SUMMARY/DISCUSSION:

For the last several years NMC has purchased, and continues to purchase, necessary modules of MediTech in order to systematically build a fully operational EHR. The implementation of these modules provide for improved safety and services to NMC patients, as well as, meeting the ongoing mandated Medicaid and Medicare Meaningful Use requirements via the HITECH Act legislated by the federal government.

Please see Attachment A, "*Explanation and Description of Meaningful Use*" for more detailed information regarding Meaningful Use.

This request is for resources to manage, design and implement needed system upgrades and changes. The Meditech 5.66 Upgrade is a major software upgrade that is needed to utilize the functionality and features offered with MediTech. This upgrade has over 7000 changes that impact over 30 Meditech Modules. This needs to be completed by October 2013. All other work is contingent on this upgrade being done. This is critical to NMC.

Changes needed to meet 'Meaningful Use'

- Analysis, coordination, design and implementation of changes to many MediTech modules is needed to meet the 'Meaningful Use' Requirements Mandate
- New software- Implement IMO (Intelligent Medical Objects) - mapping tool is needed to support data and reports that are required
- New software - Patient Portal needs to be implemented to meet Meaningful Use requirements in 2014.
