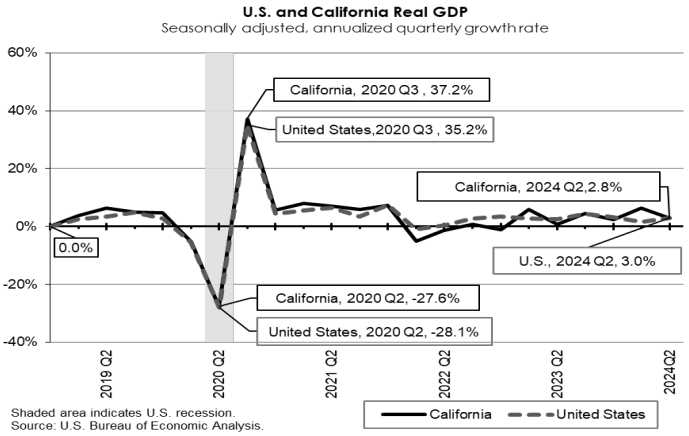
California Department of Finance

October 2024

Finance Bulletin

Joe Stephenshaw, Director

Economic Update



In the final estimate, U.S. real GDP grew at a 3-percent seasonally adjusted annualized rate (SAAR) in the second quarter of 2024, following growth of 1.6 percent in the first quarter. Similarly, California real GDP grew by 2.8 percent in the second quarter of 2024 on a SAAR basis, following upwardly revised growth of 6.3 percent in the first quarter of 2024.

California's personal income increased by 6.5 percent (SAAR) in the second quarter of 2024, while growth in the first quarter was revised up from 8.2 percent in its preliminary estimate to 15.2 percent. Gains were driven by increases in wages and salaries and property income. California's share of U.S. personal income was 13.7 percent, generally in line with the 2019 average share of 13.8 percent.

U.S. headline inflation slowed to 2.4 percent year-over-year in September 2024, down 0.1 percentage point from August 2024 and its lowest level since February 2021. Core inflation—which excludes food and energy—inched up to 3.3 percent year-over-year. Shelter inflation—which includes owners' equivalent rent and residential rent —slowed to 4.9 percent from 5.2 percent in September, falling below 5 percent for the first time since February 2022.

LABOR MARKET CONDITIONS

- The U.S. unemployment rate edged down 0.1 percentage point to 4.1 percent as the civilian labor force and household employment increased by 150,000 and 430,000 persons, respectively, while civilian unemployment declined by 281,000 persons. The U.S. added 254,000 nonfarm payroll jobs in September, while July's and August's gain was revised up by a combined 72,000 jobs. Eight sectors gained jobs in September, driven by private education and health services (81,000) and leisure and hospitality (78,000), followed by government (31,000), construction (25,000), professional and business services (17,000), trade, transportation, and utilities (13,000), financial activities (5,000), other services (4,000), information (4,000), and mining and logging (3,000). Manufacturing (-7,000) was the only sector that lost jobs in September.
- California's unemployment rate remained at 5.3 percent in September 2024 as the state's labor force and civilian household employment increased by 13,700 and 2,100 persons, respectively, and unemployment increased by 11,400 persons. California added 14,700 nonfarm payroll jobs in September 2024, led by private education and health services (9,600), followed by government (3,800), trade, transportation, and utilities (3,000), financial activities (2,600), professional and business services (1,700), construction (1,400) and manufacturing (300). Four sectors lost jobs: leisure and hospitality (-4,400), information (-2,400), other services (-800), and mining and logging (-100).

BUILDING ACTIVITY

- Year-to-date through August 2024, California permitted 104,000 housing units, essentially unchanged for three consecutive months but down 6.8 percent from a year ago. August year-to-date annualized total permits consisted of 61,000 single-family units and 43,000 multi-family units, up 11.3 percent and down 24.3 percent from the previous year, respectively.
- The statewide median sale price of existing single-family homes decreased to $868,150 in September 2024, down 2.3 percent from the previous month, but up 2.9 percent from $843,500 in September 2023. Sales of existing single-family homes in California were 253,010 in September 2024, down 3.4 percent from August 2024 but up 5.1 percent from September 2023.

Preliminary General Fund agency cash receipts were $2.4 billion, or 16 percent, above the Budget Act forecast for September. This overage was driven by personal income tax and corporation tax which were $1.8 billion and $557 million higher, respectively, due largely to estimated payments for both taxes significantly exceeding the forecast. Despite the state not having a due date for estimated payments in September, many taxpayers chose to make payments with the federal third quarter estimated payments deadline in September. Cumulatively since April when the forecast was finalized, preliminary General Fund agency cash receipts were $7.3 billion above projections. This includes an overage of $3.2 billion attributed to cash collected during the 2023-24 fiscal year.

- Personal income tax cash receipts were $1.8 billion, or 20.4 percent, above forecast in September and $4 billion, or 6.6 percent, above forecast cumulatively since April. Non-withholding payments exceeded the forecast by $1.5 billion in September and were $2.3 billion above forecast cumulatively since April. Estimated payments and final payments contributed $1.9 billion and $280 million to the cumulative overage, respectively. Refunds were $130 million lower than projected in September and $794 million lower cumulatively since April. Withholding receipts exceeded the forecast by $218 million in September, bringing the cumulative overage since April to $984 million. Year-to-date withholding growth for the first three quarters of the calendar year was 8.5 percent, on track to outpace the 6.5-percent growth projected for the entire year.
- Corporation tax cash receipts were $557 million, or 22 percent, above forecast in September. Estimated payments exceeded the forecast by $882 million in September, an overage that may be due in part to an earlier-than-expected impact of the credit limitation and net operating loss suspension. Therefore, this overage may not be fully indicative of overall corporation tax strength. Refunds exceeded the forecast by $513 million in September, due likely to overpayments of the Pass-Through Entity Elective Tax (PTET) that came in earlier than projected. Corporation tax receipts were $2.4 billion, or 12.7 percent above forecast cumulatively since April as estimated payments and other payments exceeded the forecast by $1.6 billion and $1.2 billion, respectively, while refunds were $387 million higher.
- Preliminary sales and use tax receipts were $60 million, or 2.2 percent, below forecast in September. Sales tax receipts were $73 million, or 0.4 percent, above forecast cumulatively since April.

This is an agency cash report and the data may differ from the Controller's report to the extent that cash received by agencies has not yet been reported to the Controller. The personal income total includes Individual Shared Responsibility Penalty transfers. The forecast is from the 2024-25 Budget Act. General Fund agency cash receipts for the entire 2023-24 fiscal year were $3.2 billion above the 2024-25 Budget Act forecast.
