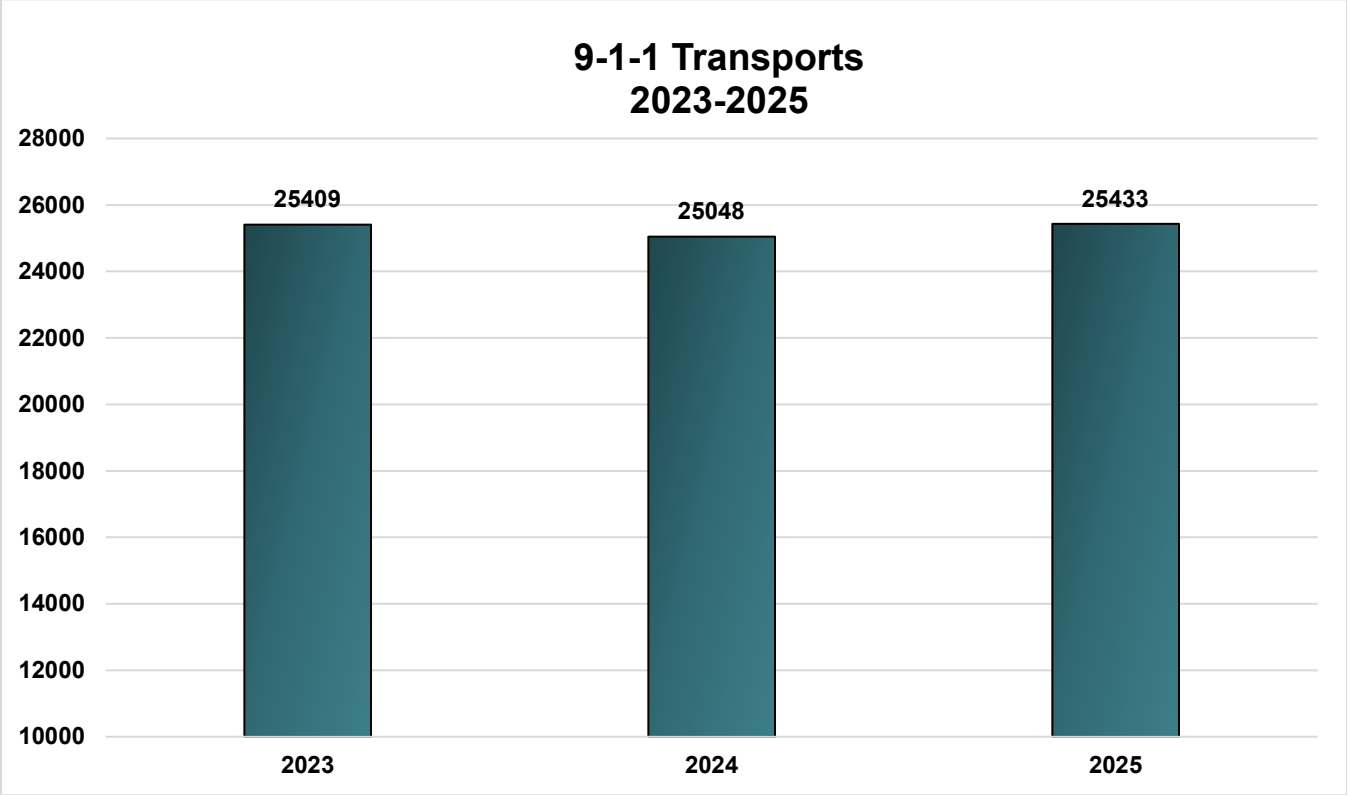
Ambulance Transport Volume

For a variety or reasons, not every call for emergency medical services results in a trip to the hospital. For example, the patient could be treated on site and not need to go to the emergency department. Sometimes, the patient chooses not to go to the emergency department.

The chart below depicts the number of calls for emergency medical assistance that originated through the 9-1-1 system and resulted in patient transport to the hospital from 2023 through 2025.

In 2025, based on the 42,102 emergency medical calls received by the ambulance services provider, approximately 59% of all calls placed to 9-1-1 for medical assistance resulted in transport to the hospital via ambulance.

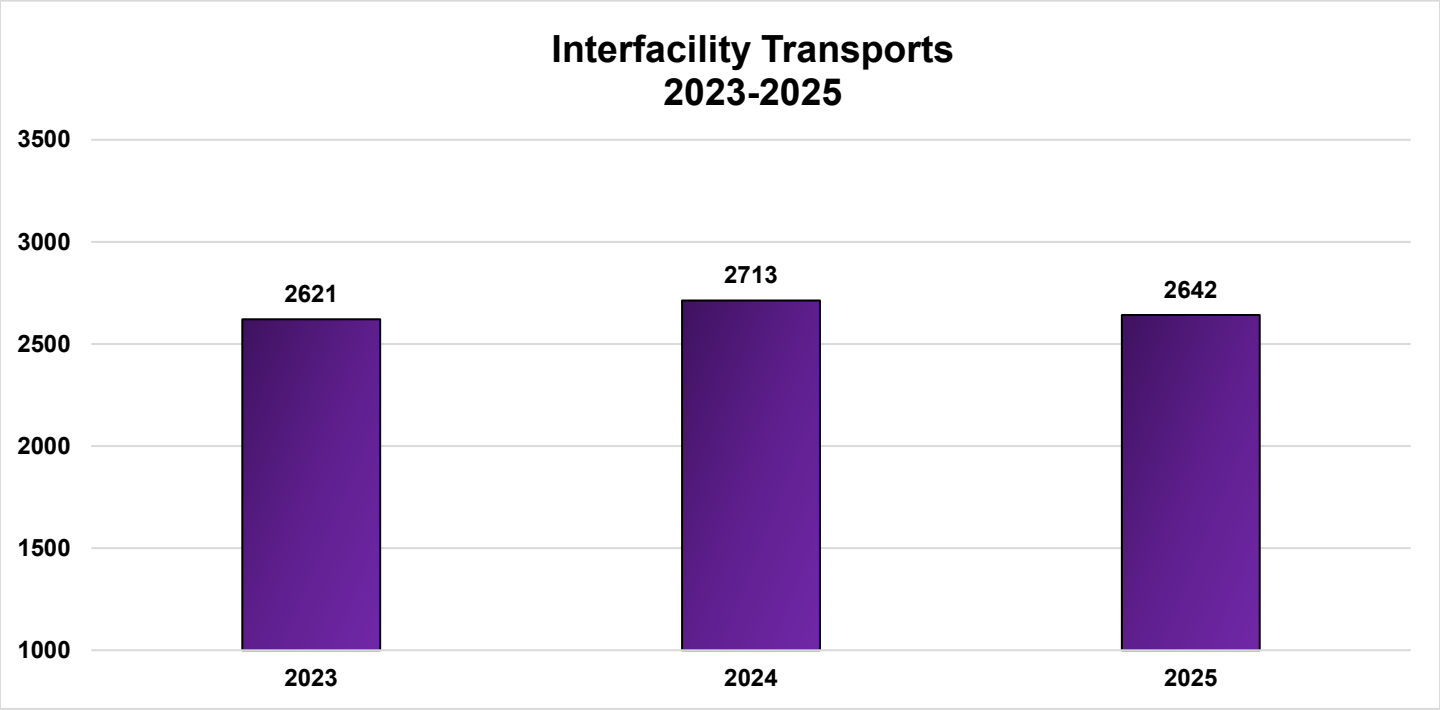
The chart below also shows that between 2023 and 2024, the number of transports decreased by 361 transports or a 1.42% decrease, and between 2024 and 2025, the number of transports increased by 385 transports or a 2% increase.



In addition to transporting patients encountered through 9-1-1 calls to hospitals, the ambulance service provider is also responsible for transporting patients who need continued medical monitoring while being transferred from one medical facility to another. For example, a patient being seen in the emergency department due to behavioral health issues who needs to be transferred to a behavioral health facility for continued care or a patient who is being released from the emergency department to go to a skilled nursing facility (SNF), which is a facility that provides high-level medical care and rehabilitation services, often after a hospital stay. These types of transports are referred to as Interfacility Transports (IFTs).

The chart below includes the number of IFTs from 2023 through 2025.

The data show that, between 2023 and 2024, the number of IFTs increased by 92 transports of 3.51% and between 2024 and 2025, the number of IFTs decreased by 71 transports or 3%.



SPECIAL EVENT PLANNING

Given the large number of special events that are held in the County of Monterey and that emergency and non-emergency medical incidents can occur at these events, to ensure that special events within Monterey County are properly prepared to address potential medical incidents and needs, the EMS Agency works closely with Housing and Community Development (HCD) and the Parks Department to collect medical plans from event coordinators and review the plans to ensure sufficient medical resource availability for each event. This process begins when HCD or the Parks Department notifies the EMS Agency about upcoming events, this notification prompts the EMS Agency to reach out to event organizers and request that the organizers complete and submit comprehensive medical plans. Some of the most prominent events that the EMS Agency reviews include the Sea Otter Classic, Big Sur International Marathon, Laguna Seca Raceway events, California Airshow, AIDS LifeCycle, AT&T Pebble Beach Pro-Am, and Concours D'Elegance. The ambulance services provider is responsible for providing standby ambulance services at special events.

In 2025, the EMS Agency successfully processed a total of 120 medical plans for these and other events. This represented an 84.6% increase from 2024 in the number of medical plans reviewed. The EMS Agency also reviewed information about another 15 events that were small enough that a formal medical plan was not needed.

In addition to collecting medical plans in advance, the EMS Agency also requests After Event Reports. These reports provide valuable insights into the actual medical needs that arose during each event, allowing the Agency to identify trends and potential challenges. This information is critical for shaping future event preparedness and ensuring that the EMS Agency can adjust policies and protocols to address emerging medical requirements effectively.

QUALITY ASSURANCE AND IMPROVEMENT

In order to achieve robust and viable quality improvement, it is imperative that the EMS Agency engages in data-driven decision-making. That is why, on a regular basis, the EMS Agency reviews data and information gathered during its specialty care QI committees, unusual occurrence reviews, and annual Policy and Protocol Development Cycle. During each of these programs, stakeholders can voice their perspectives and realities within the County of Monterey EMS system, and the EMS Agency has the ability to compare this information with strategic data reviews with the overall aim of making the county's EMS system high-performing and patient-focused.

Policy and Protocol Development

The EMS Agency seeks to review, and update as necessary, one third of our policies and protocols every year. Research and data, changes in clinical practice, stakeholder input, and information gleaned from our QA/QI processes all contribute to the update processes. This helps ensure that we use the latest data to guide patient care and EMS operations.

As a part of our 2025 Policy and Protocol Review Cycle, the EMS Agency updated 73 policies and field treatment protocols. The changes made to these policies and protocols went into effect on July 1, 2025.

Some highlights of the 2025 review and update included:

1. The addition of needle cricothyrotomy to establish an airway when other methods fail.
2. Changing the medication used to manage patients with persistent very low blood pressures to better align with current best practices. The new medication can be safely given more quickly as it does not require complex calculations and the establishment of a correct infusion rate over time.

3. Update to the policy on paramedic training program approval to provide best practices for program monitoring.
4. Expanding the policy for using the ReddiNet internet-based EMS communications system for managing critical incidents such as incidents involving multiple patients.
5. Updating the procedure for EMS personnel to make a determination of death when the patient is obviously dead and resuscitation efforts would be futile.
6. Adding a new flow-chart to the policy on how to care for patients with an implanted heart device commonly referred to as a VAD or LVAD that provides for circulation of the blood when the patient's hear is not able to do so. These device are relatively rate and not commonly encountered by EMS personnel. The improved policy will assist with the assessment, trouble-shooting, and treatment of these patients.
7. Revisions to the timeframe in which EMS personnel are to submit patient care documentation that takes into account the need for prompt transfer of information to ED staff and the need to respond to subsequent calls.

Some of the updates listed above impacted multiple policies and treatment protocols. This led a larger than normal number of changes.

In 2025 the EMS Agency also started the review and update process for the 2026 Policy and Protocol Review Cycle. The changes resulting from this cycle will go into effect on July 1, 2026.

Unusual Occurrence (UO) Case Reviews

In 2025, the EMS Agency received 66 UO reports. This number represents a decrease of 20 case reviews or 23% from 2024. These reports present opportunities for EMS system quality improvement and have led to system-wide changes including changes in patient treatment protocols, the use of mutual aid resources, and the handling of hospital requests for Critical Care Transport units.

Along with these system changes, our Unusual Occurrence Reporting system has provided important insight to challenges that our allied agencies experience when working together on complex and multifaceted situations. The EMS Agency works with our partners to resolve case reviews and ensure an EMS system that is sustainable and effective in providing the best patient care.

SPECIALTY CARE SYSTEMS

A well-organized EMS system plays a critical role in ensuring that patients receive appropriate care in a timely manner. While the care provided by EMS personnel is essential, their decisions regarding patient transport destinations are equally important. In certain conditions, choosing the right hospital can be lifesaving.

Within the EMS system, specialty care programs are designed to rapidly identify patients who require specialized treatment, facilitate swift transport to the appropriate specialty care center, and enable early notification to the receiving facility. These processes help ensure that certain life threatening conditions are treated as quickly as possible. The EMS Agency is responsible for designating and overseeing STEMI, stroke, and trauma specialty care systems, as well as developing and maintaining QA/QI programs for these systems.

As part our QA/QI efforts, the EMS Agency conducts regular reviews of STEMI, stroke, and trauma cases and data to ensure that these critically ill patients receive optimal care. Each specialty care system is supported by a dedicated QI committee composed of EMS providers, hospital coordinators, and other key stakeholders in providing patient care. These committees meet at least three times a

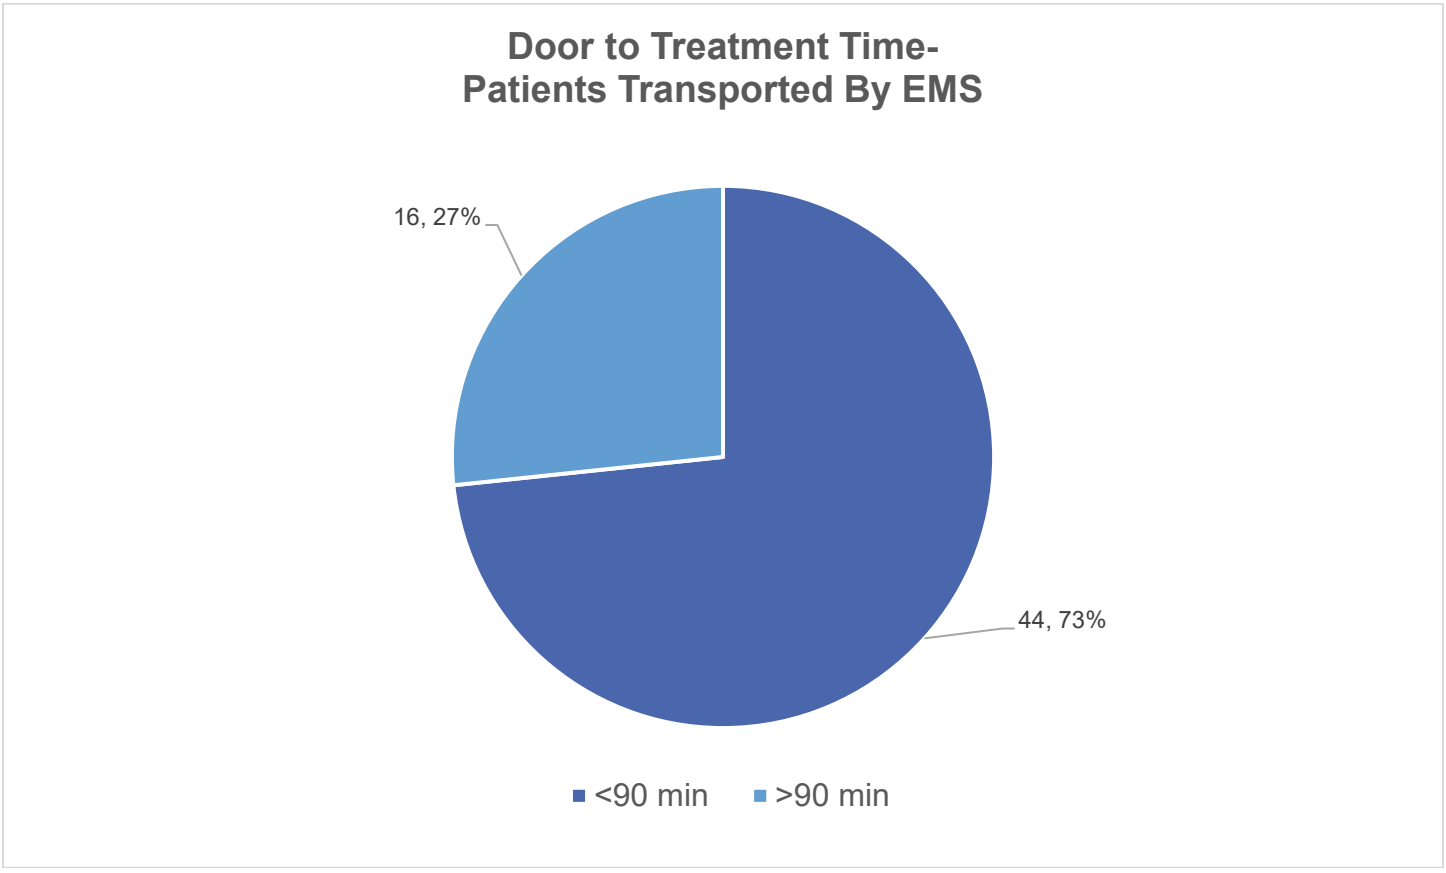
year to evaluate and discuss data trends, review cases, identify successes, and explore areas for system improvement.

The following sections highlight key trends identified across the three specialty care systems.

STEMI System of Care

The STEMI system of care starts with the policies and treatment protocols put in place by the EMS Agency. The system involves the training of our paramedic providers to obtain a 12-Lead ECG. This ECG is transmitted to a designated STEMI Receiving Center where it is reviewed by an ED physician and made available to the interventional cardiologist. In addition to electronically transmitting the 12-Lead ECG, the paramedic contacts the emergency department at the STEMI Receiving Center by phone and provides a verbal report on the patient's condition. This is the STEMI Alert that is used to trigger the STEMI Activation at the STEMI Receiving Center. The STEMI Activation brings the interventional cardiologist and cardiac cath lab team together so that the patient can be treated as soon as possible.

The benchmark time for the patient to receive treatment for STEMI is 90 minutes in 75% of cases. This benchmark is measured from the time the patient enters the hospital to the time the blockage in the patient's heart is treated. In 2025, 73.3% of EMS transported patients with STEMI met this benchmark.

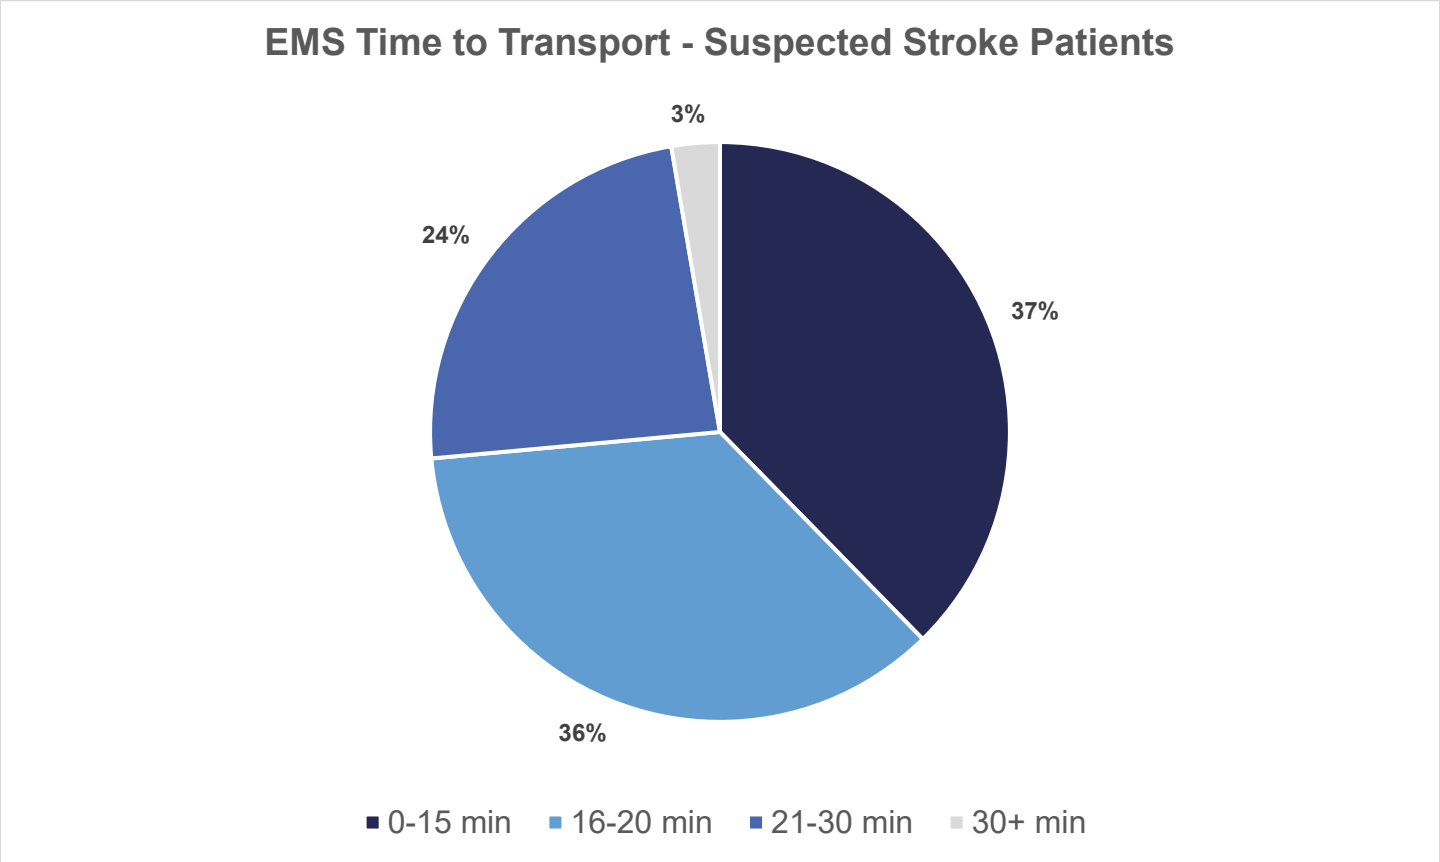


Stroke System of Care

When it comes to the best possible treatment of stroke patients, we must remember that "time equals brain." That is why the goals of the Stroke system of care include early recognition of stroke, rapid transport of the stroke patient to a designated Stroke Center, early notification to the Stroke Center of

the patient's pending arrival, and rapidly obtaining a CT scan to help confirm the presence of stroke and establish the type of stroke. One type of stroke is caused by a blockage in an artery that provides blood and nutrients to the brain. The treatment for this type of stroke is medication that works to dissolve the blockage allowing blood to flow to the brain again. The hospital must administer this treatment within a narrow window of time.

To ensure that patients have the best possible opportunity to receive this treatment, the EMS Agency has established a benchmark for EMS providers to initiate the transport of stroke patients within 15 minutes of their arrival on scene. In 2025, 37% of patients suspected of sustaining a strtoke were transported within this time frame. The EMS Agency continues to work to identify barriers to more timely transport and communicate these findings to EMS service providers through th Stroke QI Committee.



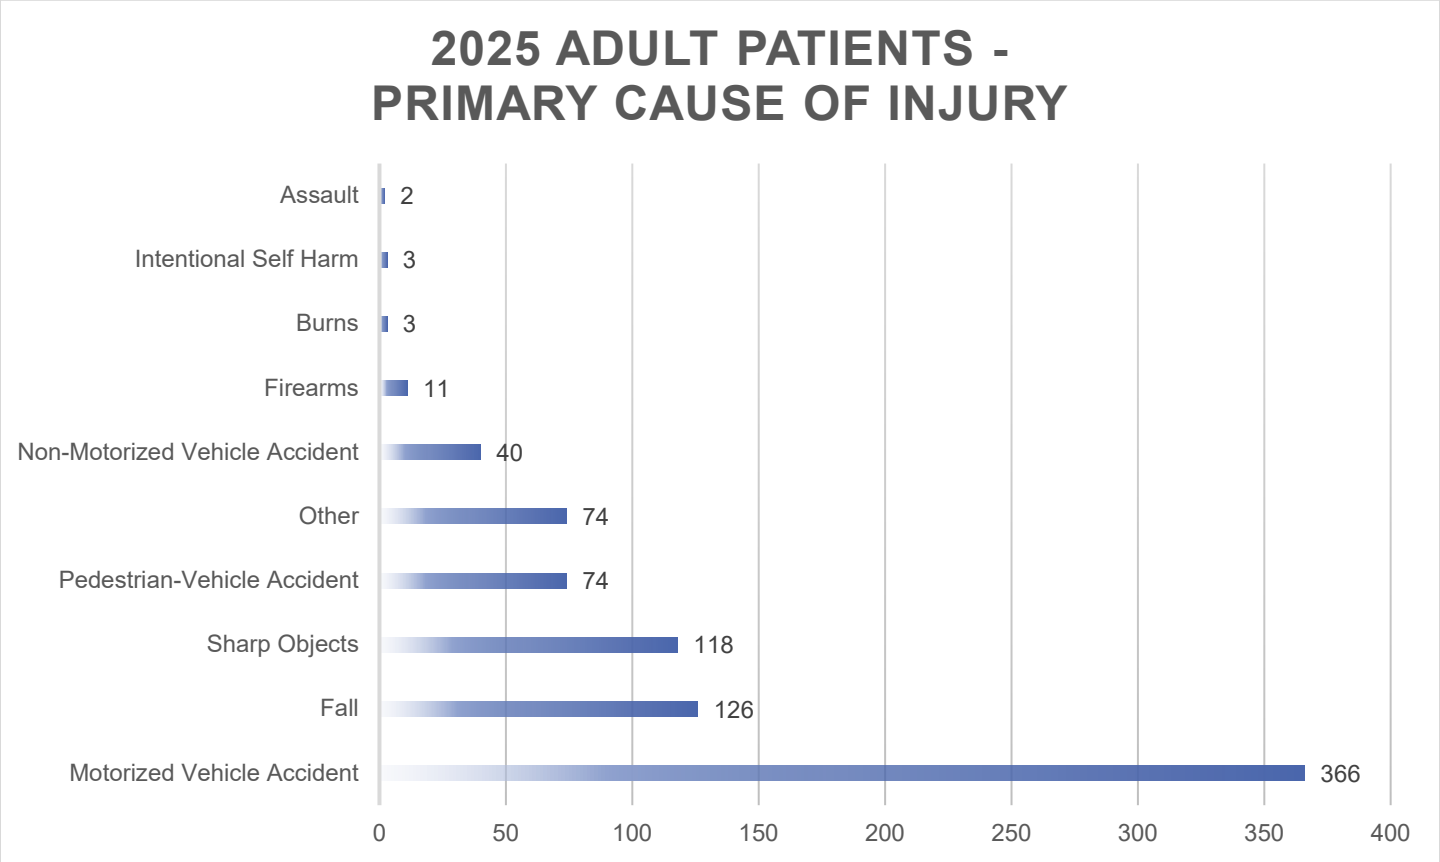
Trauma System of Care

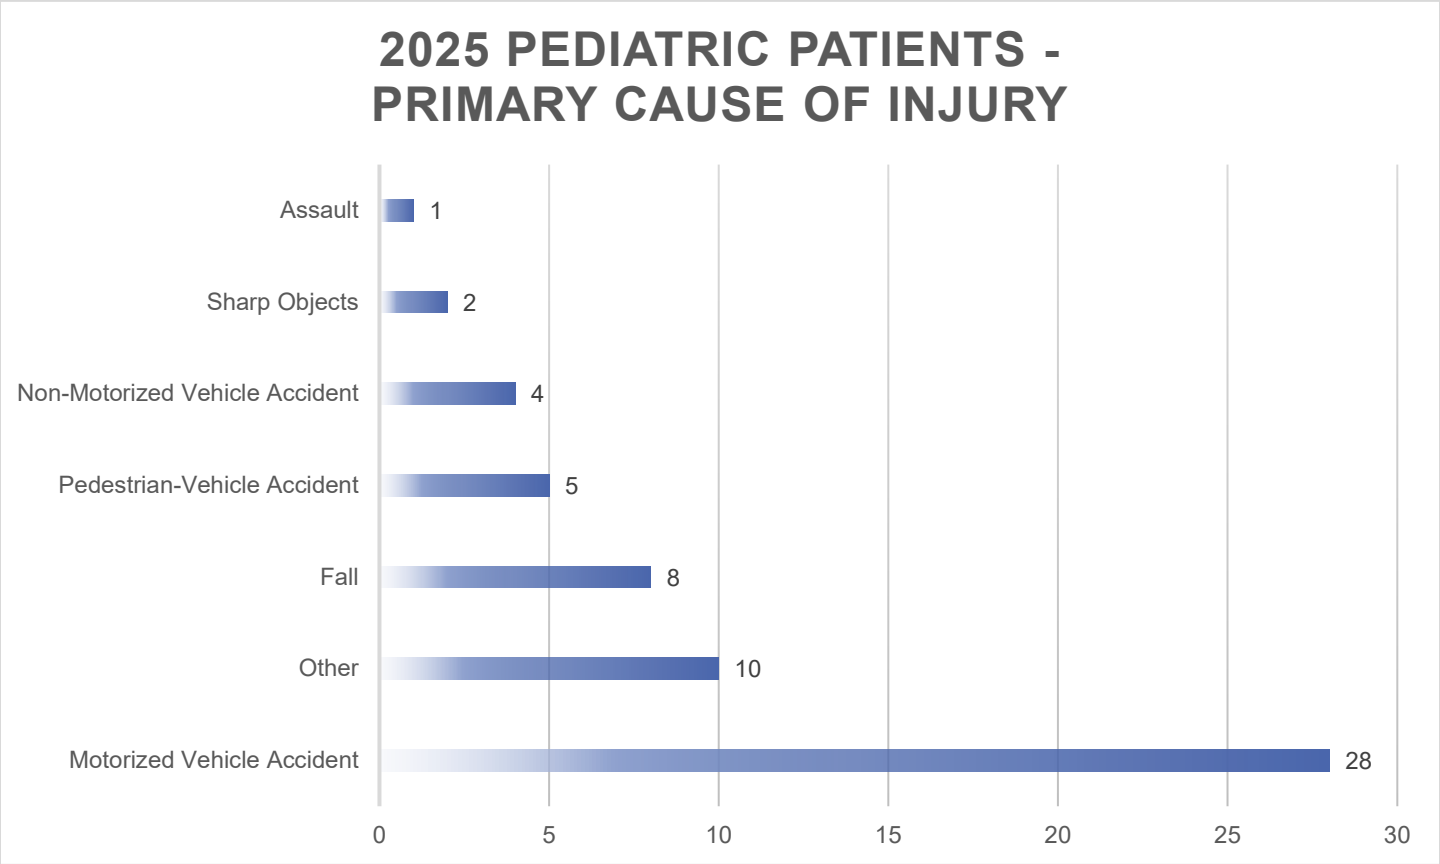
Traumatic injuries are among the most common reasons for calls for EMS service. These injuries can range from minor lacerations to severe, multisystem trauma affecting multiple organs within the body. Due to the wide spectrum of presentations and the challenge of identifying internal injuries in the field, the EMS Agency has implemented a policy addressing Field Trauma Triage Criteria. This framework assists EMS providers in assessing injury severity based on vital signs, anatomic injuries, mechanism of injury, and other factors that may influence patient outcomes.

The Field Trauma Triage Criteria categorize patients into different "steps" within an algorithm, helping providers determine the likelihood of serious injury. This structured approach also guides destination decisions, ensuring that patients with potentially severe trauma are transported to facilities equipped to provide the appropriate level of care.

Timely access to a trauma center is critical for patients with significant injuries, as these centers offer specialized resources that improve survival and long-term outcomes. Local EMS providers consistently demonstrate strong clinical judgment in recognizing high-risk patients and selecting appropriate destinations. In Monterey County, the designation of Natividad as a Level II Trauma Center allows many patients to receive advanced trauma care without leaving the county. Natividad has established a strong track record of high-quality trauma care, as demonstrated by successful external evaluations conducted through the American College of Surgeons (ACS) Verification Review and Consultation (VRC) program.

In 2025, the primary cause of injury for both adult and pediatric patients was motorized vehicle accidents. This finding was consistent with the 2024 data. The 2025 data showed that 44.7% of adult patients and 48.3% of pediatric patients sought EMS services due to injuries resulting from motorized vehicle accidents. Overall, almost 60% of injuries involved a vehicle whether motorized or non-motorized.





Health Department Performance Measure – Transport of Trauma Patients to a Trauma Center

The EMS Agency identified the transport of trauma patients to a trauma center as one of our Performance Measures for the Health Department. We established a goal of transporting 90 percent or greater of patients who meet trauma criteria directly to a trauma center.

The table below demonstrate the EMS system's success in meeting this goal.

	Q1 2025	Q2 2025	Q3 2025	Q4 2025	2025
# of Patients who Met Trauma Triage Criteria (TTC)	180	206	180	185	751
# of Patients Meeting TTC Transported to a Trauma Center	161	191	167	176	695
% of Patients Meeting TTC Transported to a Trauma Center	89.4%	92.7%	92.8%	95.1%	92.5%

**Data Note: The total number of patients varies between the two trauma metrics due to a difference in the patient populations tracked. The first measure related to cause of injury looks at all patients who met Trauma Triage Criteria while the second measure only looks at those patients who were transported to a hospital.*

TRI-COUNTY BUPRENORPHINE PROGRAM

In 2025 the County of Monterey EMS Agency continued its partnership with San Benito and Santa Cruz Counties to collaborate on the Tri-County EMS Buprenorphine Program as a way to address the opioid-addiction crisis within our region. The purpose of the program is to permit EMS providers to administer the medication to patients suffering with either opioid-related withdrawals or a nonfatal overdose. It not only provides initial treatment for patients struggling with addiction, but also provides access to long-term treatment and a network of support providers.

Along with support from the EMSA, CA Bridge, and several other community-based partners, this program has provided patients struggling with addiction the opportunity for treatment access and a network of support providers.

EMS personnel treated 25 patients with buprenorphine in 2025. This number represents a 150% increase over 2024 in the instances of administration of buprenorphine. Beyond the administration of the medication the patients were connected with substance use navigators who connected the patients with additional services and follow up care.

In July 2025, Dr. John Beuerle, the EMS Agency's Medical Director, delivered an educational presentation for field personnel. The presentation was focused on topics such as the opioid crisis, the pharmacology of buprenorphine, eligibility to receive buprenorphine, proper documentation, and the goals of administering the medication.

In late 2025, the EMS Agency applied to the EMS Authority for approval to renew our Local Optional Scope of Practice (LOSOP) that permits paramedics to administer buprenorphine in the field. The EMS Authority approved the application in November. With this approval, EMS providers in Monterey County are approved to administer buprehosphine through the end of 2028. The extension of this program will allow EMS providers to continue their positive impact on patient suffering from withdrawal symptoms and substance use disorder.

OVERDOSE AND POISONING

BLS CARE

Routine Medical Care

Identify and locate the substance. Protect self and consider contacting California Poison Control at (800) 222-1222.

Prevent additional contact with the substance, as warranted. Prevent further access to the substance by the patient.

Do not induce vomiting. Give nothing by mouth.

Substance-Specific Treatment (in addition to Routine Medical Care):

Suspected Opioid Overdose

Naloxone, up to 4 mg intra-nasal (IN), if respirations are less than 10/minute. Assess for improved respiratory rate and quality. May repeat one time if respirations remain less than 10/minute.

ALS CARE

Routine Medical Care

Substance-Specific Treatment (in addition to Routine Medical Care):

Suspected Opioid Overdose

Naloxone, up to 2 mg IV/IM/IN/IO, if respirations are less than 10/minute. Titrate to improve respiratory rate and quality. May repeat up to 8 mg if respirations remain less than 10/minute.

May be administered **IM** by an EMT working under the supervision of a paramedic.

OPIOID WITHDRAWAL TREATMENT (BUPRENORPHINE)

I. PURPOSE

To provide guidance for treating patients who are (a) exhibiting signs or symptoms of opioid withdrawal and/or (b) who have been successfully resuscitated following an opioid overdose, including the administration of naloxone. ALS providers may activate a prehospital-based MAT program, which allows paramedics to administer buprenorphine AND link the patient with a hospital treatment program.

Offering buprenorphine treatment to individuals experiencing opioid withdrawal or to those who experience a nonfatal opioid overdose provides an opportunity to reduce opioid overdose fatalities.

This optional scope of practice item is currently limited to AMR paramedics only, although we anticipate extending this project to all ALS 9-1-1 transport providers in the future. This limited roll-out will allow us to study cost, utilization, and overall effectiveness before considering whether to expand the local optional scope of practice (LOSOP) authorization to all ALS providers.

II. ASSESS FOR EXCLUSION CRITERIA

A. Patients with any of the following **exclusion criteria** should not receive buprenorphine:

- No opioid withdrawal signs of symptoms
- Under 16 years of age
- Any methadone use within the last 10 days
- Severe medical illness (sepsis, respiratory distress, etc.)
- Altered mental status and unable to give consent or comprehend potential risks and benefits of receiving buprenorphine
- Clinical Opioid Withdrawal Scale score (COWS score) < 8

FINANCES
County Service Area (CSA) 74

In 1988, the County of Monterey sponsored a ballot measure for the establishment of the CSA-74 benefit assessment on real property within the county to finance a countywide Paramedic Emergency Medical Services (EMS) program. On March 7, 2000, Monterey County voters approved Measure A, replacing the former CSA-74 benefit assessment with an equivalent special tax, in compliance with Proposition 218. The special tax is collected, whose purpose is to fund "the countywide Paramedic EMS System, which will provide advanced life-savings support ot victims inresonse to emergency calls," is administered by the EMS Agency.

The special tax for CSA 74 is assessed in accordance with the County of Monterey Land Use Codes. The basic unit is a single-family dwelling. The current rate per parcel is $12.00. All other land uses are either a percentage or multiple of that basic unit. Trailer Spaces and Hotel Rooms are calculated differently as there may be many of them on a single parcel.

The break down based on billed parcels for FY24-25 is as follows:

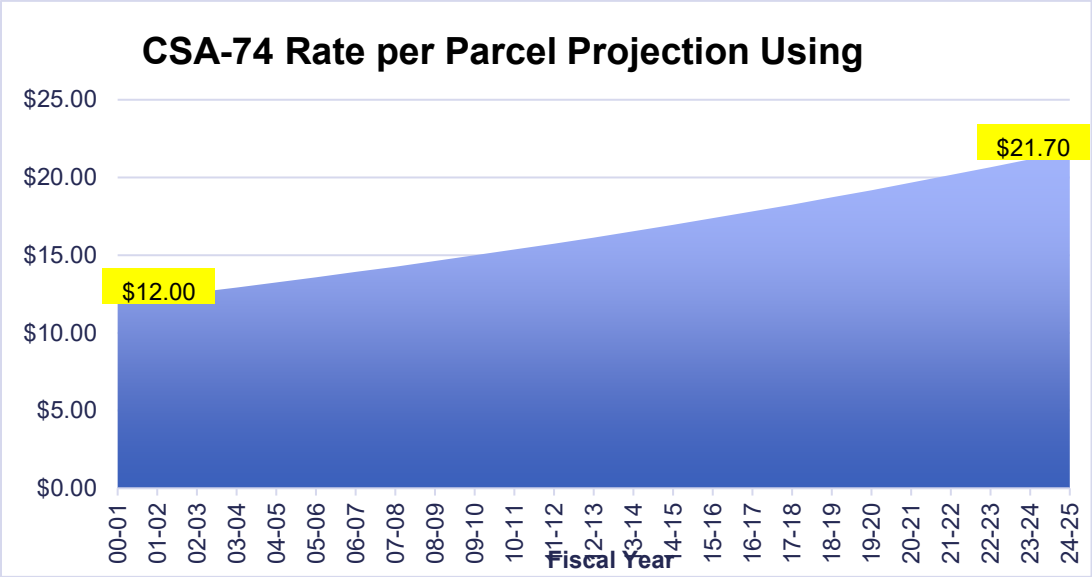
CSA Units	121,049	$1,730,640
Trailer spaces and hotels rooms	413	$183,776
Total	**121,462**	**$1,914,416**

In addition to supporting operations of the EMS Agency to comply with its responsibility to oversee the EMS System, CSA-74 funds are also used to supplement the countywide EMS training efforts and equipment acquisition of emergency first responders. The amount disbursed to each participating agency is calculated using the methodology established in the MOU dated June 17, 2011.

During FY24-25, the EMS Agency continued to use CSA-74 monies to support the cost of the countywide, integrated electronic patient care reporting (ePCR) system to ensure compliance with Assembly Bill 1129, which revised the California Health and Safety Code, Section 1797.227 to require local emergency medical care providers to submit electronic data.

It is worth noting that there has been no change in the per parcel rate since FY 2000-01 and therefore, the revenue generated from CSA-74, the EMS Agency's primary source of funding, has not kept up with the continued rise in costs. Applying an average inflation rate of 2.50% per year between 2001 and 2025, the per parcel rate today would have increased to $21.70, or a cumulative 81% increase.

A table showing what the CSA-74 Special Tax rate would be in today's value appears on the following page:



Maddy Fund Revenue

In 1989, the County of Monterey Board of Supervisors established the County Emergency Medical Services Fund (EMSF) under Section 1797.98 of the Health and Safety Code (Maddy Fund) to provide for collection and distribution of fine proceeds authorized by the California State Legislature adopting of Senate Bill 612 and 1773. These laws allow counties to levy an assessment of $4.00 per $10.00 of fines for specified traffic violations.

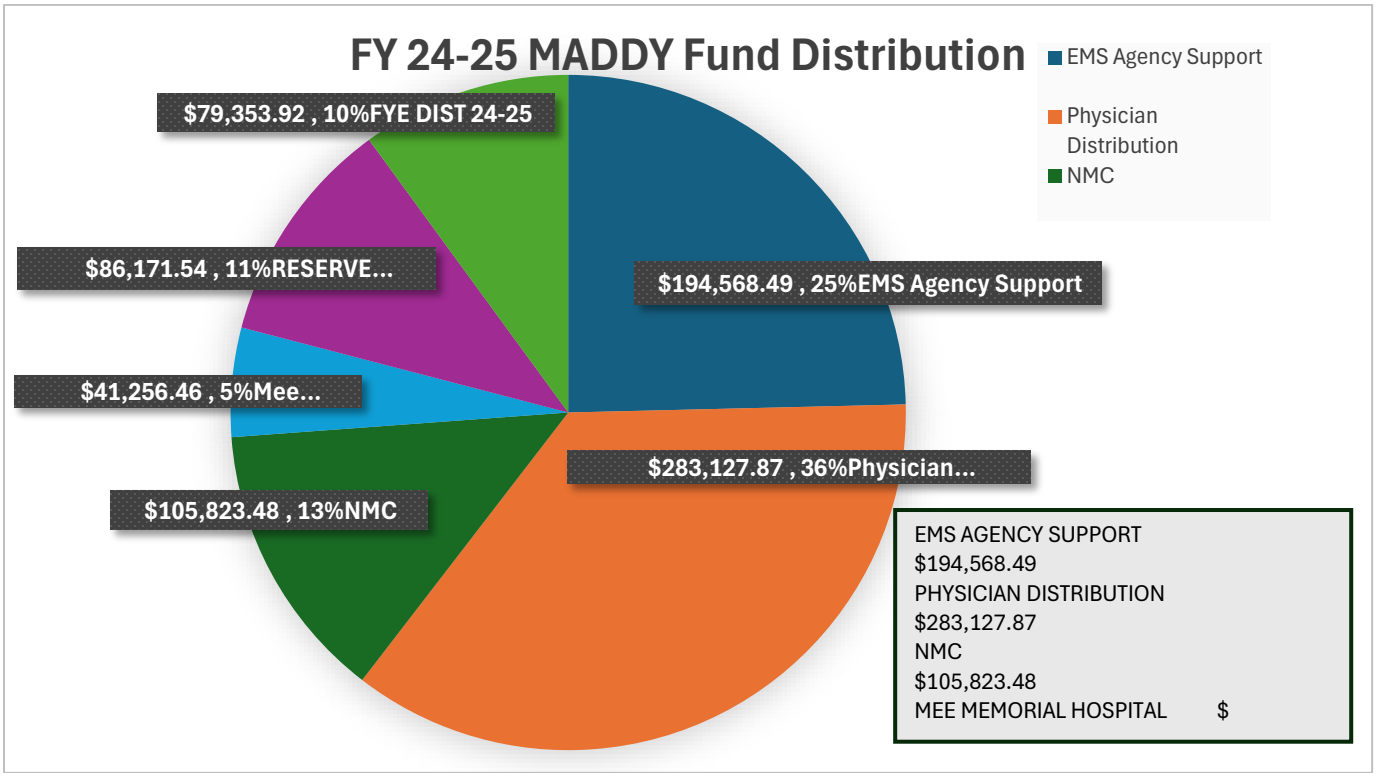
Pursuant to state law, the money in the fund is disbursed and utilized in the following manner:

- Up to 10% of the proceeds are available for the program's administration.
- The remaining 90% compensates health care providers for emergency medical services provided to individuals who do not have healthcare insurance and cannot afford to pay for emergency medical care and for discretionary EMS purposes as follows:
  - 58% to reimburse physicians for a portion of unreimbursed indigent services;
  - 25% to reimburse hospitals which provide a disproportionate share of unreimbursed emergency medical care; and
  - 17% for Health Department's Emergency Medical Services Agency discretionary activities.

Maddy funds are distributed on a quarterly basis to physicians and on an annual basis to the hospitals.

Health & Safety Code Section 1797.98(b) (4) also allows each administering agency to maintain a reserve fund of up to 15% of the amount of the fund reimbursable to physicians and hospitals. The purpose of the reserve is to ensure that physicians and hospitals continue to receive reimbursement for a portion of their services. In FY2022-23, the EMS Agency established a reserve fund in accordance with State law. The reserve fund is equivalent to 15% of the portion available for hospitals and physicians.

A chart showing the disbursement of Maddy Funds in FY24-25 appears below:



The Maddy Fund experienced overall revenue fluctuation over the five-year period from FY 2020–21 through FY 2024–25, with a general downward trend followed by modest recovery in the most recent fiscal year.

Revenue totaled $946,143 in FY 2020–21 and declined to $842,019 in FY 2021–22, representing a decrease of $104,125 (11%). This downward trend continued in FY 2022–23, with revenue decreasing by $45,248 (5%) to $796,771. In FY 2023–24, revenue further declined by $26,146 (3%) to $770,625.

In FY 2024–25, the Maddy Fund experienced a reversal of this trend, with revenue increasing by $19,677 (3%) to $790,302. This marks the first year of revenue growth following three consecutive years of decline.

Overall, the data indicates a cumulative decrease of approximately 16.5% from FY 2020–21 to FY 2023–24, followed by a partial recovery in FY 2024–25. While the recent increase is a positive development, revenue levels remain below those observed at the end of FY20-21.

The trend suggests that while revenues may be stabilizing, continued monitoring is warranted to determine whether the increase in FY 2024–25 represents the beginning of sustained growth or a short-term fluctuation.

A table showing the Maddy fund revenue for the past five years appears below:

Maddy Fund	FY20-21	FY21-22	FY22-23	FY23-24	FY24-25
Revenue	$ 946,143	$ 842,019	$ 796,771	$ 770,625	$ 790,302
Change in Revenue	$ 78,934	$ (104,125)	$ (45,248)	$ (26,146)	$ 19,677
Percentage	9%	-11%	-5%	-3%	3%

Maddy Fund Claims Received

During FY24–25, the EMS Agency received and processed a total of 6,063 claims, compared to 4,980 in the previous fiscal year. Notably, the number of claims submitted and processed electronically increased by 24%.

Electronic submissions now account for the vast majority of claims, with 99% received and processed electronically while only 1% are submitted on paper and require manual processing. This shift represents a significant improvement in operational efficiency and accuracy. Paper claims require time-intensive manual data entry, which increases the risk of human error, whereas electronic submissions streamline processing and enhance data reliability.

Overall, the EMS Agency experienced a 22% increase in total claims volume during FY24–25. Since implementing electronic claims submission in FY 2021–22, the Agency has successfully reduced paper claims to just 1% of total submissions.

The EMS Agency will continue to monitor trends in the processing of claims.

A table showing the number of claims received in FY24-25 appears below:

	FY21-22	FY22-23	FY23-24	FY24-25	% of FY24-25 Claims
ELECTRONIC CLAIMS	2,721	4,360	4,841	6,021	99%
PAPER CLAIMS	1,215	800	139	42	1%
TOTAL	3,936	5,160	4,980	6,063	100%

Finance-Related Goals for 2026

Diversifying Revenue

The CSA-74 special tax and the Maddy Fund are the EMS Agency's primary sources of funding. Given the downward trend in Maddy Fund revenue in the last five years, coupled with a CSA-74 special tax that has not changed since FY2000-01, it has become imperative for the EMS Agency to explore ways to generate increase and diversify its revenue such as the implementation of fees to ensure the fiscal stability of the EMS Agency.

In FY2023-24 the Board of Supervisors approved the implementation of an annual license fee in the amount of $25,000 for Air Ambulance Services Providers providing service in the County of Montery. The annual fee will allow the County to recover costs associated with the classification and authorization of EMS aircraft. At the time of implementation, there were two Air Ambulance Service Providers delivering the primary services in Monterey County. As of the end of 2025, primary services are now provided by one Air Ambulance Service Provider. This change will decrease the additional revenue to $25,000 annually from the originally anticipated $50,000 annually. Despite the additional revenue, expenses are continously increasing. In FY2023-24 the EMS Agency saw an increase of 30.92% in expenses in comparison to FY2022-23. The additional $50K in new revenue does not cover the increase in expenses.

In addition, the EMS agency has introduced an oversight fee to the county ambulance provider, ensuring appropriate cost recovery for system monitoring, quality assurance, and regulatory activities. The agency is has also implemented an electronic patient care reporting (ePCR) system fee requirement for the county ambulance provider for their use of the county's ePCR system. Collectively, these initiatives are intended to generate additional revenue and support the agency's ability to expand and enhance its programs and services.

With rising operational costs, the EMS agency continues to proactively identify opportunities to strengthen and diversify its revenue streams. Moving forward, the agency will focus on identifying potential new fees designed to support program sustainability and regulatory oversight. Each potential fee will be aligned with the increasing administrative, training, and compliance demands associated with the related programs.

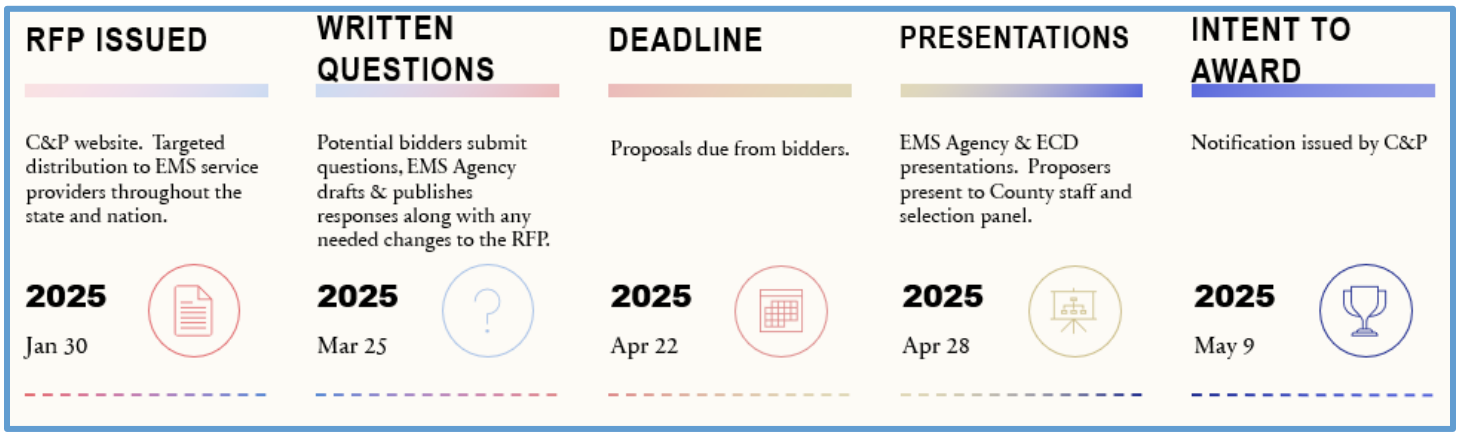
Maddy Fund – Electronic Physician Enrollment

The EMS Agency is working on transitioning to electronic physician enrollment to improve and modernize current processes. Electronic physician enrollment will streamline the way provider information is submitted, verified, and maintained across systems. By shifting from manual, paper-based workflows to a fully digital process, organizations can significantly reduce administrative burden, minimize delays, and improve data consistency. This approach enables faster onboarding of physicians, enhances compliance through standardized data entry, and reduces the likelihood of human error during processing. Additionally, it allows staff to focus on higher-value tasks rather than repetitive data handling. Overall, this transformation supports a more efficient, reliable, and scalable enrollment process that improves both operational performance and provider experience.

2025 ACCOMPLISHMENT HIGHLIGHTS

REQUEST FOR PROPOSALS PROCESS AND THE AWARD OF A NEW AMBULANCE SERVICE PROVIDER AGREEEMENT FOR THE EXCLUSIVE OPERATING AREA

In January 2010, the EMS Agency initiated an agreement with American Medical Response for the provision of ambulance services within Monterey County's Exclusive Operating Area (EOA). As the California EMS Authority (EMSA) requires that local EMS agencies conduct competitive processes approximately every ten years, the EMS Agency issued a request for proposals for ambulance services in January 2019. The RFP garnered one proposal submission that was subsequently rejected. A second RFP was issued in November 2020, but we did not receive any proposals. After approximately a year and a half of work including significant revisions, extensive opportunities for stakeholder input, and extensive work with entities such as Contracts and Purchasing, County Counsel, and the state EMSA to ensure that the RFP met all pertinent requirements, the EMS Agency issued a third RFP on January 30, 2025.



The immense amount of work that went into the RFP proved fruitful this time as the EMS Agency received two proposals in response to the RFP.

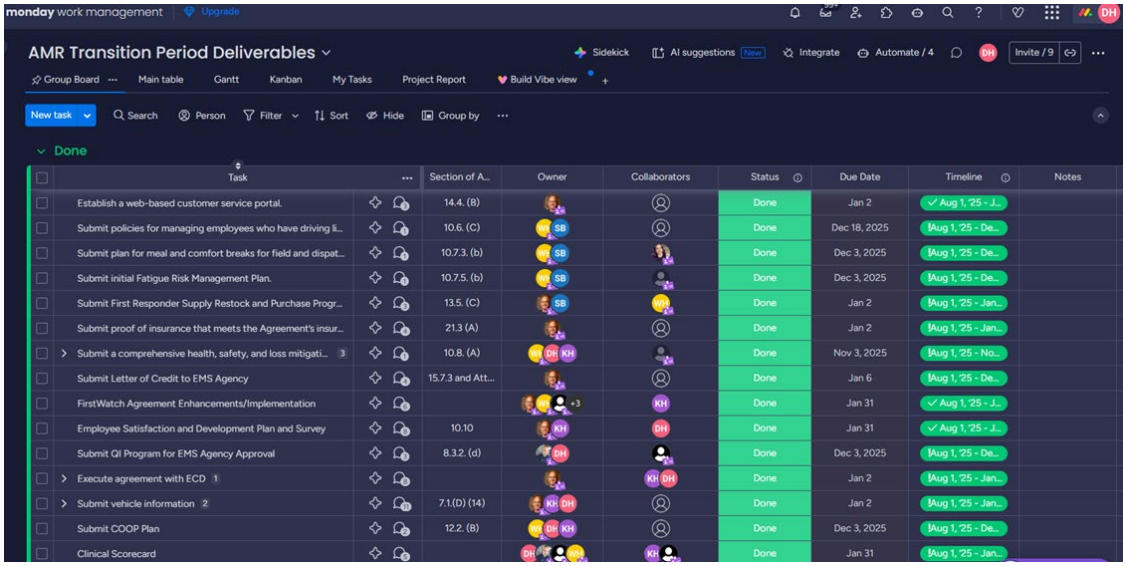
A Proposal Review Panel composed of members familiar with or oriented to various aspects of EMS systems, knowledgeable of the EMS needs of the County of Monterey, and with expertise in various EMS disciplines was tasked with selecting a provider for the EOA based on clinical, operational, and dispatch quality of service while also constraining service costs to the public and other payers.

The final award reflected careful planning, strong stakeholder involvement, and a detailed, transparent review of all proposals to ensure the selection of the contractor best suited to meet the community's needs. The successful proposer was American Medical Response.

In July 2025, the EMS Agency completed the extensive process to award a new ambulance service provider agreement for the County's Exclusive Operating Area by executing an agreement with AMR.

NEW AMBULANCE SERVICE PROVIDER AGREEMENT TRANSITION PERIOD

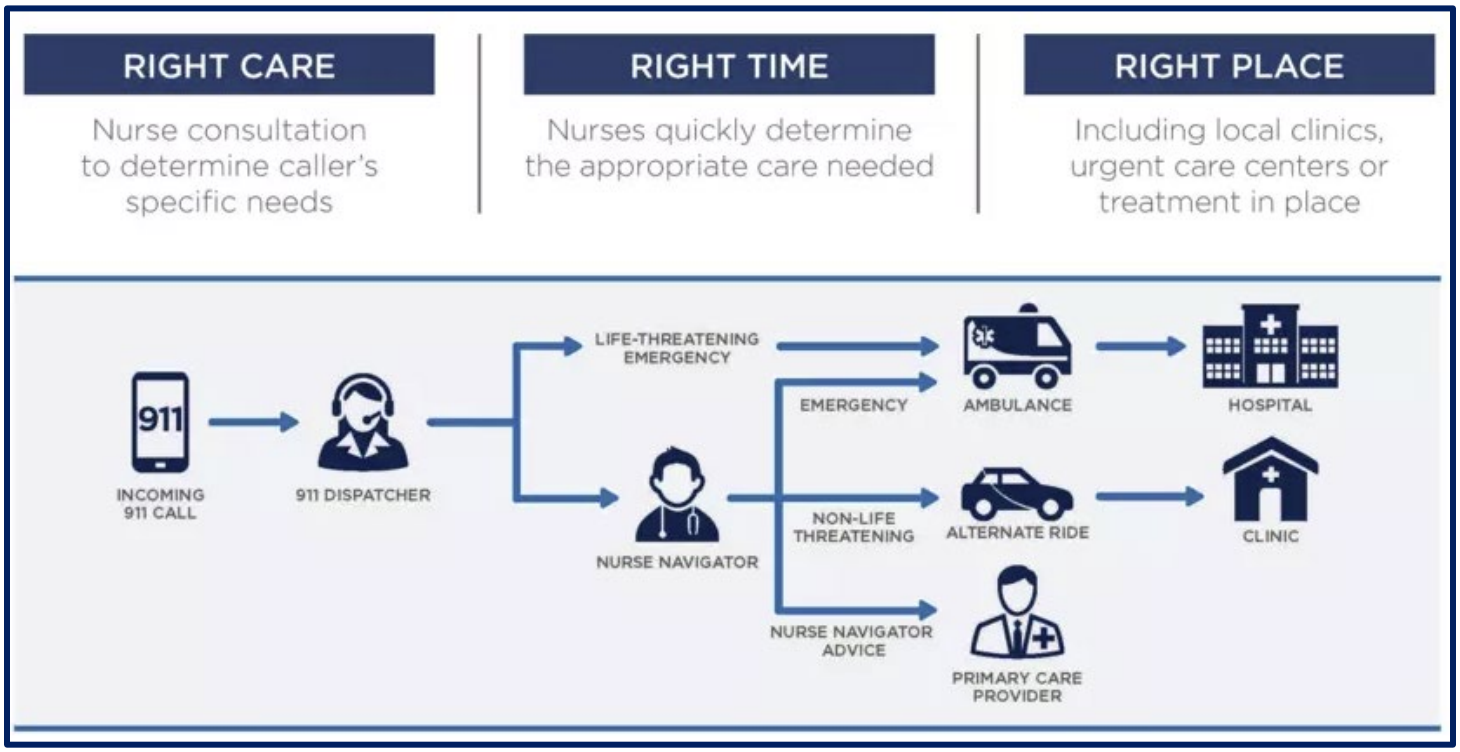
Following the award, the new agreement established a defined transition period during which the provider was immediately contractually obligated to begin preparations for the upcoming operational start date of February 1, 2026. To help manage the volume of tasks and deadlines during this period, the EMS Agency researched project management tools and identified Monday.com as a platform that could support the team's needs. Monday.com provided a straightforward way to organize deliverables, track progress, and keep everything in one place. It also allowed the EMS Agency and AMR to collaborate directly within the platform by assigning tasks, sharing updates, communicating in real time, and flagging items that needed attention.



This structure allowed the EMS Agency to maintain direct oversight of all transition requirements from the moment the award was issued. EMS Agency staff scheduled and led weekly meetings during which our team worked closely with AMR to monitor each deliverable, identify potential issues early, and ensure that all elements of the transition plan remained on schedule. Through consistent communication, coordinated oversight, and proactive problem-solving, the Agency supported a smooth and accountable transition that strengthened system readiness and ensured the provider would be fully prepared for operational launch.

DEVELOPMENT OF A 9-1-1 NURSE NAVIGATION PROGRAM

The EMS Agency successfully advanced the early development of the 9-1-1 Nurse Navigation program. This program is designed to improve the management of non–life-threatening 9-1-1 calls by connecting eligible callers with licensed nurses who can provide clinical triage, self-care guidance, and referrals to appropriate community-based services. The initiative supports improved patient experience, reduces unnecessary EMS responses, and promotes more efficient use of emergency medical resources.



To ensure the program was built collaboratively and with full system transparency, the EMS Agency, in partnership with the Nurse Navigation team, convened and facilitated a series of stakeholder-inclusive working groups. These sessions were intentionally open to all interested system partners to promote visibility, gather operational perspectives, and incorporate broad input into program design. The working groups included:

- **Call Flow Process** – Focused on defining preliminary call-routing pathways and workflow considerations to ensure smooth, reliable transitions between dispatch and nurse navigators.
- **Community Education and Outreach** – Worked on developing communication and engagement strategies to prepare the public and partner agencies for the introduction of the Nurse Navigation model.

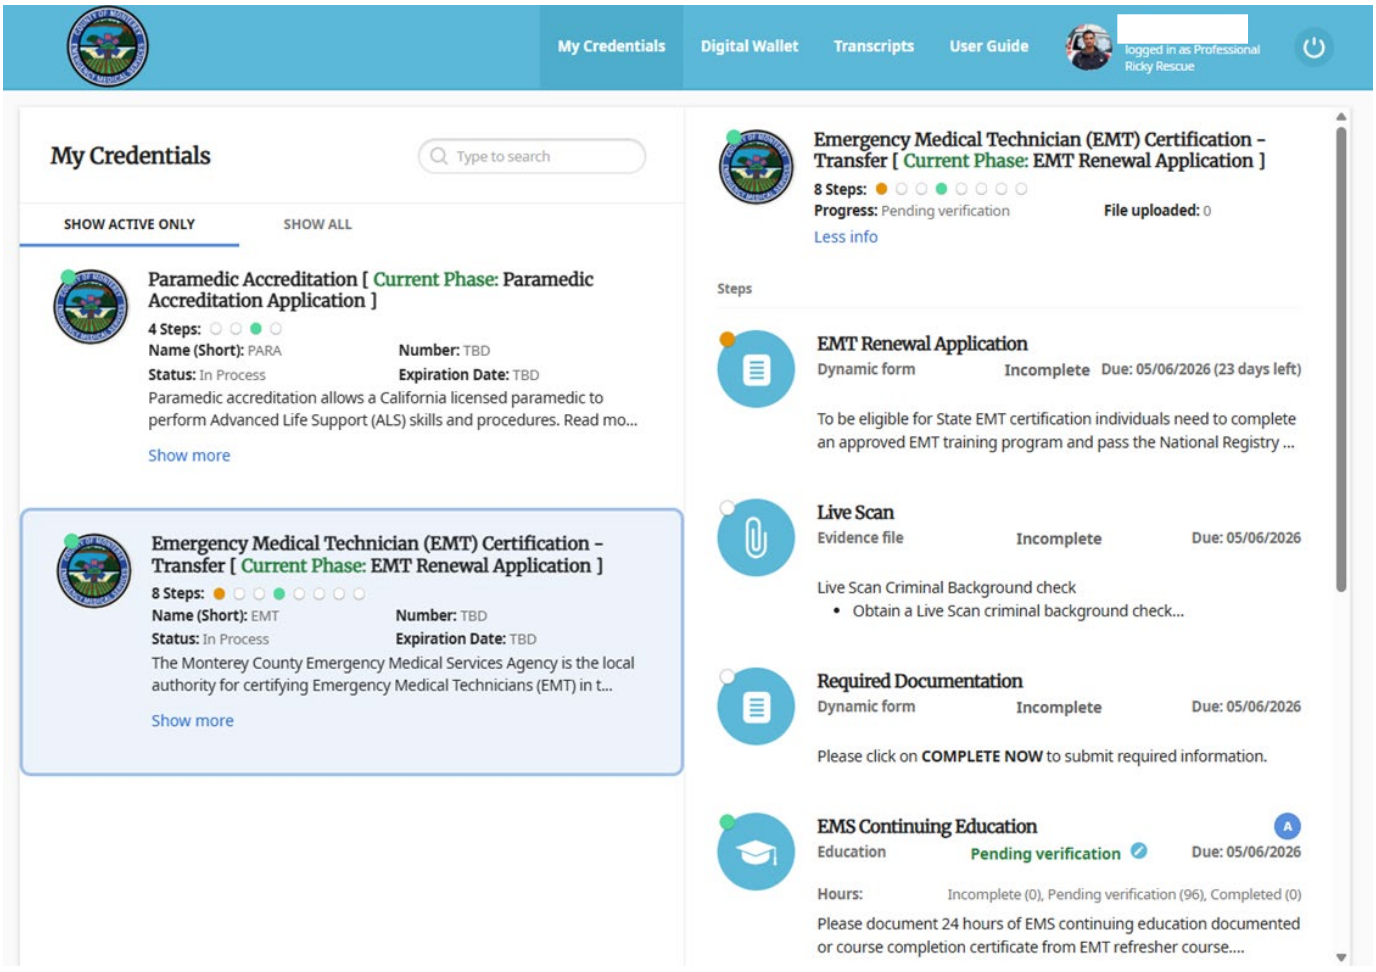
- **Community Care Resources** – Identified local service providers, support programs, and alternative care pathways that could be utilized by nurse navigators to connect callers with appropriate non-emergency options.
- **Clinical Determinants** – Reviewed clinical eligibility considerations and criteria that would guide the identification of low-acuity callers suitable for nurse navigation.

These collaborative working groups laid the foundation for program design and stakeholder alignment, positioning the 9-1-1 Nurse Navigation program for a smooth transition to the next phase of development.

The EMS Agency anticipates launching the Nurse Navigation Program during the second quarter of 2026.

EMT CERTIFICATION AND PARAMEDIC ACCREDITATION APPLICATION SOFTWARE

The EMS Agency spent a considerable amount of time planning for the adoption of an electronic system for receipt and processing of EMT certification and paramedic accreditation applications. The software system was intended to replace the EMS Agency's previous tracking and processing systems. The former system required our staff to manually scan and save multiple documents for each application as well as the use of multiple spreadsheets for application tracking and processing. After completing a review of the available systems and their various strengths and weaknesses, the EMS Agency established an agreement with Certemy to provide the system and software.



Work to move towards full implementation began with staff outlining the then current processes and requirements for application documents to be submitted and the steps taken to process each application. Certemy worked to translate this information into an electronic application process. The software allows applicants to enter their demographic data, upload important documents and continuing education certifications, and even to send documents to their employer for completion of verification steps. We also provided Certemy with our historical certification and accreditation records so that they could upload the data and create an account for each of our EMTs and Paramedics. Our staff then intensively reviewed the electronic processes and suggested modifications where needed. Additionally, we sought feedback from stakeholders and had several test-drive they system to provide input and suggestion for improvement prior to the go-live date.

After working with Certemy to fine-tune the software to be as user-friendly as possible, the EMS Agency is prepared to launch the system on February 1, 2026. We anticipate that the new software will not only be an easier tool for applicants, but also reduce the staff time needed to process each application.

STEMI SYSTEM OF CARE 15 YEAR ANNIVERSARY

2025 marked the 15th anniversary of the County of Monterey EMS ST-Elevation Myocardial Infarction (STEMI) system of care which launched in June 2010. The purpose of the STEMI system of care is to identify patients in need of prompt care for their heart attack emergency and to transport the patient to a hospital prepared to provide the care necessary for the patient's condition.

The main components of the STEMI system that have made it successful include:

- ✓ The EMS Agency established policies to direct the patient with STEMI to a designated hospital with the capability to promptly meet the patient's needs.
- ✓ EMS policies and education inform EMS personnel of which patient symptoms are suggestive of potential STEMI.
- ✓ The prehospital provision of 12-Lead ECG monitoring to identify the presence of STEMI.
- ✓ The EMS Agency designated Salinas Valley Health and Community Hospital of the Monterey Peninsula as the local STEMI receiving facilities that can provide for emergent cardiac catheterization and back-up cardio-thoracic surgery.
- ✓ Early notification to alert the STEMI receiving hospital of the arrival of a patient with STEMI.
- ✓ The STEMI receiving hospital provides for early activation of their on-call interventional cardiologist and cardiac catheterization lab team.
- ✓ The EMS Agency brings together system stakeholders to provide for the careful review of STEMI system data in a collaborative Quality Improvement model.

IMPLEMENTATION OF PARAMEDIC/ADVANCED LIFE SUPPORT SERVICE IN PACIFIC GROVE

In August 2024, the City Council of Pacific Grove adopted an amendment to their agreement with the City of Monterey and their Fire Department to permit the Monterey Fire Department to provide paramedic/advanced life support (ALS) services in Pacific Grove. Title 22 of the California Code of Regulations requires paramedic services providers to have a written agreement with their local EMS Agency to participate in the EMS system and ensure compliance with applicable state regulations and local policies and procedures.

EMS Agency policies address the requirements for a basic life support (BLS) first response EMS service provider to become a paramedic service provider. The policy requires a several step process that ensures that the new services are provided in a manner consistent with the established standards of the EMS system and that patients receive the highest quality care possible.

The application process requires documentation related to items such as: the medical/clinical need for paramedic services in the geographic service area, staffing to ensure adequate coverage on a continuous 24 hour per day basis, response time performance, financing of the services, and EMS call handling and dispatch of units. Applicants must submit a quality improvement program and plan and designate a liaison to address any related issues that might arise. They must also provide documentation of their commitment to EMS system participation and coordination with other providers.

Early in 2025, the EMS Agency brought an agreement with the City of Monterey to the Board of Supervisors. This agreement allowed for the provision of first response paramedic services in the City of Pacific Grove. The Board of Supervisors passed the agreement. Shortly thereafter EMS Agency staff conducted a final inspection of the personnel, equipment, and supplies needed to implement services. Monterey Fire successfully completed the inspection.

The provision of paramedic-level first response services begin in January 2025. The higher level of service provided by paramedics brings expanded training and additional assessment and treatment tools to those in Pacific Grove.

LOOKING AHEAD

On February 1, 2026, the County of Monterey EMS Agency initiated the operational period of the new ambulance service provider agreement with American Medical Response for the County's Exclusive Operating Area (EOA). This milestone marks a significant step forward in strengthening emergency medical services (EMS) delivery across the region.

Throughout 2026, the EMS Agency will focus on refining key components of the agreement, enhancing system performance, and implementing new tools and programs designed to improve patient care, operational efficiency, and transparency. We have outlined below some of the EMS Agency's primary priorities and planned initiatives for 2026.

1. Clinical Quality Scorecard Development

A central component of the new ambulance service provider agreement is the implementation of a Clinical Quality Scorecard. This tool evaluates the quality of patient care delivered once an ambulance arrives on scene and complements existing response time performance standards. Together, these measures will provide a more comprehensive and meaningful assessment of EMS system performance.

In 2026, the EMS Agency will:

- Improve data accuracy and reporting reliability.
- Establish baseline performance expectations
- Identify areas where performance may not meet established standards.
- Develop and implement targeted improvement plans.

As the system matures, the Agency will further analyze care delivery using an equity-focused approach, identifying potential disparities and opportunities to enhance equitable delivery of care across all populations served.

2. 9-1-1 Nurse Navigation Program Implementation

The EMS Agency will work to advance the 9-1-1 Nurse Navigation Program toward full implementation, with a target launch in the second quarter of 2026.

Key implementation priorities include:

- Finalizing operational workflows.
- Completing technical integration with dispatch systems.
- Refining clinical criteria for safe and appropriate call routing.
- Collaborating with system stakeholders to ensure readiness.
- Developing public education materials and outreach strategies.
- Updating relevant policies and procedures.

These efforts will ensure a coordinated rollout that supports patient access to the right level of care while improving overall system efficiency.

3. Implementation of Public-Facing Data Dashboards

To enhance transparency and accountability, the EMS Agency will work to develop and deploy public-facing data dashboards. These dashboards will provide stakeholders and community members with accessible insights into EMS system performance, including response and quality metrics.

4. Fee Schedule Development

The EMS Agency will work towards development of an updated fee schedule to support regulatory compliance and ensure sustainable funding for EMS system operations. This effort will align financial structures with the evolving needs of the system.

5. Improvement of Organizational Capacity and Staffing

To effectively implement these initiatives and meet our ongoing and evolving regulatory requirements, the EMS Agency will prioritize strengthening its organizational capacity. After operating with limited staffing for several years, the Agency plans to recruit and onboard additional personnel.

This change will:

- Allow the EMS Agency to fullfill its regulatory responsibilities and oversight requirements.
- Reduce workload strain on existing staff.
- Enhance overall operational effectiveness.
- Permit the EMS Agency to bring improvement and enhancements to the EMS system.

Expanding the team will be critical to sustaining progress and delivering high-quality service to the residents of and visitors to Monterey County.

Conclusion

The initiatives outlined above reflect the County of Monterey EMS Agency's commitment to advancing the quality, efficiency, and transparency of emergency medical services.
Through focused implementation of performance measurement tools, innovative care models, and enhanced accountability, the EMS Agency is well-positioned to continue improving patient outcomes and meeting the evolving needs of the community in 2026 and beyond.

CONCLUSION

We would like to thank the Board of Supervisors for the opportunity to present the 2025 EMS Agency Annual Report to highlight some of the work the team, along with our agency partners, achieved during 2025, bring attention to of the challenges our system faces today, and outline our goals for 2026. We are proud of what we have accomplished, grateful of the relationship with our partner agencies, and honored and committed to serving our community.

Receive a presentation on the County of Monterey Health Department Behavioral Health Bureau Community Assistance, Recovery, and Empowerment (CARE) Act Program.

RECOMMENDATION:
It is recommended that the County of Monterey Board of Supervisors:
Receive a presentation on the County of Monterey Health Department Behavioral Health Bureau Community Assistance, Recovery, and Empowerment (CARE) Act Program.

SUMMARY:
The Community Assistance, Recovery, and Empowerment (CARE) Act established a civil court-based framework designed to connect individuals living with untreated serious mental illness to coordinated behavioral health treatment, housing, and supportive services. Monterey County implemented the CARE Act on December 1, 2024. The purpose of this presentation is to provide the Board of Supervisors with an updated overview of CARE Act implementation in Monterey County to date, including changes made pursuant to Senate Bill 27 (SB27), program structure, implementation activities, data, trends, successes, challenges, and opportunities.

DISCUSSION:
The CARE Act establishes a civil court process intended to connect individuals living with untreated severe mental illness to community-based behavioral health treatment, supportive services, and housing resources. Under the CARE Act, designated individuals such as family members, behavioral health providers, first responders, and others identified in statute may petition the court to initiate the CARE process. The court may then facilitate either a voluntary CARE Agreement or a court-ordered CARE Plan tailored to the individual's identified needs.

CARE Agreements and CARE Plans may include behavioral health treatment, medication support, case management, supportive housing resources, and other community-based services intended to promote stabilization and recovery. The CARE Act is designed to serve as an upstream intervention strategy intended to reduce avoidable psychiatric hospitalizations, incarcerations, homelessness, and Lanterman-Petris-Short (LPS) Act conservatorships through earlier engagement, coordination, accountability, and support for individuals experiencing significant functional impairment due to severe mental illness.

Monterey County Behavioral Health (MCBH) continues to prioritize voluntary engagement and treatment in the least restrictive setting possible. CARE Court serves as one additional intervention tool within the broader continuum of behavioral health and justice-related services available to individuals

experiencing serious mental illness and co-occurring conditions.

Prior to implementation, a multidisciplinary CARE Court Planning Committee was convened led by the Monterey County Superior Court beginning in January 2024. The planning effort included representatives from Behavioral Health, County Counsel, the Public Defender's Office, District Attorney's Office, Public Guardian/ Administrator/ Conservator, the Court Self-Help Center, healthcare providers, and other justice and community partners. Monterey County also conducted stakeholder outreach and participated in statewide CARE Act trainings, workgroups, and implementation convenings in preparation for program launch.

Effective January 1, 2026, Senate Bill 27 enacted several amendments to the CARE Act intended to clarify eligibility criteria and streamline implementation. These amendments expanded CARE Act eligibility to include individuals diagnosed with Bipolar I Disorder with psychotic features, excluding psychosis related solely to substance intoxication; defined "clinically stabilized in ongoing voluntary treatment" within statute; allowed certain court referrals to serve as CARE petitions; authorized nurse practitioners and physician assistants to complete affidavits supporting CARE petitions; and permitted criminal courts to consider CARE referrals earlier in cases involving individuals found incompetent to stand trial.

Since implementation of the CARE Act on December 1, 2024, a total of 44 petitions have been filed through April 30, 2026, including 24 petitions filed during calendar year 2025 and 18 petitions filed during the first four months of 2026. To date, the CARE process has resulted in 18 CARE Agreements and four court-ordered CARE Plans, with additional cases currently in progress toward agreement or plan development. CARE petition activity has continued to increase since implementation, and the County is currently on track to exceed the total 2025 petition activity by year-end.

Implementation successes include increased collaboration among Behavioral Health, the Superior Court, Public Guardian/Conservator, healthcare providers, and justice partners; improved coordination for individuals transitioning from custody to treatment and housing; and increased opportunities for family engagement and voluntary treatment participation. CARE participants experiencing homelessness have also been connected to supportive housing placements, including Hope Housing Marina, board-and-care facilities, transitional housing, and Interim Inc. programs.

Implementation challenges continue to include extensive data reporting requirements, limited placement options for certain high-acuity populations, significant legal and administrative coordination requirements, and the reality that CARE is a resource intensive program in terms of staffing associated with the provision of direct client care and the court-related requirements. .

On May 7, 2026, Monterey County Behavioral Health hosted a number of State representatives and local partners for a CARE Act site visit. The visit occurred at the initiation of California Health and Human Services (CALHHS) Agency following increased statewide attention and accountability efforts related to CARE Act implementation and county performance following Governor Newsom's March 2, 2026, press conference where he named Monterey as one of 10 underperforming counties as CARE Improvement and Coordination Unit (ICU) counties, along with Los Angeles, Orange, San

Francisco, Santa Clara, San Bernardino, Kern, Riverside, Yolo and Fresno based only on a single data point, the number of per capita CARE petitions filed in calendar year 2025. The site visit was an opportunity for MCBH and our partners to provide a comprehensive overview of Monterey County's CARE Act implementation efforts, program data that demonstrates Monterey is not "underperforming", operational processes and broader continuum of behavioral health, housing, conservatorship, and supportive services available to this population at the local level.

The delegation also toured the County's Behavioral Health Bridge Housing (BHBH) grant-funded Hope Housing Marina program, where they heard firsthand from individuals sharing their lived experience regarding housing stability, treatment engagement, sense of community, recovery, and coordinated support services. Site visit participants engaged in discussions regarding implementation successes, operational challenges, legal and policy considerations, and potential opportunities for targeted technical assistance and enhanced statewide collaboration related to CARE reimbursement maximization, cost-saving strategies, coordination with Department of State Hospitals (DSH), and strengthening collaboration between Behavioral Health and Public Guardian/Public Administrator/Conservator programs across counties.

This presentation supports the County of Monterey Health Department 2025-2028 Strategic Plan Goal 2: Provide Exceptional Person-Centered Care through Accessible, Community-Focused Health Services. It also supports the following of the ten essential public health services, specifically: 7. Link people to needed personal health services and assure the provision of health care when otherwise unavailable.

OTHER AGENCY INVOLVEMENT/COMMITTEE ACTIONS:
The Monterey County Superior Court, County of Monterey County Counsel, Public Defender's Office, District Attorney's Office, Public Guardian/Administrator/Conservator, local hospitals, law enforcement / first responder agencies, and community-based organizations have collaborated with Monterey County Behavioral Health in CARE Act implementation planning and ongoing operations.

FINANCING:
Assembly Bill 179 provided statewide funding for CARE Act implementation, including startup funding allocated to County of Monterey in the amount of $328,604 to support implementation activities. The Governor's Budget also includes ongoing statewide General Fund support for CARE Act operations, including court hearings, outreach and engagement, reporting, and data collection activities. To date, MCBH has received $38,031 in reimbursement for eligible CARE-related activities in FY 2024-25 and has billed an additional $333,423 through the third quarter of FY 2025-26. CARE Act implementation continues to require significant staff and operational resources associated with court coordination, case management, outreach and engagement, reporting requirements, and legal and administrative support activities.

BOARD OF SUPERVISORS STRATEGIC PLAN GOALS:
The recommended action supports the Board of Supervisors' Strategic Plan Goals of Well-Being and Quality of Life and Safe and Resilient Communities by enhancing access to behavioral health services for individuals with untreated serious mental illness. The CARE Act promotes early intervention, coordinated care, and system accountability, contributing to improved individual outcomes and

community stability.

CARE Act

Community Assistance, Recovery, and Empowerment Act

Senate Bill 27 Amendments

The Community Assistance, Recovery, and Empowerment (CARE) Act provides community-based behavioral health (BH) services and supports through a civil court process for individuals who are experiencing a serious mental disorder and who meet other eligibility requirements. The CARE Act allows specified adults to petition the court to engage respondents in a broad range of treatment services and supports through a CARE agreement or CARE plan.

Senate Bill (SB) 27 amends provisions of the CARE Act in a number of ways:

- Adds bipolar I disorder with psychotic features as an eligible diagnosis.
- Defines "clinically stabilized in ongoing voluntary treatment."
- Provides a process by which certain court referrals can constitute a CARE petition without a separate petition form being filed.
- Allows criminal courts to consider CARE referrals earlier for individuals found incompetent to stand trial (IST) in misdemeanor cases.
- Allows nurse practitioners and physician assistants to complete an affidavit in support of a CARE petition.
- Makes other technical amendments to the CARE process.

Below is a more detailed summary of SB 27's provisions. These provisions will be effective January 1, 2026.

Eligibility Criteria Changes

Adds bipolar I disorder with psychotic features as an eligible diagnosis. Previously, eligible diagnoses were limited to schizophrenia spectrum and other psychotic disorders. SB 27 adds bipolar I disorder with psychotic features, except psychosis related to current intoxication.

Defines "clinically stabilized in ongoing voluntary treatment." The CARE process is designed to support individuals with serious mental illness who are *not* currently stabilized in ongoing voluntary treatment. As defined in SB 27, an individual is considered clinically stabilized in ongoing voluntary treatment if *both* of the following conditions are met:

- **Stable condition.** The individual's condition is stable and not deteriorating.
- **Active participation in treatment.** The individual is currently engaged in treatment and is managing symptoms through medication or therapeutic interventions. Importantly, enrollment in treatment alone is not enough.

DHCS
CALIFORNIA DEPARTMENT OF HEALTH CARE SERVICES

Overview of Senate Bill (SB) 27

Beginning **January 1, 2026**, changes made by **Senate Bill 27** went into effect, including:

- Addition of bipolar I with psychotic features, except psychosis related to intoxication, as an eligible diagnosis.
- Definition of clinically stabilized in ongoing voluntary treatment.
- A process for certain court referrals to serve as a CARE petition.
- Ability of criminal courts to consider CARE referrals earlier for individuals found incompetent to stand trial in misdemeanor cases.
- Authority for nurse practitioners and physician assistants to complete affidavits in support of petitions.
- Other technical amendments to streamline the CARE process.

Find more information about these changes in the Senate Bill 27 Amendments brief on the CARE Act Resource Center or email us at **info@CARE-Act.org**.

Addition of Bipolar 1 Disorder

- SB 27 added bipolar I disorder with psychotic features, except psychosis related to current intoxication, as an eligible diagnosis for CARE eligibility.

See the updated Eligibility Fact Sheet that includes bipolar 1 with psychotic features and the FAQ on eligible diagnosis. For more information on bipolar I, see the Understanding Bipolar I w Psychotic Symptoms brief.

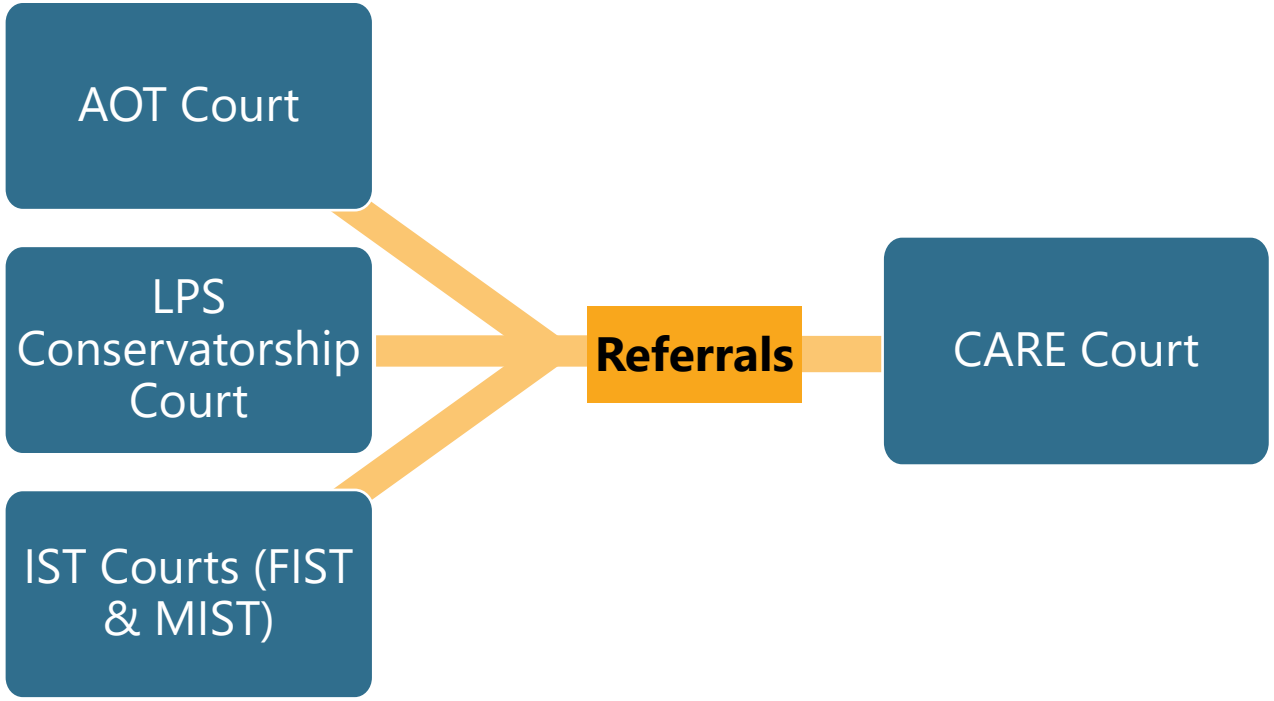
Clinically Stabilized

To be eligible for CARE, an individual cannot be clinically stabilized in ongoing voluntary treatment.

As defined by SB 27, an individual is considered clinically stabilized in ongoing voluntary treatment if *both* of the following conditions are met:

- ✓ **Stable condition.** The individual's condition is stable and not deteriorating.
- ✓ **Active participation in treatment.** The individual is currently engaged in treatment *and* is managing symptoms through medication or therapeutic interventions.

Streamlined Court Referrals

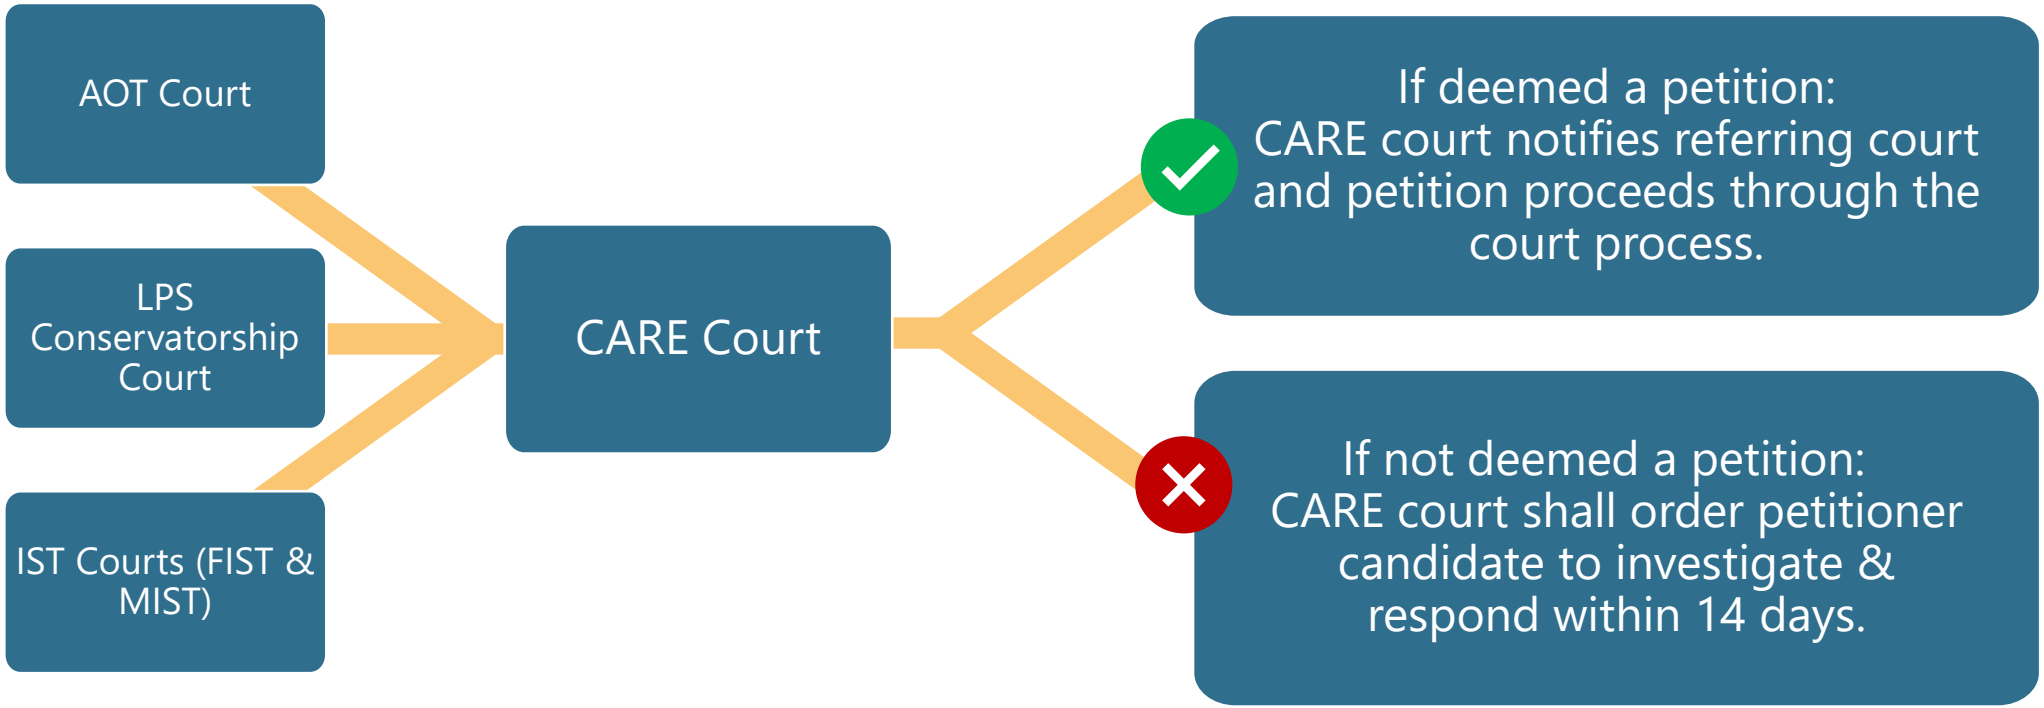


A CARE court may consider a referral to be a petition if:

- It includes all required information (e.g., facts that support CARE eligibility), **and**
- The referral makes a prima facie showing that the individual meets or may meet CARE eligibility criteria.

AOT – Assisted Outpatient Treatment
LPS – Lanterman-Petris-Short
FIST / MIST – felony and misdemeanor Incompetent to Stand Trial (IST)

Streamlined Court Referrals



- AOT, MIST, FIST → County behavioral health director/designee.
- LPS conservatorship → Conservator or proposed conservator.

AOT – Assisted Outpatient Treatment
LPS – Lanterman-Petris-Short
FIST / MIST – felony and misdemeanor Incompetent to Stand Trial (IST)

County BH and jail medical providers can share confidential medical records and other relevant information associated with a referral with the court to determine eligibility.

Earlier Referrals from MIST Courts

SB 27 allows a MIST court to consider an individual's CARE eligibility at a hearing held after the initial determination of incompetency.

The following process applies:

- CARE court holds a hearing to determine eligibility within 30 court days of the referral.
  - If the hearing is not held within the 30 court days, an individual in county jail shall be released pending the hearing.
- If the individual is accepted into CARE, the CARE court shall notify the criminal court and the charges shall be dismissed 6 months after the referral, unless the case is referred back to the criminal court prior.

A MIST court retains the ability to make a CARE referral if an individual is ineligible for or unsuccessful in diversion.

Referrals from FIST Cases

- While FIST referrals to CARE have always been provided for in the Penal Code, SB 27 specifically includes a FIST referral pathway in the CARE statute.
- SB 27 allows for FIST and CARE courts to communicate regarding the status of a respondent's case and any relevant court orders while the cases are pending in both courts.

CARE Process Clarifications

- ✓ Allows nurse practitioners and physician assistants to sign affidavits in support of petitions.
- ✓ Confirms that courts may make a prima facie determination without a hearing.
- ✓ Confirms courts may hold multiple progress hearings throughout the duration of a CARE agreement.
- ✓ Clarifies the court's role in graduations and voluntary reappointments.
- ✓ Clarifies that the county, not respondent, must provide notice of case management hearings to tribes.

Key Takeaways

- 2026 is already the 2nd busiest year— with 18 cases in just 4 months, it's on pace to surpass 2025 by year-end.
- Rapid program growth: filings increased 12× from 2024 to 2025 (2 → 24 cases), and 2026 continues that trajectory.
- CARE Agreements remain the top successful outcome
- Prima facie dismissals are the most common non-agreement closure (7 total across 2025–2026).
- We currently have the largest active docket the program has seen.

Source: Monterey County Superior Court | Data through April 2026

- Increased collaboration with PG/PA/PC
- Support for mentally ill individuals transitioning from jail to treatment and housing (e.g., reducing repeated parole violations for technical issues like ankle monitor charging).
- Assist families in creating stable housing and improving family harmony for both the individual and their loved ones.
- Help individuals transitioning off conservatorship remain stable and demonstrate voluntary adherence to treatment.
- The CARE process involves repeated engagement with Behavioral Health providers, which often helps even resistant individuals become more open to treatment over time.

- Extensive Data Collection
- No Placement for P.C. 290 Registrants
- Legal process tasks (preparing and serving legal documents, arranging transportation to court, etc…) is time consuming and reduces the amount of time that can be spent on treatment specific services.
- Resource intensive program in terms of staffing

- Assembly Bill 179 provided a statewide appropriation of $57 million for CARE Act implementation, with $31 million reserved for Cohort 2 counties and allocated proportionally by population.
- In November 2022, Monterey County received **$328,604** from the State for CARE Act startup and implementation costs
  - *Funding to support efforts of Behavioral Health, County Counsel, and Public Defender*
  - *The Court received separate funding for their start up costs*
- The Governor's Budget allocates roughly $31.9 million in General Fund resources for FY 2025-26 and $47.4 million for FY 2026-27 to support statewide ongoing court hearings, court reports, outreach and engagement, and data reporting costs.
  - *This funding supports time spent on Court Reports, Court Hearings, Notices, Outreach and Engagement, and Data Reporting activities.*
  - *To date, MCBH has received **$38,031** for these categories.*
  - *MCBH has billed but not yet received and additional **$333,423** (through Q3 for FY 25/26)*

Challenges

- This is the first BHBH program in the County of Monterey
- This is the first project MCBH and HACM have partnered on in this way
- Effective, efficient communication between all key partners (MCBH, HACM, SSC, Interim)
- Housing and Behavioral Health programs, language, etc. is very different so there has been a learning curve for everyone
- Sustainability once grant funding runs out (April 2027) and Housing Authority deed restriction ends (June 2027)
- CARE Court participants receive priority for placement in BHBH programs however we do not have any CARE participants at Hope Housing as they have needed higher levels of care

In closing

- Healthy discussion with the representatives from the state
- Opportunity to put CARE into context
  - Provide bigger picture of how CARE fits into the array of programs and services available for this population here at the local level
  - Share larger data set that shows Monterey is not *“underperforming”*
- Opportunity to highlight success of the Hope Housing Marina
  - Delegation heard impact stories directly from clients
- Opportunity for targeted technical assistance
  - Fiscal - maximizing billing & reimbursement from the state for CARE, any opportunities to bring more dollars to the county for this work, or cost savings strategies
  - Connect to other counties to explore how their PG/PA/PC and BH are collaborating on T-Cons and CARE
  - Improve / streamline the communication and coordination with DSH re CARE

COUNTY RESPONSE

REPORT TITLE: 2025-2026 Monterey County Civil Grand Jury Report – Emergency Radio Coverage Gaps Impacting Monterey County Fire Agencies
RESPONSE BY: County of Monterey Board of Supervisors
UPATES TO: FINDINGS: F1, F2 and F3 and RECOMMENDATIONS: R1, R2 and R3

Finding (F1): Approximately 42% of Monterey County's geographic area lacks reliable digital radio coverage, and 18% lacks usable analog coverage, resulting in areas where first responders cannot reliably communicate during emergencies.

Response to F1:

The Board partially disagrees with the findings and provides the following clarifications regarding the scope, responsibilities, and coverage metrics of the NGEN radio system.

1. Clarification of NGEN System Coverage Scope and Responsibilities

The cited countywide geographic area exceeds the scope of the NGEN agreement and the jurisdictional boundaries of participating member agencies and therefore does not accurately reflect the system's coverage responsibilities. The NGEN system is designed to provide radio coverage for participating member agencies within their respective jurisdictions and operational service areas and is not intended to provide coverage for the entirety of Monterey County.

The NGEN agreement includes the following participating member agencies:

- Big Sur Volunteer Fire Brigade
- City of Carmel-by-the-Sea
- City of Del Rey Oaks
- City of Gonzales
- City of Greenfield
- City of King
- City of Marina
- City of Monterey
- City of Pacific Grove
- City of Salinas
- City of Sand City
- City of Seaside
- City of Soledad
- California State University Monterey Bay
- Mid-coast Volunteer Fire Brigade
- Monterey Peninsula Airport District
- Monterey County Regional Fire District
- North County Fire Protection District
- County of Monterey.

2. Clarification of NGEN Radio Coverage Percentages

The NGEN digital project, initiated in 2009, includes only portions of participating member agency jurisdictions due to funding constraints. The project boundary is shown in Figure 1. The NGEN analog system is designed to provide supplemental coverage in areas where digital coverage is limited, particularly in rural and unincorporated areas of Monterey County. Overall system performance should be evaluated based on the combined radio coverage provided by both the digital and analog radio systems.

Based on the defined NGEN scope, the Monterey County Information Technology Department (ITD) conducted a radio frequency (RF) engineering analysis and determined the following:

- Sixteen of the nineteen participating agencies, including five of the seven unincorporated fire districts, exceed 95% mobile coverage for combined digital and analog radio coverage within their respective jurisdictions.
- Overall jurisdictional mobile radio coverage across participating agencies is approximately 83.69% combined digital and analog coverage, representing approximately 99.80% population coverage.
- Fifteen of the nineteen participating agencies, including three of the seven unincorporated fire districts, exceed 95% portable coverage for combined digital and analog radio coverage within their respective jurisdictions.
- Overall jurisdictional portable radio coverage across participating agencies is approximately 68.03% combined digital and analog coverage, representing approximately 98.24% population coverage.

Coverage deficiencies are primarily concentrated within the Big Sur fire districts and portions of the County's unincorporated areas, where terrain and infrastructure limitations significantly impact radio propagation.

See Table A-1, "NGEN Member Agency Mobile Radio Coverage", Table A-2, "NGEN Member Agency Portal Radio Coverage", Table B-1, "NGEN Unincorporated Fire Districts Mobile Radio Coverage", and Table B-2, "NGEN Unincorporated Fire Districts Portable Radio Coverage".

3. Clarification of Fire District Coverage, Radio and Dispatch Responsibility

The report's discussion of Table 1, Appendix B, and the referenced LAFCO study may be interpreted as implying that the NGEN radio system and Emergency Communications Department (ECD) dispatch services support all fire districts serving unincorporated Monterey County. This interpretation is not accurate.

Appendix B identifies fourteen fire districts serving unincorporated Monterey County. Of those, seven operate on the NGEN radio system and receive dispatch services from ECD pursuant to the Agreement for 9-1-1 Emergency Communications Services and Governance, while the remaining seven operate on the CalFire radio system with CalFire dispatch services.

See Table C, "Fire Districts Covering Unincorporated Areas of Monterey County," which identifies fire districts served by the NGEN system versus those operating under CalFire.

4. Clarification of Emergency Communications Department Dispatch Services Scope

The statement on page 6 that the County Consolidated Dispatch Center (9-1-1) serves as a single communications center for all cities and unincorporated areas is not accurate.

Emergency Communications Department dispatch services are provided pursuant to the Agreement for 9-1-1 Emergency Communications Services and Governance. ECD provides 9-1-1 call answering, dispatching, and related emergency communications services to agencies that are parties to that agreement. ECD does not serve as the dispatch center for all public safety agencies, cities, fire districts, or unincorporated areas within Monterey County.

5. Coverage Calculation Methodology

The coverage calculation methodology used the Raptor RF propagation modeling platform, an industry-standard tool in public safety communications engineering. This allowed County staff and stakeholders to visualize and analyze where radio signals are expected to provide reliable coverage within the jurisdictional boundaries of NGEN member agencies using Geographic Information System (GIS) data. Accurate coverage modeling is critical to identifying potential communication gaps and supports informed decisions regarding future radio system improvements.

Percent coverage was calculated by dividing the modeled coverage acreage by jurisdiction acreage. Population coverage was estimated using Esri's Enrich tool, based on 2025 population estimates (436,491), and calculated as population within the modeled coverage area divided by jurisdiction population.

Recommendation (R1): The Monterey County Board of Supervisors (BOS) direct NGEN Executive Committee, in coordination with County ITD, to develop and submit a countywide implementation plan identifying the specific equipment upgrades, infrastructure needs, estimated costs, and timelines required to reduce or eliminate identified emergency communication dead zones by December 31, 2026.

Response to R1:

The Board agrees with the recommendation. The recommendation is currently being evaluated for implementation in accordance with operational needs and fiscal requirements. An implementation plan will be submitted to the NGEN boards for approval by December 31, 2026.

1. Known NGEN Coverage Deficiencies

1.1 Countywide In-Building Coverage Deficiencies

The primary in-building coverage concerns are associated with NGEN digital radio coverage. In-building coverage was not included in the original NGEN project scope or coverage guarantees, except for within the specific City of Salinas boundary and the specific Monterey Peninsula boundary. NGEN member agencies in coordination with ITD have been addressing identified in-building coverage issues using agency funding.

1.2 Outdoor Coverage Deficiencies

The following areas have been identified as having NGEN digital coverage deficiencies:

- Big Sur area
- Portions of County unincorporated areas
  - Bitterwater and Highway 25 Corridor
  - Bryson
  - Carmel Valley Village
  - Greenfield Green Bridge area
  - King City
  - Pajaro
  - Prunedale
  - San Ardo Oil Field
  - San Benancio
- North Salinas includes Bolsa Knolls.

2. Ongoing Coverage Improvement Efforts

Improving NGEN digital radio coverage remains a priority for the NGEN Boards and ITD. ITD continues to work collaboratively with participating public safety agencies and the NGEN Boards to improve radio coverage, reliability, and interoperability throughout the NGEN service area.

In 2020, the Monterey County Sheriff's Office, in coordination with ITD and with Board approval, began replacing legacy radios with Motorola APX NEXT radios to support future Long-Term Evolution (LTE) integration capabilities and improve operational flexibility. LTE is a wireless broadband communications standard that enables high-speed data transmission for mobile

devices and data terminals. The project represented an approximately $2.5 million investment for 350 radios.

The Monterey County Sheriff's Office and ITD also evaluated implementation of Motorola SmartConnect technology, which integrates traditional land mobile radio (LMR) systems with LTE broadband networks. However, implementation was not pursued due to funding limitations.

Beginning in 2023, ITD initiated discussions with the NGEN Boards regarding implementation of Motorola SmartConnect technology. Preliminary analysis indicates the technology could significantly improve portable and in-building radio coverage in areas where traditional radio coverage is limited.

In February 2024, ITD worked collaboratively with the NGEN Boards, established a NGEN capital fee schedule and developed a five-year capital improvement plan to support long-term system sustainability and future coverage enhancement projects.

In June 2024, a new NGEN radio site at Glen Devon serving the Mid-coast Volunteer Fire Brigade was added to the NGEN analog system, utilizing Starlink for backhaul connectivity.

In November 2025, a new NGEN radio site at Carmel Lobos Ridge was added to both the NGEN digital and analog systems through a Homeland Security grant secured by the Carmel Police Department. The site improved radio coverage in the Carmel Highlands area.

The Greenfield NGEN site project, funded through a grant received by the City of Greenfield, is currently under development and is expected to improve radio coverage in the South County area upon completion in 2027.

3. Planned Coverage Improvement Actions

ITD has completed a survey of all NGEN member agencies regarding identified coverage deficiency areas. ITD will develop and submit an implementation plan identifying equipment upgrades, infrastructure needs, estimated costs, and implementation timelines necessary to reduce or mitigate identified emergency communication dead zones.

ITD will present coverage improvement options to the NGEN Boards, including traditional land mobile radio (LMR) expansion approaches, such as construction of additional radio sites in underserved areas, as well as LTE-integrated solutions.

Upon completion of project analysis and cost estimates, recommendations will be presented to the NGEN Boards for consideration and approval. At that time, the NGEN Boards will determine funding appropriations and follow the appropriate budget and procurement processes necessary to implement approved projects.

ITD will continue coordinating with participating agencies to evaluate operational needs, radio lifecycle replacement planning, funding impacts, and long-term interoperability objectives as the County continues modernization of the NGEN system.

Finding (F2): Some fire districts reported limited financial capacity to purchase and maintain radios capable of operating across all communication modes supported by the County's emergency communication infrastructure, which compromises their ability to coordinate services with other agencies.

Response to F2:

The Board agrees with the findings.

Recommendation (R2): The BOS direct the ITD to develop a feasibility analysis identifying available funding options to support fire district radio equipment upgrades and emergency communication infrastructure in unincorporated areas by March 31, 2027.

Response to R2:

The Board partially disagrees with the recommendation. The recommendation requires further analysis regarding governance responsibilities, operational impacts, and funding considerations under the NGEN Agreement. The NGEN Executive Board, in coordination with County ITD, will evaluate the recommendation and may develop a feasibility analysis to identify potential funding options for fire district radio equipment upgrades and emergency communications infrastructure improvements within unincorporated areas. This analysis will be completed by March 31, 2027.

Under the NGEN Agreement, the NGEN Executive Board and Operations Board, in coordination with County ITD, are responsible for reviewing and recommending matters affecting the cost, scope, operational requirements, and capital improvements of the NGEN public safety radio system.

ITD operates, maintains, and manages the shared NGEN infrastructure system, including telecommunications sites, transmission systems, and related infrastructure supporting NGEN public safety communications services, and supports the NGEN Boards in developing operational procedures for participating agencies.

Radio equipment used by participating agencies, including portable radios, mobile radios, dispatch consoles, network management terminals, and encryption key management equipment (“subscriber equipment”), is the responsibility of each agency, including procurement, operation, maintenance, and lifecycle management under ITD system standards.

Finding (F3): Emergency responders in Monterey County must operate across multiple radio technologies and manually adjust communication modes depending on location, increasing operational complexity and the potential for communication delays during emergencies.

Response to F3: The Board partially agrees with the finding. The existing system requires manual switching between digital and analog modes in certain areas where digital coverage may be limited until the NGEN analog system is fully replaced by the NGEN digital system. Full transition to a radio device that can automatically switch is limited by currently available technology.

To support continuity of communication, each digital channel and its corresponding analog channel are linked and interoperable, allowing users on either system to communicate with one another.

NGEN users operating on the digital system roam automatically between digital radio sites. Users operating on the analog system may also automatically roam between analog sites and select the strongest available frequency when radios are equipped with vote-scan functionality. Otherwise, users manually select the frequency or repeater channel that provides the best operational coverage for the area.

Recommendation (R3): The BOS directs the ITD to develop a framework to assist fire districts with limited financial capacity to obtain radios compatible with the County's emergency communication system by March 31, 2027.

Response to R3: The Board partially disagrees with the recommendation. The recommendation requires further analysis regarding governance responsibilities, operational impacts, and funding considerations under the NGEN Agreement. This analysis will be completed by March 31, 2027.

Under the NGEN Agreement, the NGEN Executive Board and Operations Board, in coordination with County ITD, are responsible for reviewing and recommending matters affecting the cost, scope, operational requirements, and capital improvements associated with the NGEN public safety radio system.

ITD is responsible for operating, maintaining, and managing the shared NGEN infrastructure system, including telecommunications sites, transmission systems, and related infrastructure supporting NGEN public safety communications services. ITD coordinates, administers, and maintains systems defined by the NGEN Boards for the benefit of member agencies, including the development of standard operating procedures.

Equipment used exclusively by individual member agencies, including portable radios, mobile radios, dispatch consoles, terminals, broadband push-to-talk devices, and encryption key management equipment (“subscriber equipment”), remains the responsibility of each participating agency. Each agency is responsible for the procurement, operation, maintenance, and lifecycle replacement of its subscriber equipment in compliance with ITD system standards and specifications.

ITD has initiated a radio standardization effort and will continue working collaboratively with participating agencies, including fire districts, and the NGEN Boards to develop subscriber equipment standards compatible with the County’s emergency communications system.

SUMMARY

Challenging terrain, funding limitations, and delayed adoption of new technology have led to inadequate and inconsistent radio communications for the fire districts serving unincorporated areas of Monterey County. As a result, residents and emergency responders face the risk of experiencing communication failures during life-saving and property-protecting emergencies.

Emergency communication systems are supported by the Monterey County Information and Technology Department (ITD). The ITD's Next Generation Radio Network (NGEN) initiative has begun testing new technology solutions but lacks sufficient funding to fully implement them.

The rugged terrain in Monterey County creates radio communication dead zones (areas with no coverage) and zones with weak or limited coverage. However, advancements in cell phone technology, low-orbit satellites, and modern multifunctional (analog, digital, LTE, and Wi-Fi) durable radios have the potential to eliminate these communication gaps.

Implementation of these solutions will be challenging for local fire districts. The County Fire Districts' primary source of funding is their allocation of the property taxes collected under State Assembly Bill 8. These revenues were severely affected by Proposition 13, passed in 1978, which limited property tax reassessments primarily to the time of property sales. The County has not identified a dedicated funding mechanism specifically for radio modernization in unincorporated fire districts.

The Civil Grand Jury (CGJ) recommends that the Monterey County Board of Supervisors (BOS) take the necessary actions to fund and implement the communication upgrades required to eliminate the emergency radio communication "dead zones" in Monterey County. This includes ensuring that all fire districts have radios compatible with the County's emergency communication system.

BACKGROUND

The Civil Grand Jury (CGJ) has an longstanding interest in fire safety and radio communication. In reviewing the issue, the CGJ found that it had been addressed in prior Civil Grand Jury reports as well as in the 2020 Local Agency Formation Commission (LAFCO) study: "Special Districts Providing Fire Protection and Emergency Medical Services in Unincorporated Monterey County." This report focuses on several key findings from those earlier efforts.

The Origins of Fire Districts

The earliest records of fire outbreaks in Monterey County date back to the 1870s, when settlers began populating the area. Initially, residents were primarily responsible for fighting fires. However, in 1934, a local agricultural advocacy group requested the establishment of fire protection services to protect local farms. Since then, there has been a history of fire district creation, mergers, and separations, resulting in the current system of 11 fire districts covering unincorporated Monterey County and the Monterey Regional Airport. See Table 1 for a list of these districts. While most municipalities have their own fire departments, two volunteer-based fire districts, Mid-Coast and Big Sur Brigades, have also been established. Additionally, portions of Monterey County receive fire suppression services from federal and state agencies. In total, 18 fire suppression agencies provide services to 31 areas or communities throughout the County. All agencies participate in mutual aid agreements. For a comprehensive list, see Appendix A.

The Local Agency Formation Commission (LAFCO) is an agency that coordinates logical and timely changes to local government boundaries, including annexations and detachments of territory, the incorporation of cities, and the formation, consolidation, merger, or dissolution of special districts. LAFCO currently has influence over 11 of the unincorporated fire districts.

Fire protection services in unincorporated Monterey County are provided by multiple independent special districts. Each district has its own governance authority and funding allocation, which complicates countywide planning and contributes to uneven adoption of radio communication technology. These unincorporated districts, listed in Table 1, cover approximately 958,000 acres, or 45.6%, of the County's total 2.4 million acres. The remaining approximately 1.4 million acres are covered by municipal fire departments, the California Department of Forestry and Fire Protection (CalFire), and the Federal Government, including the former Fort Ord, Fort Hunter Liggett, Los Padres National Forest, and Ventana Wilderness Area. See Figure 1 for coverage by each fire district.

On June 22, 2020, LAFCO of Monterey County released a study titled "Special Districts Providing Fire Protection and Emergency Medical Services in Unincorporated Monterey County." In this study, LAFCO identified 20 key findings across 14 fire districts and brigades (Appendix B). The CGJ focused on two of these findings, as worded in the LAFCO report:

1. *Public Safety radio infrastructure costs have become overwhelming due, in part, to the advent of digital radios. Radio equipment life expectancy has been reduced, and coverage diminished due to the limited range of digital radios (compared to analog radios). The costs have risen sharply (LAFCO Finding #19).*

2. *Agencies have struggled with financial sustainability largely because of a funding model based primarily on property tax, which has proven inadequate to support operations (LAFCO Finding #6).*

Emergency Communication Oversight: Next Generation Radio Network (NGEN)

Monterey County's Information Technology Department (ITD) supports the radio equipment necessary for successful emergency communication between all cities and unincorporated areas of Monterey County. In collaboration with County-wide contributors, the ITD also developed the NGEN (Next Generation Radio Network)

strategic plan, which outlines a proposed path to maintain and improve emergency communication. A Consolidated Dispatch Center, 9-1-1, serves as a single communications center for the County's cities and unincorporated areas. This dispatch center, developed in the late 1970's and located in Salinas, was recognized as the first wide area consolidated 9-1-1 system in the nation.

Types of Radio Communication and Promising Technologies

There are several different types of communication devices:

1. Analog radios are a simple, more affordable, and traditional way of transmitting audio signals that work well in mountainous areas but are more prone to static.

2. Digital radios are the newer counterpart to analog radio. using a digital format to transmit audio signals. They offer a wider range of channels and provide clearer communication, but are limited to line-of-sight situations or to areas with repeater towers.

3. Cellular radios work like cell phone technology and rely on satellites such as Starlink. This is a newer and more expensive technology.

A mix of digital and analog radio devices is currently used by all fire districts, departments, and agencies in Monterey County. Wireless radio devices are currently being tested but are not available to all fire districts.

Cell Towers and Repeaters

A network of towers located in strategic points throughout the County supports digital radio communications for both fire and police agencies. These towers occupy high points and are designed to receive and retransmit line-of-sight communications across the County, including microwave and digital signals. The installation of towers and repeaters is very costly, as repeaters are typically situated on peaks with no road access amid steep terrain. Figure 2 shows how repeater towers function.

Figure 2: Repeater towers are required at high elevations for digital communication to be effective in highly varied terrain

Wireless Transmission: LTE and Wi-Fi

With the recent advances in technology, the most promising radio communication methods currently available use wireless data transmission for fast mobile internet, known as LTE (Long-Term Evolution), in conjunction with Wi-Fi. This combination allows certain portable radios to connect to cellular data for voice communication. Notably, this technology is faster than standard digital communications and uses low-orbit satellites, such as Starlink, thereby reducing or eliminating the need for additional cell towers. Figure 3 shows how radio communication operates with LTE and Wi-Fi in diverse terrains. Specific radios are required to support LTE and Wi-Fi, while maintaining compatibility with analog and digital. Additionally, there is a monthly fee associated with using LTE and Wi-Fi services.

Topography

Monterey County's vast size and rugged topography pose significant challenges to public safety communication systems. With a population of roughly 425,000, the County spans more than two million acres of scenic central coastal lands, ranging from sea level to over 5,800 feet in elevation (see Figure 4). Approximately 185,000 acres of the County are designated military lands, and approximately 470,000 acres are in the Los Padres National Forest and Ventana Wilderness Area. This highlights the importance of communication not only among County fire agencies but also with the Federal and State fire agencies.

The Increasing Fire Threat

The County's fire suppression strategies have become more complex over the years, while the number of fires has continued to rise. Factors, such as changes in the environment, vegetation, a warmer and drier climate, and a tendency toward drought, make Monterey County highly susceptible to wildfires. CalFire has designated Monterey County as a high to very high fire-hazard severity zone. Meanwhile, the departure of major fire insurance companies is leaving homeowners without adequate coverage options. In Monterey County alone, over 500,000 acres burned between 2000 and 2022.

METHODOLOGY

The Civil Grand Jury (CGJ) investigated the effectiveness and interoperability of radios across the various fire departments and districts in Monterey County. This was accomplished by visiting several County offices and departments involved in ensuring effective communication 24 hours per day, including during an emergency.

The CGJ also interviewed representatives from state, county, and city fire departments and districts about the effectiveness of radio communications. Jurors interviewed county representatives familiar with radio technology and communication constraints in Monterey County.

Additionally, the CGJ requested, received, and analyzed relevant documentation on the effectiveness and interoperability of radio technology used for fire emergency response

across Monterey County, including maps showing the effectiveness of various communication types across the County.

DISCUSSION

Known Radio Coverage Gaps

All interviewees acknowledged that portions of Monterey County are radio dead zones. Some of these areas result from the County's rugged terrain, while others are caused by buildings with thick and heavy walls that prevent radio signals from penetrating. In November 2023, the most prevalent areas with limited coverage were identified as follows:

- County-wide coverage inside buildings
- Outdoor areas: North Salinas, Bolsa Knolls, Prunedale, Pajaro, San Benancio, Carmel Valley Village, Green Bridge, King City, Bryson, San Ardo Oil Field, Bitterwater/HWY 25 Road, and the Big Sur area.

The CGJ was provided with information highlighting outdoor areas with no or limited radio coverage, depending on the type of communication (analog vs. digital) in use. The CGJ analyzed this information to categorize the communication transmission data (see Appendix C). For digital coverage, the metric measured the bit-error (BER) rate of transference, which measures the success rate of a transmitted digital communication stream. Analog radio performance was measured in decibel milliwatts (dBm), a unit that reflects signal power. The results of this analysis are shown in Table 2.

In summary, analog radio communication covers more of the County than digital, but its quality is inferior. Audio signal strength can steadily degrade, making it much noisier.

Table 2: NGEN Digital and Analog Radio Performance

Transmission Categories	Digital Radio Coverage	Analog Overlay Radio Coverage
A stable and clean connection, with few if any errors and strong audio.	56% of Monterey County land. (BER > 0.0)	72% of Monterey County land. (< 0 dBm)
A weak or unstable connection. Static, muting, hissing, loss of connection or multiple errors.	2% of Monterey County land. (BER > 4.0)	10% of Monterey County land. (< 100 dBm)
No connection. The radio receiver cannot lock on the signal or decode the data at all.	42% of Monterey County land. (No transmission)	18% of Monterey County land. (No transmission)

Increasing the number of repeater towers could greatly enhance coverage, but the locations where these towers would be most effective generally lack access roads or platforms for installation, driving the cost of installing a single tower to over $1 million. Multiple towers would be required to eliminate these dead zones, but the County currently lacks the funding to support this solution.

The overall area of Monterey County covered by both analog and digital communication is 73.3% per ITD. This is estimated to include 99.5% of the County's population. However, the low-population areas that are not covered by analog or digital communication remain at risk of wildfires and other emergencies that require urgent communication and response.

Operational Effects on Firefighters

The CGJ found that the types of radios used vary by fire district and department. Some rely on analog equipment, while others use digital or a combination of both. Further, emergency personnel must know the specific frequency their radio must transmit on, which requires a manual reset depending on their location in the County and the type of

communication being used. This knowledge is inherently understood and applied by long-term firefighters who have adopted a “make it work” approach. However, for new personnel or those traveling outside of their usual district, this can lead to delays in communication or even complete breakdowns, potentially putting lives and property at risk.

Actions Taken by Monterey County

1. *Development of Next Generation Radio Network (NGEN)*

Monterey County’s ongoing NGEN project was created to enhance the reliability of the emergency communication network and address the gaps in radio coverage throughout the County.

The NGEN Executive Board is responsible for making recommendations regarding the cost, nature, and scope of the public-safety radio communications services provided to their organizations. The NGEN budget may be supplemented to address specific needs such as purchasing special or upgraded equipment, replacing failed equipment, purchasing system software and hardware, and upgrading physical communications sites. This NGEN Board recommends equitable apportionment and cost-sharing methods for such special costs among the parties, including the County and the emergency response agencies that use their services.

The NGEN Operations Board makes operational policy recommendations to the NGEN Executive Board based on reports from the County Radio Manager, or other County staff, on all policy matters pertaining to budget, personnel, equipment, operations, or fiscal issues that could affect costs to agencies and parties.

2. *Investment in Infrastructure*

Monterey County ITD, under the oversight of the NGEN Executive Board, has made a significant investment to modernize and upgrade the backbone of the County’s Information Technology infrastructure. This upgrade aims to enhance communication coverage and ensure real-time failover and backup of the NGEN operations in case of a

single system fail or a power outage. A portion of this investment is shown in the photograph below.

Under an agreement between the NGEN Executive Board and the fire departments and districts, Monterey County is responsible for funding and implementing all centralized infrastructure required to ensure effective communication throughout the County. The fire departments and districts, in turn, have agreements with the County to reimburse it for the use of their 9-1-1 services and the maintenance of the NGEN infrastructure. However, each fire department and district must purchase its own radios in accordance with the standards established by the NGEN Executive Board. Improvements made through the NGEN project can only be realized if the respective fire districts and departments can afford the required upgrades, such as radios.

Status of Current Equipment in Relation to Dead Zones

The NGEN Project, in collaboration with commercial entities, has explored alternatives to eliminate the remaining dead zones in radio coverage. The most promising solution appears to be the LTE/Wi-Fi and low-orbit satellite solution. Limited pilot testing indicates that LTE-based solutions may significantly reduce coverage gaps across the County. However, these solutions have not yet been deployed at scale. The CGJ found that most radios currently in use throughout the County support only analog and digital signals, so most fire districts would need to update their radios to incorporate additional LTE and Wi-Fi technology.

Required Standards for Equipment

All portable radios purchased must meet the fire radio standards outlined in Project 25 (P25). P25 is a suite of standards that enable interoperability among digital two-way land mobile radio communications products developed for public safety professionals. It was established in October 1989 by a coalition of the Association of Public Safety Communications Officials-International and the National Association of State

Tower in Salinas with various affixed communication Devices that are directed to the various communication towers throughout Monterey County

Telecommunications Directors to address vendor incompatibility issues from the 1980s to support digital/analog mixed modes. Radios also must meet the new National Fire Protection Association (NFPA) 18002 standard for fire service performance.

The P25 standard focuses on ensuring that different radio brands work together, handle analog/digital modes, and feature rugged designs with enhanced audio for noisy fire environments.

The portable radio NGEN is currently testing and recommending is the Motorola APX NEXT All-Band P25 Smart Radio. The radio is estimated to cost $12,000 per unit. Considering that each fire department or district maintains multiple radio sets, the total cost becomes substantial and unsupported by funding. This makes it challenging to meet current radio requirements. The photo below shows a similar model.

Funding Constraints on Eliminating Dead Zones

The unincorporated fire districts of Monterey County are limited not only by the rugged terrain but also by a lack of funding. Prior to the passage of Proposition 13 in 1978,

Motorola APX 8000XE radio

local governments were authorized to levy property taxes on individuals, which served as a source of funding for unincorporated fire districts. Since Proposition 13 was implemented, this funding source has been declining. Property values are now assessed only at the time of construction or resale. Under Proposition 13, changes in property values significantly affect property tax revenue. For example, the energy plant in Moss Landing is by far the largest taxpayer in the North County Fire Protection District. The reduction in the assessed value of the power plant from $800,000 to $400,000 in the early 2000s had a significant impact on special district funding earmarked to provide protection services to rural fire districts.

Property taxes, the primary funding source for most unincorporated fire districts in Monterey County, fall far short of covering all operational expenses. Consequently, some districts seek additional funding through special assessments, fees, or grants. The Monterey County Weekly (January 1-7, 2026) reported that the cities of Gonzales and Soledad were evaluating their respective communities' interest in supporting a parcel tax to bolster their fire departments' funding. Local citizens and their elected representatives lack the necessary fiscal authority to change the state allocation of property taxes to align with contemporary community priorities.

FINDINGS AND RECOMMENDATIONS

Finding (F1): Approximately 42% of Monterey County's geographic area lacks reliable digital radio coverage, and 18% lacks usable analog coverage, resulting in areas where first responders cannot reliably communicate during emergencies.

Recommendation (R1): The Monterey County Board of Supervisors (BOS) direct NGEN Executive Committee, in coordination with County ITD, to develop and submit a countywide implementation plan identifying the specific equipment upgrades, infrastructure needs, estimated costs, and timelines required to reduce or eliminate identified emergency communication dead zones by December 31, 2026.

Finding (F2): Some fire districts reported limited financial capacity to purchase and maintain radios capable of operating across all communication modes supported by

the County's emergency communication infrastructure, which compromises their ability to coordinate services with other agencies.

Recommendation (R2): The BOS direct the ITD to develop a feasibility analysis identifying available funding options to support fire district radio equipment upgrades and emergency communication infrastructure in unincorporated areas by March 31, 2027.

Finding (F3): Emergency responders in Monterey County must operate across multiple radio technologies and manually adjust communication modes depending on location, increasing operational complexity and the potential for communication delays during emergencies.

Recommendation (R3): The BOS direct the ITD to develop a framework to assist fire districts with limited financial capacity to obtain radios compatible with the County's emergency communication system by March 31, 2027.

APPENDIX C

The following is an in-depth explanation of the methodology used in calculating the performance data shown in Table 2 on page 12.

Jury members summarized the information from NGEN digital and analog coverage maps by converting the maps into the percentage of the county that was covered at each radio performance level. This was done by analyzing the colors of the maps, focusing on those areas that fall within the official Monterey County boundary, and grouping the coverage categories based on their visual color characteristics. Small labels and symbols embedded within coverage areas were treated as part of the surrounding coverage to avoid skewing results. Percentages represent the share of the county's total mapped area in each coverage category, excluding all areas outside the county boundary.

Chart 1 shows the NGEN digital radio performance in Monterey County. Digital radio performance here is measured by testing the bit-error rate (BER) that the radio provides under various conditions. BER is a straightforward metric that answers the question: "How many of the bits get through correctly when a data stream is passed through the system?" One can interpret this figure as follows:

- Green or "BER > 0.0%" indicates that while errors are present, they are very low. The radio's error correction is handling mistakes. Radio users would generally have a clean and stable connection. The user experiences normal operations. This is the experience in 56% of Monterey County.

- Orange or "BER > 4.0%" indicates that there are a high number of errors. Radio users would experience a large amount of static, stuttering, muting, and frequent loss of the connection.This is the experience in 2% of Monterey County.

- Brown or "None" indicates no coverage, as the radio receiver cannot lock onto the signal or decode data at all. This is the experience in 42% of Monterey County.

Chart 1: NGEN Digital Radio Coverage

Chart 2 shows the overlay of analog radio coverage. Analog radio performance was measured in decibel milliwatts (dBm). It expresses an absolute measurement of signal power. Signal strength usually ranges from -50 dBm (strong signal) to -120 dBm (weak to no signal). One can interpret this figure as follows:

- Green or “<0 dBm” indicates that there is a very strong signal. The radio’s communication would be clear, strong audio. This is the experience in 72% of Monterey County.
- Orange or “<-90 dBm” indicates that there is a weak, but potentially usable signal. Radio users are likely to experience noisy, hissy, or intermittently unintelligible communication. This is the experience in 3% of Monterey County.
- Blue or “<-100 dBm” indicates that there is a very weak signal. Radio users are likely to know that someone is trying to communicate with them, but what is being said cannot be decerned. This is the experience in 7% of Monterey County.

- Brown or “None” indicates no coverage as the radio receiver is not receiving a signal at all, even under ideal conditions. This is the experience in 18% of Monterey County.

A preliminary response was presented to the Board on June 25, 2024. The Board provided direction to HCD to prepare an ordinance that amend current requirements to authorize the County to provide tenant relocation assistance directly to impacted families and individuals and to seek reimbursement from the landlord/property owner for those costs. The amendments add the option to use POU/POE for new development on a vacant lot or for an ADU or other second unit. Once County Counsel approves the amended ordinance, EHB will contract with Rincon to do the Initial Study. It is necessary to prepare the draft ordinance before contracting with Rincon, so they know what to include in the initial study. The updates in the amended ordinance regarding new development are the same as Rincon analyzed in the initial CEQA document, which will help streamline the process. Staff gave an update to the Board on April 22, 2025 and were instructed to return by December 2025 with a proposed amendment to the ordinance and an initial Study-Mitigated Negative Declaration evaluation. Staff will provide an update to the Board on February 6, 2026. Staff presented an update at the Board of Supervisors meeting on February 3, 2026, and were directed to continue work on amending the ordinance and make it available for public input in the near term. A preliminary response will be presented to the Board on October 1, 2024. Staff presented a Preliminary Analysis Response to the Board on 10/1/24 where the referral will be deemed complete contingent upon staff returning in 6 months with recommendations for updating/changing the Rooster ordinance. Staff is waiting to see if there is a change in State law and will bring the update back to the BoS once that information is confirmed next month (March 2025). Then a date will be set on the Board Agenda for an update. Staff is working on a letter of support for AB-928 (Rogers) Cockfighting Cruelty Act that is going to the Hitchcock Road Advisory Committee the week of May 19, 2025. Proposed completion date in ~~October 2025~~ June 2026. Staff provided an update at the Board of Supervisor meeting on November 4, 2025, and based on this discussion and following dicussions with HCD, it has been determined that it makes most sense to pivot and enforce rooster keeping via land use policy and not County Code Chapter 8. Hitchcock Road Animal Services (HRSA) and County Housing and Community Development (HCD) staff are in dicussions regarding timing for an update to the Board on status. HCD is in the process of drafting an ordinance to add rooster keeping restrictions to the zoning ordinance. The ordinance must be reviewed by the Planning Commission before it can be adopted by the Board. Board consideration of the ordinance is anticipated in August of 2026.	Pending

Referral Title: Commitment to Constitutional Order Resolution		
Referral Purpose: Request the "Commitment to Constitutional Order" be scheduled for consideration on a future Board of Supervisors agenda.		

Brief Referral Description (attach additional sheet as required):

This referral resubmits the Commitment to Constitutional Order resolution (attached) for placement on a future Board agenda so the Board of Supervisors may consider its adoption. The resolution was originally brought forward by members of the public, who have appeared before the Board on several occasions during General Public Comment requesting that the Board take up this matter.

In response to these requests, the Chair worked with community members to route their submission through the County's established ceremonial resolution process. However, upon further review, the resolution is being submitted through the referral process instead.

The resolution affirms Monterey County's commitment to constitutional principles, including separation of powers, due process protections, and the foundational rights outlined in the U.S. Constitution and Bill of Rights. It further expresses concern about actions by the federal executive branch that community members believe exceed constitutional authority, and outlines statements and suggested actions consistent with the County's previously adopted positions on immigrant communities and constitutional protections.

Submitting the resolution via referral ensures that it is routed in accordance with established procedures and brought before the Board for formal consideration at a future meeting.

i. Continue review and recommended updates to Board Policy G-146 related to ceremonial display of the Pride Flag to establish a consistent approach for recognizing Pride Month through flag display practices at County facilities and parks;

ii. Proceed with completion of referral based on modifications by the Board.

c. Rescind referral.

d. Provide further direction, as appropriate.

PRELIMINARY ANALYSIS:

Background:

On May 19, 2026, Supervisor Root Askew (Chair of the Board of Supervisors) submitted Referral 2026.10 (Attachment A) - Requesting review and recommended updates to Board Policy G-146 (Attachment B) related to ceremonial display of the Pride Flag to establish a consistent approach for recognizing Pride Month through flag display practices at County facilities and parks. The purpose of the referral is set forth below.

The referral seeks to reconcile direction contained in Resolution 22-113 (CR 21-150) (Attachment C) and Resolution CR25-095 (Attachment D) and informal practice, to establish a clear, consistent, and administratively workable Countywide expectation for implementation moving forward through updates to Board Policy G-146 (Flag Policy). The referral also seeks to modernize policy terminology by referencing the broader “Pride Flag,” recognizing that symbols associated with LGBTQ+ pride and inclusion continue to evolve over time.

Public Works, Facilities and Parks (PWFP) was assigned the referral, and staff began reviewing existing Flag Policy and practices related to ceremonial display of the Pride Flag (sometimes referred to as the Rainbow Flag).

Flag Policy:
Board Policy G-146 was adopted on August 13, 2024 (Board Resolution No. 24-284) for inclusion in the Board Policy Manual to guide departments in properly and respectfully displaying the flag of the United States and other flags.
Ceremonial display of the Pride Flag falls under section H of the County Flag Policy G-146 which states:

> Flags other than the flags of the United States, the State of California, and the County of Monterey may be displayed when approved by the Board of Supervisors. If such approval is given by the Board of Supervisors, the Board shall specify where the other flag is to be displayed and for what period of time.

Pride Flag:
The Board of Supervisors (Board) of the County of Monterey (County) has adopted multiple resolutions directing staff to raise a flag during the month of June in recognition of Pride month (Board Resolution No. 21-150 adopted on June 8, 2021; Amendment to Board Resolution No. 21-150 adopted on June 1, 2022; Board Resolution No. 23-069 adopted on June 6, 2023; Board Resolution No. 24-170 adopted on June 11, 2024; Board Resolution No. 25-095 adopted on June 3, 2025).

Since June 2021, at the direction of the Board pursuant to Board Resolution No. 21-150, PWFP-Facilities has flown a Rainbow Flag during the month of June on the flagpole located at the downtown County Government Center at 168 W. Alisal Street, Salinas, in recognition of Pride Month. PWFP has also flown the Pride Flag during the month of June at multi-use County buildings located at 1441 Schilling Place, Salinas, 1200 Aguajito Road, Monterey and at the Marina Coastal Offices located 2620 First Street, Marina. Additionally, PWFP-Parks has flown the Pride Flag at every County-managed park including the Lakes, Laguna Seca Recreation Area, and Lincoln Park.

In June of 2025, Board Resolution No. 25-095 directed that the Rainbow Flag will be raised at all County facilities' flagpoles for the month of June 2025.

Current Procedures and Practice:
In practice, Pride Flag displays at County owned multi-use facilities are managed by the PWFP Facility Maintenance Division. Pride Flag displays at single use facilities are managed by individual Departments. Pride Flag displays at PWFP-Parks are managed by the PWFP-Parks Division. The above practices were implemented in accordance with section H of the County Flag Policy G-146.

Proposed Updates to Procedures and Practice:
The following items have been identified by Supervisor Root Askew and are proposed to be addressed through a Board Resolution and Policy update:

- Codifying the expectation that the Pride Flag be raised annually during the month of June at County multi-use facilities and County parks where flag poles are present and operational.
- Encouraging County departments with flag poles under their direct control to similarly participate in Pride Month recognition through ceremonial display of the Pride Flag.
- Establishing administrative guidance regarding duration of display, appropriate flag placement

and etiquette consistent with protocols outlined in the existing Flag Policy, including guidance related to departmental coordination responsibilities.

- Providing operational flexibility regarding the specific Pride Flag design utilized, recognizing that Pride symbols continue to evolve while maintaining the intent of LGBTQ+ community recognition and inclusion.
- Clarifying that ceremonial display of the Pride Flag is intended to recognize and affirm LGBTQ+ community members, employees, families, and visitors within Monterey County.

Proposed Policy Update:
Staff will confer with County Departments including the Civil Rights Office, County Administrative Office, and the Office of the County Counsel to draft a proposed resolution and new policy language for a new subsection under Section II of Board Policy G-146, substantially similar to the following language suggested by Supervisor Root Askew:

> The County of Monterey recognizes Pride Month during the month of June. During Pride Month, the Pride Flag shall be ceremonially displayed at County multi-use facilities and County Parks where operational flag poles are present, in accordance with applicable federal and state flag protocols and any administrative guidance established by the County. County departments with flag poles under their direct control are encouraged to participate in this annual recognition.

Estimated Project Cost:
The cost of administration, raising flags and purchasing flags is proposed to be the responsibility of individual Department budgets similar to current practice for the United States, State of California and County flag raising. The current price for purchasing new pride flags averages $65 per flag depending on size and quality.

Staffing Level Estimate:
PWFP staff will work with the Civil Rights Office, County Administrative Office and the Office of the County Counsel to update the existing Board Policy in accordance with Board Direction.

Departmental Challenges:
Staff have not identified any significant challenges.

Proposed Response Date:
By Fall 2026.

BOARD OF SUPERVISORS STRATEGIC PLAN GOALS:
This Board Referral supports the Strategic Goal of improving Well-Being and Quality of Life by recognizing and increasing awareness, acceptance and inclusion of Lesbian, Gay, Bisexual, Transgender and Queer (LGBTQ+) individuals.

Referral Title: G-146 Flag Policy Amendment – Pride Flag

Referral Purpose: Request review and recommended updates to Board Policy G-146 related to ceremonial display of the Pride Flag to establish a consistent approach for recognizing Pride Month through flag display practices at County facilities and parks.

Brief Referral Description (attach additional sheet as required):
Annually, since at least 2021, the Monterey County Board of Supervisors has adopted resolutions recognizing and celebrating Pride Month in Monterey County. Multiple resolutions have included direction to raise the Rainbow Flag throughout the month of June at the Government Center located at 168 West Alisal Street in Salinas. In 2022, through Resolution 22-113, the BOS directed the flag be raised annually at this location in every year.

Over time, operational practice has also included raising the Rainbow Flag at additional County multi-use facilities; in some years, County parks; and other County facilities, as requested. Most recently, Resolution CR25-095 directed that "the Rainbow Flag, a symbol of pride for the Lesbian, Gay, Bisexual, Transgender, Queer community, and LGBTQ+ social movements will be raised at all county facilities' flagpoles for the month of June 2025."

This referral seeks to reconcile the direction contained in Resolution 22-113 and Resolution CR25-095, and informal practice, to establish a clear, consistent, and administratively workable Countywide expectation for implementation moving forward through updates to Board Policy G-146 (Flag Policy). The referral also seeks to modernize policy terminology by referencing the broader "Pride Flag," recognizing that symbols associated with LGBTQ+ pride and inclusion continue to evolve over time.

The proposed policy update should consider:

- Codifying the expectation that the Pride Flag be raised annually during the month of June at County multi-use facilities and County parks where flag poles are present and operational.
- Encouraging County departments with flag poles under their direct control to similarly participate in Pride Month recognition through ceremonial display of the Pride Flag.
- Establishing administrative guidance regarding duration of display, appropriate flag placement and etiquette consistent with protocols outlined in the existing Flag Policy, including guidance related to departmental coordination responsibilities.
- Providing operational flexibility regarding the specific Pride Flag design utilized, recognizing that Pride symbols continue to evolve while maintaining the intent of LGBTQ+ community recognition and inclusion.
- Clarifying that ceremonial display of the Pride Flag is intended to recognize and affirm LGBTQ+ community members, employees, families, and visitors within Monterey County.

- Returning to the Board with any recommended policy language and associated operational considerations necessary for implementation.

Suggested policy language for consideration could include a new subsection under Section II (Policy), substantially similar to the following:

> "The County of Monterey recognizes Pride Month during the month of June. During Pride Month, the Pride Flag shall be ceremonially displayed at County multi-use facilities and County parks where operational flag poles are present, in accordance with applicable federal and state flag protocols and any administrative guidance established by the County. County departments with flag poles under their direct control are encouraged to participate in this annual recognition."

I. Purpose

a. To guide departments in properly and respectfully displaying the flag of the United States and other flags.

II. Policy

a. It is the policy of the County of Monterey to display the flag of the United States prominently where it may be viewed by all attendees at official County meetings, hearings, or events (Gov't Code, § 430). At a minimum, the flag of the United States shall be displayed in the Board of Supervisors Chambers at the Government Center at 168 West Alisal Street, Salinas, California. The flag of the State of California and of the County of Monterey may also be displayed in the Board of Supervisors Chambers.

b. When displaying the flag of the United States indoors, the flag should be displayed to the left side of the stage from the audience's point of view. If other flags are also displayed, the flag of the United States shall always be placed in the position of honor, either by placing it to the far left of the stage from the audience's point of view or placing it in the center of a group of flags such that the flag of the United States is higher than any other non-national flag (See generally 4 U.S.C. § 7).

c. Both the flag of the United States and the flag of the State of California shall be prominently displayed during business hours upon or in front of major buildings and facilities owned, leased, or regularly used by the County (Gov't Code, § 431, subd. (a)).

d. The flag of the United States shall be displayed at half-staff on the following occasions:

i. By order of the President, usually upon the death of principal figures of the United States government, the governor of a state, or other officials or foreign dignitaries, or to commemorate other days of observance, such as:

September 11th	Patriot Day (half-staff all day) (36 U.S.C. § 144)
December 7th	Pearl Harbor Remembrance Day (half-staff all day) (36 U.S.C. § 129)

ii. On the following dates pursuant to law without any order:

May 15th	Peace Officers Memorial Day (half-staff all day, unless Armed Forces Day) (36 U.S.C. § 175)
Last Monday in May	Memorial Day (half-staff until **noon**) (36 U.S.C. § 175)

On these occasions, the flag of the State of California shall be similarly displayed at half-staff.

e. The flag of the United States and the flag of the State of California shall be displayed at half-staff upon proclamation of the Governor to acknowledge the death of a present or former official of the state government or the death of a member of the armed services from California (4 U.S.C. § 7, subd. (m)).

f. County Flag. The County may adopt a flag in accordance with Government Code section 435. The County Flag should be flown or hung below or lower than the flag of the State of California.

g. The flag of the National League of Prisoner-of-War/Missing-in-Action Families (POW/MIA Flag) shall be flown by Proclamation of the Governor, typically the third Friday of September, also known as POW/MIA Recognition Day. The POW/MIA Flag shall be flown during business hours, at all County buildings or facilities where the United States Flag and the California State Flag fly, if the flag can be attached to existing flagpoles or other existing structures on which the United States Flag or California Flag fly (Mil. & Vet. Code, § 1831).

h. Flags other than the flags of the United States, the State of California, and the County of Monterey may be displayed when approved by the Board of Supervisors. If such approval is given by the Board of Supervisors, the Board shall specify where the other flag is to be displayed and for what period of time. Generally, locations should be places of prominence where the flags are least likely to be disturbed (flag poles or secured areas) and subject to appropriate etiquette. If a flag under this section is flown in Board Chambers, a resolution should be placed next to the flag to explain its presence.

i. The flag of the United States and the flag of the State of California shall be displayed at half-staff upon the discretion of the Chair of the Board of Supervisors, in consultation with the Administrative Office and Office of County Counsel, who may direct flags displayed at County facilities be flown at half-staff upon the death of an official or person of significant public import, the death of a County employee while on duty, or the death of citizens occurring in a disaster of significant proportion.

Commercial general liability and automobile liability policies shall provide an endorsement naming the County of Monterey, its officers, officials, employees, and volunteers as Additional Insured with respect to liability arising out of the CONTRACTOR'S work, including ongoing and complete operations, and shall further provide that such insurance is primary insurance to any insurance or self-insurance maintained by the COUNTY and that the insurance of the Additional Insured shall not be called upon to contribute to a loss covered by the CONTRACTOR'S insurance.

The workers' compensation policy required hereunder shall be endorsed to state that the workers' compensation carrier waives its right of subrogation against COUNTY, its officers, officials, employees, agents, or volunteers, which might arise by reason of payment under such policy in connection with performance under this Agreement by CONTRACTOR. Should CONTRACTOR be self-insured for workers' compensation, CONTRACTOR hereby agrees to waive its right of subrogation against COUNTY, its officers, officials, employees, agents, or volunteers.

Prior to the execution of this Agreement by the COUNTY, CONTRACTOR shall file certificates of insurance and endorsements with the COUNTY'S contract administrator and the COUNTY'S Contracts/Purchasing Office, showing that the CONTRACTOR has in effect the insurance required by this Agreement. The CONTRACTOR shall file a new or amended certificate of insurance within five (5) calendar days after any change is made in any insurance policy, which would alter the information on the certificate then on file. Acceptance or approval of insurance shall in no way modify or change the indemnification clause in this Agreement, which shall continue in full force and effect.

CONTRACTOR shall at all times during the term of this Agreement maintain in force the insurance coverage required under this Agreement and shall send, without demand by COUNTY, annual certificates to COUNTY'S Contract Administrator and COUNTY'S Contracts/Purchasing Office. If the certificate is not received by the expiration date, CONTRACTOR shall have five (5) calendar days to send the certificate, evidencing no lapse in coverage during the interim. Failure by CONTRACTOR to maintain such insurance coverage is a breach of this Agreement, which entitles COUNTY, at its sole and absolute discretion, to (1) immediately disallow claim(s) for payment and/or withhold payment(s) by COUNTY to CONTRACTOR, pursuant to Section IV (A), for services rendered on or after the effective date of termination, reduction, non-renewal, or cancellation of the insurance coverage maintained by CONTRACTOR, and/or (2) terminate this Agreement pursuant to Section V.

RECOMMENDATION:

It is recommended that the County of Monterey Board of Supervisors:
a. Approve and authorize the Director of Health Services or designee to execute a retroactive standard Mental Health Services Agreement for the term beginning January 1, 2026 through June 30, 2027 with Olive Crest for the provision of Short Term Residential Therapeutic Program (STRTP) treatment including Case Management, Specialty Mental Health Services, Medication Support and Crisis Intervention for children/youth in the amount of $189,421 for Fiscal Year (FY) 2025-2026 and $505,123 for FY 2026-2027 for a total agreement amount not to exceed $694,544; and
b. Approve and authorize the Director of Health Services or designee to execute up to three future amendments that do not exceed 10% ($69,454) of the original agreement amount, do not significantly change the scope of services, and do not increase the total not to exceed amount over $763,998.

SUMMARY:

Short-Term Residential Therapeutic Programs (STRTP) are licensed by the California Department of Social Services and provide a Mental Health Program Approval by the Department of Health Care Services. STRTPs are residential facilities that provide an integrated program of specialized and intensive care and supervision, services and supports, specialty mental health services, mental health treatment; and short-term, 24-hour care and supervision to children and youth. The program's goal is to move the youth to a less restrictive environment within six months. The care and supervision STRTPs provide are nonmedical, except as otherwise permitted by law. STRTPs are designed primarily for youth aged 12 to 20. These programs may be operated by private organizations, which must be organized and operated on a not-for-profit basis. Only state-licensed, county-contracted agencies may provide STRTP services.

DISCUSSION:

Olive Crest is a Short-term Residential Therapeutic Program (STRTP) providing residential and specialty mental health services including specialized and intensive care, support, and 24-hour supervision on a short-term basis for children and youth with complex and severe needs. The goal of the program is to provide therapeutic interventions to treat and ameliorate behavioral health symptoms and improve function so that children and adolescents may move to a less restrictive and intensive treatment setting. This agreement is retroactive to January 1, 2026, due to ongoing contract negotiations for Monterey County youth placed on an emergency basis. Emergency placements are conducted when current contracted providers are not able to provide the specialized residential and mental health needs of a child/youth.

This Agreement contains the County's standard 30-day "no cause" provision (Section V, B) and an additional defunding provision (Section V, D), which provides the County the ability to amend or terminate the Agreement in the event of a reduction and/or termination of funding.

This work supports one of the County of Monterey Health Department 2025-2028 Strategic Plan Goal(s): 2. Provide Exceptional Person-Centered Care through Accessible, Community-Focused Health Services. It also supports one of the ten essential public health services, specifically: 7. Link people to needed personal health services and assure the provision of health care when otherwise unavailable.

Commercial general liability and automobile liability policies shall provide an endorsement naming the County of Monterey, its officers, officials, employees, and volunteers as Additional Insured with respect to liability arising out of the CONTRACTOR'S work, including ongoing and complete operations, and shall further provide that such insurance is primary insurance to any insurance or self-insurance maintained by the COUNTY and that the insurance of the Additional Insured shall not be called upon to contribute to a loss covered by the CONTRACTOR'S insurance.

The workers' compensation policy required hereunder shall be endorsed to state that the workers' compensation carrier waives its right of subrogation against COUNTY, its officers, officials, employees, agents, or volunteers, which might arise by reason of payment under such policy in connection with performance under this Agreement by CONTRACTOR. Should CONTRACTOR be self-insured for workers' compensation, CONTRACTOR hereby agrees to waive its right of subrogation against COUNTY, its officers, officials, employees, agents, or volunteers.

Prior to the execution of this Agreement by the COUNTY, CONTRACTOR shall file certificates of insurance and endorsements with the COUNTY'S contract administrator and the COUNTY'S Contracts/Purchasing Office, showing that the CONTRACTOR has in effect the insurance required by this Agreement. The CONTRACTOR shall file a new or amended certificate of insurance within five (5) calendar days after any change is made in any insurance policy, which would alter the information on the certificate then on file. Acceptance or approval of insurance shall in no way modify or change the indemnification clause in this Agreement, which shall continue in full force and effect.

CONTRACTOR shall at all times during the term of this Agreement maintain in force the insurance coverage required under this Agreement and shall send, without demand by COUNTY, annual certificates to COUNTY'S Contract Administrator and COUNTY'S Contracts/Purchasing Office. If the certificate is not received by the expiration date, CONTRACTOR shall have five (5) calendar days to send the certificate, evidencing no lapse in coverage during the interim. The term also includes any act of retaliation.

C. Application of Monterey County Code Chapter 2.80. The provisions of Monterey County Code Chapter 2.80 apply to activities conducted pursuant to this Agreement. II. PROGRAM GOALS AND OBJECTIVES

A. PROGRAM NARRATIVE

CONTRACTOR is licensed by the California State Department of Social Services as a Short-Term Residential Therapeutic Program (STRTP) and maintains Mental Health Program Approval and Medi-Cal certification to provide an integrated program of specialized and intensive care, services and supports, specialty mental health services, and 24-hour supervision on a short-term basis for children and youth with complex and severe needs. The STRTP is intended for children whose behavioral and therapeutic needs are not able to be met in a home-based family setting, even with the provision of supportive services, and who require the level of supervision and clinical interventions provided by a STRTP.

Children and youth requiring STRTP care need a multi-faceted approach of care. It is expected that services will be provided within the context and implementation of the Integrated Core Practice Model (ICPM) as outlined in the Katie A. Settlement. The ICPM is a comprehensive model for serving children and youth in need. The ICPM Guide publication in the Medi-Cal Manual available through the Department of Health Care Services defines the ICPM as, "a set of practices and principles that promotes a set of values shared by all who seek to support children, youth, and families involved in child-serving agencies including, but not limited to, the child welfare system, special education, probation, drug and alcohol, and other health and human services agencies or legal systems with which the child or youth is involved".

B. PROGRAM GOALS

a. Provide trauma-informed therapeutic interventions and integrated programming designated to treat and ameliorate the behavioral health symptoms and improve functioning.
b. Provide a range of services, of varying intensity, tailored to the individual needs of the child, which can be adjusted during his or her stay in the program as they are meeting goals and improving functioning.
c. Provide mental health interventions so that children and adolescents may move to less restrictive/intensive treatment settings.
d. Child/youth develop effective problem-solving and coping skills to resolve behavioral and emotional problems, improving relationships, and overall functioning.

i. The services were provided prior to determining a diagnosis, including clinically appropriate and covered services provided during the assessment process;
ii. The service was not included in an individual treatment plan; or
iii. The client had a co-occurring substance use disorder.

2. Diagnosis Not a Prerequisite

a. Per BHIN 21-073, a mental health diagnosis is not a prerequisite for access to covered SMHS. This does not eliminate the requirement that all Medi-Cal claims, including SMHS claims, include a current Centers for Medicare & Medicaid Services (CMS) approved ICD diagnosis code.

Documentation in each client's chart as a whole will demonstrate medical necessity as defined below, based on the client's age at the time of service provision.

2. For individuals 21 years of age or older, a service is "medically necessary" or a "medical necessity" when it is reasonable and necessary to protect life, to prevent significant illness or significant disability, or to alleviate severe pain as set forth in Welfare and Institutions Code section 14059.5.

Docusign Envelope ID: 46B0A82A-711F-8E3D-83CD-81A6B037CF7A

2. CONTRACTOR shall ensure that care coordination activities support the monitoring and treatment of comorbid substance use disorder and/or health conditions.

3. CONTRACTOR shall include in care coordination activities efforts to connect, refer and link clients to community-based services and supports, including but not limited to educational, social, prevocational, vocational, housing, nutritional, criminal justice, transportation, childcare, child development, family/marriage education, cultural sources, and mutual aid support groups.

4. CONTRACTOR shall engage in care coordination activities beginning at intake and throughout the treatment and discharge planning processes.

5. To facilitate care coordination, CONTRACTOR will request a HIPAA and California law compliant client authorization to share client information with and among all other providers involved in the client's care, in satisfaction of state and federal privacy laws and regulations.

F. Co-Occurring Treatment and No Wrong Door

1. Per BHIN 22-011, Specialty and Non-Specialty Mental Health Services can be provided concurrently, if those services are clinically appropriate, coordinated, and not duplicative. When a client meets criteria for both NSMHS and SMHS, the client should receive services based on individual clinical need and established therapeutic relationships. Clinically appropriate and covered SMHS can also be provided when the client has a co-occurring mental health condition and substance use disorder.

2. Under this Agreement, CONTRACTOR will ensure that clients receive timely mental health services without delay. Services are reimbursable to CONTRACTOR by COUNTY even when:

   a. Services are provided prior to determination of a diagnosis, during the assessment or prior to determination of whether SMHS access criteria are met, even if the assessment ultimately indicates the client does not meet criteria for SMHS.

Docusign Envelope ID: 46B0A82A-711F-8E3D-83CD-81A6B037CF7A

IV. AUTHORIZATION AND DOCUMENTATION PROVISIONS

A. Services Authorization

1. CONTRACTOR will collaborate with COUNTY to complete authorization requests in line with COUNTY and DHCS policy.

2. CONTRACTOR shall have in place, and follow, written policies and procedures for completing requests for initial and continuing authorizations of services, as required by COUNTY guidance.

3. CONTRACTOR shall respond to COUNTY in a timely manner when consultation is necessary for COUNTY to make appropriate authorization determinations.

4. COUNTY shall provide CONTRACTOR with written notice of authorization determinations within the timeframes set forth in BHINs 22-016 and 22-017, or any subsequent DHCS notices.

3. For clients aged 6 through 20, the Child and Adolescent Needs and Strengths (CANS), and for clients aged 3 through 18, the Pediatric Symptom Checklist-35 (PSC-35) tools are required at intake, every six months during treatment, and at discharge, as specified in DHCS MHSUDS INs 17-052 and 18-048.

4. The problem list shall include, but is not limited to, all elements specified in BHIN 22-019.

5. COUNTY does not require the problem list to be updated within a specific timeframe or have a requirement about how frequently the problem list should be updated after a problem has initially been added. However, CONTRACTOR shall update the problem list within a reasonable time such that the problem list reflects the current issues facing the client, in accordance with generally accepted standards of practice and in specific circumstances specified in BHIN 22-019.

2. Each progress note shall provide sufficient detail to support the service code selected for the service type as indicated by the service code description.

3. Progress notes shall include all elements specified in BHIN 22-019, whether the note be for an individual or a group service.

4. CONTRACTOR shall complete progress notes within three business days of providing a service, with the exception of notes for crisis services, which shall be completed within 24 hours.

5. Providers shall complete a daily progress note for services that are billed on a daily basis, such as residential and day treatment services, if applicable.

G. Transition of Care Tool

1. CONTRACTOR shall use a Transition of Care Tool for any clients whose existing services will be transferred from CONTRACTOR to an Medi-Cal Managed Care Plan (MCP) provider or when NSMHS will be added to the existing mental health treatment provided by CONTRACTOR, as specified in BHIN 22-065, in order to ensure continuity of care.

In order to reduce COUNTY costs, the CONTRACTOR shall comply with all applicable provisions of the California Welfare and Institutions Code (WIC), the California Code of Regulations, the Code of Federal Regulations, and the federal Social Security Act related to reimbursements by non-County and non-State sources, including, but not limited to, collecting reimbursements for services from clients (which shall be the same as patient fees established pursuant to WIC section 5710) and from private or public third-party payers.

Docusign Envelope ID: 46B0A82A-711F-8E3D-83CD-81A6B037CF7A

CONTRACTOR shall not claim reimbursement from COUNTY for (or apply sums received from COUNTY with respect to) that portion of its obligations which has been paid by another source of revenue. If CONTRACTOR is seeking reimbursement for mental health services provided pursuant to this Agreement, reimbursement for such services shall be based upon the actual allowable costs of providing those services less any deductible revenues, as stated above. Notwithstanding any other provision of this Agreement, in no event may CONTRACTOR request a rate that exceeds the COUNTY'S Maximum Rate, which is based on the most recent State's Medi-Cal Behavioral Health Service Fee Schedules established by the State's Department of Health Care Services. In no case shall payments to CONTRACTOR exceed County's Maximum Rates. In addition to the rate limitation, in no event shall the maximum reimbursement that will be paid by COUNTY to CONTRACTOR under this Agreement for any Program Amount be more than the amount identified for each Program Amount for each Funded Program, as identified in this Exhibit B, Section III. Said amounts shall be referred to as the "Maximum Obligation of County," as identified in this Exhibit B, Section V.

B. To the extent a recipient of services under this Agreement is eligible for coverage under Short-Doyle/Medi-Cal or Medicaid or Medicare or any other Federal or State funded program ("an eligible beneficiary"), CONTRACTOR shall ensure that services provided to eligible beneficiaries are properly identified and claimed to the Funded Program responsible for such services to said eligible beneficiaries. For the Short-Doyle/Medi-Cal Funded Program, CONTRACTOR assumes fiscal responsibility for services provided to all individuals who do not have full-scope Medi-Cal or are not Medi-Cal eligible during the term of this Agreement.

C. CONTRACTOR shall be responsible for delivering services to the extent that funding is provided by the COUNTY. To the extent that CONTRACTOR does not have funds allocated in the Agreement for a Funded Program that pays for services to a particular eligible beneficiary, CONTRACTOR shall, at the first opportunity, refer said eligible beneficiary to another CONTRACTOR or COUNTY facility within the same geographic area to the extent feasible, which has available funds allocated for that Funded Program.

D. In order to receive any payment under this Agreement, CONTRACTOR shall submit reports and claims in such form as General Ledger, Payroll Report and other accounting documents as needed, and as may be required by the County of Monterey Department of Health, Behavioral Health Bureau. Specifically, CONTRACTOR shall submit its claims on Behavioral Health Invoice Form provided as Exhibit G, to this Agreement, along with backup documentation, on a monthly basis, to COUNTY so as to reach the Behavioral Health Bureau no later than the thirtieth (30^{th}) day of the month following the month of service. See Section III, above, for payment amount information to be reimbursed each fiscal year period of this Agreement. The amount requested for reimbursement shall be in accordance with the approved budget and shall not exceed the actual net costs incurred for services provided under this Agreement.

CONTRACTOR shall submit via email a monthly claim using Exhibit G, Behavioral Health Invoice Form in Excel format with electronic signature along with supporting documentation, as may be required by the COUNTY for services rendered to:

Docusign Envelope ID: 46B0A82A-711F-8E3D-83CD-81A6B037CF7A

E. CONTRACTOR shall submit all claims for reimbursement under this Agreement within thirty (30) calendar days after the termination or end date of this Agreement. All claims not submitted after thirty (30) calendar days following the termination or end date of this Agreement shall not be subject to reimbursement by the COUNTY. Any claim(s) submitted for services that preceded thirty (30) calendar days prior to the termination or end date of this Agreement may be disallowed, except to the extent that such failure was through no fault of CONTRACTOR.

F. If CONTRACTOR fails to submit claim(s) for services provided under the terms of this Agreement as described above, the COUNTY may, at its sole discretion, deny payment for that month of service and disallow the claim.

G. COUNTY shall review and certify CONTRACTOR'S claim either in the requested amount or in such other amount as COUNTY approves in conformity with this Agreement, and shall then submit such certified claim to the COUNTY Auditor. The County Auditor-Controller shall pay the amount certified within thirty (30) calendar days of receiving the certified invoice.

H. To the extent that the COUNTY determines CONTRACTOR has improperly claimed services to a particular Program Amount, COUNTY may disallow payment of said services and require CONTRACTOR to resubmit said claim of services for payment from the correct Program Amount, or COUNTY may make corrective accounting transactions to transfer the payment of the services to the appropriate Program Amount.

I. If COUNTY certifies payment at a lesser amount than the amount requested COUNTY shall immediately notify the CONTRACTOR in writing of such certification and shall specify the reason for it. If the CONTRACTOR desires to contest the certification, the CONTRACTOR must submit a written notice of protest to the COUNTY within twenty (20) calendar days after the CONTRACTOR'S receipt of the COUNTY notice. The parties shall thereafter promptly meet to review the dispute and resolve it on a mutually acceptable basis. No court action may be taken on such a dispute until the parties have met and attempted to resolve the dispute in person.

V. MAXIMUM OBLIGATION OF COUNTY

A. Subject to the limitations set forth herein, COUNTY shall pay to CONTRACTOR during the term of this Agreement a maximum amount of **$694,544** for services rendered under this Agreement.

B. Maximum Annual Liability:

FISCAL YEAR LIABILITY	AMOUNT
January 1, 2026 – June 30, 2026	$189,421
July 1, 2026 – June 30, 2027	$505,123
TOTAL MAXIMUM COUNTY OBLIGATION:	**$694,544**

Docusign Envelope ID: 46B0A82A-711F-8E3D-83CD-81A6B037CF7A

C. If, as of the date of signing this Agreement, CONTRACTOR has already received payment from COUNTY for services rendered under this Agreement, such amount shall be deemed to have been paid out under this Agreement and shall be counted towards COUNTY'S maximum liability under this Agreement.

D. If for any reason this Agreement is canceled, COUNTY'S maximum liability shall be the total utilization to the date of cancellation not to exceed the maximum amount listed above.

E. As an exception to Section D. above with respect to the Survival of Obligations after Termination, COUNTY, any payer, and CONTRACTOR shall continue to remain obligated under this Agreement with regard to payment for services required to be rendered after termination.

VI. BILLING AND PAYMENT LIMITATIONS

B. Provisional Payments: COUNTY payments to CONTRACTOR for performance of eligible services hereunder are provisional until the completion of all settlement activities and audits, as such payments are subject to future Federal, State and/or COUNTY adjustments. COUNTY adjustments to provisional payments to CONTRACTOR may be based upon COUNTY'S claims processing information system data, State adjudication of Medi-Cal claims files, contractual limitations of this Agreement, annual cost and MHSA reports, application of various Federal, State, and/or COUNTY reimbursement limitations, application of any Federal, State, and/or COUNTY policies, procedures and regulations, and/or Federal, State, or COUNTY audits, all of which take precedence over monthly claim reimbursements.

C. Allowable Costs: Allowable costs shall be the CONTRACTOR'S actual costs of developing, supervising and delivering the services under this Agreement, as set forth in the Budget provided in Exhibit H and 2 C.F.R. § 230. Only the costs listed in Exhibit H of this Agreement as contract expenses may be claimed as allowable costs. Any dispute over whether costs are allowable shall be resolved in accordance with the provisions of applicable Federal, State and COUNTY regulations.

D. Cost Control: CONTRACTOR shall not exceed by more than twenty (20%) percent any contract expense line-item amount in the budget without the written approval of COUNTY, given by and through the Contract Administrator or Contract Administrator's designee. CONTRACTOR shall submit an amended budget using Exhibit H, or on a format as required by the COUNTY, with its request for such approval. Such approval shall not permit CONTRACTOR to receive more than the maximum total amount payable under this Agreement. Therefore, an increase in one line item shall require corresponding decreases in other line items.

E. Other Limitations for Certain Funded Programs: In addition to all other limitations provided in this Agreement, reimbursement for services rendered under certain Funded Programs may be further limited by rules, regulations and procedures applicable only to that Funded Program. CONTRACTOR shall be familiar with said rules, regulations and procedures and submit all claims in accordance therewith.

Docusign Envelope ID: 46B0A82A-711F-8E3D-83CD-81A6B037CF7A

F. Adjustment of Claims Based on Other Data and Information: The COUNTY shall have the right to adjust claims based upon data and information that may include, but are not limited to, COUNTY'S claims processing information system reports, remittance advices, State adjudication of Medi-Cal claims, and billing system data.

VII. LIMITATION OF PAYMENTS BASED ON FUNDING AND BUDGETARY RESTRICTIONS

A. This Agreement shall be subject to any restrictions, limitations, or conditions imposed by State which may in any way affect the provisions or funding of this Agreement, including, but not limited to, those contained in State's Budget Act.

B. This Agreement shall also be subject to any additional restrictions, limitations, or conditions imposed by the Federal government which may in any way affect the provisions or funding of this Agreement.

C. In the event that the COUNTY'S Board of Supervisors adopts, in any fiscal year, a COUNTY Budget which provides for reductions in COUNTY Agreements, the COUNTY reserves the right to unilaterally reduce its payment obligation under this Agreement to implement such Board reductions for that fiscal year and any subsequent fiscal year during the term of this Agreement, correspondingly. The COUNTY'S notice to the CONTRACTOR regarding said reduction in payment obligation shall be provided within thirty (30) calendar days of the Board's approval of such action.

D. Notwithstanding any other provision of this Agreement, COUNTY shall not be obligated for CONTRACTOR'S performance hereunder or by any provision of this Agreement during any of COUNTY'S current or future fiscal year(s) unless and until COUNTY'S Board of Supervisors appropriates funds for this Agreement in COUNTY'S Budget for each such fiscal year. In the event funds are not appropriated for this Agreement, then this Agreement shall terminate as of June 30 of the last fiscal year for which funds were appropriated. COUNTY shall notify CONTRACTOR of any such non-appropriation of funds at the earliest possible date and the services to be provided by the CONTRACTOR under this Agreement shall also be reduced or terminated.

VIII. BILLING PROCEDURES AND LIMITATIONS ON COUNTY'S FINANCIAL RESPONSIBILITY FOR PAYMENT OF SERVICES UNDER FEDERAL SOCIAL SECURITY ACT, TITLE XIX SHORT-DOYLE/MEDI-CAL SERVICES AND/OR TITLE XXI HEALTHY FAMILIES

The Short-Doyle/Medi-Cal (SD/MC) claims processing system enables California county Mental Health Plans (MHPs) to obtain reimbursement of Federal funds for medically necessary specialty mental health services provided to Medi-Cal-eligible beneficiaries diagnosed as Seriously Emotionally Disturbed (SED). The Mental Health Medi-Cal program oversees the SD/MC claims processing system. Authority for the Mental Health Medi-Cal program is governed by Federal and California statutes.

A. If, under this Agreement, CONTRACTOR has Funded Programs that include Short-Doyle/Medi-Cal services, CONTRACTOR shall certify in writing annually, by August 1

Docusign Envelope ID: 46B0A82A-711F-8E3D-83CD-81A6B037CF7A

of each year, that all necessary documentation shall exist at the time any claims for Short-Doyle/Medi-Cal services are submitted by CONTRACTOR to COUNTY.
CONTRACTOR shall be solely liable and responsible for all service data and information submitted by CONTRACTOR.

B. CONTRACTOR acknowledges and agrees that the COUNTY, in undertaking the processing of claims and payment for services rendered under this Agreement for these Funded Programs, does so as the Mental Health Plan for the Federal, State and local governments.

C. CONTRACTOR shall submit to COUNTY all Short-Doyle/Medi-Cal claims or other State required claims data within the thirty (30) calendar daytime frame(s) as prescribed by this Agreement to allow the COUNTY to meet the time frames prescribed by the Federal and State governments. COUNTY shall have no liability for CONTRACTOR'S failure to comply with the time frames established under this Agreement and/or Federal and State time frames, except to the extent that such failure was through no fault of CONTRACTOR.

D. COUNTY, as the Mental Health Plan, shall submit to the State in a timely manner claims for Short-Doyle/Medi-Cal services only for those services/activities identified and entered into the COUNTY'S claims processing information system which are compliant with Federal and State requirements. COUNTY shall make available to CONTRACTOR any subsequent State approvals or denials of such claims upon request by the CONTRACTOR.

E. CONTRACTOR acknowledges and agrees that COUNTY'S final payment for services and activities claimed by CONTRACTOR Short-Doyle/Medi-Cal services is contingent upon reimbursement from the Federal and State governments and that COUNTY'S provisional payment for said services does not render COUNTY in any way responsible for payment of, or liable for, CONTRACTOR'S claims for payment for these services.

F. CONTRACTOR'S ability to retain payment for such services and/or activities is entirely dependent upon CONTRACTOR'S compliance with all laws and regulations related to same.

G. Notwithstanding any other provision of this Agreement, CONTRACTOR shall hold COUNTY harmless from and against any loss to CONTRACTOR resulting from the denial or disallowance of claim(s) for or any audit disallowances related to said services, including any State approved Title XIX Short-Doyle/Medi-Cal and/or Medi-Cal Administrative Activities, by the Federal, State or COUNTY governments, or other applicable payer source, unless the denial or disallowance was due to the fault of the COUNTY.

H. CONTRACTOR shall repay to COUNTY the amount paid by COUNTY to CONTRACTOR for Title XIX Short-Doyle/Medi-Cal and/or Medi-Cal Administrative Activities subsequently denied or disallowed by Federal, State and/or COUNTY government.

Docusign Envelope ID: 46B0A82A-711F-8E3D-83CD-81A6B037CF7A

I. Notwithstanding any other provision of this Agreement, CONTRACTOR agrees that the COUNTY may off set future payments to the CONTRACTOR and/or demand repayment from CONTRACTOR when amounts are owed to the COUNTY pursuant to Subparagraphs G. and H. above. Such demand for repayment and CONTRACTOR'S repayment shall be in accordance with Exhibit I, Section II (Method of Payments for Amounts Due to County) of this Agreement.

J. CONTRACTOR shall comply with all written instructions provided to CONTRACTOR by the COUNTY, State or other applicable payer source regarding claiming and documentation.

K. Nothing in this Section VIII shall be construed to limit CONTRACTOR'S rights to appeal Federal and State settlement and/or audit findings in accordance with the applicable Federal and State regulations.

IX. PATIENT/CLIENT ELIGIBILITY, UMDAP FEES, THIRD PARTY REVENUES, AND INTEREST

A. CONTRACTOR shall comply with all Federal, State and COUNTY requirements and procedures relating to:

2. The eligibility of patients/clients for Short-Doyle/Medi-Cal, Medicaid, Medicare, private insurance, or other third-party revenue, and the collection, reporting and deduction of all patient/client and other revenue for patients/clients receiving services hereunder. B. All fees paid by patients/clients receiving services under this Agreement and all fees paid on behalf of patients/clients receiving services hereunder shall be utilized by CONTRACTOR only for the delivery of mental health service/activities specified in this Agreement.

C. CONTRACTOR may retain unanticipated fee for service program revenue, under this Agreement, provided that the unanticipated revenue is utilized for the delivery of mental health services/activities specified in this Agreement.

D. CONTRACTOR shall not retain any fees paid by any sources for, or on behalf of, Medi-Cal beneficiaries without deducting those fees from the cost of providing those mental health services for which fees were paid.

E. CONTRACTOR may retain any interest and/or return which may be received, earned or collected from any funds paid by COUNTY to CONTRACTOR, provided that CONTRACTOR shall utilize all such interest and return only for the delivery of mental health services/activities specified in this Agreement.

Docusign Envelope ID: 46B0A82A-711F-8E3D-83CD-81A6B037CF7A

F. Failure of CONTRACTOR to report in all its claims and in its Annual Report(s) all fees paid by patients/clients receiving services hereunder, all fees paid on behalf of patients/clients receiving services hereunder, all fees paid by third parties on behalf of Medi-Cal beneficiaries receiving services and/or activities hereunder, and all interest and return on funds paid by COUNTY to CONTRACTOR, shall result in:

1. CONTRACTOR'S submission of a revised claim statement and/or Annual Report(s) showing all such non-reported revenue.
2. A report by COUNTY to State of all such non-reported revenue including any such unreported revenue paid by any sources for or on behalf of Medi-Cal beneficiaries and/or COUNTY'S revision of the Annual Report(s).
3. Any appropriate financial adjustment to CONTRACTOR'S reimbursement.

C. CFA shall consist of, and shall be payable only from, the Maximum Contract Amount for the particular fiscal year in which the related services are to be rendered and upon which the request(s) is (are) based.

D. CFA is intended to provide cash flow to CONTRACTOR pending CONTRACTOR'S rendering and billing of eligible services/activities, as identified in this Exhibit B, Sections III. and V., and COUNTY payment thereof. CONTRACTOR may request each monthly Cash Flow Advance only for such services/activities and only to the extent that there is no reimbursement from any public or private sources for such services/activities.

E. Cash Flow Advance (CFA) Invoice. For each month for which CONTRACTOR is eligible to request and receive a CFA, CONTRACTOR must submit to the COUNTY an invoice of a CFA in a format that is in compliance with the funding source and the amount of CFA CONTRACTOR is requesting. In addition, the CONTRACTOR must submit supporting documentation of expenses incurred in the prior month to receive future CFAs.

F. Upon receipt of the Invoice, COUNTY, shall determine whether to approve the CFA and, if approved, whether the request is approved in whole or in part.

G. If a CFA is not approved, COUNTY will notify CONTRACTOR within ten (10) business days of the decision, including the reason(s) for non-approval. Thereafter, CONTRACTOR may, within fifteen (15) calendar days, request reconsideration of the decision.

EXHIBIT E:
ASSURANCE OF COMPLIANCE WITH MONTEREY COUNTY'S CULTURAL COMPETENCY POLICY

In a culturally competent system, each provider organization shows respect for and responds to individual differences and special needs. Services are provided in the appropriate cultural context and without discrimination related to race, national origin, income level, religion, gender, sexual orientation, age, or physical disability, to name a few. Culturally competent caregivers are aware of the impact of their own culture on their relationships with consumers/families and know about and respect cultural and ethnic differences. They adapt their skills to meet each individual's/family's values and customs. Cultural competence is a developmental and dynamic process – one that occurs over time.

Organizations in a Culturally Competent Service System Promote:

Quality Improvement
- Continuous evaluation and quality improvement
- Supporting evidence-based, promising, community defined, and emerging practices that are congruent with ethnic/racial/linguistic group belief systems, cultural values and help-seeking behaviors.

Collaboration
- Collaborating with Behavioral Health and other community programs
- Resolving barriers to partnerships with other service providers

Access
- Providing new services to unserved and underserved children, youth, adults and/or older adults
- Reducing disparities in access to, and retention in, care as identified in the Mental Health Services Act Plan
- Ensuring representation of mental health services consumers, family members of a mental health services consumer, and/or representatives from unserved communities on their advisory/governance body or committee for development of service delivery and evaluation (with a minimum target of 40%).
- Developing recruitment, hiring, and retention plans that are reflective of the population focus, communities' ethnic, racial, and linguistic populations.

Cultural Competent Services:

- Are available, accessible and welcoming to all clients regardless of race, ethnicity, language, age, and sexual orientation.
- Provide a physical environment that is friendly, respectful and inclusive of all cultures.
- Provide information, resources and reading materials in multilingual formats.
- Promote and foment culturally accepted social interactions, respect and healthy behaviors within the family constellation and service delivery system.

Docusign Envelope ID: 46B0A82A-711F-8E3D-83CD-81A6B037CF7A

- Provide options for services, which are consistent with the client's beliefs, values, healing traditions, including individual preferences for alternative, spiritual and/or holistic approaches to health.
- Offer services in unserved and underserved communities.
- Have services available in the evening and on weekends to ensure maximum accessibility.
- Offer services in Spanish and other necessary languages (such as Tagalog, Vietnamese, Oaxacan, Trique and other languages spoken of Monterey County residents).

Definitions for Cultural Competency

"Cultural Competence" is defined as a set of congruent practice skills, knowledge, behaviors, attitudes, and policies that come together in a system, agency, or among consumer providers, family members, and professionals that enables that system, agency, or those professionals and consumers, and family member providers to work effectively in cross-cultural situations.
(Adapted from Cross, et al., 1989; cited in DMH Information Notice No.02-03).

"Cultural Competence" is a means to eliminating cultural, racial and ethnic disparities. Cultural Competence enhances the ability of the whole system to incorporate the languages, cultures, beliefs and practices of its clients into the service. In this way all clients benefit from services that address their needs from the foundation of their own culture. Strategies for elimination of these disparities must be developed and implemented. Cultural Competence must be supported at all levels of the system.
(CMHDA Framework for Eliminating Cultural, Linguistic, Racial and Ethnic Behavioral Health Disparities)

[Cultural Competency] A set of congruent behaviors, attitudes, and policies that come together in a system, agency or amongst professionals and consumers and enables that system, agency or those professionals and consumers to work effectively in cross-cultural situations.
(Cross, Bazron, Dennis & Issacs, 1989)

The ability to work effectively with culturally diverse clients and communities.
(Randall David, 1994)

CONTRACTOR hereby agrees that it will comply with the principles and guidelines set forth in Monterey County's Health Department – Behavioral Health's Cultural Competency Policy (as outlined above), and will:

1. Develop organizational capacity to provide services in a culturally and linguistically competent manner. This may include: hiring staff with the linguistic capabilities needed to meet the diverse language needs in Monterey County (for example, Spanish, Tagalog, Vietnamese, Oaxacan, Trique, American Sign Language (ASL), Middle Eastern languages); providing staff with training in cultural competency; making services accessible at locations and times that minimize access barriers, and ensuring that staff have an open, welcoming and positive attitude and feel comfortable working with diverse cultures.

2. Create a physical environment that ensures people of all cultures, ages and sexual orientation feel welcome and cared for. This may include: decorating waiting and treatment areas with pictures that reflect the diverse cultures of Monterey County; providing reading materials,

Docusign Envelope ID: 46B0A82A-711F-8E3D-83CD-81A6B037CF7A

resources and magazines in varied languages, at appropriate reading levels and suitable for different age groups, including children and youth; consideration of cultural differences and preferences when offering refreshments; ensuring that any pictures, symbols or materials on display are not unintentionally disrespectful to another culture.

3. Provide a services delivery environment that ensures people of all cultures, ages and sexual orientation feel welcome and cared for. This may include: respect for individual preferences for alternative, spiritual and/or holistic approaches to health; a reception staff that is competent in the different languages spoken by consumers/families; staff that is knowledgeable of cultural and ethnic differences and needs, and is able and willing to respond an appropriate and respectful manner.

4. Support the county's goal to reduce disparities to care by increasing access and retention while decreasing barriers to services by unserved and underserved communities.

5. Include the voice of multi-cultural youth, client and family members, including: monolingual and bilingual clients and family members and representatives from unserved and underserved communities, in the advisory/governance body or committee for development of service delivery, planning and evaluation (County Goal: 40%).

6. Participate in outcome evaluation activities aimed at assessing individual organizations as well as countywide cultural competency in providing mental health services.

7. As requested, meet with the Monterey County Health Department - Behavioral Health Director or designee to monitor progress and outcomes of the project.

8. Ensure that 100% of staff, over a 3 year period, participate in cultural competency training including, but not limited to, those offered by Monterey County Behavioral Health.

Dissemination of these Provisions. CONTRACTOR shall inform all its officers, employees, agents, and subcontractors providing services hereunder of these provisions.

By my signature below, as the authorized representative of the CONTRACTOR named below, I certify acceptance and understanding for myself and the CONTRACTOR of the above provisions.

§ 164.402; however, the term "Breach" as used in this BAA shall also mean the unlawful or unauthorized access to, Use or Disclosure of a patient's "medical information" as defined under Cal. Civil Code § 56.05(j), for which notification is required pursuant to Cal. Health & Safety Code 1280.15, or a "breach of the security of the system" under Cal. Civil Code § 1798.29.

(b) "California Confidentiality Laws" shall mean the applicable laws of the State of California governing the confidentiality, privacy, or security of PHI or other personally identifiable information (PII), including, but not limited to, the California Confidentiality of Medical Information Act (Cal. Civil Code § 56 *et seq.*), the patient access law (Cal. Health & Safety Code § 123100 *et seq.*), the HIV test result confidentiality law (Cal. (c) "Protected Health Information" or "PHI" shall mean any information, whether oral or recorded in any form or medium: (i) that relates to the past, present or future physical or mental condition of an individual; the provision of health care to an individual or the past, present or future payment for the provision of health care to an individual; (ii) that identifies the individual or with respect to which there is a reasonable basis to believe the information that can be used to identify the individual, and (iii) is provided by Covered Entity to Business Associate or created, maintained, received, or transmitted by Business Associate on Covered Entity's behalf. PHI, when used in this BAA, includes EPHI.

(d) "Services" shall mean the services for or functions performed by Business Associate on behalf of Covered Entity pursuant to an underlying services agreement "(Services Agreement") between Covered Entity and Business Associate to which this BAA applies.

2. PERMITTED USES AND DISCLOSURES OF PHI

Unless otherwise limited herein, Business Associate may:

(a) Use or Disclose PHI to perform Services for, or on behalf of, Covered Entity, provided that such Use or Disclosure would not violate the Privacy or Security Rules, this BAA, or California Confidentiality Laws if done by Covered Entity;

(b) Use PHI to provide Data Aggregation Services for the Health Care Operations of Covered Entity, if required by the Services Agreement and as permitted by 45 C.F.R. § 164.504I(2)(i)(B);

(c) Use PHI if necessary for the proper management and administration of Business Associate or to carry out the legal responsibilities of Business Associate as permitted by 45 C.F.R. § 164.504I(4)(i);

(d) Disclose PHI for the proper management and administration of Business Associate or to carry out the legal responsibilities of Business Associate as permitted under 45 C.F.R. § 164.504I(4)(ii), provided that Disclosures are Required by Law, or Business Associate obtains reasonable assurances from the person to whom the information is Disclosed that it will remain confidential and be Used or further Disclosed only as Required by Law or for the purpose for which it was Disclosed to the person, and that such person will notify the Business Associate of any instances of which such person is aware that the confidentiality of the information has been

breached; and

(e) Use PHI to report violations of law to appropriate Federal and state authorities, consistent with 45 C.F.R. § 164.502(j)(1).

3. RESPONSIBILITIES OF THE PARTIES WITH RESPECT TO PHI

3.1. Responsibilities of Business Associate. Business Associate shall:

(a) Notify the Privacy Officer of Covered Entity, in writing, of: (i) any Use and/or Disclosure of the PHI that is not permitted by this BAA; (ii) any Security Incident of which Business Associate becomes aware; and (iii) any suspected Breach. Such notice shall be provided within five (5) business days of Business Associate's discovery of such unauthorized access, acquisition, Use and/or Disclosure, Security Incident, or suspected Breach. Notwithstanding the foregoing, the Parties acknowledge the ongoing existence and occurrence of attempted but ineffective Security Incidents that are trivial in nature, such as pings and other broadcast service attacks, and unsuccessful log-in attempts. The Parties acknowledge and agree that this Section 3.1(a) constitutes notice by Business Associate to Covered Entity of such ineffective Security Incidents and no additional notification to Covered Entity of such ineffective Security Incidents is required, provided that no such Security Incident results in unauthorized access, acquisition, Use or Disclosure of PHI. For the avoidance of doubt, a ransomware attack shall not be considered an ineffective Security Incident and shall be reported to Covered Entity, irrespective of whether such Security Incident results in a Breach. Business Associate shall investigate each Security Incident or unauthorized access, acquisition, Use, or Disclosure of PHI, or suspected Breach that it discovers and shall provide a summary of its investigation to Covered Entity, upon request;

(i) If Business Associate or Covered Entity determines that such Security Incident or unauthorized access, acquisition, Use, or Disclosure, or suspected Breach constitutes a Breach, then Business Associate shall provide a supplemental written report in accordance with 45 C.F.R. § 164.410I, which shall include, to the extent possible, the identification of each individual whose PHI has been, or is reasonably believed by the Business Associate to have been, accessed, acquired, Used or Disclosed during the Breach, to Covered Entity without unreasonable delay, but no later than five (5) business days after discovery of the Breach;

(ii) In consultation with Covered Entity, Business Associate shall promptly mitigate, to the extent practicable, any harmful effect that is known to the Business Associate of such improper access, acquisition, Use, or Disclosure, Security Incident, or Breach; and

(iii) Covered Entity shall have sole control over the timing and method of providing notification of such Breach to the affected individual(s), the appropriate government agencies, and other persons required by law to be notified. Business Associate shall assist with any notifications, as requested by Covered Entity. Business Associate shall take prompt corrective action, including any action required by applicable State or federal laws and regulations relating to such Security Incident or non- permitted access, acquisition, Use, or Disclosure. Business Associate shall reimburse Covered Entity for its reasonable costs and expenses in providing notification to affected individuals, appropriate government agencies, and any other persons required by law to be notified (e.g., without limitation, the media or consumer reporting agencies), including, but not limited to, any administrative costs associated with providing notice, printing and mailing costs, public relations costs, attorney fees, and costs of mitigating the harm (which may

Docusign Envelope ID: 46B0A82A-711F-8E3D-83CD-81A6B037CF7A

include the costs of obtaining up to one (1) year of credit monitoring services and identity theft insurance) for affected individuals whose PHI or other PII has or may have been compromised as a result of the Breach.

(b) Implement appropriate administrative, physical, and technical safeguards and comply with the Security Rule and industry best practices to prevent Use and/or Disclosure of EPHI other than as provided for by this BAA;

(c) Obtain and maintain a written agreement with each of its Subcontractors that creates, receives, maintains, or transmits PHI that requires each such Subcontractor to adhere to restrictions and conditions that are at least as restrictive as those that apply to Business Associate pursuant to this BAA. Upon request, Business Associate shall provide Covered Entity with copies of its written agreements with such Subcontractors;

(d) Make available all internal practices, records, books, agreements, policies and procedures and PHI relating to the Use and/or Disclosure of PHI received from, created, maintained, or transmitted by Business Associate on behalf of Covered Entity to the Secretary of the Department of Health and Human Services ("Secretary") in a time and manner designated by the Secretary for purposes of determining Covered Entity's or Business Associate's compliance with HIPAA. Business Associate shall immediately notify Covered Entity of any such requests by the Secretary and, upon Covered Entity's request, provide Covered Entity with any copies of documents Business Associate provided to the Secretary. In addition, Business Associate shall promptly make available to Covered Entity such practices, records, books, agreements, policies and procedures relating to the Use and Disclosure of PHI for purposes of determining whether Business Associate has complied with this BAA or maintains adequate security safeguards, upon reasonable request by Covered Entity. The fact that Covered Entity has the right to inspect, inspects, or fails to inspect Business Associate's internal practices, records, books, agreements, policies and procedures does not relieve Business Associate of its responsibility to comply with this BAA, regardless of whether Covered Entity detects or fails to detect a violation by Business Associate, nor does it constitute Covered Entity's acceptance of such practices or waiver of Covered Entity's rights under this BAA;

(e) Document Disclosures of PHI and information related to such Disclosure and, within twenty (20) days of receiving a written request from Covered Entity, provide to Covered Entity such information as is requested by Covered Entity to permit Covered Entity to respond to a request by an individual for an accounting of the Disclosures of the individual's PHI in accordance with 45 C.F.R. § 164.528 and the HITECH Act. At a minimum, the Business Associate shall provide Covered Entity with the following information: (i) the date of the Disclosure; (ii) the name of the entity or person who received the PHI, and if known, the address of such entity or person; (iii) a brief description of the PHI Disclosed; and (iv) a brief statement of the purpose of such Disclosure which includes an explanation of the basis for such Disclosure. In the event the request for an accounting is delivered directly to the Business Associate, the Business Associate shall, within ten (10) days, forward such request to Covered Entity. The Business Associate shall implement an appropriate recordkeeping process to enable it to comply with the requirements of this Section;

(f) Subject to Section 4.4 below, return to Covered Entity in a mutually agreeable format and medium, or destroy, within thirty (30) days of the termination of this BAA, the PHI in its possession and retain no copies, including backup copies;

Docusign Envelope ID: 46B0A82A-711F-8E3D-83CD-81A6B037CF7A

(g) Use, Disclose to its Subcontractors or other third parties, and request from Covered Entity, only the minimum PHI necessary to perform or fulfill a specific function required or permitted hereunder;

(h) If all or any portion of the PHI is maintained in a Designated Record Set;

(i) Upon ten (10) days' prior written request from Covered Entity, provide access to the PHI to Covered Entity, or to the individual, if so directed by Covered Entity, to meet a request by an individual under 45 C.F.R. § 164.524 or California Confidentiality Laws. Business Associate shall notify Covered Entity within five (5) days of its receipt of a request for access to PHI from an individual; and

(ii) Upon ten (10) days' prior written request from Covered Entity, make any amendment(s) to the PHI that Covered Entity directs pursuant to 45 C.F.R. § 164.526. Business Associate shall notify Covered Entity within five (5) days of its receipt of a request for amendment of PHI from an individual.

(i) If applicable, maintain policies and procedures to detect and prevent identity theft in connection with the provision of the Services, to the extent required to comply with the Red Flag Rules;

(j) To the extent that Business Associate carries out one or more of Covered Entity's obligations under the Privacy Rule, Business Associate shall comply with the requirements of the Privacy Rule that apply to Covered Entity in the performance of such obligations;

(k) Unless prohibited by law, notify Covered Entity as soon as possible and in no case later than five (5) days after the Business Associate's receipt of any request or subpoena for PHI. To the extent that Covered Entity decides to assume responsibility for challenging the validity of such request, the Business Associate shall cooperate fully with Covered Entity in such challenge; and

(l) Maintain policies and procedures materially in accordance with HIPAA and California Confidentiality Laws and industry standards designed to ensure the confidentiality, availability, and integrity of Covered Entity's data and protect against threats or vulnerabilities to such data.

3.2 <u>Business Associate Acknowledgment</u>.

(a) Business Associate acknowledges that, as between the Business Associate and Covered Entity, all PHI shall be and remain the sole property of Covered Entity.

(b) Business Associate is not permitted to Use PHI to create de- identified information except as approved in writing by Covered Entity.

(c) Business Associate further acknowledges that it is obligated by law to comply, and represents and warrants that it shall comply, with HIPAA. Business Associate shall comply with all California Confidentiality Laws, to the extent that such state laws are not preempted by HIPAA.

Docusign Envelope ID: 46B0A82A-711F-8E3D-83CD-81A6B037CF7A

(d) Business Associate further acknowledges that Uses and Disclosures of PHI must be consistent with Covered Entity's privacy practices, as stated in Covered Entity's Notice of Privacy Practices. The current Notice of Privacy Practices can be retrieved online from the Covered Entity's webpage. Business Associate agrees to review the Notice of Privacy Practices at this URL at least once annually while doing business with Covered Entity to ensure it remains updated on any changes to the Notice of Privacy Practices Covered Entity may make.

3.3 Responsibilities of Covered Entity. Covered Entity shall notify Business Associate of any (i) changes in, or withdrawal of, the authorization of an individual regarding the Use or Disclosure of PHI provided to Covered Entity pursuant to 45 C.F.R. § 164.508, to the extent that such changes may affect Business Associate's Use or Disclosure of PHI; or (ii) restrictions on Use and/or Disclosure of PHI as provided for in 45 C.F.R. § 164.522 agreed to by Covered Entity, to the extent that such restriction may affect Business Associate's Use or Disclosure of PHI.

4. TERM AND TERMINATION

4.1 Term. This BAA shall become effective on the Effective Date and shall continue in effect until all of the PHI provided by Covered Entity to Business Associate, or created or received by Business Associate on behalf of Covered Entity, is destroyed or returned to Covered Entity, or if it is infeasible to return or destroy PHI, protections are extended to such PHI, in accordance with the termination provisions in Section 4.4. Certain provisions and requirements of this BAA shall survive its expiration or other termination as set forth in Section 5 herein.

4.2 Termination. If Covered Entity determines in good faith that Business Associate has breached a material term of this BAA, Covered Entity may either: (i) immediately terminate this BAA and any underlying Services Agreement without penalty; or (ii) terminate this BAA and any underlying Services Agreement within thirty (30) days of Business Associate's receipt of written notice of such breach, if the breach is not cured to the satisfaction of Covered Entity.

4.3 Automatic Termination. This BAA shall automatically terminate without any further action of the Parties upon the termination or expiration of all Services Agreements between Covered Entity and Business Associate that would necessitate having this BAA in place.

4.4 Effect of Termination. Upon termination or expiration of this BAA for any reason, Business Associate shall return or destroy all PHI pursuant to 45 C.F.R. § 164.504I(2)(ii)(J) if, and to the extent that, it is feasible to do so. Prior to returning or destroying the PHI, Business Associate shall recover any PHI in the possession of its Subcontractors. Business Associate shall certify in writing that all PHI has been returned or securely destroyed, and no copies retained, upon Covered Entity's request. To the extent it is not feasible for Business Associate to return or destroy any portion of the PHI, Business Associate shall notify Covered Entity in writing of the condition that makes return or destruction infeasible. If Covered Entity agrees that return or destruction of the PHI is infeasible, as determined in its sole discretion, Business Associate shall: (i) retain only that PHI which is infeasible to return or destroy; (ii) return to Covered Entity the remaining PHI that the Business Associate maintains in any form; (iii) continue to extend the protections of this BAA to the PHI for as long as Business Associate retains PHI; (iv) limit further Uses and Disclosures of such PHI to those purposes that make the return or destruction of the PHI not feasible and subject to the same conditions as set out in Sections 2 and 3 above, which applied prior to termination; and

Docusign Envelope ID: 46B0A82A-711F-8E3D-83CD-81A6B037CF7A

(v) return to Covered Entity the PHI retained by Business Associate when such return is no longer infeasible.

5. MISCELLANEOUS

5.1 Survival. The obligations of Business Associate under the provisions of Sections 3.1, 3.2, and 4.4 and Article 5 shall survive termination of this BAA until such time as all PHI is returned to Covered Entity or destroyed.

5.2 Amendments; Waiver. This BAA may not be modified or amended, except in a writing duly signed by authorized representatives of the Parties. To the extent that any relevant provision of HIPAA or California Confidentiality Laws is materially amended in a manner that changes the obligations of the Parties, the Parties agree to negotiate in good faith appropriate amendment(s) to this BAA to give effect to the revised obligations. Further, no provision of this BAA shall be waived, except in a writing duly signed by authorized representatives of the Parties. A waiver with respect to one event shall not be construed as continuing, or as a bar to or waiver of any right or remedy as to subsequent events.

5.3 No Third Party Beneficiaries. Nothing express or implied in this BAA is intended to confer, nor shall anything herein confer, upon any person other than the Parties and the respective successors or assigns of the Parties, any rights, remedies, obligations, or liabilities whatsoever.

5.5 Counterparts; Facsimiles. This BAA may be executed in any number of counterparts, each of which shall be deemed an original. Facsimile and electronic copies hereof shall be deemed to be originals.

5.6 Relationship of Parties. Notwithstanding anything to the contrary in the Services Agreement, Business Associate is an independent contractor and not an agent of Covered Entity under this BAA. Business Associate has the sole right and obligation to supervise, manage, contract, direct, procure, perform, or cause to be performed all Business Associate obligations under this BAA.

5.7 Choice of Law; Interpretation. This BAA shall be governed by the laws of the State of California. Any ambiguities in this BAA shall be resolved in a manner that allows Covered Entity and Business Associate to comply with HIPAA and the California Confidentiality Laws.

5.8 Indemnification. Business Associate shall indemnify, defend, and hold harmless the County of Monterey (the "County"), its officers, agents, and employees from any claim, liability, loss, injury, cost, expense, penalty or damage, including costs incurred by the County with respect to any investigation, enforcement proceeding, or third party action, arising out of, or in connection with, a violation of this BAA, HIPAA or California Confidentiality Laws, or a Breach that is attributable to an act or omission of Business Associate and/or its agents, members, employees, or Subcontractors, excepting only loss, injury, cost, expense, penalty or damage caused by the negligence or willful misconduct of personnel employed by the County. It is the intent of the Parties to provide the broadest possible indemnification for the County. This provision is in addition to, and independent of, any indemnification provision in any Services Agreement between the Parties.

5.9 Applicability of Terms. This BAA applies to all present and future Services Agreements and business associate relationships, written or unwritten, formal or informal, in which Business Associate creates, receives, transmits, or maintains any PHI for or on behalf of Covered Entity in any form whatsoever. This BAA shall automatically be incorporated in all subsequent agreements between Business Associate and Covered Entity involving the Use or Disclosure of PHI whether or not specifically referenced therein. In the event of any conflict or inconsistency between a provision of this BAA and a provision of any other agreement between Business Associate and Covered Entity, the provision of this BAA shall control unless the provision in such other agreement establishes additional rights for Business Associate or additional duties for or restrictions on Business Associate with respect to PHI, in which case the provision of such other agreement will control.

5.10 Insurance. In addition to any general and/or professional liability insurance required of Business Associate under the Services Agreement, Business Associate agrees to obtain and maintain, at its sole expense, liability insurance on an occurrence basis, covering any and all claims, liabilities, demands, damages, losses, costs expenses, fines, and compliance costs arising from a breach of the obligations of Business Associate, its officers, employees, agents and Subcontractors under this BAA. Without limiting the foregoing, at a minimum, Business Associate's required insurance under this Section shall include cyber liability insurance covering breach notification expenses, network security and privacy liability. The insurance coverage limits, per claim and in the aggregate, shall not be less than the following amounts based upon the number of unique patient served under this agreement:

Docusign Envelope ID: 46B0A82A-711F-8E3D-83CD-81A6B037CF7A

12,001 – 30,000	$3,000,000
30,001 – 60,000	$5,000,000
More than 60,000	$10,000,000

If the Business Associate maintains broader coverage and/or higher limits than these minimums, the Covered Entity requires, and shall be entitled to, the broader coverage and/or the higher limits maintained by the Business Associate. Any available insurance proceeds in excess of the specified minimum limits of insurance and coverage shall be available to the Covered Entity. Such insurance coverage will be maintained for the term of this BAA, and a copy of such policy or a certificate evidencing the policy shall be provided to Covered Entity at Covered Entity's request.

5.11 Legal Actions. Promptly, but no later than five (5) calendar days after notice thereof, Business Associate shall advise Covered Entity of any actual or potential action, proceeding, regulatory or governmental orders or actions, or any material threat thereof that becomes known to it that may affect the interests of Covered Entity or jeopardize this BAA, and of any facts and circumstances that may be pertinent to the prosecution or defense of any such actual or potential legal action or proceeding, except to the extent prohibited by law. This includes, without limitation, any allegation that Business Associate has violated HIPAA or other federal or state privacy or security laws.

5.12 Audit or Investigations. EXHIBIT I: AUDITS AND AUDIT APPEALS

I. AUDITS AND AUDIT APPEALS

A. At any time during the term of this Agreement or after the expiration or termination of this Agreement, in accordance with Federal and State law including but not limited to the California Welfare and Institutions Code (WIC) Sections 14170 et seq., authorized representatives from the Federal governments, State or COUNTY may conduct an audit of CONTRACTOR regarding the services/activities provided under the fiscal year(s) for which the audit is outstanding. In addition, contract compliance audits or reviews may be conducted by the County of Monterey Auditor-Controller's Office or designated representative. Furthermore, the California State Controller Office performs audits of the mandated cost claims for the seriously emotionally disturbed pupils for the Out-of-State Mental Health Services Program and Handicapped and Disabled Students Programs. The Centers for Medicare and Medicaid Services (CMS) also perform audits of the Certified Public Expenditure (CPE) processes, negotiated rate audit information, and other issues.

B. Settlement of audit findings shall be conducted according to the auditing party's procedures in place at the time of the audit.

C. In the case of a Federal Government or State audit, COUNTY may perform a post-audit based on Federal or State audit findings. Such post-audit shall take place when the Federal Government or State initiates its settlement action, which customarily is after the issuance of the audit report by the Federal Government or State and before the Federal Government or State's audit appeal process.

    1. If the Federal Government or State stays its collection of any amounts due or payable because of the audit findings, COUNTY shall also stay its settlement of the same amounts due or payable until the responsible auditing party initiates its settlement action with COUNTY.

    2. COUNTY shall follow all applicable Federal, State and local laws, regulations manuals, guidelines and directives in recovering from CONTRACTOR any amount due to the COUNTY.

    3. COUNTY shall issue an invoice to CONTRACTOR for any amount due to the COUNTY no later than ninety (90) calendar days after the Federal or State issues its audit settlement letter to the COUNTY. CONTRACTOR shall make payment to the COUNTY in accordance with the terms of Section II (Method of Payments for Amounts Due to COUNTY) of this Exhibit I. Said payment shall be submitted to the person and at the address identified in the COUNTY invoice.

D. CONTRACTOR may appeal any such audit findings in accordance with the audit appeal process established by the party performing the audit.

    1. For Federal audit exceptions, Federal audit appeal processes shall be followed.

Docusign Envelope ID: 46B0A82A-711F-8E3D-83CD-81A6B037CF7A

2. CONTRACTOR may appeal the State audit findings in conformance with provisions of Sections 51016 et seq. of Title 22 of the California Code of Regulations. Such appeals must be filed through COUNTY. COUNTY shall notify CONTRACTOR of State appeal deadlines after COUNTY'S receipt from State of the audit report.

3. If at any time the Appeal process results in a revision to the audit findings, and the Federal Government or State recalculates the final settlement with COUNTY, COUNTY may perform a post-audit based on the Federal or State revised findings after the Federal Government or State has issued its revised settlement with the COUNTY, based on such re-computed final settlement.

   a. If the re-computed final settlement results in amounts due to CONTRACTOR by the COUNTY, COUNTY shall make such payments to CONTRACTOR within thirty (30) calendar days of issuing the revised settlement amount to the CONTRACTOR.

   b. If the re-computed final settlement results in amounts due from CONTRACTOR to the COUNTY, CONTRACTOR shall make payment to the COUNTY within thirty (30) days that the COUNTY issues its invoice to the CONTRACTOR.

E. Notwithstanding any other provisions of this Agreement, if CONTRACTOR appeals any audit report, the appeal shall not prevent the COUNTY from recovering from CONTRACTOR any amount owed by CONTRACTOR that the Federal Government or State has recovered from COUNTY.

F. Should the auditing party be the COUNTY, CONTRACTOR shall have thirty (30) calendar days from the date of the audit report with in which to file an appeal with COUNTY. The letter providing the CONTRACTOR with notice of the audit findings shall indicate the person(s) and address to which the appeal should be directed. COUNTY shall consider all information provided by CONTRACTOR with its appeal, and shall issue its decision on the appeal after such consideration. Such decision is final. COUNTY shall issue an invoice for any amount due COUNTY fifteen (15) calendar days after COUNTY has notified CONTRACTOR of the COUNTY'S audit appeal findings. CONTRACTOR shall make payment to the COUNTY in accordance with the terms of Section II (Method of Payments for Amounts Due to COUNTY) of this Exhibit I. Said payment shall be submitted to the person and at the address identified in the COUNTY invoice.

II. METHOD OF PAYMENTS FOR AMOUNTS DUE TO COUNTY

A. Within ten (10) business days after written notification by COUNTY to CONTRACTOR of any amount due by CONTRACTOR to COUNTY, CONTRACTOR shall notify COUNTY as to which of the following five (5) payment options CONTRACTOR requests be used as the method by which such amount shall be recovered by COUNTY.

   Any such amount shall be:

   1. Paid in one cash payment by CONTRACTOR to COUNTY;

Docusign Envelope ID: 46B0A82A-711F-8E3D-83CD-81A6B037CF7A

2. Deducted from future claims over a period not to exceed six (6) months;

3. Deducted from any amounts due from COUNTY to CONTRACTOR whether under this Agreement or otherwise;

4. Paid by cash payment(s) by CONTRACTOR to COUNTY over a period not to exceed six (6) months; OR

5. A combination of any or all of the above.

B. If CONTRACTOR does not so notify COUNTY within such ten (10) days, or if CONTRACTOR fails to make payment of any such amount to COUNTY as required, then Director, in his sole discretion, shall determine which of the above five (5) payment options shall be used by COUNTY for recovery of such amount from CONTRACTOR.

Purpose: Demonstrate CONTRACTOR's telehealth compliance with federal & state telehealth laws

A. Federal Telehealth Law

There are no specific federal laws governing the delivery of telehealth related to compliance, but there are numerous laws requiring telehealth reimbursement parity with face-to-face services. However, in parity with on-ground mental health services, Telehealth 'covered entities' are required to uphold federally-established HIPAA regulations according to the Health Insurance Portability and Accountability Act of 1996.

HIPAA Regulations: In addition to standard operations, HIPAA security guidelines for the electronic delivery of telehealth services have been established by HITECH (Health Information Technology for Economic and Clinical Health) as part of the American Recovery and Reinvestment Act of 2009 (ARRA). Specifically, CONTRACTOR Telehealth technologies and operational standards conform to HITECH guidelines for HIPAA compliance through:

1. **Technology Security**
    a. IETF-standard Secure Sockets Layer (SSL) and Transport Layer Security (TLS) protocols are used to protect all communication between endpoints. To provide maximum protection against eavesdropping, modification, or replay attacks, the only SSL cipher suite supported for non-Web-site TCP connections is 1024-bit RSA with 128-bit AES-CBC and HMAC-SHA1
    b. End-to-end 128 bit encryption that protects both ends of the connection
    c. Multi-layer cryptography, server, certificate, and user authentication prevent unauthorized access
2. **Role-based Security Features**
    a. Platform user permissions are centrally assigned to approved providers by the CONTRACTOR's Director of Operations only (controlled access to platform)
    b. Each session has a uniquely coded session ID that is not reusable
    c. No one else can enter the session uninvited (including staff members)
3. **Security Monitoring**
    a. occurs simultaneously on three levels, 1) CONTRACTOR Provider; 2) Facility; and 3) Behavioral Health
    b. Provider has on-screen monitoring tools to see who is connected to the session at all times
    c. Facility and BH monitors daily activity plus comprehensive data logs to ensure appropriate, secure use of system
    d. CONTRACTOR Data Centers are physically guarded and continually monitored for security and performance, guarding against cyber attacks
4. **Information Access**
    a. Communications and user identities are NEVER visible to any third party

Docusign Envelope ID: 46B0A82A-711F-8E3D-83CD-81A6B037CF7A

b. User logs and activity is not visible to anyone but the CONTRACTOR Director of Operations

c. Sessions are not recorded

d. Contingency and Emergency Operations Plan

5. **Stringent Policies and Procedures**

a. Extensive training plus CONTRACTOR policies and procedures for clinicians governing use of the platform, their behavior online, and how they access and manage client information.

b. We also work closely with clients to ensure their compliance to HIPAA confidentiality measures (such as confirming no one can overhear their session, confirming they are in a secure and private location, etc.

B. **California Telehealth Law**

California was one of the earliest adopters of a state telehealth policy with the passing of The Telemedicine Development Act of 1996, which established a legal requirement to recognize telehealth services as equivalent to face to face services, and for such services to be reimbursable by both Medi-Cal and Medicare, as well as commercial insurers.

Current and relevant CA telehealth codes/laws include:

• **Cal. Health & Safety Code § 1374.13. (c)** - On and after January 1, 1997, no health care service plan contract that is issued, amended, or renewed shall require face-to-face contact between a health care provider and a patient for services appropriately provided through telemedicine, subject to all terms and conditions of the contract agreed upon between the enrollee or subscriber and the plan.

• **Cal. Health & Safety Code § 14132.72. (a)** - It is the intent of the Legislature to recognize the practice of telemedicine as a legitimate means by which an individual may receive medical services from a health care provider without person-to-person contact with the provider.

• **AB 415 (2012)** – Was passed to facilitate the advancement of telehealth as way of providing health services. The law established that telehealth services may consist of a real-time (synchronous) interaction between a patient and a health care provider located at a distant site or may involve the transmission of a patient's medical information from patient's site to a distant site without the presence of the patient ("asynchronous store and forward"). The law also affirmed that the use of telehealth includes allied health professions such as mental health practitioners. (See Cal. Bus. & Prof. Code § 2290.5).

• **AB 809 (2015)** - Provided that informed consent for telehealth services may be verbal only, although USCTH still obtains written consent and acknowledgement of telehealth service delivery as a "best practice".

Additional Important Telehealth Facts:

California law considers telehealth equivalent to in-person services ... Regulations established by The Telemedicine Development Act of 1996 focus on the prompt and equivalent payment for telemedicine services by contracting entities to uphold the law's intention that **telemedicine/telehealth be recognized as a legitimate means of service delivery the same as face-to-face services for all services that are possible through a telehealth platform.**

Docusign Envelope ID: 46B0A82A-711F-8E3D-83CD-81A6B037CF7A

Allied health professions are covered under the law ... Please note that the language from the Telemedicine Development Act of 1996 (Senate Bill 1665) was updated in 2012 to "**telehealth**" instead of telemedicine and covers **allied health** professions in addition to medical services.

CMS has a history of paying for telehealth services ... For informational purposes, a recent article in *healthitoutcomes.com – May, 28, 2015* – states "Total reimbursements for telemedicine by the Centers for Medicare & Medicaid Services reached $13.9 million in 2014."

II. Program Overview:

Objective

CalMHSA shall administer this Program to assist participating counties in conducting concurrent review and authorization for all psychiatric inpatient hospital and psychiatric health facility services on behalf of participating California County Mental Health Plans ("MHPs").

Per the Department of Health Care Services ("DHCS") Behavioral Health Information Notice ("BHIN") 19-026 and BHIN 22-017, MHPs are required to conduct concurrent review and authorization for all psychiatric inpatient hospital services and psychiatric health facility services. These BHINs outline policy changes implemented to ensure an MHPs' compliance with the Parity in Mental Health and Substance Use Disorder Services Final Rule (Parity Rule; Title 42 of the CFR, part 438.910).

By utilizing a technology-assisted concurrent review process, a consistent and efficient review process will support MHP compliance with BHINs 19-026, 22-017, 26-001, 26-002 (and any additional or superseding BHIN), and the Parity in Mental Health and Substance Use Disorder Services Final Rule (Parity Rule; Tittle 42 of the CFR, part 438.910).

Services

CalMHSA has entered into a services contract ("Service Agreement") with Acentra Health, LLC (formerly known as Kepro/Keystone Peer Review Organization, Inc. ("Contractor")) to provide participating counties a web-enabled utilization review platform and clinical services to carry out psychiatric inpatient concurrent review and authorization services on behalf of multiple California County MHPs.

CalMHSA shall work closely with Contractor to coordinate implementation and onboarding of participating counties. Participants shall submit their Monthly MEDS Extract File ("MMEF") to Contractor via secure transfer utilizing Dropbox or a successor application, as determined by CalMHSA. For Participants utilizing the SmartCare electronic health record, Participant authorizes CalMHSA to import Participant's MMEF data from Participant's CalMHSA SmartCare instance, or any other data sources as otherwise agreed upon between CalMHSA and Participant, directly to Dropbox.

MHPs delegating concurrent review and authorization services to Contractor will range in size from small/rural to large counties and will be located throughout California. Although the review and authorization requirements are uniform, the communication practices may vary, as agreed upon, to accommodate the operational needs of the participating counties or inpatient psychiatric hospitals where county beneficiaries are hospitalized.

b. Authorize the Director of the Department of Social Services or designee to sign up to three amendments to this Agreement where the total amendments do not exceed 10% ($66,000) of the amended contract amount, do not significantly change the scope of work, and do not exceed the maximum aggregate amount of $726,000.

RECOMMENDATION:
It is recommended that the Board of Supervisors:
a. Approve and authorize the Director of the Department of Social Services or designee to sign an agreement with Learning Time Inc. for the provision of Learning Disabilities, Evaluations and Academic Achievement Coaching for the period of July 1, 2026 through June 30, 2029, in the amount of $660,000; and
b. Authorize the Director of the Department of Social Services or designee to sign up to three amendments to this Agreement where the total amendments do not exceed 10% ($66,000) of the amended contract amount, do not significantly change the scope of work, and do not exceed the maximum aggregate amount of $726,000.

SUMMARY:
The Department is seeking to renew their contract with Learning Time, Inc. to provide learning disability (LD) evaluation and tutoring services to adult participants in the CWES Welfare-to-Work (WTW) program. The purpose of the LD evaluation in the CalWORKs program is to determine whether an individual has a learning disability that interferes with his or her ability to work and/or participate in other WTW activities.
DISCUSSION:
CalWORKs provides temporary financial assistance and other services to economically disadvantaged families with dependent children. The program is designed to assist families toward a path of work and self-sufficiency. As a condition of eligibility for CalWORKs, adults are required to work, or to participate in WTW activities that will increase their employability and move them toward earning enough money to support their family.
The CalWORKs Employment Services (CWES) program requires that the County offer a learning disability screening to all adult CWES participants. Those who score "12" or more on a standardized

and normed screening tool are then offered a learning disability evaluation that identifies the specific learning disabilities and recommended accommodations. This agreement is for the provision of learning disability evaluations and related services for the CWES Welfare-to-Work (WTW) program, including, but not limited to, direct instruction to individuals and groups to relieve identified disabilities that prevent success in meeting WTW goals and the participation in Multidisciplinary Team (MDT) meetings to assist customers in the CalWORKs Family Stabilization program.
This contract provides for the provision of LD evaluation services to identify customers with learning needs, determine if accommodations are necessary for the individual to effectively participate in the WTW program, provide individual academic achievement coaching/tutoring to eligible individuals, provide lab/group workshops to eligible individuals with common goals and needs, provide training to CWES staff to help them identify indicators of possible learning needs and how to discuss the topic with WTW participants, and provide ongoing presentations to WTW Job Search Workshop (JSW) participants on the identification and impacts of learning needs on their life.
This agreement was awarded through a formal Request for Proposal (RFP#10968) process in March 2026.

OTHER AGENCY INVOLVEMENT/COMMITTEE ACTIONS:
The Office of County Counsel has reviewed and approved the Agreements as to form, as has the Auditor-Controller's Office as to financial provisions.

FINANCING:
This agreement is funded with Family Stabilization Allocation funding. Sufficient appropriations and estimated revenues of $220,000 are included in the FY 2026-27 Recommended Budget and FY 2027-28 and FY 2028-29 will incorporate total appropriations and revenues of $440,000 in the corresponding future budgets.
BOARD OF SUPERVISORS STRATEGIC PLAN GOALS:
This agreement correlates to the Well-Being and Quality of Life as well as the Diverse and Thriving Economy Strategic Plan Goals adopted by the Board of Supervisors by providing tools and services designed to help CalWORKs and Employment Services customers overcome educational and learning challenges and move toward self-sufficiency meeting a key objective for services.

9.04 **Other Requirements:**

All insurance required by this Agreement shall be with a company acceptable to the County and issued and executed by an admitted insurer authorized to transact Insurance business in the State of California. Unless otherwise specified by this Agreement, all such insurance shall be written on an occurrence basis, or, if the policy is not written on an occurrence basis, such policy with the coverage required herein shall continue in effect for a period of three years following the date CONTRACTOR completes its performance of services under this Agreement.

Each liability policy shall provide that the County shall be given notice in writing at least thirty days in advance of any endorsed reduction in coverage or limit, cancellation, or intended non-renewal thereof. Each policy shall provide coverage for Contractor and additional insureds with respect to claims arising from each subcontractor, if any, performing work under this Agreement, or be accompanied by a certificate of insurance from each subcontractor showing each subcontractor has identical insurance coverage to the above requirements.

Additional Insured Status:

The County of Monterey, its officers, officials, employees, agents, and volunteers are to be covered as additional insureds on the auto liability policy for liability arising out of automobiles owned, leased, hired or borrowed by or on behalf of the Contractor. Auto liability coverage shall be provided in the form of an endorsement to the CONTRACTOR'S insurance.

The County of Monterey, its officers, officials, employees, agents, and volunteers are to be covered as additional insureds on the commercial general liability policy with respect to liability arising out of work or operations performed by or on behalf of the CONTRACTOR including materials, parts, or equipment furnished in connection with such work or operations. Primary Coverage:

For any claims related to this contract, the CONTRACTOR'S insurance coverage shall be primary and non-contributory and at least as broad as ISO CG 20 01 04 13 as respects the County, its officers, officials, employees, agents, and volunteers. Any insurance or self-insurance maintained by the County, its officers, officials, employees, agents, or volunteers shall be excess of the CONTRACTOR'S insurance and shall not contribute with it. This requirement shall also apply to any Excess or Umbrella liability policies.

Workers' Compensation Insurance Waiver of Subrogation:

The Workers' Compensation Insurance policy required hereunder shall be endorsed to state that the Workers' Compensation Insurance carrier waives its right of subrogation against County, its officers, officials, employees, agents, or volunteers, which might arise by reason of payment under such policy in connection with performance under this Agreement by CONTRACTOR. Should CONTRACTOR be self-insured for Workers' Compensation Insurance, CONTRACTOR hereby agrees to waive its right of subrogation against County, its officers, officials, employees, agents, or volunteers.

Docusign Envelope ID: D5048F0E-64E7-8FF7-81C8-ED2DDDE0D83C

Prior to the execution of this Agreement by the County, CONTRACTOR shall file certificates of insurance and endorsements with the County's contract administrator and County's Contracts/Purchasing Division, showing that the CONTRACTOR has in effect the insurance required by this Agreement. The CONTRACTOR shall file a new or amended certificate of insurance within five (5) calendar days after any change is made in any insurance policy, which would alter the information on the certificate then on file. Acceptance or approval of insurance shall in no way modify or change the indemnification clause in this Agreement, which shall continue in full force and effect. CONTRACTOR shall always during the term of this Agreement maintain in force the insurance coverage required under this Agreement and shall send, without demand by County, annual certificates to County's Contract Administrator and County's Contracts/Purchasing Division. If the certificate is not received by the expiration date, County shall notify CONTRACTOR and CONTRACTOR shall have five calendar days to send in the certificate, evidencing no lapse in coverage during the interim. Failure by CONTRACTOR to maintain such insurance is a default of this Agreement, which entitles County, at its sole discretion, to terminate this Agreement immediately.

10.0 RECORDS AND CONFIDENTIALITY:

10.01 **Confidentiality:** CONTRACTOR and its officers, employees, agents, and subcontractors shall comply with any and all federal, state, and local laws, which provide for the confidentiality of records and other information. CONTRACTOR shall not disclose any confidential records or other confidential information received from the County or prepared in connection with the performance of this Agreement, unless County specifically permits CONTRACTOR to disclose such records or information. CONTRACTOR shall promptly transmit to County any and all requests for disclosure of any such confidential records or information. CONTRACTOR shall not use any confidential information gained by CONTRACTOR in the performance of this Agreement except for the sole purpose of carrying out CONTRACTOR's obligations under this Agreement.

10.02 **County Records:** When this Agreement expires or terminates, CONTRACTOR shall return to County any County records which CONTRACTOR used or received from County to perform services under this Agreement.

10.03 **Maintenance of Records:** CONTRACTOR shall prepare, maintain, and preserve all reports and records that may be required by federal, state, and County rules and regulations related to services performed under this Agreement. CONTRACTOR shall maintain such records for a period of at least three years after receipt of final payment under this Agreement. If any litigation, claim, negotiation, audit exception, or other action relating to this Agreement is pending at the end of the three-year period, then CONTRACTOR shall retain said records until such action is resolved.

E. BACKGROUND:

The CalWORKs Employment Services (CWES) program requires that the COUNTY offer a learning disability screening to all adult CWES participants. Those who score "12" or more on a standardized and normed screening tool are then offered a learning disability evaluation that identifies the specific learning disabilities and recommended accommodations. This agreement

Docusign Envelope ID: D5048F0E-64E7-8FF7-81C8-ED2DDDE0D83C

is for the provision of learning disability evaluations and related services for the CWES Welfare-to-Work (WTW) program, including, but not limited to, direct instruction to individuals and groups to relieve identified disabilities that prevent success in meeting WTW goals and the participation in Multidisciplinary Team (MDT) meetings to assist customers in the CalWORKs Family Stabilization program.

F. TARGET POPULATION

F.1 The target population is recipients who are 18 years of age or older, who are participating in the CWES Welfare-to-Work (WTW) program, and referred by the COUNTY, who:

F.1.1 Are identified as having potential learning disabilities based on:

F.1.1.a The California State Department of Social Services approved Learning Needs Screening (WTW 18), or

F.1.1.b Being previously identified as having learning problems (for example, were in Special Education classes during all or part of grades kindergarten through 12), or

F.1.1.c The statewide Online CalWORKs Appraisal Tool (OCAT), Section B4, Learning Disabilities.

F.1.2 Are suspected of having a learning disability, even though the results of the learning disabilities screening (WTW 18 or OCAT, Section B4) did not indicate a potential learning disability, or

F.1.3 Are limited-English proficient (LEP) and therefore have not been screened with the screening tool but have indicators of a potential learning disability.*

**The State of California learning disability screening tool (WTW 18) is validated and normed only for English speakers. Customers with Limited English Proficiency (LEP) may be referred for an evaluation based on other indicators of a possible learning disability.*

G. DESCRIPTION OF SERVICES:

CONTRACTOR shall provide services and staff, and otherwise do all things necessary for or incidental to the performance of work, as set forth below:

G.1 Provide learning need evaluations to referred customers in both English and Spanish, depending on the customer's preferred language.

If the Final Invoice is not received by COUNTY by close of business on July 10th. CONTRACTOR understands and agrees that the reimbursement of CONTRACTOR's final expenses represented by that invoice may be forfeited, and COUNTY shall have no legal obligation regarding it, nor shall COUNTY be required to make any payment towards that untimely/late invoiced claim.**

1.03 Allowable Costs:
a) Allowable costs shall be the CONTRACTOR's actual costs of developing, supervising and delivering the services under this Agreement, as set forth in **Exhibit C-1, Exhibit C-2** and **Exhibit C-3**. Any dispute over whether costs are allowable shall be resolved in accordance with the provisions of 45 Code of Federal Regulations, Part 74, Sub-Part F and 48 Code of Federal Regulations (CFR), Chapter 1, Part 31.

b) Allowable costs for travel expenses incurred while providing services under this Agreement, as set forth in **Exhibit C-1, Exhibit C-2** and **Exhibit C-3**, must follow the Monterey County Auditor/Controller's Travel Policy https://www.countyofmonterey.gov/government/departments-a-h/auditor-controller/policies-and-procedures and should be invoiced the current per diem rates for lodging, meals, and mileage up to the rates listed online at https://www.irs.gov/tax-professionals/standard-mileage-rates.

If CONTRACTOR does not protest the lesser amount by delivering to COUNTY a written notice of protest within twenty (20) days after CONTRACTOR's receipt of the certification, then payment of the lesser amount shall be deemed payment in full for the month in question and may not thereafter be questioned by CONTRACTOR.

1.06 Disputed payment amount: If COUNTY pays a lesser amount than the amount requested, and if CONTRACTOR submits a written notice of protest to COUNTY within twenty (20) days after CONTRACTOR's receipt of the certification, then the parties shall promptly meet to review the dispute and resolve it on a mutually acceptable basis. 2.05 Remedies for Inadequate Service Levels:

Health Insurance Portability & Accountability Act (HIPAA) Certification

WHEREAS, Sections 261 through 264 of the federal Health Insurance Portability and Accountability Act of 1996, Public Law 104-191, known as "the Administrative Simplification provisions," direct the Department of Health and Human Services to develop standards to protect the security, confidentiality and integrity of health information; and

WHEREAS, pursuant to the Administrative Simplification provisions, the Secretary of Health and Human Services has issued regulations modifying 45 CFR Parts 160 and 164 (the "HIPAA Privacy Rule"); and

WHEREAS, CONTRACTOR and COUNTY have entered into an Agreement ("the Agreement") to which this Certification is an attachment whereby CONTRACTOR will provide certain services to COUNTY; and

WHEREAS, CONTRACTOR may have access to Protected Health Information (as defined below) in fulfilling its responsibilities under the underlying Agreement.

THEREFORE, in consideration of the Parties' continuing obligations under the Agreement, compliance with the HIPAA Privacy Rule, and other good and valuable consideration, the receipt and sufficiency of which is hereby acknowledged, CONTRACTOR agrees to the provisions of this Certification and of the HIPAA Privacy Rule and to protect the interests of COUNTY.

I. DEFINITIONS

Except as otherwise defined herein, any and all capitalized terms in this Section shall have the definitions set forth in the HIPAA Privacy Rule. In the event of an inconsistency between the provisions of this Certification and mandatory provisions of the HIPAA Privacy Rule, as amended, the HIPAA Privacy Rule shall control. Where provisions of this Certification are different than those mandated in the HIPAA Privacy Rule, but are nonetheless permitted by the HIPAA Privacy Rule, the provisions of this Certification shall control.

The term "Protected Health Information" means individually identifiable health information including, without limitation, all information, data, documentation, and materials, including without limitation, demographic, medical and financial information, that relates to the past, present, or future physical or mental health or condition of an individual; the provision of health care to an individual; or the past, present, or future payment for the provision of health care to an individual; and that identifies the individual or with respect to which there is a reasonable basis to believe the information can be used to identify the individual.

CONTRACTOR acknowledges and agrees that all Protected Health Information that is created or received by COUNTY and disclosed or made available in any form, including paper record, oral communication, audio recording, and electronic display by COUNTY, or its operating units, to CONTRACTOR or is created or received by CONTRACTOR on COUNTY's behalf shall be subject to this Certification.

II. CONFIDENTIALITY REQUIREMENTS

Docusign Envelope ID: D5048F0E-64E7-8FF7-81C8-ED2DDDE0D83C

(a) CONTRACTOR agrees:
(i) to use or disclose any Protected Health Information solely: (1) for meeting its obligations as set forth in any agreements between the Parties evidencing their business relationship or (2) as required by applicable law, rule or regulation, or by accrediting or credentialing organization to whom COUNTY is required to disclose such information, or as otherwise permitted under this Certification, or the underlying Agreement ,(if consistent with this Certification and the HIPAA Privacy Rule), or the HIPAA Privacy Rule, and (3) as would be permitted by the HIPAA Privacy Rule if such use or disclosure were made by COUNTY; and
(ii) at termination of the Agreement, (or any similar documentation of the business relationship of the Parties), or upon request of COUNTY, whichever occurs first, if feasible CONTRACTOR will return or destroy all Protected Health Information received from or created or received by CONTRACTOR on behalf of COUNTY that CONTRACTOR still maintains in any form, and retain no copies of such information, or if such return or destruction is not feasible, CONTRACTOR will extend the protections of this Agreement to the information and limit further uses and disclosures to those purposes that make the return or destruction of the information not feasible; and
(iii) to ensure that its agents, including a subcontractor(s), to whom it provides Protected Health Information received from or created by CONTRACTOR on behalf of COUNTY, agrees to the same restrictions and conditions that apply to CONTRACTOR with respect to such information. In addition, CONTRACTOR agrees to take reasonable steps to ensure that its employees' actions or omissions do not cause CONTRACTOR to breach the terms of the Agreement.

(b) Notwithstanding the prohibitions set forth in this Certification or the Agreement, CONTRACTOR may use and disclose Protected Health Information as follows:
(i) if necessary, for the proper management and administration of CONTRACTOR or to carry out the legal responsibilities of CONTRACTOR, provided that as to any such disclosure, the following requirements are met:
(A) the disclosure is required by law; or
(B) CONTRACTOR obtains reasonable assurances from the person to whom the information is disclosed that it will be held confidentially and used or further disclosed only as required by law, or for the purpose for which it was disclosed to the person, and the person notifies CONTRACTOR of any instances of which it is aware in which the confidentiality of the information has been breached;
(ii) for data aggregation services, if to be provided by CONTRACTOR for the health care operations of COUNTY pursuant to any agreements between the Parties evidencing their business relationship. For purposes of this Certification and the Agreement, data aggregation services means the combining of Protected Health Information by CONTRACTOR with the protected health information received by CONTRACTOR in its capacity as CONTRACTOR of another COUNTY, to permit data analyses that relate to the health care operations of the respective covered entities.

(c) CONTRACTOR will implement appropriate safeguards to prevent use or disclosure of Protected Health Information other than as permitted in this Certification. The Secretary of Health and Human Services shall have the right to audit CONTRACTOR's records and practices related to use and disclosure of Protected Health Information to ensure

Docusign Envelope ID: D5048F0E-64E7-8FF7-81C8-ED2DDDE0D83C

COUNTY's compliance with the terms of the HIPAA Privacy Rule. CONTRACTOR shall report to COUNTY any use or disclosure of Protected Health Information which is not in compliance with the terms of this Certification of which it becomes aware. In addition, CONTRACTOR agrees to mitigate, to the extent practicable, any harmful effect that is known to CONTRACTOR of a use or disclosure of Protected Health Information by CONTRACTOR in violation of the requirements of this Certification or the Agreement.

III. AVAILABILITY OF PHI

CONTRACTOR agrees to make available Protected Health Information to the extent and in the manner required by Section 164.524 of the HIPAA Privacy Rule. CONTRACTOR agrees to make Protected Health Information available for amendment and incorporate any amendments to Protected Health Information in accordance with the requirements of Section 164.526 of the HIPAA Privacy Rule. In addition, CONTRACTOR agrees to make Protected Health Information available for purposes of accounting of disclosures, as required by Section 164.528 of the HIPAA Privacy Rule.

IV. TERMINATION

Notwithstanding anything in this Certification or the Agreement to the contrary, COUNTY shall have the right to terminate the Agreement immediately if COUNTY determines that CONTRACTOR has violated any material term of this Certification and/or the Agreement. If COUNTY reasonably believes that CONTRACTOR will violate a material term of this Certification and/or the Agreement and, where practicable, COUNTY gives written notice to CONTRACTOR of such belief within a reasonable time after forming such belief, and CONTRACTOR fails to provide adequate written assurances to COUNTY that it will not breach the cited term of this Certification and/or the Agreement within a reasonable period of time given the specific circumstances, but in any event, before the threatened breach is to occur, then COUNTY shall have the right to terminate the Agreement immediately.

V. MISCELLANEOUS

Except as expressly stated herein or the HIPAA Privacy Rule, the parties to the Agreement do not intend to create any rights in any third parties. The obligations of CONTRACTOR under this Section shall survive the expiration, termination, or cancellation of this Certification and/or the Agreement, and/or the business relationship of the parties, and shall continue to bind CONTRACTOR, its agents, employees, contractors, successors, and assigns as set forth herein.

The parties agree that, in the event that any documentation of the arrangement pursuant to which CONTRACTOR provides services to COUNTY contains provisions relating to the use or disclosure of Protected Health Information which are more restrictive than the provisions of this Certification or the Agreement, the provisions of the more restrictive documentation will control. The provisions of this Certification and the Agreement are intended to establish the minimum requirements regarding CONTRACTOR's use and disclosure of Protected Health Information.

In the event that either party believes in good faith that any provision of this Certification and/or the Agreement fails to comply with the then current requirements of the HIPAA Privacy Rule, such party shall notify the other party in writing. For a period of up to thirty (30) days, the parties shall address in good faith such concern and amend the terms of this Certification and/or the Agreement, if necessary to bring it into compliance. If, after such thirty-day period, the Certification and/or the Agreement fails to

Docusign Envelope ID: D5048F0E-64E7-8FF7-81C8-ED2DDDE0D83C

comply with the HIPAA Privacy Rule, then either party has the right to terminate upon written notice to the other party.

Matter Type: BoS Agreement

a. Approve and authorize the Director of the Department of Social Services or designee to sign an agreement with Goodwill Central Coast for Expanded Subsidized Employment training, supervision, intensive case management, and job performance evaluations for CalWORKs Welfare-to-Work customers for the period of July 1, 2026 through June 30, 2027, in the amount of $1,750,000; and
b. Authorize the Director of the Department of Social Services or designee to sign up to three amendments to this Agreement where the total amendments do not exceed 10% ($175,000) of the amended contract amount, do not significantly change the scope of work, and do not exceed the maximum aggregate amount of $1,925,000.

RECOMMENDATION:

It is recommended that the Board of Supervisors:

a. Approve and authorize the Director of the Department of Social Services or designee to sign an agreement with Goodwill Central Coast for Expanded Subsidized Employment training, supervision, intensive case management, and job performance evaluations for CalWORKs Welfare-to-Work customers for the period of July 1, 2026 through June 30, 2027, in the amount of $1,750,000; and
b. Authorize the Director of the Department of Social Services or designee to sign up to three amendments to this Agreement where the total amendments do not exceed 10% ($175,000) of the amended contract amount, do not significantly change the scope of work, and do not exceed the maximum aggregate amount of $1,925,000.

SUMMARY:

The Department is looking to continue the provision of Expanded Subsidized Employment (ESE) services for another year. As the ESE provider, Goodwill Central Coast will act as the provider for ESE services, which includes assessment of employment skills and needs; job readiness and retention training; immediate employment at Goodwill stores or other off-site businesses throughout the county; intensive case management to assure success on the job; the payment of wages to participants; and placement of participants in unsubsidized employment.

DISCUSSION:

ESE services are targeted at the hardest-to-employ CalWORKs Welfare-to-Work customers. These customers have minimal or no work experience and/or must establish appropriate work behaviors before entering unsubsidized employment or the existing ‘work-ready’ subsidized employment

opportunities. CalWORKs customers are eligible to participate in the ESE program for four to six months to obtain skills and experience in an employment field and improve their marketability to obtain and maintain unsubsidized employment.

OTHER AGENCY INVOLVEMENT/COMMITTEE ACTIONS:
The Office of County Counsel has reviewed and approved the Agreements as to form, as has the Auditor-Controller's Office as to financial provisions.

FINANCING:
This agreement is funded with the CalWORKs Expanded Subsidized Employment allocation. Sufficient appropriations and estimated revenues for SOC005 are included in the FY 2026-2027 Recommended Budget.

BOARD OF SUPERVISORS STRATEGIC PLAN GOALS:
This agreement correlates to the Well-Being and Quality of Life and Diverse and Thriving Economy Goals adopted by the Board of Supervisors by providing employment training, skill building, tools, and services designed to help CalWORKs and Employment Services customers be ready for and obtain employment and move towards self-sufficiency.

This Agreement is of no force or effect until signed by both CONTRACTOR and County and with County signing last, and **CONTRACTOR may not commence work before County signs this Agreement**.

3.02 The County reserves the right to cancel this Agreement, or any extension of this Agreement, without cause, with a thirty day (30) written notice, or with cause immediately.

5.0 PERFORMANCE STANDARDS:

5.01 CONTRACTOR warrants that CONTRACTOR and CONTRACTOR's agents, employees, and subcontractors performing services under this Agreement are specially trained, experienced, competent, and appropriately licensed to perform the work and deliver the services required under this Agreement and are not employees of the County, or immediate family of an employee of the County.

5.02 CONTRACTOR, its agents, employees, and subcontractors shall perform all work in a safe and skillful manner and in compliance with all applicable laws and regulations. All work performed under this Agreement that is required by law to be performed or supervised by licensed personnel shall be performed in accordance with such licensing requirements.

5.03 CONTRACTOR shall furnish, at its own expense, all materials, equipment, and personnel necessary to carry out the terms of this Agreement, except as otherwise specified in this Agreement. CONTRACTOR shall not use County premises, property (including equipment, instruments, or supplies) or personnel for any purpose other than in the performance of its obligations under this Agreement.

6.0 PAYMENT CONDITIONS:

6.01 Prices shall remain firm for the initial term of the Agreement and, thereafter, may be adjusted annually as provided in this paragraph. The County does not guarantee any minimum or maximum amount of dollars to be spent under this Agreement.

6.02 Negotiations for rate changes shall be commenced, by CONTRACTOR, a minimum of ninety days (90) prior to the expiration of the Agreement. Rate changes are not binding unless mutually agreed upon in writing by the County and the CONTRACTOR.

6.03 Invoice amounts shall be billed directly to the ordering department.

6.04 CONTRACTOR shall submit such invoice periodically or at the completion of services, but in any event, not later than 30 days after completion of services. The invoice shall set forth the amounts claimed by CONTRACTOR for the previous period, together with an itemized basis for the amounts claimed, and such other information pertinent to the invoice. The County shall certify the invoice, either in the requested amount or in such other amount as the County approves in conformity with this Agreement and shall promptly submit such invoice to the County Auditor-Controller for payment. The County Auditor-Controller shall pay the amount certified within 30 days of receiving the certified invoice.

6.05 CONTRACTOR shall not receive reimbursement for mileage or travel expenses unless set forth in this Agreement.

7.0 TERMINATION:

7.01 During the term of this Agreement, the County may terminate the Agreement for any reason by giving written notice of termination to the CONTRACTOR at least thirty (30) days prior to the effective date of termination. Such notice shall set forth the effective date of termination. In the event of such termination, the amount payable under this Agreement shall be reduced in proportion to the services provided prior to the date of termination.

Docusign Envelope ID: 928BADDE-BCAD-8F1E-8282-20B791E984B0

7.02 The County may cancel and terminate this Agreement for good cause effective immediately upon written notice to CONTRACTOR. "Good cause" includes the failure of CONTRACTOR to perform the required services at the time and in the manner provided under this Agreement. If County terminates this Agreement for good cause, the County may be relieved of the payment of any consideration to CONTRACTOR, and the County may proceed with the work in any manner, which County deems proper. The cost to the County shall be deducted from any sum due the CONTRACTOR under this Agreement.

7.03 The County's payments to CONTRACTOR under this Agreement are funded by local, state and federal governments. If funds from local, state and federal sources are not obtained and continued at a level sufficient to allow for the County's purchase of the indicated quantity of services, then the County may give written notice of this fact to CONTRACTOR, and the obligations of the parties under this Agreement shall terminate immediately, or on such date thereafter, as the County may specify in its notice, unless in the meanwhile the parties enter into a written amendment modifying this Agreement.

8.0 INDEMNIFICATION:

CONTRACTOR shall indemnify, defend, and hold harmless the County, its officers, agents, and employees, from and against any and all claims, liabilities, and losses whatsoever (including damages to property and injuries to or death of persons, court costs, and reasonable attorneys' fees) occurring or resulting to any and all persons, firms or corporations furnishing or supplying work, services, materials, or supplies in connection with the performance of this Agreement, and from any and all claims, liabilities, and losses occurring or resulting to any person, firm, or corporation for damage, injury, or death arising out of or connected with the CONTRACTOR's performance of this Agreement, unless such claims, liabilities, or losses arise out of the sole negligence or willful misconduct of the County. "CONTRACTOR's performance" includes CONTRACTOR's action or inaction and the action or inaction of CONTRACTOR's officers, employees, agents and subcontractors.

9.0 INSURANCE REQUIREMENTS:

9.01 **Evidence of Coverage:** Prior to commencement of this Agreement, the Contractor shall provide a "Certificate of Insurance" certifying that coverage as required herein has been obtained. Individual endorsements executed by the insurance carrier shall accompany the certificate. In addition, the Contractor upon request shall provide a certified copy of the policy or policies.

This verification of coverage shall be sent to the County's Contracts/Purchasing Department, unless otherwise directed. The Contractor shall not receive a "Notice to Proceed" with the work under this Agreement until it has obtained all insurance required and the County has approved such insurance. This approval of insurance shall neither relieve nor decrease the liability of the Contractor.

9.02 **Qualifying Insurers:** All coverages, except surety, shall be issued by companies which hold a current policy holder's alphabetic and financial size category rating of not less than A- VII, according to the current A.M. Best's Rating Guide or a company of equal financial stability that is approved by the County's Purchasing Agent.

9.03 **Insurance Coverage Requirements:** Without limiting CONTRACTOR's duty to

Docusign Envelope ID: 928BADDE-BCAD-8F1E-8282-20B791E984B0

indemnify, CONTRACTOR shall maintain in effect throughout the term of this Agreement a policy or policies of insurance with the following minimum limits of liability:

Commercial General Liability Insurance: including but not limited to premises and operations, including coverage for Bodily Injury and Property Damage, Personal Injury, Contractual Liability, Broad form Property Damage, Independent Contractors, Products and Completed Operations, with a combined single limit for Bodily Injury and Property Damage of not less than $1,000,000 per occurrence, and $2,000,000 in the aggregate.
(Note: any proposed modifications to these general liability insurance requirements shall be attached as an Exhibit hereto, and the section(s) above that are proposed as not applicable shall be lined out in blue ink. All proposed modifications are subject to County approval.)

Auto Liability Coverage: must include motor vehicles, including scheduled, non-owned, and hired vehicles, used in providing services under this Agreement, with a combined single limit or Bodily Injury and Property Damage of not less than $1,000,000 per occurrence.
(Note: any proposed modifications to these auto insurance requirements shall be attached as an Exhibit hereto, and the section(s) above that are proposed as not applicable shall be lined out in blue ink. All proposed modifications are subject to County approval.)

Workers' Compensation Insurance: if CONTRACTOR employs others in the performance of this Agreement, in accordance with California Labor Code section 3700 and with Employer's Liability limits not less than $1,000,000 each person, $1,000,000 each accident and $1,000,000 each disease.
(Note: any proposed modifications to these Workers' Compensation Insurance requirements shall be attached as an Exhibit hereto, and the section(s) above that are proposed as not applicable shall be lined out in blue ink. All proposed modifications are subject to County approval.)

Professional Liability Insurance: if required for the professional services being provided, (e.g., those persons authorized by a license to engage in a business or profession regulated by the California Business and Professions Code), in the amount of not less than $1,000,000 per claim and $2,000,000 in the aggregate, to cover liability for malpractice or errors or omissions made in the course of rendering professional services. If professional liability insurance is written on a "claims-made" basis rather than an occurrence basis, the CONTRACTOR shall, upon the expiration or earlier termination of this Agreement, obtain extended reporting coverage ("tail coverage") with the same liability limits. Any such tail coverage shall continue for at least three years following the expiration or earlier termination of this Agreement.
(Note: Professional liability insurance coverage is required if the contractor is providing a professional service regulated by the state. Examples of service providers regulated by the state are insurance agents, professional architects and engineers, doctors, certified public accountants, lawyers, etc. However, other professional Contractors, such as computer or software designers, technology services, and services providers such as claims administrators, should also have professional liability. If in doubt, consult with your risk or contract manager.)

If the contractor maintains broader coverage and/or higher limits than the minimums shown above, the County requires and shall be entitled to the broader coverage and/or higher limits maintained by the contractor.

9.04 **Other Requirements:**

All insurance required by this Agreement shall be with a company acceptable to the County and issued and executed by an admitted insurer authorized to transact Insurance business in the State of California. Unless otherwise specified by this Agreement, all such insurance shall be written on an occurrence basis, or, if the policy is not written on an occurrence basis, such policy with the coverage required herein shall continue in effect for a period of three years following the date CONTRACTOR completes its performance of services under this Agreement.

Each liability policy shall provide that the County shall be given notice in writing at least thirty days in advance of any endorsed reduction in coverage or limit, cancellation, or intended non-renewal thereof. Each policy shall provide coverage for Contractor and additional insureds with respect to claims arising from each subcontractor, if any, performing work under this Agreement, or be accompanied by a certificate of insurance from each subcontractor showing each subcontractor has identical insurance coverage to the above requirements.

Additional Insured Status:

The County of Monterey, its officers, officials, employees, agents, and volunteers are to be covered as additional insureds on the auto liability policy for liability arising out of automobiles owned, leased, hired or borrowed by or on behalf of the Contractor. Auto liability coverage shall be provided in the form of an endorsement to the CONTRACTOR'S insurance.

The County of Monterey, its officers, officials, employees, agents, and volunteers are to be covered as additional insureds on the commercial general liability policy with respect to liability arising out of work or operations performed by or on behalf of the CONTRACTOR including materials, parts, or equipment furnished in connection with such work or operations. General liability coverage shall be provided in the form of an endorsement to the CONTRACTOR'S insurance (at least as broad as ISO Form CG 20 10 11 85 or if not available, through the addition of both CG 20 10, CG 20 26, CG 20 33, or CG 20 38; and CG 20 37 if a later edition is used).

Primary Coverage:

For any claims related to this contract, the CONTRACTOR'S insurance coverage shall be primary and non-contributory and at least as broad as ISO CG 20 01 04 13 as respects the County, its officers, officials, employees, agents, and volunteers. Any insurance or self-insurance maintained by the County, its officers, officials, employees, agents, or volunteers shall be excess of the CONTRACTOR'S insurance and shall not contribute with it. This requirement shall also apply to any Excess or Umbrella liability policies.

Workers' Compensation Insurance Waiver of Subrogation:

The Workers' Compensation Insurance policy required hereunder shall be endorsed to state that the Workers' Compensation Insurance carrier waives its right of subrogation against County, its officers, officials, employees, agents, or volunteers, which might arise by reason of payment under such policy in connection with performance under this Agreement by CONTRACTOR. Should CONTRACTOR be self-insured for Workers' Compensation Insurance, CONTRACTOR hereby agrees to waive its right of subrogation against County, its officers, officials, employees, agents, or volunteers.

Docusign Envelope ID: 928BADDE-BCAD-8F1E-8282-20B791E984B0

Prior to the execution of this Agreement by the County, CONTRACTOR shall file certificates of insurance and endorsements with the County's contract administrator and County's Contracts/Purchasing Division, showing that the CONTRACTOR has in effect the insurance required by this Agreement. The CONTRACTOR shall file a new or amended certificate of insurance within five (5) calendar days after any change is made in any insurance policy, which would alter the information on the certificate then on file. Acceptance or approval of insurance shall in no way modify or change the indemnification clause in this Agreement, which shall continue in full force and effect. CONTRACTOR shall always during the term of this Agreement maintain in force the insurance coverage required under this Agreement and shall send, without demand by County, annual certificates to County's Contract Administrator and County's Contracts/Purchasing Division. If the certificate is not received by the expiration date, County shall notify CONTRACTOR and CONTRACTOR shall have five calendar days to send in the certificate, evidencing no lapse in coverage during the interim. Failure by CONTRACTOR to maintain such insurance is a default of this Agreement, which entitles County, at its sole discretion, to terminate this Agreement immediately.

10.0 RECORDS AND CONFIDENTIALITY:

10.01 **Confidentiality:** CONTRACTOR and its officers, employees, agents, and subcontractors shall comply with any and all federal, state, and local laws, which provide for the confidentiality of records and other information. CONTRACTOR shall not disclose any confidential records or other confidential information received from the County or prepared in connection with the performance of this Agreement, unless County specifically permits CONTRACTOR to disclose such records or information. CONTRACTOR shall promptly transmit to County any and all requests for disclosure of any such confidential records or information. CONTRACTOR shall not use any confidential information gained by CONTRACTOR in the performance of this Agreement except for the sole purpose of carrying out CONTRACTOR's obligations under this Agreement.

10.02 **County Records:** When this Agreement expires or terminates, CONTRACTOR shall return to County any County records which CONTRACTOR used or received from County to perform services under this Agreement.

10.03 **Maintenance of Records:** CONTRACTOR shall prepare, maintain, and preserve all reports and records that may be required by federal, state, and County rules and regulations related to services performed under this Agreement. CONTRACTOR shall maintain such records for a period of at least three years after reciept of final payment under this Agreement. If any litigation, claim, negotiation, audit exception, or other action relating to this Agreement is pending at the end of the three-year period, then CONTRACTOR shall retain said records until such action is resolved.

10.04 **Access to and Audit of Records:** The County shall have the right to examine, monitor and audit all records, documents, conditions, and activities of the CONTRACTOR and its subcontractors related to services provided under this Agreement. 10.05 **Royalties and Inventions:** County shall have a royalty-free, exclusive and irrevocable license to reproduce, publish, and use, and authorize others to do so, all original computer programs, writings, sound recordings, pictorial reproductions, drawings, and other works of similar nature produced in the course of or under this Agreement. CONTRACTOR shall not publish any such material without the prior written approval of County.

10.06 **Format of Deliverables:** For this section, "Deliverables" shall mean all electronic documents CONTRACTOR provides to the County under this Agreement. CONTRACTOR shall ensure all Deliverables comply with the requirements of the Web Content Accessibility Guidelines ("WCAG") 2.1, pursuant to the Americans with Disabilities Act ("ADA"). CONTRACTOR shall ensure that the evaluation and treatment of its employees and applicants for employment and all persons receiving and requesting services are free of such discrimination. CONTRACTOR and any subcontractor shall, in the performance of this Agreement, fully comply with all federal, state, and local laws and regulations which prohibit discrimination. The provision of services primarily or exclusively to such target population as may be designated in this Agreement shall not be deemed to be prohibited discrimination.

12.0 COMPLIANCE WITH TERMS OF STATE OR FEDERAL GRANTS:

If this Agreement has been or will be funded with monies received by the County pursuant to a contract with the state or federal government in which the County is the grantee, CONTRACTOR will comply with all the provisions of said contract, to the extent applicable to CONTRACTOR as a subgrantee under said contract, and said provisions shall be deemed a part of this Agreement, as though fully set forth herein. ADDITIONAL PROVISIONS

I. PAYMENT BY COUNTY:

1.01 Monthly claims/invoices by CONTRACTOR: Not later than the tenth (10th) day of each month, CONTRACTOR shall submit to COUNTY a signed invoice setting forth the amount claimed. All invoices (monthly and final) shall be submitted in the form set forth in **Exhibit D**.

1.02 Final Invoice; forfeiture for late invoice: CONTRACTOR's final month and end of fiscal year invoice is due, and must be received by COUNTY, no later than close of business on **July 10th. If the Final Invoice is not received by COUNTY by close of business on July 10th. 1.03 Allowable Costs:
a) Allowable costs shall be the CONTRACTOR's actual costs of developing, supervising and delivering the services under this Agreement, as set forth in **Exhibit C**. Only the costs listed in **Exhibit C** as contract expenses may be claimed as allowable costs. Any dispute over whether costs are allowable shall be resolved in accordance with the provisions of 45 Code of Federal Regulations, Part 74, Sub-Part F and 48 Code of Federal Regulations (CFR), Chapter 1, Part 31.

Health Insurance Portability & Accountability Act (HIPAA) Certification

WHEREAS, Sections 261 through 264 of the federal Health Insurance Portability and Accountability Act of 1996, Public Law 104-191, known as "the Administrative Simplification provisions," direct the Department of Health and Human Services to develop standards to protect the security, confidentiality and integrity of health information; and

WHEREAS, pursuant to the Administrative Simplification provisions, the Secretary of Health and Human Services has issued regulations modifying 45 CFR Parts 160 and 164 (the "HIPAA Privacy Rule"); and

WHEREAS, CONTRACTOR and COUNTY have entered into an Agreement ("the Agreement") to which this Certification is an attachment whereby CONTRACTOR will provide certain services to COUNTY; and

WHEREAS, CONTRACTOR may have access to Protected Health Information (as defined below) in fulfilling its responsibilities under the underlying Agreement.

THEREFORE, in consideration of the Parties' continuing obligations under the Agreement, compliance with the HIPAA Privacy Rule, and other good and valuable consideration, the receipt and sufficiency of which is hereby acknowledged, CONTRACTOR agrees to the provisions of this Certification and of the HIPAA Privacy Rule and to protect the interests of COUNTY.

I. DEFINITIONS

Except as otherwise defined herein, any and all capitalized terms in this Section shall have the definitions set forth in the HIPAA Privacy Rule. In the event of an inconsistency between the provisions of this Certification and mandatory provisions of the HIPAA Privacy Rule, as amended, the HIPAA Privacy Rule shall control. Where provisions of this Certification are different than those mandated in the HIPAA Privacy Rule, but are nonetheless permitted by the HIPAA Privacy Rule, the provisions of this Certification shall control.

The term "Protected Health Information" means individually identifiable health information including, without limitation, all information, data, documentation, and materials, including without limitation, demographic, medical and financial information, that relates to the past, present, or future physical or mental health or condition of an individual; the provision of health care to an individual; or the past, present, or future payment for the provision of health care to an individual; and that identifies the individual or with respect to which there is a reasonable basis to believe the information can be used to identify the individual.

CONTRACTOR acknowledges and agrees that all Protected Health Information that is created or received by COUNTY and disclosed or made available in any form, including paper record, oral communication, audio recording, and electronic display by COUNTY, or its operating units, to CONTRACTOR or is created or received by CONTRACTOR on COUNTY's behalf shall be subject to this Certification.

II. CONFIDENTIALITY REQUIREMENTS

Docusign Envelope ID: 928BADDE-BCAD-8F1E-8282-20B791E984B0

(a) CONTRACTOR agrees:
(i) to use or disclose any Protected Health Information solely: (1) for meeting its obligations as set forth in any agreements between the Parties evidencing their business relationship or (2) as required by applicable law, rule or regulation, or by accrediting or credentialing organization to whom COUNTY is required to disclose such information, or as otherwise permitted under this Certification, or the underlying Agreement ,(if consistent with this Certification and the HIPAA Privacy Rule), or the HIPAA Privacy Rule, and (3) as would be permitted by the HIPAA Privacy Rule if such use or disclosure were made by COUNTY; and
(ii) at termination of the Agreement, (or any similar documentation of the business relationship of the Parties), or upon request of COUNTY, whichever occurs first, if feasible CONTRACTOR will return or destroy all Protected Health Information received from or created or received by CONTRACTOR on behalf of COUNTY that CONTRACTOR still maintains in any form, and retain no copies of such information, or if such return or destruction is not feasible, CONTRACTOR will extend the protections of this Agreement to the information and limit further uses and disclosures to those purposes that make the return or destruction of the information not feasible; and
(iii) to ensure that its agents, including a subcontractor(s), to whom it provides Protected Health Information received from or created by CONTRACTOR on behalf of COUNTY, agrees to the same restrictions and conditions that apply to CONTRACTOR with respect to such information. In addition, CONTRACTOR agrees to take reasonable steps to ensure that its employees' actions or omissions do not cause CONTRACTOR to breach the terms of the Agreement.

(b) Notwithstanding the prohibitions set forth in this Certification or the Agreement, CONTRACTOR may use and disclose Protected Health Information as follows:
(i) if necessary, for the proper management and administration of CONTRACTOR or to carry out the legal responsibilities of CONTRACTOR, provided that as to any such disclosure, the following requirements are met:
(A) the disclosure is required by law; or
(B) CONTRACTOR obtains reasonable assurances from the person to whom the information is disclosed that it will be held confidentially and used or further disclosed only as required by law, or for the purpose for which it was disclosed to the person, and the person notifies CONTRACTOR of any instances of which it is aware in which the confidentiality of the information has been breached;
(ii) for data aggregation services, if to be provided by CONTRACTOR for the health care operations of COUNTY pursuant to any agreements between the Parties evidencing their business relationship. For purposes of this Certification and the Agreement, data aggregation services means the combining of Protected Health Information by CONTRACTOR with the protected health information received by CONTRACTOR in its capacity as CONTRACTOR of another COUNTY, to permit data analyses that relate to the health care operations of the respective covered entities.

(c) CONTRACTOR will implement appropriate safeguards to prevent use or disclosure of Protected Health Information other than as permitted in this Certification. The Secretary of Health and Human Services shall have the right to audit CONTRACTOR's records and practices related to use and disclosure of Protected Health Information to ensure

Docusign Envelope ID: 928BADDE-BCAD-8F1E-8282-20B791E984B0

COUNTY's compliance with the terms of the HIPAA Privacy Rule. CONTRACTOR shall report to COUNTY any use or disclosure of Protected Health Information which is not in compliance with the terms of this Certification of which it becomes aware. In addition, CONTRACTOR agrees to mitigate, to the extent practicable, any harmful effect that is known to CONTRACTOR of a use or disclosure of Protected Health Information by CONTRACTOR in violation of the requirements of this Certification or the Agreement.

III. AVAILABILITY OF PHI

CONTRACTOR agrees to make available Protected Health Information to the extent and in the manner required by Section 164.524 of the HIPAA Privacy Rule. CONTRACTOR agrees to make Protected Health Information available for amendment and incorporate any amendments to Protected Health Information in accordance with the requirements of Section 164.526 of the HIPAA Privacy Rule. In addition, CONTRACTOR agrees to make Protected Health Information available for purposes of accounting of disclosures, as required by Section 164.528 of the HIPAA Privacy Rule.

IV. TERMINATION

Notwithstanding anything in this Certification or the Agreement to the contrary, COUNTY shall have the right to terminate the Agreement immediately if COUNTY determines that CONTRACTOR has violated any material term of this Certification and/or the Agreement. If COUNTY reasonably believes that CONTRACTOR will violate a material term of this Certification and/or the Agreement and, where practicable, COUNTY gives written notice to CONTRACTOR of such belief within a reasonable time after forming such belief, and CONTRACTOR fails to provide adequate written assurances to COUNTY that it will not breach the cited term of this Certification and/or the Agreement within a reasonable period of time given the specific circumstances, but in any event, before the threatened breach is to occur, then COUNTY shall have the right to terminate the Agreement immediately.

V. MISCELLANEOUS

Except as expressly stated herein or the HIPAA Privacy Rule, the parties to the Agreement do not intend to create any rights in any third parties. The obligations of CONTRACTOR under this Section shall survive the expiration, termination, or cancellation of this Certification and/or the Agreement, and/or the business relationship of the parties, and shall continue to bind CONTRACTOR, its agents, employees, contractors, successors, and assigns as set forth herein.

The parties agree that, in the event that any documentation of the arrangement pursuant to which CONTRACTOR provides services to COUNTY contains provisions relating to the use or disclosure of Protected Health Information which are more restrictive than the provisions of this Certification or the Agreement, the provisions of the more restrictive documentation will control. The provisions of this Certification and the Agreement are intended to establish the minimum requirements regarding CONTRACTOR's use and disclosure of Protected Health Information.

In the event that either party believes in good faith that any provision of this Certification and/or the Agreement fails to comply with the then current requirements of the HIPAA Privacy Rule, such party shall notify the other party in writing. For a period of up to thirty (30) days, the parties shall address in good faith such concern and amend the terms of this Certification and/or the Agreement, if necessary to bring it into compliance. If, after such thirty-day period, the Certification and/or the Agreement fails to

Docusign Envelope ID: 928BADDE-BCAD-8F1E-8282-20B791E984B0

comply with the HIPAA Privacy Rule, then either party has the right to terminate upon written notice to the other party.

5.0 PERFORMANCE STANDARDS:

5.01 CONTRACTOR warrants that CONTRACTOR and CONTRACTOR's agents, employees, and subcontractors performing services under this Agreement are specially trained, experienced, competent, and appropriately licensed to perform the work and deliver the services required under this Agreement and are not employees of the County, or immediate family of an employee of the County.

7.02 The County may cancel and terminate this Agreement for good cause effective immediately upon written notice to CONTRACTOR. "Good cause" includes the failure of CONTRACTOR to perform the required services at the time and in the manner provided under this Agreement. The cost to the County shall be deducted from any sum due the CONTRACTOR under this Agreement.

7.03 The County's payments to CONTRACTOR under this Agreement are funded by local, state and federal governments. If funds from local, state and federal sources are not obtained and continued at a level sufficient to allow for the County's purchase of the indicated quantity of services, then the County may give written notice of this fact to CONTRACTOR, and the obligations of the parties under this Agreement shall terminate immediately, or on such date thereafter, as the County may specify in its notice, unless in the meanwhile the parties enter into a written amendment modifying this Agreement.

8.0 INDEMNIFICATION:

CONTRACTOR shall indemnify, defend, and hold harmless the County, its officers, agents, and employees, from and against any and all claims, liabilities, and losses whatsoever (including damages to property and injuries to or death of persons, court costs, and reasonable attorneys' fees) occurring or resulting to any and all persons, firms or corporations furnishing or supplying work, services, materials, or supplies in connection with the performance of this Agreement, and from any and all claims, liabilities, and losses occurring or resulting to any person, firm, or corporation for damage, injury, or death arising out of or connected with the CONTRACTOR's performance of this Agreement, unless such claims, liabilities, or losses arise out of the sole negligence or willful misconduct of the County. "CONTRACTOR's performance" includes CONTRACTOR's action or inaction and the action or inaction of CONTRACTOR's officers, employees, agents and subcontractors.

9.0 INSURANCE REQUIREMENTS:

9.01 **Evidence of Coverage:** Prior to commencement of this Agreement, the Contractor shall provide a "Certificate of Insurance" certifying that coverage as required herein has been obtained. Individual endorsements executed by the insurance carrier shall accompany the certificate. In addition, the Contractor upon request shall provide a certified copy of the policy or policies.

This verification of coverage shall be sent to the County's Contracts/Purchasing Department, unless otherwise directed. The Contractor shall not receive a "Notice to Proceed" with the work under this Agreement until it has obtained all insurance required and the County has approved such insurance. This approval of insurance shall neither relieve nor decrease the liability of the Contractor.

9.02 **Qualifying Insurers:** All coverages, except surety, shall be issued by companies which hold a current policy holder's alphabetic and financial size category rating of not less than A- VII, according to the current A.M. Best's Rating Guide or a company of equal financial stability that is approved by the County's Purchasing Agent.

9.03 **Insurance Coverage Requirements:** Without limiting CONTRACTOR's duty to

(Note: any proposed modifications to these general liability insurance requirements shall be attached as an Exhibit hereto, and the section(s) above that are proposed as not applicable shall be lined out in blue ink. All proposed modifications are subject to County approval.)

Auto Liability Coverage: must include motor vehicles, including scheduled, non-owned, and hired vehicles, used in providing services under this Agreement, with a combined single limit or Bodily Injury and Property Damage of not less than $1,000,000 per occurrence.

Workers' Compensation Insurance: if CONTRACTOR employs others in the performance of this Agreement, in accordance with California Labor Code section 3700 and with Employer's Liability limits not less than $1,000,000 each person, $1,000,000 each accident and $1,000,000 each disease.
(Note: any proposed modifications to these workers' compensation insurance requirements shall be attached as an Exhibit hereto, and the section(s) above that are proposed as not applicable shall be lined out in blue ink. All proposed modifications are subject to County approval.)

Professional Liability Insurance: if required for the professional services being provided, (e.g., those persons authorized by a license to engage in a business or profession regulated by the California Business and Professions Code), in the amount of not less than $1,000,000 per claim and $2,000,000 in the aggregate, to cover liability for malpractice or errors or omissions made in the course of rendering professional services. If professional liability insurance is written on a "claims-made" basis rather than an occurrence basis, the CONTRACTOR shall, upon the expiration or earlier termination of this Agreement, obtain extended reporting coverage ("tail coverage") with the same liability limits. Any such tail coverage shall continue for at least three years following the expiration or earlier termination of this Agreement.
(Note: Professional liability insurance coverage is required if the contractor is providing a professional service regulated by the state. Examples of service providers regulated by the state are insurance agents, professional architects and engineers, doctors, certified public accountants, lawyers, etc. However, other professional Contractors, such as computer or software designers, technology services, and services providers such as claims administrators, should also have professional liability. If in doubt, consult with your risk or contract manager.)

If the contractor maintains broader coverage and/or higher limits than the minimums shown above, the County requires and shall be entitled to the broader coverage and/or higher limits maintained by the contractor.

9.04 **Other Requirements:**

All insurance required by this Agreement shall be with a company acceptable to the County and issued and executed by an admitted insurer authorized to transact Insurance business in the State of California. Unless otherwise specified by this Agreement, all such insurance shall be written on an occurrence basis, or, if the policy is not written on an occurrence basis, such policy with the coverage required herein shall continue in effect for a period of three years following the date CONTRACTOR completes its performance of services under this Agreement.

Each liability policy shall provide that the County shall be given notice in writing at least thirty days in advance of any endorsed reduction in coverage or limit, cancellation, or intended non-renewal thereof. Each policy shall provide coverage for Contractor and additional insureds with respect to claims arising from each subcontractor, if any, performing work under this Agreement, or be accompanied by a certificate of insurance from each subcontractor showing each subcontractor has identical insurance coverage to the above requirements.

Additional Insured Status:

The County of Monterey, its officers, officials, employees, agents, and volunteers are to be covered as additional insureds on the auto liability policy for liability arising out of automobiles owned, leased, hired or borrowed by or on behalf of the Contractor. Auto liability coverage shall be provided in the form of an endorsement to the CONTRACTOR'S insurance.

The County of Monterey, its officers, officials, employees, agents, and volunteers are to be covered as additional insureds on the commercial general liability policy with respect to liability arising out of work or operations performed by or on behalf of the CONTRACTOR including materials, parts, or equipment furnished in connection with such work or operations. General liability coverage shall be provided in the form of an endorsement to the CONTRACTOR'S insurance (at least as broad as ISO Form CG 20 10 11 85 or if not available, through the addition of both CG 20 10, CG 20 26, CG 20 33, or CG 20 38; and CG 20 37 if a later edition is used).

Primary Coverage:

For any claims related to this contract, the CONTRACTOR'S insurance coverage shall be primary and non-contributory and at least as broad as ISO CG 20 01 04 13 as respects the County, its officers, officials, employees, agents, and volunteers. Any insurance or self-insurance maintained by the County, its officers, officials, employees, agents, or volunteers shall be excess of the CONTRACTOR'S insurance and shall not contribute with it. This requirement shall also apply to any Excess or Umbrella liability policies.

Workers' Compensation Waiver of Subrogation:

The workers' compensation policy required hereunder shall be endorsed to state that the workers' compensation carrier waives its right of subrogation against COUNTY, its officers, officials, employees, agents, or volunteers, which might arise by reason of payment under such policy in connection with performance under this Agreement by CONTRACTOR. Should CONTRACTOR be self-insured for workers' compensation, CONTRACTOR hereby agrees to waive its right of subrogation against COUNTY, its officers, officials,

Docusign Envelope ID: D8C81C2C-5F99-458A-907A-B6D0BE265975

employees, agents, or volunteers.

Prior to the execution of this Agreement by the County, CONTRACTOR shall file certificates of insurance and endorsements with the County's contract administrator and County's Contracts/Purchasing Division, showing that the CONTRACTOR has in effect the insurance required by this Agreement. The CONTRACTOR shall file a new or amended certificate of insurance within five calendar days after any change is made in any insurance policy, which would alter the information on the certificate then on file. Acceptance or approval of insurance shall in no way modify or change the indemnification clause in this Agreement, which shall continue in full force and effect. CONTRACTOR shall always during the term of this Agreement maintain in force the insurance coverage required under this Agreement and shall send, without demand by County, annual certificates to County's Contract Administrator and County's Contracts/Purchasing Division. If the certificate is not received by the expiration date, County shall notify CONTRACTOR and CONTRACTOR shall have five calendar days to send in the certificate, evidencing no lapse in coverage during the interim. Failure by CONTRACTOR to maintain such insurance is a default of this Agreement, which entitles County, at its sole discretion, to terminate this Agreement immediately.

10.0 RECORDS AND CONFIDENTIALITY:

10.01 **Confidentiality:** CONTRACTOR and its officers, employees, agents, and subcontractors shall comply with any and all federal, state, and local laws, which provide for the confidentiality of records and other information. CONTRACTOR shall not disclose any confidential records or other confidential information received from the County or prepared in connection with the performance of this Agreement, unless County specifically permits CONTRACTOR to disclose such records or information. If the Final Invoice is not received by COUNTY by close of business on July 10th. Health Insurance Portability & Accountability Act (HIPAA) Certification

WHEREAS, Sections 261 through 264 of the federal Health Insurance Portability and Accountability Act of 1996, Public Law 104-191, known as "the Administrative Simplification provisions," direct the Department of Health and Human Services to develop standards to protect the security, confidentiality and integrity of health information; and

WHEREAS, pursuant to the Administrative Simplification provisions, the Secretary of Health and Human Services has issued regulations modifying 45 CFR Parts 160 and 164 (the "HIPAA Privacy Rule"); and

WHEREAS, CONTRACTOR and COUNTY have entered into an Agreement ("the Agreement") to which this Certification is an attachment whereby CONTRACTOR will provide certain services to COUNTY; and

WHEREAS, CONTRACTOR may have access to Protected Health Information (as defined below) in fulfilling its responsibilities under the underlying Agreement.

THEREFORE, in consideration of the Parties' continuing obligations under the Agreement, compliance with the HIPAA Privacy Rule, and other good and valuable consideration, the receipt and sufficiency of which is hereby acknowledged, CONTRACTOR agrees to the provisions of this Certification and of the HIPAA Privacy Rule and to protect the interests of COUNTY.

I. DEFINITIONS

Except as otherwise defined herein, any and all capitalized terms in this Section shall have the definitions set forth in the HIPAA Privacy Rule. In the event of an inconsistency between the provisions of this Certification and mandatory provisions of the HIPAA Privacy Rule, as amended, the HIPAA Privacy Rule shall control. Where provisions of this Certification are different than those mandated in the HIPAA Privacy Rule, but are nonetheless permitted by the HIPAA Privacy Rule, the provisions of this Certification shall control.

The term "Protected Health Information" means individually identifiable health information including, without limitation, all information, data, documentation, and materials, including without limitation, demographic, medical and financial information, that relates to the past, present, or future physical or mental health or condition of an individual; the provision of health care to an individual; or the past, present, or future payment for the provision of health care to an individual; and that identifies the individual or with respect to which there is a reasonable basis to believe the information can be used to identify the individual.

CONTRACTOR acknowledges and agrees that all Protected Health Information that is created or received by COUNTY and disclosed or made available in any form, including paper record, oral communication, audio recording, and electronic display by COUNTY, or its operating units, to CONTRACTOR or is created or received by CONTRACTOR on COUNTY's behalf shall be subject to this Certification.

II. CONFIDENTIALITY REQUIREMENTS

Docusign Envelope ID: D8C81C2C-5F99-458A-907A-B6D0BE265975

(a) CONTRACTOR agrees:
(i) to use or disclose any Protected Health Information solely: (1) for meeting its obligations as set forth in any agreements between the Parties evidencing their business relationship or (2) as required by applicable law, rule or regulation, or by accrediting or credentialing organization to whom COUNTY is required to disclose such information, or as otherwise permitted under this Certification, or the underlying Agreement ,(if consistent with this Certification and the HIPAA Privacy Rule), or the HIPAA Privacy Rule, and (3) as would be permitted by the HIPAA Privacy Rule if such use or disclosure were made by COUNTY; and
(ii) at termination of the Agreement, (or any similar documentation of the business relationship of the Parties), or upon request of COUNTY, whichever occurs first, if feasible CONTRACTOR will return or destroy all Protected Health Information received from or created or received by CONTRACTOR on behalf of COUNTY that CONTRACTOR still maintains in any form, and retain no copies of such information, or if such return or destruction is not feasible, CONTRACTOR will extend the protections of this Agreement to the information and limit further uses and disclosures to those purposes that make the return or destruction of the information not feasible; and
(iii) to ensure that its agents, including a subcontractor(s), to whom it provides Protected Health Information received from or created by CONTRACTOR on behalf of COUNTY, agrees to the same restrictions and conditions that apply to CONTRACTOR with respect to such information. In addition, CONTRACTOR agrees to take reasonable steps to ensure that its employees' actions or omissions do not cause CONTRACTOR to breach the terms of the Agreement.

(b) Notwithstanding the prohibitions set forth in this Certification or the Agreement, CONTRACTOR may use and disclose Protected Health Information as follows:
(i) if necessary, for the proper management and administration of CONTRACTOR or to carry out the legal responsibilities of CONTRACTOR, provided that as to any such disclosure, the following requirements are met:
(A) the disclosure is required by law; or
(B) CONTRACTOR obtains reasonable assurances from the person to whom the information is disclosed that it will be held confidentially and used or further disclosed only as required by law, or for the purpose for which it was disclosed to the person, and the person notifies CONTRACTOR of any instances of which it is aware in which the confidentiality of the information has been breached;
(ii) for data aggregation services, if to be provided by CONTRACTOR for the health care operations of COUNTY pursuant to any agreements between the Parties evidencing their business relationship. For purposes of this Certification and the Agreement, data aggregation services means the combining of Protected Health Information by CONTRACTOR with the protected health information received by CONTRACTOR in its capacity as CONTRACTOR of another COUNTY, to permit data analyses that relate to the health care operations of the respective covered entities.

(c) CONTRACTOR will implement appropriate safeguards to prevent use or disclosure of Protected Health Information other than as permitted in this Certification. The Secretary of Health and Human Services shall have the right to audit CONTRACTOR's records and practices related to use and disclosure of Protected Health Information to ensure

Docusign Envelope ID: D8C81C2C-5F99-458A-907A-B6D0BE265975

COUNTY's compliance with the terms of the HIPAA Privacy Rule. CONTRACTOR shall report to COUNTY any use or disclosure of Protected Health Information which is not in compliance with the terms of this Certification of which it becomes aware. In addition, CONTRACTOR agrees to mitigate, to the extent practicable, any harmful effect that is known to CONTRACTOR of a use or disclosure of Protected Health Information by CONTRACTOR in violation of the requirements of this Certification or the Agreement.

III. AVAILABILITY OF PHI

CONTRACTOR agrees to make available Protected Health Information to the extent and in the manner required by Section 164.524 of the HIPAA Privacy Rule. CONTRACTOR agrees to make Protected Health Information available for amendment and incorporate any amendments to Protected Health Information in accordance with the requirements of Section 164.526 of the HIPAA Privacy Rule. In addition, CONTRACTOR agrees to make Protected Health Information available for purposes of accounting of disclosures, as required by Section 164.528 of the HIPAA Privacy Rule.

IV. TERMINATION

Notwithstanding anything in this Certification or the Agreement to the contrary, COUNTY shall have the right to terminate the Agreement immediately if COUNTY determines that CONTRACTOR has violated any material term of this Certification and/or the Agreement. If COUNTY reasonably believes that CONTRACTOR will violate a material term of this Certification and/or the Agreement and, where practicable, COUNTY gives written notice to CONTRACTOR of such belief within a reasonable time after forming such belief, and CONTRACTOR fails to provide adequate written assurances to COUNTY that it will not breach the cited term of this Certification and/or the Agreement within a reasonable period of time given the specific circumstances, but in any event, before the threatened breach is to occur, then COUNTY shall have the right to terminate the Agreement immediately.

V. MISCELLANEOUS

Except as expressly stated herein or the HIPAA Privacy Rule, the parties to the Agreement do not intend to create any rights in any third parties. The obligations of CONTRACTOR under this Section shall survive the expiration, termination, or cancellation of this Certification and/or the Agreement, and/or the business relationship of the parties, and shall continue to bind CONTRACTOR, its agents, employees, contractors, successors, and assigns as set forth herein.

The parties agree that, in the event that any documentation of the arrangement pursuant to which CONTRACTOR provides services to COUNTY contains provisions relating to the use or disclosure of Protected Health Information which are more restrictive than the provisions of this Certification or the Agreement, the provisions of the more restrictive documentation will control. The provisions of this Certification and the Agreement are intended to establish the minimum requirements regarding CONTRACTOR's use and disclosure of Protected Health Information.

In the event that either party believes in good faith that any provision of this Certification and/or the Agreement fails to comply with the then current requirements of the HIPAA Privacy Rule, such party shall notify the other party in writing. For a period of up to thirty (30) days, the parties shall address in good faith such concern and amend the terms of this Certification and/or the Agreement, if necessary to bring it into compliance. If, after such thirty-day period, the Certification and/or the Agreement fails to

Docusign Envelope ID: D8C81C2C-5F99-458A-907A-B6D0BE265975

5.02 CONTRACTOR, its agents, employees, and subcontractors shall perform all work in a safe and skillful manner and in compliance with all applicable laws and regulations. All work performed under this Agreement that is required by law to be performed or supervised by licensed personnel shall be performed in accordance with such licensing requirements.

5.03 CONTRACTOR shall furnish, at its own expense, all materials, equipment, and personnel necessary to carry out the terms of this Agreement, except as otherwise specified in this Agreement. CONTRACTOR shall not use County premises, property (including equipment, instruments, or supplies) or personnel for any purpose other than in the performance of its obligations under this Agreement.

6.0 PAYMENT CONDITIONS:

6.01 Prices shall remain firm for the initial term of the Agreement and, thereafter, may be adjusted annually as provided in this paragraph. The County does not guarantee any minimum or maximum amount of dollars to be spent under this Agreement.

6.02 Negotiations for rate changes shall be commenced, by CONTRACTOR, a minimum of ninety days (90) prior to the expiration of the Agreement. Rate changes are not binding unless mutually agreed upon in writing by the County and the CONTRACTOR.

6.03 Invoice amounts shall be billed directly to the ordering department.

6.04 CONTRACTOR shall submit such invoice periodically or at the completion of services, but in any event, not later than 30 days after completion of services. The invoice shall set forth the amounts claimed by CONTRACTOR for the previous period, together with an itemized basis for the amounts claimed, and such other information pertinent to the invoice. The County shall certify the invoice, either in the requested amount or in such other amount as the County approves in conformity with this Agreement and shall promptly submit such invoice to the County Auditor-Controller for payment. The County Auditor-Controller shall pay the amount certified within 30 days of receiving the certified invoice.

6.05 CONTRACTOR shall not receive reimbursement for mileage or travel expenses unless set forth in this Agreement.

7.0 TERMINATION:

7.01 During the term of this Agreement, the County may terminate the Agreement for any reason by giving written notice of termination to the CONTRACTOR at least thirty (30) days prior to the effective date of termination. Such notice shall set forth the effective date of termination. In the event of such termination, the amount payable under this Agreement shall be reduced in proportion to the services provided prior to the date of termination.

Docusign Envelope ID: EF3B0954-5660-84B7-804F-D0DCA73736ED

7.02 The County may cancel and terminate this Agreement for good cause effective immediately upon written notice to CONTRACTOR. "Good cause" includes the failure of CONTRACTOR to perform the required services at the time and in the manner provided under this Agreement. If County terminates this Agreement for good cause, the County may be relieved of the payment of any consideration to CONTRACTOR, and the County may proceed with the work in any manner, which County deems proper. The cost to the County shall be deducted from any sum due the CONTRACTOR under this Agreement.

7.03 The County's payments to CONTRACTOR under this Agreement are funded by local, state and federal governments. If funds from local, state and federal sources are not obtained and continued at a level sufficient to allow for the County's purchase of the indicated quantity of services, then the County may give written notice of this fact to CONTRACTOR, and the obligations of the parties under this Agreement shall terminate immediately, or on such date thereafter, as the County may specify in its notice, unless in the meanwhile the parties enter into a written amendment modifying this Agreement.

8.0 INDEMNIFICATION:

CONTRACTOR shall indemnify, defend, and hold harmless the County, its officers, agents, and employees, from and against any and all claims, liabilities, and losses whatsoever (including damages to property and injuries to or death of persons, court costs, and reasonable attorneys' fees) occurring or resulting to any and all persons, firms or corporations furnishing or supplying work, services, materials, or supplies in connection with the performance of this Agreement, and from any and all claims, liabilities, and losses occurring or resulting to any person, firm, or corporation for damage, injury, or death arising out of or connected with the CONTRACTOR's performance of this Agreement, unless such claims, liabilities, or losses arise out of the sole negligence or willful misconduct of the County. "CONTRACTOR's performance" includes CONTRACTOR's action or inaction and the action or inaction of CONTRACTOR's officers, employees, agents and subcontractors.

9.0 INSURANCE REQUIREMENTS:

9.01 **Evidence of Coverage:** Prior to commencement of this Agreement, the Contractor shall provide a "Certificate of Insurance" certifying that coverage as required herein has been obtained. Individual endorsements executed by the insurance carrier shall accompany the certificate. In addition, the Contractor upon request shall provide a certified copy of the policy or policies.

This verification of coverage shall be sent to the County's Contracts/Purchasing Department, unless otherwise directed. The Contractor shall not receive a "Notice to Proceed" with the work under this Agreement until it has obtained all insurance required and the County has approved such insurance. This approval of insurance shall neither relieve nor decrease the liability of the Contractor.

9.02 **Qualifying Insurers:** All coverages, except surety, shall be issued by companies which hold a current policy holder's alphabetic and financial size category rating of not less than A- VII, according to the current A.M. Best's Rating Guide or a company of equal financial stability that is approved by the County's Purchasing Agent.

9.03 **Insurance Coverage Requirements:** Without limiting CONTRACTOR's duty to

Docusign Envelope ID: EF3B0954-5660-84B7-804F-D0DCA73736ED

indemnify, CONTRACTOR shall maintain in effect throughout the term of this Agreement a policy or policies of insurance with the following minimum limits of liability:

Commercial General Liability Insurance: including but not limited to premises and operations, including coverage for Bodily Injury and Property Damage, Personal Injury, Contractual Liability, Broad form Property Damage, Independent Contractors, Products and Completed Operations, with a combined single limit for Bodily Injury and Property Damage of not less than $1,000,000 per occurrence, and $2,000,000 in the aggregate.
(Note: any proposed modifications to these general liability insurance requirements shall be attached as an Exhibit hereto, and the section(s) above that are proposed as not applicable shall be lined out in blue ink. All proposed modifications are subject to County approval.)

Auto Liability Coverage: must include motor vehicles, including scheduled, non-owned, and hired vehicles, used in providing services under this Agreement, with a combined single limit or Bodily Injury and Property Damage of not less than $1,000,000 per occurrence.
(Note: any proposed modifications to these auto insurance requirements shall be attached as an Exhibit hereto, and the section(s) above that are proposed as not applicable shall be lined out in blue ink. All proposed modifications are subject to County approval.)

Workers' Compensation Insurance: if CONTRACTOR employs others in the performance of this Agreement, in accordance with California Labor Code section 3700 and with Employer's Liability limits not less than $1,000,000 each person, $1,000,000 each accident and $1,000,000 each disease.
(Note: any proposed modifications to these Workers' Compensation Insurance requirements shall be attached as an Exhibit hereto, and the section(s) above that are proposed as not applicable shall be lined out in blue ink. All proposed modifications are subject to County approval.)

Professional Liability Insurance: if required for the professional services being provided, (e.g., those persons authorized by a license to engage in a business or profession regulated by the California Business and Professions Code), in the amount of not less than $1,000,000 per claim and $2,000,000 in the aggregate, to cover liability for malpractice or errors or omissions made in the course of rendering professional services. If professional liability insurance is written on a "claims-made" basis rather than an occurrence basis, the CONTRACTOR shall, upon the expiration or earlier termination of this Agreement, obtain extended reporting coverage ("tail coverage") with the same liability limits. Any such tail coverage shall continue for at least three years following the expiration or earlier termination of this Agreement.
(Note: Professional liability insurance coverage is required if the contractor is providing a professional service regulated by the state. Examples of service providers regulated by the state are insurance agents, professional architects and engineers, doctors, certified public accountants, lawyers, etc. However, other professional Contractors, such as computer or software designers, technology services, and services providers such as claims administrators, should also have professional liability. If in doubt, consult with your risk or contract manager.)

If the contractor maintains broader coverage and/or higher limits than the minimums shown above, the County requires and shall be entitled to the broader coverage and/or higher limits maintained by the contractor.

9.04 **Other Requirements:**

All insurance required by this Agreement shall be with a company acceptable to the County and issued and executed by an admitted insurer authorized to transact Insurance business in the State of California. Unless otherwise specified by this Agreement, all such insurance shall be written on an occurrence basis, or, if the policy is not written on an occurrence basis, such policy with the coverage required herein shall continue in effect for a period of three years following the date CONTRACTOR completes its performance of services under this Agreement.

Each liability policy shall provide that the County shall be given notice in writing at least thirty days in advance of any endorsed reduction in coverage or limit, cancellation, or intended non-renewal thereof. Each policy shall provide coverage for Contractor and additional insureds with respect to claims arising from each subcontractor, if any, performing work under this Agreement, or be accompanied by a certificate of insurance from each subcontractor showing each subcontractor has identical insurance coverage to the above requirements.

Additional Insured Status:

The County of Monterey, its officers, officials, employees, agents, and volunteers are to be covered as additional insureds on the auto liability policy for liability arising out of automobiles owned, leased, hired or borrowed by or on behalf of the Contractor. Auto liability coverage shall be provided in the form of an endorsement to the CONTRACTOR'S insurance.

The County of Monterey, its officers, officials, employees, agents, and volunteers are to be covered as additional insureds on the commercial general liability policy with respect to liability arising out of work or operations performed by or on behalf of the CONTRACTOR including materials, parts, or equipment furnished in connection with such work or operations. General liability coverage shall be provided in the form of an endorsement to the CONTRACTOR'S insurance (at least as broad as ISO Form CG 20 10 11 85 or if not available, through the addition of both CG 20 10, CG 20 26, CG 20 33, or CG 20 38; and CG 20 37 if a later edition is used).

Primary Coverage:

For any claims related to this contract, the CONTRACTOR'S insurance coverage shall be primary and non-contributory and at least as broad as ISO CG 20 01 04 13 as respects the County, its officers, officials, employees, agents, and volunteers. Any insurance or self-insurance maintained by the County, its officers, officials, employees, agents, or volunteers shall be excess of the CONTRACTOR'S insurance and shall not contribute with it. This requirement shall also apply to any Excess or Umbrella liability policies.

Workers' Compensation Insurance Waiver of Subrogation:

The Workers' Compensation Insurance policy required hereunder shall be endorsed to state that the Workers' Compensation Insurance carrier waives its right of subrogation against County, its officers, officials, employees, agents, or volunteers, which might arise by reason of payment under such policy in connection with performance under this Agreement by CONTRACTOR. Should CONTRACTOR be self-insured for Workers' Compensation Insurance, CONTRACTOR hereby agrees to waive its right of subrogation against County, its officers, officials, employees, agents, or volunteers.

Docusign Envelope ID: EF3B0954-5660-84B7-804F-D0DCA73736ED

Prior to the execution of this Agreement by the County, CONTRACTOR shall file certificates of insurance and endorsements with the County's contract administrator and County's Contracts/Purchasing Division, showing that the CONTRACTOR has in effect the insurance required by this Agreement. The CONTRACTOR shall file a new or amended certificate of insurance within five (5) calendar days after any change is made in any insurance policy, which would alter the information on the certificate then on file. Acceptance or approval of insurance shall in no way modify or change the indemnification clause in this Agreement, which shall continue in full force and effect. CONTRACTOR shall always during the term of this Agreement maintain in force the insurance coverage required under this Agreement and shall send, without demand by County, annual certificates to County's Contract Administrator and County's Contracts/Purchasing Division. If the certificate is not received by the expiration date, County shall notify CONTRACTOR and CONTRACTOR shall have five calendar days to send in the certificate, evidencing no lapse in coverage during the interim. Failure by CONTRACTOR to maintain such insurance is a default of this Agreement, which entitles County, at its sole discretion, to terminate this Agreement immediately.

10.0 RECORDS AND CONFIDENTIALITY:

10.01 **Confidentiality:** CONTRACTOR and its officers, employees, agents, and subcontractors shall comply with any and all federal, state, and local laws, which provide for the confidentiality of records and other information. CONTRACTOR shall not disclose any confidential records or other confidential information received from the County or prepared in connection with the performance of this Agreement, unless County specifically permits CONTRACTOR to disclose such records or information. CONTRACTOR shall not publish any such material without the prior written approval of County.

CONTRACTOR shall ensure that the evaluation and treatment of its employees and applicants for employment and all persons receiving and requesting services are free of such discrimination. CONTRACTOR and any subcontractor shall, in the performance of this Agreement, fully comply with all federal, state, and local laws and regulations which prohibit discrimination. WHEREAS, Sections 261 through 264 of the federal Health Insurance Portability and Accountability Act of 1996, Public Law 104-191, known as "the Administrative Simplification provisions," direct the Department of Health and Human Services to develop standards to protect the security, confidentiality and integrity of health information; and

WHEREAS, pursuant to the Administrative Simplification provisions, the Secretary of Health and Human Services has issued regulations modifying 45 CFR Parts 160 and 164 (the "HIPAA Privacy Rule"); and

WHEREAS, CONTRACTOR and COUNTY have entered into an Agreement ("the Agreement") to which this Certification is an attachment whereby CONTRACTOR will provide certain services to COUNTY; and

WHEREAS, CONTRACTOR may have access to Protected Health Information (as defined below) in fulfilling its responsibilities under the underlying Agreement.

THEREFORE, in consideration of the Parties' continuing obligations under the Agreement, compliance with the HIPAA Privacy Rule, and other good and valuable consideration, the receipt and sufficiency of which is hereby acknowledged, CONTRACTOR agrees to the provisions of this Certification and of the HIPAA Privacy Rule and to protect the interests of COUNTY.

I. DEFINITIONS

Except as otherwise defined herein, any and all capitalized terms in this Section shall have the definitions set forth in the HIPAA Privacy Rule. In the event of an inconsistency between the provisions of this Certification and mandatory provisions of the HIPAA Privacy Rule, as amended, the HIPAA Privacy Rule shall control. Where provisions of this Certification are different than those mandated in the HIPAA Privacy Rule, but are nonetheless permitted by the HIPAA Privacy Rule, the provisions of this Certification shall control.

The term "Protected Health Information" means individually identifiable health information including, without limitation, all information, data, documentation, and materials, including without limitation, demographic, medical and financial information, that relates to the past, present, or future physical or mental health or condition of an individual; the provision of health care to an individual; or the past, present, or future payment for the provision of health care to an individual; and that identifies the individual or with respect to which there is a reasonable basis to believe the information can be used to identify the individual.

CONTRACTOR acknowledges and agrees that all Protected Health Information that is created or received by COUNTY and disclosed or made available in any form, including paper record, oral communication, audio recording, and electronic display by COUNTY, or its operating units, to CONTRACTOR or is created or received by CONTRACTOR on COUNTY's behalf shall be subject to this Certification.

II. CONFIDENTIALITY REQUIREMENTS

Docusign Envelope ID: EF3B0954-5660-84B7-804F-D0DCA73736ED

(a) CONTRACTOR agrees:
(i) to use or disclose any Protected Health Information solely: (1) for meeting its obligations as set forth in any agreements between the Parties evidencing their business relationship or (2) as required by applicable law, rule or regulation, or by accrediting or credentialing organization to whom COUNTY is required to disclose such information, or as otherwise permitted under this Certification, or the underlying Agreement ,(if consistent with this Certification and the HIPAA Privacy Rule), or the HIPAA Privacy Rule, and (3) as would be permitted by the HIPAA Privacy Rule if such use or disclosure were made by COUNTY; and
(ii) at termination of the Agreement, (or any similar documentation of the business relationship of the Parties), or upon request of COUNTY, whichever occurs first, if feasible CONTRACTOR will return or destroy all Protected Health Information received from or created or received by CONTRACTOR on behalf of COUNTY that CONTRACTOR still maintains in any form, and retain no copies of such information, or if such return or destruction is not feasible, CONTRACTOR will extend the protections of this Agreement to the information and limit further uses and disclosures to those purposes that make the return or destruction of the information not feasible; and
(iii) to ensure that its agents, including a subcontractor(s), to whom it provides Protected Health Information received from or created by CONTRACTOR on behalf of COUNTY, agrees to the same restrictions and conditions that apply to CONTRACTOR with respect to such information. In addition, CONTRACTOR agrees to take reasonable steps to ensure that its employees' actions or omissions do not cause CONTRACTOR to breach the terms of the Agreement.

(b) Notwithstanding the prohibitions set forth in this Certification or the Agreement, CONTRACTOR may use and disclose Protected Health Information as follows:
(i) if necessary, for the proper management and administration of CONTRACTOR or to carry out the legal responsibilities of CONTRACTOR, provided that as to any such disclosure, the following requirements are met:
(A) the disclosure is required by law; or
(B) CONTRACTOR obtains reasonable assurances from the person to whom the information is disclosed that it will be held confidentially and used or further disclosed only as required by law, or for the purpose for which it was disclosed to the person, and the person notifies CONTRACTOR of any instances of which it is aware in which the confidentiality of the information has been breached;
(ii) for data aggregation services, if to be provided by CONTRACTOR for the health care operations of COUNTY pursuant to any agreements between the Parties evidencing their business relationship. For purposes of this Certification and the Agreement, data aggregation services means the combining of Protected Health Information by CONTRACTOR with the protected health information received by CONTRACTOR in its capacity as CONTRACTOR of another COUNTY, to permit data analyses that relate to the health care operations of the respective covered entities.

(c) CONTRACTOR will implement appropriate safeguards to prevent use or disclosure of Protected Health Information other than as permitted in this Certification. The Secretary of Health and Human Services shall have the right to audit CONTRACTOR's records and practices related to use and disclosure of Protected Health Information to ensure

Docusign Envelope ID: EF3B0954-5660-84B7-804F-D0DCA73736ED

COUNTY's compliance with the terms of the HIPAA Privacy Rule. CONTRACTOR shall report to COUNTY any use or disclosure of Protected Health Information which is not in compliance with the terms of this Certification of which it becomes aware. In addition, CONTRACTOR agrees to mitigate, to the extent practicable, any harmful effect that is known to CONTRACTOR of a use or disclosure of Protected Health Information by CONTRACTOR in violation of the requirements of this Certification or the Agreement.

III. AVAILABILITY OF PHI

CONTRACTOR agrees to make available Protected Health Information to the extent and in the manner required by Section 164.524 of the HIPAA Privacy Rule. CONTRACTOR agrees to make Protected Health Information available for amendment and incorporate any amendments to Protected Health Information in accordance with the requirements of Section 164.526 of the HIPAA Privacy Rule. In addition, CONTRACTOR agrees to make Protected Health Information available for purposes of accounting of disclosures, as required by Section 164.528 of the HIPAA Privacy Rule.

IV. TERMINATION

Notwithstanding anything in this Certification or the Agreement to the contrary, COUNTY shall have the right to terminate the Agreement immediately if COUNTY determines that CONTRACTOR has violated any material term of this Certification and/or the Agreement. If COUNTY reasonably believes that CONTRACTOR will violate a material term of this Certification and/or the Agreement and, where practicable, COUNTY gives written notice to CONTRACTOR of such belief within a reasonable time after forming such belief, and CONTRACTOR fails to provide adequate written assurances to COUNTY that it will not breach the cited term of this Certification and/or the Agreement within a reasonable period of time given the specific circumstances, but in any event, before the threatened breach is to occur, then COUNTY shall have the right to terminate the Agreement immediately.
