Water Resources Agency Planning Committee

*Deidre Sullivan, Chair
Ken Ekelund
Mark Gonzalez
Matthew Simis*

To participate in this Planning Committee meeting through the following methods:

1. You may attend in person,
2. For ZOOM participation please join by computer audio at:
<https://montereycty.zoom.us/j/95511982423>
OR to participate by phone call any of these numbers below:
+1 669 900 6833 US (San Jose)
+1 346 248 7799 US (Houston)
+1 312 626 6799 US (Chicago)
+1 929 205 6099 US (New York)
+1 253 215 8782 US
+1 301 715 8592 US

Enter this Meeting ID number: 955 1198 2423, PASSWORD: 884853 when prompted. Please note there is no Participant Code, you will just hit # again after the recording prompts you. You will be placed in the meeting as an attendee; when you are ready to make a public comment, if joined by computer audio, please Raise your Hand; and by phone, please push *9 on your keypad.

3. If you wish to comment on a specific agenda item while the matter is being heard, you may participate by the following means: When the Chair calls for public comment on an agenda item, the Zoom Meeting Host, or his or her designee, will first ascertain who wants to comment (among those who are in the meeting electronically or telephonically) and will then call on speakers and unmute their device one at a time. Public speakers may be broadcast in audio form only.

PLEASE NOTE: IF ALL COMMITTEE MEMBERS ARE PRESENT IN PERSON, PUBLIC PARTICIPATION BY ZOOM IS FOR CONVENIENCE ONLY AND IS NOT REQUIRED BY LAW. IF THE ZOOM FEED IS LOST FOR ANY REASON, THE PLANNING COMMITTEE MEETING MAY BE PAUSED WHILE A FIX IS ATTEMPTED BUT THE PLANNING COMMITTEE MEETING MAY CONTINUE AT THE DISCRETION OF THE CHAIRPERSON.

4. If you wish to comment on a particular agenda item, please submit your comments in writing via email to Monterey County Water Resources Agency at WRAPubliccomment@countyofmonterey.gov by 5:00 p.m. on the Tuesday prior to the Committee meeting. To assist Agency staff in identifying the agenda item to which the comment relates please indicate the Committee meeting date and agenda number in the subject line. Comments received by the 5:00 p.m. Tuesday deadline will be distributed to the Committee and will be placed in the record.

5. If you wish to make either a general public comment for items not on the day's agenda or to Committee Meeting Agenda comment on a specific agenda item as it is being heard, please submit your comment, limited to 250 words or less, to the Monterey County Water Resources Agency at WRAPubliccomment@countyofmonterey.gov In an effort to assist Agency staff in identifying the

agenda item relating to your public comment please indicate in the subject line, the meeting body (i.e. Planning Committee) and item number (i.e. Item No. 10). Every effort will be made to read your comment into the record, but some comments may not be read due to time limitations. Comments received after an agenda item will be made part of the record if received prior to the end of the meeting.

6. If speakers or other members of the public have documents they wish to distribute to the Committee for an agenda item, they are encouraged to submit such documents by 5:00 p.m. on Tuesday before the meeting to: WRAPubliccomment@countyofmonterey.gov. To assist Agency staff in identifying the agenda item to which the comment relates, the public is requested to indicate the Committee date and agenda number in the subject line.

7. If members of the public want to present documents/Power Point presentations while speaking, they should submit the document electronically by 5:00 p.m. on Tuesday before the meeting at WRAPubliccomment@countyofmonterey.gov. (If submitted after that deadline, staff will make best efforts, but cannot guarantee, to make it available to present during the Committee meeting.)

8. Individuals with disabilities who desire to request a reasonable accommodation or modification to observe or participate in the meeting may make such request by sending an email to WRAPubliccomment@countyofmonterey.gov. The request should be made no later than noon on the Wednesday prior to the Committee meeting in order to provide time for the Agency to address the request.

9. The Chair and/or Secretary may set reasonable rules as needed to conduct the meeting in an orderly manner.

Participar en esta reunión del Comité de Planificación a través de los siguientes métodos:

1. Puede asistir en persona,

2.El público puede observar la reunión ZOOM a través de computadora haciendo clic en el siguiente enlace: <https://montereycty.zoom.us/j/95511982423>

O el público puede escuchar a través del teléfono llamando al:

+1 669 900 6833 US (San Jose)

+1 346 248 7799 US (Houston)

+1 312 626 6799 US (Chicago)

+1 929 205 6099 US (New York)

+1 253 215 8782 US

+1 301 715 8592 US

Cuando se le solicite el código de acceso para entrar a la reunión, presione los siguientes números: 955 1198 2423, PASSWORD: 884853 . Tenga en cuenta que no hay un Código de participante, simplemente presionará # nuevamente después de que la grabación lo solicite. Se le colocará en la reunión como asistente; cuando esté listo para hacer un comentario público si se une al audio de la computadora, levante la mano; y por teléfono presione * 9 en su teclado.

3. Los miembros del público que desean comentar en un artículo específico de la agenda, mientras que el artículo se este presentando durante la reunión, pueden participar por cualquiera de los siguientes medios: Cuando el Presidente del Comité solicite comentarios públicos sobre un artículo de la agenda, el anfitrión de la reunión Zoom o su designado, primero determinará quién quiere testificar (entre los que están en la reunión por vía electrónica o telefónica) y luego llamará a los oradores (speakers) y activará la bocina para el orador, uno a la vez. Todo orador, será transmitido por audio en altavoz solamente.

TENGA EN CUENTA: SI TODOS LOS MIEMBROS DEL COMITÉ ESTÁN PRESENTES EN PERSONA, LA PARTICIPACIÓN PÚBLICA DE ZOOM ES SOLO POR CONVENIENCIA Y NO ES REQUERIDA POR LA LEY. SI LA FUENTE DE ZOOM SE PIERDE POR CUALQUIER MOTIVO, LA REUNIÓN DEL COMITÉ DE PLANIFICACIÓN PUEDE PAUSARSE MIENTRAS SE INTENTA UNA SOLUCIÓN, PERO LA REUNIÓN DEL COMITÉ DE PLANIFICACIÓN PUEDE CONTINUAR A DISCRECIÓN DEL PRESIDENTE.

4. Si un miembro del público desea comentar sobre un artículo de la agenda en particular, se le es sumamente recomendable que envíe sus comentarios por escrito por correo electrónico a la Agencia de Administración de Recursos del Agua (Agencia) a WRAPubliccomment@countyofmonterey.gov antes de las 5:00 P. M. el Martes antes de la reunión del Comité. Para ayudar al personal de la Agencia a identificar el número del artículo de la agenda con el cual se relaciona el comentario, se solicita al público que indique la fecha de la reunión del Comité y el número del artículo de la agenda en la línea de asunto. Comentarios recibidos en la fecha límite del Martes a las 5 P.M, serán distribuidos al Comité y serán colocados en el registro.

5. Los miembros del público que deseen hacer un comentario público general para temas que no están en la agenda del día o que deseen comentar en un artículo específico mientras se escucha la presentación, lo pueden hacer enviando un comentario por correo electrónico, preferiblemente limitado a 250 palabras o menos, a WRAPubliccomment@countyofmonterey.gov. Para ayudar al personal de la Agencia a identificar el artículo de la agenda con el cual se relaciona el comentario, se solicita al público que indique el nombre del Comité (por ejemplo: Comite de Planificación) y el número del artículo de la agenda (por ejemplo: Artículo # 10). Se hará todo lo posible para leer el comentario en el registro, pero algunos comentarios pueden no leerse en voz alta debido a limitaciones de tiempo. Los comentarios recibidos después del cierre del período de comentarios públicos sobre un artículo de la agenda serán parte del registro si se reciben antes que termine la reunión del Comité.

6. Si los oradores u otros miembros del público tienen documentos que desean distribuir al Comité para un artículo de la agenda, se les recomienda enviar dichos documentos antes de las 5:00P.M. el Martes antes de la reunión a: WRAPubliccomment@countyof.monterey.gov. Para ayudar al personal de la Agencia a identificar el número del artículo de la agenda con el cual se relaciona el comentario, se solicita al público que indique la fecha de la reunion del Comité y el número de agenda en la línea de asunto.

7. Si los miembros del público desean presentar documentos o presentaciones de PowerPoint mientras hablan, deben enviar el documento electrónicamente antes de las 5:00 P.M. del Martes antes de la reunión a WRAPubliccomment@countyofmonterey.gov. (Si se presenta después de ese plazo, el personal hará los mejores esfuerzos, pero no puede garantizar que esté disponible su PowerPoint para presentar durante la reunión del Comité).

8. Las personas con discapacidades que deseen solicitar una modificación o modificación razonable para observar o participar en la reunión pueden realizar dicha solicitud enviando un correo electrónico a WRAPubliccomment@countyofmonterey.gov. La solicitud debe hacerse a más tardar el mediodía del Martes antes de la reunión del Comité para dar tiempo a la Agencia para que atiendala solicitud.

9. El Presidente y / o Secretario pueden establecer reglas razonables según sea necesario para llevar a cabo la reunión de manera ordenada.

Update on the Nonpoint Source Implementation Plan. (Presenter: Manuel Saavedra)

Nonpoint Source Implementation Plan Update

Overview:

- On February 18, 2022, the Central Coast Regional Water Quality Control Board adopted a Basin Plan amendment establishing total maximum daily loads (TMDLs) for turbidity in the Gabilan Creek watershed.
- The MCWRA operates pump stations facilities in several streams in the lower Gabilan Creek watershed.
- MCWRA is required to meet TMDL load allocations during pump operations.

Gabilan Watershed Pump Stations

Legend

- | | | |
|----------------------------|--------------|----------------------------|
| PS | Pump Station | Detention Basins/Dry Lakes |
| Reclamation Ditch | | Upstream Monitoring Site |
| Downstream Monitoring Site | | |

Nonpoint Source Implementation Plan Update

TMDL Implementation Requirements:

- Development of a Nonpoint Source (NPS) program for meeting turbidity water quality objectives.
- NPS program includes the following Best Management Practices:
 - Decrease pump operation times.
 - Operate low flow capacity pumps during the summer months.
 - Improve riprap protection of the channel banks on discharge side of the pump stations to reduce erosion.
 - Water Quality Monitoring at pump stations.

Nonpoint Source Implementation Plan Update

Turbidity Water Quality Objectives:

- Where natural turbidity is between 0 and 50 Nephelometric Turbidity Units (NTU), increases shall not exceed 20 percent.
- Where natural turbidity is between 50 and 100 NTU, increase shall not exceed 10 NTU.
- Where natural turbidity is greater than 100 NTU, increases shall not exceed 10 percent.

Nonpoint Source Implementation Plan Update

Timeline:

PUMP STATION NAME	MANAGEMENT PRACTICE ALTERNATIVE (MP No. 1)	TIMELINE	MANAGEMENT PRACTICE ALTERNATIVE (MP No. 2)	TIMELINE	MANAGEMENT PRACTICE ALTERNATIVE (MP No. 3)	TIMELINE
ESPINOSA	Adjust ON/OFF pump run setpoints.	By May 2025	Not Applicable	-	Improve riprap armoring in channel downstream of PS	By December 2027
LOWER MERRITT (Pilot Project)	Not Applicable	-	Operate portable small HP engine driven pump.	By May 2025	Improve riprap armoring in channel downstream of PS	By December 2027
UPPER MERRITT (Pilot Project)	Not Applicable	-	Operate existing electrical small HP pump	By May 2025	Improve riprap armoring in channel downstream of PS	By December 2027
SANTA RITA	Not Applicable	-	Operate portable small HP engine driven pump.	By May 2025	Improve riprap armoring in channel downstream of PS	By December 2027

Nonpoint Source Implementation Plan Update

Progress to Date

- MCWRA is currently conducting a Nonpoint Source Implementation Plan Pilot Study at the Lower Merritt Pump Station.
- Water Quality and flow data is being collected and monitored.

Matter Type: WRA Planning Item

Update on the activities related to the Salinas Valley Basin Groundwater Sustainability Agency's (SVBGSA) subgrant agreements. (Presenter: Shaunna Murray)

TODAY'S ACTION

Update on the MCWRA activities related to
the Salinas Valley Basin Groundwater
Sustainability Agency's Subgrant Agreements

Background

- Local Groundwater Sustainability Agencies (GSAs) have received State funding for studies and projects that rely on Agency programs, permits, water rights, and infrastructure
- Subgrant agreements have been developed between the SVBGSA and Agency to cover staff time to participate in, advise on, or complete various studies and activities.

Prior BOD Action

- Approved Subgrant Agreement and Amendments for services in support of Sustainable Groundwater Management Act Implementation Grant, Round 1
 - September 2022: original agreement totaling \$3,690,000
 - July 2023: amendment 1 for an additional \$131,000 for services and revised work plan (total \$3,821,000)
 - June 2024: amendment 2 to align with grant deadline and reduce grant total by \$341,000 (total \$3,480,000)
 - February 2025: amendment 3 for an additional \$1,500, revised work plan and time extension (total \$3,483,300)
- Approved Subgrant Agreement and Amendment for services in support of Sustainable Groundwater Management Act Implementation Grant, Round 2
 - January 2025: original agreement totaling \$250,000
 - February 2025: amendment 1 for an additional \$150,000 for services (total \$400,000)

Financial Impact

- Subgrant Agreement Round 1 is for an amount not to exceed \$3,483,300 allocated to staff time and other project costs related to planning, design and implementation
- Subgrant Agreement Round 2 is for an amount not to exceed \$400,000 and has been allocated to staff time to complete the projects and coordination
- No required matching funds or cost share from the Agency

Strategic Plan Alignment

Agency work under the Subgrant Agreements aligns with the Strategic Plan

- **Goal B, Planning and New Projects**

- **Strategy 1** - Expand and optimize the CSIP system.
- **Strategy 2** - Collaborate with local Groundwater Sustainability Agencies, define MCWRA's role, and implement a GSA integration plan.
- **Strategy 3** - Identify new water projects for development, utilizing existing or new water rights in collaboration with the GSA.

- **Goal C, Financial Sustainability**

- **Strategy 6** – Pursue grant funding and cost saving opportunities from all available sources, including collaborating with the GSA.

Discussion

- Both the SVGBSA and MCWRA have crucial roles related to the management of regional water supplies
- MCWRA staff is participating in various processes as memorialized in the relevant agreements in place
 - Continue to collect and expand groundwater monitoring for evaluation of current conditions and to inform decisions
 - Focus on evaluating GSPs Management Actions for feasible implementation
 - Priority questions include:
 - How do current facilities and operations work?
 - » Are there missed opportunities?
 - » What can be improved/done differently?
 - How much water is available?
 - When is the water available?
 - Where is the water available?
 - What can we do with the water, e.g., storage vs direct use?
 - Projects all have ambitious timeframes

Types of Activities

Existing Facility/Operations Studies and Improvements:

- Dry Chlorine Scrubber Upgrade at Recycled Water Plant
- CSIP System & Operations Hydraulic Modeling
 - CSIP Distribution System Upgrades
 - Water scheduling system
 - Input on development of a Recycled Water Master Plan
- CSIP Distribution system booster enhancements

New Project Studies:

- Feasibility study on Aquifer Storage and Recovery
- Assessment of project constraints related to Agency permits and policies.
- Feasibility study for NSIP/CSIP Expansion
- Advise on Brackish Groundwater Restoration Project
- Reservoir operations modeling
- Castroville and Eastside Canals and Alternatives

Data Collection, Analysis and Monitoring:

- Expansion of Groundwater Monitoring Program
- Monitoring plan for the Deep Aquifers
- Water quality sampling to provide data for the Brackish Groundwater Restoration Project

Existing Facility Improvements: Dry Chlorine Scrubber Upgrade at Recycled Water Plant COMPLETED

Overview:

The Dry Chlorine Scrubber Upgrade at the Salinas Valley Reclamation Project (SVRP) reduces the annual maintenance requirements for the treatment system and increases the number of days that recycled water is available for delivery to CSIP users. M1W has had to shut down its tertiary treatment process every winter for maintenance of the existing chlorination system to comply with hazardous materials plan requirements and maintain its reliability. During that period, river water is also not permitted for diversion and use; therefore, the system must rely solely on groundwater from CSIP supplemental wells to deliver irrigation water to farmers in the seawater-intruded area. If a chlorine leak should occur during the summer, the entire treatment plant and river diversion facility would have to be shut down for repairs, also forcing CSIP to rely on groundwater.

This Component implements the first phase of GSP Priority Project #3: CSIP Winter Modifications through installing a dry chlorine scrubber system to replace the existing wet scrubber system. Chlorine is used to disinfect both recycled and surface water. The previous scrubber system used liquid caustic chlorine scrubbers to contain and remove toxic gaseous chlorine from the air in the event of an accidental release from the chlorine containment system. The new system incorporates two dry scrubbers into the existing chlorination system. The dry scrubbers are much safer to operate due to the elimination of liquid caustic ammonia which is a hazardous material that is corrosive to the system. The new system utilizes two scrubber tanks so that one is always available during maintenance of the other.

Existing Facility Improvements: CSIP Hydraulic Modeling IN PROGRESS

Technical Memo Overview:

The report documents the development, calibration, and application of a new hydraulic computer model for the CSIP distribution system. The purpose of this study is to replace the previous hydraulic model, evaluate existing CSIP distribution system capacity and performance under peak irrigation demands, and provide recommendations to guide MCWRA's capital improvement planning and long-term operational strategies, with the goal of optimizing existing operations and minimizing reliance on supplemental groundwater wells.

Existing Facility Improvements: CSIP Hydraulic Modeling

Outcomes: recommended system improvements to address hydraulic constraints, minimize reliance on groundwater, while enhancing system redundancy and reliability.

CIP 1 – Rodgers Loop Check Valve and Pressure Relief Valve

Installation of a check valve and pressure relief valve along the 24-inch pipe at Rodgers Loop prevents the Espinosa Booster Pump Station from recirculating through the loop, thereby improving pumping efficiency.

CIP 2 – Second CSIP Storage Pond Outlet Pipe

Construction of a new 30-inch outlet pipeline from the CSIP Storage Pond to Turnout 78 increases conveyance capacity across the Salinas River and provides operational redundancy for the existing 51-inch outlet pipe.

CIP 3 – In-System Storage and Booster Pump Station

Construction of 10–12.5 million gallons of new water storage with a booster pump station on the northeastern side of the CSIP distribution system adjacent to Blackie Road creates a secondary pressurized supply point. By reducing headloss and improving pressures at critical turnouts, the project strengthens redundancy and balances weekly demand fluctuations.

Existing Facility Improvements: CSIP Distribution System Booster Enhancements IN PROGRESS

Overview:

The Booster Station Enhancements will reduce the use of CSIP groundwater wells to address distribution system hydraulic deficiencies by optimizing the effectiveness of the three booster station sites.

All eight booster pumps at the three booster station sites (Espinosa, Molera, and Lapis) have been fully rebuilt and recoated, this includes both the pumping equipment and the motor. Final onsite equipment recoating was completed, and the optimization efforts are finalizing. The Molera Booster station motor VFD's control units have been ordered and are in production with arrival anticipated in September 2025, which will then complete this project.

PLANNING PHASE: Aquifer Storage and Recovery

Goals and Objectives

Address seawater intrusion in 180/400-Foot Aquifer Subbasin by:

- Maximizing surface water diversions
- Raising groundwater levels through injection
- Reducing groundwater pumping

Preliminary Feasibility Study / Conceptual Analysis

Summary Report

TM-1: Assesses physical and operational constraints, considering existing infrastructure such as the Nacimiento and San Antonio Reservoirs, the Salinas River Diversion Facility, and CSIP, while identifying new infrastructure needs.

TM-2: Reviews permitting and regulatory requirements, including water rights.

TM-3: Summarizes available water quality data and recommends a sampling plan for further treatment analysis.

TM-4: Presents groundwater flow modeling results.

PLANNING PHASE: Aquifer Storage and Recovery COMPLETED

ASR Scenarios Evaluated

Scenario	Description
Seasonal Release with ASR project concept	• Shift reservoir releases and diversions at SRDF to Dec-June • Injects treated water via new ASR wells • Summer extraction from ASR wells
New Diversion of Winter High Flows for ASR project concept – Alternative 1	• No change to current April-October SRDF operations or “business as usual CSIP” • For ASR: use excess flows to divert November-April and inject (no extraction from ASR wells)
New Diversion of Winter High Flows for ASR project concept with injection into 400-Foot Aquifer only – Alternative 1A	• Same as Alternative 1, except all diverted water is injected into 400-Foot Aquifer only

PLANNING PHASE: Aquifer Storage and Recovery COMPLETED

Key Findings

ASR Scenarios did not achieve SWI Minimum Threshold

Seasonal Release with ASR project concept has significant operational constraints associated with releasing stored reservoir water and rediverting it at SRDF in winter.

Modified or new water rights would be needed for either approach.

Existing CSIP and SRDF infrastructure upgrades are likely required to implement either approach.

The timing of diversions and injection is key for meeting CSIP demands in the peak season.

Seasonal release/re-diversion scenario may create additional issues with not being able to meet CSIP demands, exacerbating the need to pump more groundwater

PLANNING PHASE: Castroville and Eastside Canals and Alternatives Roadmap IN PROGRESS

Purpose:

- Support MCWRA to put Permit 11043 water right to beneficial use
- Understand project options, including but not limited to Permit 11043, for achieving groundwater sustainability, to be further studied.

Project Scenario(s):

- Identify a realistic project concept using additional supply from the Salinas River for:
 - Mitigating seawater intrusion
 - and/or
 - Addressing lowered groundwater levels to help achieving Sustainable Management Criteria (SMC) in Eastside, Langleigh, 180/400

PLANNING PHASE: Castroville and Eastside Canals and Alternatives Roadmap

Timeline:

Phase 1 includes:

- History / Project Ideas
- Permit 11043 and new water rights
- Project concept to use Salinas River diversions to mitigate seawater intrusion
- Estimation of how much water might be diverted
- Tool for project evaluation and ranking
- Report

Phases 2 & 3 include: Modeling of streamflow and permitted and alternative points of diversion and effects relative to Sustainable Management Criteria. Modeling of at least 2 climate change scenarios.

PLANNING PHASE: New Seawater Intrusion Project (NSIP) IN PROGRESS

Overview:

- Modified description of CSIP Expansion
- Evaluation of a new agricultural water supply project to compare options for delivery of alternative supplies to areas experiencing or at risk of seawater intrusion, outside of CSIP area
- High Level Feasibility Study for New Seawater Intrusion Project (NSIP)

PLANNING PHASE: New Seawater Intrusion Project (NSIP)

Approach:

- Includes source water investigations, identification of delivery areas and irrigation demands, infrastructure needs and sizing paired with source water options, costs
- First Step: Source Water Usability Evaluation
This includes identifying different source waters that could be used for NSIP and defining volumes, quality, timing, and other issues, e.g. water rights, related with securing these supplies. Water quality evaluation and storage needs.
- Subsequent Steps: Project Configurations and Modeling; and Delivery Area Scenarios and Technical Memorandum
- Carollo Engineers to support this study, including assistance with documenting findings on potential source waters, engineering analysis of options for distribution system sizing and layouts, and cost estimates

PLANNING PHASE: New Seawater Intrusion Project (NSIP)

- Source waters to be considered may include:
 - effluent available from Monterey One Water Regional Treatment Plant currently not put to beneficial use 2) the City of Salinas industrial ponds
 - Tembladero Slough, Reclamation Ditch No.1665, and the Blanco Drain surface water related to water right applications A032263C, and A032263D currently not put to beneficial use
 - excess or available Salinas River Diversion Facility (SRDF)
 - other potential sources under investigation in SVBGSA's feasibility studies for Salinas River water as identified from the Castroville and Eastside Canals and Alternatives study related to water right permit 11043
 - treated brackish groundwater

PLANNING PHASE: DATA EXPANSION AND SGMA COMPLIANCE IN PROGRESS

Work plans for both SGM Round 2 grants include tasks related to expanding well registration and groundwater extraction reporting programs in the Salinas Valley Groundwater Basin

Discussion (cont.)

- Timelines for relevant agreements:
 - Round 1 grant: Ends September 30, 2025
 - Round 2 grant: Ends March 31, 2026
 - GMP Service Agreement for March 1, 2025 to June 30, 2026 recommended by BOD and being considered by BOS to fund full year of program activities
 - SVBGSA/MCWRA MOU for additional services through valid through June 15, 2026

- Other coordination efforts
 - Staff-level meetings on a regular basis
 - Both SVBGSA and MCWRA Committee participation
 - e.g.: MCWRA BMAC and SVBGSA Advisory Committee

Next Steps

- Closeout Round 1 Grant
 - Complete final CSIP Distribution System project design
 - Report out on preferred project scope and estimated costs
 - Finalize Subgrant Completion Report and Deliverables
- GMP data collection activities have commenced and reporting will be provided as available
- Coordinated updates on Management Action Progress will be presented by SVBGSA and MCWRA staff this fall/winter
 - A roadmap to decision making will be developed for actions next year
