Section 3 (Sanitation) Notes –

- ¹ An Onsite Wastewater Treatment System, referred to throughout Article I.E. as “OWTS”, is a system used to collect and treat wastewater from a single family dwelling or buildings that dispose of the treated wastewater below ground on the same parcel as the structure(s) that the OWTS serves. A Package Treatment Plant means a non-regional wastewater treatment facility that treats two-thousand and five hundred gallons or more per day of wastewater and does not include OWTS. A Wastewater Treatment Facility means a facility designed to receive wastewater from a regional area, e.g. The Monterey Regional Water Pollution Control Agency (MRWPCA) or the Carmel Area Wastewater District (CAWD). Definitions of the terms referenced herein are consistent with the 2010 Monterey County General Plan.
- ² An OWTS permit may only be renewed if no changes to Monterey County Code, Chapter 15.20 or the Central Coast Basin Plan have been approved by the Monterey County Board of Supervisors or the Central Coast Regional Water Quality Control Board, respectively, since the date of permit issuance and no changes to the OWTS design are proposed. An OWTS permit that has expired more than 36 months from the date of issuance shall be void; therefore, a new application and applicable fees must be submitted for consideration by EHB staff prior to issuance of the OWTS permit. If an applicant proposes to change the OWTS design for an expired OWTS permit a new application and applicable fees must be submitted for consideration by EHB staff prior to issuance of the OWTS permit.
- ³ Relative to OWTS construction permits, fees collected for soils and/or percolation testing shall be credited toward a subsequent OWTS permit application, up to 50% of the total permit fee, provided the permit application is made within 6 months of the first day of onsite soils and/or percolation testing. Relative to discretionary permits, fees collected for soils and/or percolation testing shall be credited toward a subsequent discretionary permit, except design approval, provided the discretionary permit application is made within 6 months of the application appointment. The fees collected for soils and/or percolation testing shall only be credited toward one (1) subsequent application, being either an OWTS construction permit or discretionary permit.
- ⁴ In the event staff time spent reviewing the application materials exceeds 27 hours, the applicant may be billed for each additional hour beyond 27 hours at the current hourly rate approved by the Board of Supervisors through this article, Article I.E.
- ⁵ In the event staff time spent reviewing the application materials exceeds 41 hours, the applicant may be billed for each additional hour beyond 41 hours at the current hourly rate approved by the Board of Supervisors through this article, Article I.E.

Section 5 (Land Use) Notes –

- 1 Unless a “deposit” is indicated, the fee is a flat fee based on the estimated reasonable cost, averaged across all applications, of processing the permit/entitlement/activity for which the fee is charged. For certain matters, a “deposit” is indicated because the cost of processing varies widely depending on the particular application. Where a “deposit” is indicated, the fee will be based on actual cost, measured by actual time spent on a particular application in quarter hour (.25) increments. Applicant is required to pay the deposit, which is based on an estimate of minimum cost, and to increase the deposit if, in the course of processing the application, County determines that the deposit is insufficient to cover actual processing time. The fee will be calculated at full cost recovery when the project is complete. Where there are conflicting deposit amounts, the lower deposit shall apply.
- 2 In the coastal zone, the appeal fee applies only to appeals of permits that are not appealable to the California Coastal Commission such as Administrative Permits, Design Approvals, Variances and Tree Removal Permits in certain coastal areas. The appeal fee does not apply to appeals of Coastal Development Permits that are appealable to the Coastal Commission. The Appeal fee is based upon the fee adopted by the Board of Supervisors on May 7, 2013, which sets the fee substantially lower than the actual cost. The Appeal Fee is subsidized by the County General Fund.
- 3 “Extraordinary development applications” are those applications which will require staff time well beyond the typical application, as determined by the Director of Planning. These applications may include, by way of example and without limitation, applications for large scale development involving multiple discretionary entitlements, significant technical review by other land use agencies, and/or an anticipated lengthy time frame for processing because of their scope and complexity. Consistent with these criteria, any project requiring the preparation of an EIR shall qualify as an extraordinary development application. The amount paid to the County is for staff costs. The County may utilize a consultant, whose expenses shall be fully funded by the project applicant.
- 4 Fees for Combined Development Permits under Chapter 21.76 of Title 21 and Chapter 20.70 of Title 20 shall be 85% of the total combined permit application fees. Fees for Condition Compliance on Combined Development Permits shall be 85% of the total combined Condition Compliance fees on each permit assessed an application fee as part of the Combined Development Permit.
- 5 Fees collected for Development Review Conferences shall be credited against any subsequent discretionary permit, except design approval, provided the discretionary permit application is made within 6 months of the application appointment.
- 6 These fees shall apply, in lieu of other condition compliance fees set forth in this Article, to any permit approved after the effective date of this article that incorporates mitigation measures, such as permits that required adoption of a Mitigated Negative Declaration, certification of an EIR, or carryover of mitigation measures from a previously adopted/certified environmental document. If these fees apply, the other condition compliance fees set forth in this Article do not apply. Projects approved after the effective date of this article with mitigation measures shall be subject to the mitigation monitoring fees set forth in this Article. Projects approved prior to the effective date of this article with mitigation measures shall be subject to the mitigation monitoring fees set forth in the County Fee Resolution that was in effect on the project approval date.
- 7 Environmental Health fees are based on an hourly rate approved by the Board of Supervisors through Health Department Fees, Article I.E. A flat fee is based on the estimated reasonable cost, averaged across all applications, or processing the permit/entitlement for which the fee is charged. On matters for which a deposit is required, fees will be based on actual time in quarter hour (.25) increments multiplied by the hourly rate representing actual hours worked by Environmental Health staff. The applicant is required to pay the indicated deposit and will be billed subsequently if the deposit is insufficient to cover actual processing time. On deposit matters, applicant and the Director of Health,

or designee, may elect, on a case-by-case basis, to agree to a different deposit amount based on the estimated actual cost of processing a specific application.

- ⁸ The condition compliance fee shall be collected after project approval and after all administrative appeals have been exhausted, based on the fee in effect at the time of collection, to cover the cost of staff time monitoring condition compliance. If the permit incorporates mitigation measures, such as permits that required adoption of a Mitigated Negative Declaration, certification of an EIR, or carryover of mitigation measures from a previously adopted/certified environmental document, the condition compliance fees that apply are the fees set forth under the category “Mitigation Monitoring and Condition Compliance For Projects with Mitigation Measures.” Those fees are based on actual time spent on monitoring condition compliance and require a deposit. Additionally, project applications whose application fees were based on actual time, rather than flat fee, will continue to be subject to fees based on actual time for condition compliance, and the County may require an additional deposit for condition compliance. For all other projects, the fee for condition compliance is as indicated in the fee schedule. Where the applicable condition compliance fee is a flat fee, it is based on the estimated reasonable cost of staff time for monitoring condition compliance. Because such flat fees represent an average across all similar permits, such flat fee shall be required of all permits having at least one condition of approval, regardless of the total number of conditions and regardless of the land use department or agency that originated the condition.
- ⁹ These fees only apply to maps originally submitted prior to July 13, 2003 when applicants were charged "flat-fees" (the use of deposits for full-cost recovery projects became effective July 13, 2003) and those submitted after August 20, 2006. Maps submitted between July 13, 2003 and August 20, 2006 and on or after the effective date of this article are full-cost recovery projects and require a deposit.
- ¹⁰ An Onsite Wastewater Treatment System, referred to throughout Article I.E. as “OWTS”, is a system used to collect and treat wastewater from a single family dwelling or buildings that dispose of the treated wastewater below ground on the same parcel as the structure(s) that the OWTS serves. A Package Treatment Plant means a non-regional wastewater treatment facility that treats two-thousand and five hundred gallons or more per day of wastewater and does not include OWTS. A Wastewater Treatment Facility means a facility designed to receive wastewater from a regional area, e.g. The Monterey Regional Water Pollution Control Agency (MRWPCA) or the Carmel Area Wastewater District (CAWD). Definitions of the terms referenced herein are consistent with the 2010 Monterey County General Plan.
- ¹¹ The applicant for a discretionary land use development permit, use permit, construction permit, Williamson Act agreement, Mills Act contract, lot line adjustment, and/or any procedure that requires processing through the Health Department and includes recording/filing of a document with the Monterey County Recorder shall, in addition to the payment of any and all other County and/or Health Department fees, be required to pay any and all applicable standard recording/filing fees no later than the time of the recording/filing of that document. The payment of the applicable recording/filing fee shall be required whether or not the document is processed on behalf of the applicant by an employee of the County of Monterey (e.g., Health Department staff or Clerk of the Board) or is processed by the applicant. Failure to ensure full payment of such recording/filing fee by the time of the recording/filing shall be grounds for rejection of the recording/filing of that document with no liability to the County.
- ¹² When a hydrogeologic report is required to be prepared for a subdivision or other application subject to Title 19 of Monterey County Code, the report shall be based on a comprehensive hydrological investigation prepared by a certified hydrogeologist, selected by the County and under contract with the County, at the applicant's expense. A deposit for staff costs associated with preparation and administration of the contract, and review of the hydrogeologic report shall be in addition to the

deposit for the development application. When an application is not subject to Title 19, the applicant shall consult with the Water Resources Agency (WRA) to develop the scope of work for the hydrological investigation; however, selection, contract and preparation of the hydrogeologic report shall occur independent of the County. EHB will review the hydrogeologic report in consultation with WRA.

¹³ The deposit paid to the County for staff costs as identified in the Funding or Reimbursement Agreement between the County and the Applicant. Staff costs shall be reimbursed as part of an Extraordinary Development Application as noted in #3 above.
