Furthermore, NMC's piped medical gas system's design, construction, certification, ongoing inspection, maintenance & repair and administrative requirements are standardized and follow the standard for Health Care Facilities. Annual Preventative Maintenance Inspections are performed to reduce operation costs, eliminate potential liabilities, and improve compliance performance. Service will include total infrastructure inspection from equipment that supplies gases/air/vacuum to every med gas/air/vacuum outlet throughout the NMC campus to be tested for flow leakage, labeling, and general integrity. Detailed inspection occurs with each alarm panel, zone valve, and 24 point inspection of each manifold and a 41 point inspection of each Medical Air System Source.
