

Clover® product comparison guide

The Clover suite of products offers businesses all-in-one solutions that combine flexible payment processing options with business management tools.

Clover Station

Clover Mini

Clover Flex

Clover Go

Best suited for	» Businesses looking for robust payment processing and business management capabilities. Ideal for restaurants, retailers and personal services businesses that don't need a mobile station.	» Businesses that want robust payment processing and business management capabilities in a compact, space saving device. Ideal for restaurants, retail and personal services businesses that want to replace a bulky terminal with an all-in-one device.	» Businesses that want to accept payments anywhere and want the benefits of an onscreen signature pad, built in printer, camera and QR scanner. Ideal for mobile businesses, quick service restaurants, retail and other businesses that want to accept payments on-the-go.	» Businesses that want to use their own phone or tablet to accept payments and email or text receipts. Ideal for businesses that want to accept payments on-the-go such as caterers, florists, home appliance delivery and repair, and other mobile or delivery-based businesses.
