Exhibit A

SAS Enterprise User License Agreement

This Software License and Support Agreement (“Agreement”) is made by EIS (“Licensor”) and between the Government Customer (“Licensee” or “Ordering Activity”) to purchase a license to Software Product(s) and Software Maintenance.

The following terms apply to the Software (as defined below) licensed pursuant to the General Services Administration Contract Number 47QTCA18D0081(the “GSA Schedule”) and latest accepted Mass Modification to the Schedule held by Executive Information Systems, LLC (“EIS”). In the event of a conflict between specific terms and conditions in this EULA and those in the GSA Schedule, the terms and conditions in the Schedule of Supplies/Services shall prevail. The EULA and the GSA Schedule contract shall collectively be defined as the “Agreement.” Any initially capitalized terms not defined herein shall be as defined in the GSA Schedule. All task orders are subject to the terms and conditions of the GSA Schedule. In the event of conflict between a task order and the GSA Schedule, the GSA Schedule will take precedence.

1. Inspection/Acceptance

The Contractor shall only tender for acceptance those items that conform to the requirements of this contract. The ordering activity reserves the right to inspect or test any software that has been tendered for acceptance. The ordering activity may require repair or replacement of nonconforming software at no increase in contract price. The ordering activity must exercise its post acceptance rights (1) within a reasonable time after the defect was discovered or should have been discovered; and (2) before any substantial change occurs in the condition of the software, unless the change is due to the defect in the software.

2. Warranties.

- a. All SAS Software will substantially conform to its then-current user documentation. If the Software does not substantially conform, EIS will choose to make it conform, replace it with conforming Software or refund the current license fee paid. This is the exclusive remedy for breach of this warranty.
- b. By way of clarification, since the Software is general purpose software, the purpose of Software is as described in its applicable documentation. If the Software does not substantially conform, EIS will choose to make it conform, replace it with conforming Software or refund the current license fee paid. This is the exclusive warranty law remedy for breach of this warranty.

3. Disclaimer.

For SAS software, EIS and its licensors are not liable for (1) special, incidental, indirect, consequential, punitive, or reliance damages (arising on contract or tort), or (2) any claim against the customer by a third party. EIS and its licensors are not required to provide the product authorization code if Customer is in breach of this Agreement or if all amounts due to EIS are not paid and are not liable for damages caused by the resulting Software interruption. Customer is responsible for implementing procedures to verify accuracy of data input and output. EIS’ and its licensors’ total liability for any claim relating to matters covered by this Agreement or use of the Software is limited to the license or maintenance fees received from Customer for the Software product(s) at issue during the then-current annual period of the license. The foregoing exclusion/limitation of liability shall not apply to (1) personal injury or death resulting from negligence; (2) for fraud; or (3) for any other matter for which liability cannot be excluded by law.

4. Ownership.

Title to and ownership of the Software and documentation shall remain with the Contractor or its licensors at all times notwithstanding any other term hereof or any term in any purchase order or other ordering documents, including, without limitation, any attachment included in any purchase order or other ordering documents.

5. Ordering Activity.

- a. Software licenses are by site and by ordering activity. The GSA Order ADM4800.2I(7) defines an ordering activity as an eligible entity authorized to use GSA Sources of Supplies and Services pursuant to 40 U.S.C. §§501-502 and identified on each quotation issued or order placed hereunder. Subject to the license restrictions set forth herein and in any order, the software may be used by any subdivision of the ordering activity (service, bureau, division, command, etc.) that has access to the site the software is placed at, even if the subdivision did not participate in the acquisition of the software. Further, the software may be used on a sharing basis where multiple agencies have joint projects that can be satisfied by the use of the software placed at one ordering activity's site. This would allow other agencies access to one ordering activity's database. For ordering activity public domain databases, user agencies and third parties may use the computer program to enter, retrieve, analyze and present the government's data within such public domain databases. The user ordering activity will take appropriate action by instruction, agreement, or otherwise, to protect the Contractor's proprietary property with any third parties that are permitted access to the computer programs and documentation in connection with the user ordering activity's permitted use of the computer programs and documentation.
- b. Except as is provided in paragraph 4.a above, the ordering activity shall not provide or otherwise make available the software or documentation, or any portion thereof, in any form, to any third party without the prior written approval of the Contractor. Third parties do not include prime Contractors, subcontractors and agents of the ordering activity who have the ordering activity's permission to use the licensed software and documentation at the ordering activity's facility, and who have agreed to use the licensed software and documentation only in accordance with these restrictions. This provision does not limit the right of the ordering activity to use software, documentation, or information therein, which the ordering activity may already have or obtains without restrictions.
- c. The ordering activity shall have the right to use the computer software and documentation with the computer for which it is acquired at any other facility to which that computer may be transferred, or in cases of disaster recovery, the ordering activity has the right to transfer the software to another site if the ordering activity site for which it is acquired is deemed to be unsafe for ordering activity personnel; to use the computer software and documentation with a backup computer when the primary computer is inoperative; to copy computer programs for safekeeping (archives) or backup purposes; to transfer a copy of the software to another site for purposes of benchmarking new hardware and/or software; and to combine it with other software.
- d. "Commercial Computer Software" may be marked with the Contractor's standard commercial restricted rights legend, but the schedule contract and schedule pricelist, including this clause, "Utilization Limitations" are the only governing terms and conditions, and shall take precedence and supersede any different or additional terms and conditions included in the standard commercial legend.
- e. For SAS software, the license is for use only by those employees of the agency licensing the software and any short-term on-site contractors while doing work for such agency.
- f. FAR 52.227-1 (Authorization and Consent) and FAR 52.227-2 (Notice and Assistance Regarding Patent and Copyright Infringement) apply to any licenses granted hereunder.

6. Self-Examination.

Customer agrees to conduct a self-examination promptly following EIS' reasonable request, not to exceed once annually, by using its own process and EIS' agreed examination method, application and tools to verify its compliance with the terms and conditions of the license grant (i.e. all the information that may affect the pricing metric and license scope, including but not limited to any third party usage, hardware and operating system information, usage territory, pricing metric related information, installation location and installed copies, number of users accessing PC software, etc.). Customer shall also explain to EIS its examination process.

Such examination results shall be signed by an authorized official of Customer. If the examination reveals that Customer owes additional license fees, Customer shall pay the amounts owed.

7. License Terms.

The terms and conditions of this Section, along with the applicable purchase order govern the license hereunder of software products ("Software") of SAS Institute Inc. (the "Institute" or "SAS").

Each purchase order to this Agreement ("PO") identifies the specific government entity ("Customer") authorized to use the Software listed on that purchase order. Each PO is a separate agreement, which incorporates the terms of this Agreement.

a. License Grant

- i. The Software products and versions available under this Agreement are set forth in the Price List. Upon receipt of an acceptable order, EIS will provide to the Government entity placing the order the production release for the Software identified on the purchase order for the applicable operating system and hardware. For desktop and server based Software, the version of the Software will be specified.
- ii. The desktop and server based Software provided under this Agreement and categorized as "perpetual" will be authorized to operate for fifty (50) years; desktop and server based Software categorized as "annual term" will be preauthorized to operate for one (1) year. The utility contained in the Software that will authorize it to operate for fifty years is confidential and a trade secret of EIS or its licensors, which is not discernible or disclosed during authorized use, to which access is not authorized by anyone who receives or uses the Software under this Agreement.
- iii. The desktop and server based Software provided under this Agreement and categorized as "annual term" shall be licensed to the ordering activity on a term basis consisting of 12 months from the date of delivery. After expiration of the initial 12-month period, the ordering activity may purchase a new license at the then current contract awarded price or the parties' mutually agreed upon negotiated price which shall cover the new annual term.
- iv. The Software is licensed (1) on a per server basis for use with the supported operating system designated on the order; (2) for an unlimited number of users or on a user increment basis for a specified number of users, or (3) on a per mainframe basis for use with the supported operating system designated on the order. The order will specify if the Software is licensed on a per-server, user increment basis or per mainframe. If the Software is licensed on a per-server or per mainframe basis, each copy of Software must only be installed on individual CPUs (i.e. the authorized hardware). If the Software is licensed on a user-increment basis, the total number of individuals who access the Software during the license period must be counted and included in the user increment licensed.

b. Pricing Metrics

- i. Certain Software is licensed by "processor cores," "total cores," "processor core based," "total processor cores," or "processor core count" (or similar language referring to a number of processor cores) as identified in the applicable quotation and/or order (See applicable Part Number on Price List). In such event, the Software license fee is based on the total number of processor cores contained within a single item of authorized hardware. Customer shall not exceed the licensed number of processor cores.

- ii. Certain Software is licensed by “distributed capacity,” “total distributed capacity,” “distributed processor cores,” “distributed processor core based,” “total distributed processor cores,” “total distributed capacity processor cores,” or “distributed processor core count” (or similar language referring to a number of distributed processor cores) as identified in the applicable quotation and/or order (See applicable Part Number on Price List). In such event, the Software license fee is based on the full processing capacity of the computer hardware architecture where distributed Software computation and processing occurs (“Distributed Environment”). Full processing capacity is defined as the total number of physical processor cores, including each physical processor core on each chip, and/or virtual processor cores contained within the Distributed Environment. For the purposes of this agreement, “authorized hardware” is defined as the Distributed Environment. Customer shall not exceed the licensed number of processor cores.
- iii. The following terms apply to any license for Software that is identified in any applicable order hereunder as for “virtual client use” or use in a virtualized personal computer environment or virtualized client environment (or such similar identification).

The Software license fee is based on the total number of users (not concurrent) authorized to access the Software via one or more Virtual Machines on the designated operating system. For purposes of this provision, a “Virtual Machine” is defined as a virtual environment, running a Windows workstation operating system that is created within and managed by a centrally located host computer using commercially available virtualization software providing an interface to access the resources of the host computer. Unless otherwise authorized in writing by EIS, each Virtual Machine is limited to a maximum of four (4) virtual processor cores.

- iv. The following terms apply to any license for Software that is identified in any applicable order hereunder as for use in a virtualized server environment (or such similar identification).
 1. The Software is licensed for use on the number of virtual processor cores listed in the applicable order. If the number of virtual processor cores is not identified, then the Software is licensed for four (4) virtual processor cores. Such Software shall be allocated to one (1) virtual machine in which the Software is installed. For purposes of this provision, a virtual machine is defined as an environment, identified by a unique name (to be specified by the Customer in writing to EIS), and created using commercially available virtualization software, in which use of the Software is isolated, at all times, to a specified number of virtual processor cores (“Virtual Machine”). A separate Software license is required for each Virtual Machine. For the purposes of this provision, authorized hardware is defined as the named Virtual Machine identified by Customer in writing to EIS. Customer may change the name of the licensed Virtual Machine upon prior written notice to EIS.
 2. The Virtual Machine may run only on a single physical host machine at any given time but may be moved from one physical host machine to another so long as the

named Virtual Machine and maximum number of virtual processor cores allocated to it remain unchanged Customer will not combine virtual processor cores across multiple Virtual Machines. Unless otherwise authorized in the applicable order, the physical host machine must be located on Customer's premises.

3. In order to be eligible for the Virtual Machine based license, Customer must install version 9.2 or higher of the Software.
- v. With regard to Software licensed for desktop use (or use on personal computers or such similar designation), Customer may make one (1) additional copy of the Software for home use by each Customer employee who also uses the Software at work ("Home Use") and such Home Use copies shall not count toward the total users or workstations licensed, provided: (i) each Home Use copy is installed on a personal computer or laptop located in the United States and owned by such Customer employee; (ii) Home Use is limited to use for Customer's purposes by an employee who also uses the Software at work; (iii) the operating system of the hardware on which each Home Use copy is installed mirrors the operating system of Customer's hardware on which the Software is installed; and (iv) the total number of Home Use copies does not exceed the total number of users or workstations, as applicable, licensed by Customer. If Customer wishes to increase the number of licensed users or workstations, Customer must contact EIS and pay to EIS the applicable fees for such additional licenses as set forth in the Price List. The identical copyright notice and any other proprietary rights notice found on the original Software media must be maintained on all Home Use copies. Customer will maintain records of the names of all employees using the Software for Home Use and will provide EIS with a copy of such records upon request, subject to Government security requirements. Customer will inform all persons authorized to use the Software pursuant to this provision of the relevant terms of the license for such Software and will be responsible for their adherence to such terms. The foregoing provisions do not apply to Software licensed for use in a virtualized environment.
 - vi. Certain Software is licensed for use on a "grid," by "grid processor cores" or "grid processor core count" (or similar language referring to a number of processor cores available in a "Grid" computing environment) as identified in the applicable quotation and/or order (See applicable Part Number on Price List). In such event, the Software license fee is based on the sum of all processor cores of all authorized hardware in the Grid on which the Software is installed. A "Grid" is a network of authorized hardware that uses the combined processing power of the authorized hardware to process and run applications initiated in the network. Software may be installed on authorized hardware in the Grid as specified in the applicable quotation and/or order. A license for SAS® Grid Manager Software is a prerequisite to licensing any other Software in a Grid. SAS® Grid Manager Software is the only software that may be used for Grid management and job scheduling purposes in conjunction with SAS software applications residing on authorized hardware included in the licensed Grid. Upon installation, Customer will provide EIS a statement identifying the configuration of the Grid, to include the total number of nodes in the Grid and the total number of grid processor cores per Software product per Grid node, as well as such other reasonably requested Grid configuration information. Customer will update the same from time to time and upon reasonable request.
 - vii. In addition to any other pricing metrics that may apply to the Software, the language set forth in this subsection (vii) shall apply to any Software that, as identified in the applicable quotation and/or order, is to be deployed in a Public Cloud.

Customer represents that it has established and currently maintains a private online account, (“Cloud Account”) with a third party provider (“Provider”) of public Internet- based computing resources (“Public Cloud”). Upon issuance of an order and as such information is updated from time to time, Customer will provide Customer’s Cloud Account number and any other information reasonably required by EIS to enable Customer’s use of the Software within Customer’s Cloud Account.

Notwithstanding anything to the contrary contained herein, Customer may install and store an image of the Software in a single Customer-controlled Cloud Account. Customer shall use the Public Cloud facilities to structure its Cloud Account such that (i) installation and storage of the Software image is restricted at all times to Customer’s Cloud Account and (ii) access to the Software image is restricted at all times to authorized Users. Customer shall not apply an active product authorization code to a Software image. Customer shall install within its Cloud Account only Software designated by SAS as version 9.3 maintenance release 2, or later.

Customer may use the Software image to create a running instance and shall apply product authorization codes provided by EIS only to a running instance. If the licensed Software is designed for deployment across multiple hardware tiers, an instance shall be defined as a single virtual machine within the deployment and such deployment may include multiple instances corresponding to the multiple hardware tiers. If the Software is designed for deployment on a single hardware tier, an instance is defined as a single virtual machine and such deployment shall include only a single instance. Notwithstanding anything to the contrary contained in the GSA Contract, “Authorized Hardware” shall mean the virtual machine(s) associated with a single deployment.

Unless otherwise authorized herein, Customer shall not create instances for more than a single deployment of the Software at any given time. A separate license is required for each concurrent Software deployment in use by Customer.

If the Software license fee is based on the capacity of the Authorized Hardware or if the Software license otherwise restricts the maximum capacity of the Authorized Hardware, capacity shall not exceed the licensed number of virtual Processor Cores set forth in the quotation unless Customer notifies EIS and pays additional license fees.

Customer may use Public Cloud features to clone and/or save Customer’s instance(s) of the Software only to the extent required to enable Customer to use the Software as authorized hereunder. Customer shall not use Public Cloud features to make the Software available to other Public Cloud accounts or for local deployment of the Software outside of Customer’s Cloud Account.

EIS is not responsible for any fees charged to Customer by the Public Cloud Provider; for maintenance and support of any Public Cloud software or resources; for management, back-up and/or restoration of Customer content or data; or for any loss of content or productivity resulting from issues associated with the Public Cloud. Customer shall be responsible for any damages, costs or expenses accruing to EIS arising out of or related to any access to or use of the Software and/or Product Authorization Code by any party

including, but not limited to, Provider, in any manner that is inconsistent with the terms and conditions herein or EIS' (and its licensor's) intellectual property rights.

Technical support is limited to assistance with issues related to Software functionality. EIS makes no representations or warranties with respect to Software performance in a Public Cloud. Information regarding technical support policies, including support for Software installed in a Public Cloud, can be found at support.sas.com.

- viii. The following terms apply to any license for Software that is identified in any applicable order hereunder as for "CAS Capacity" (or such similar identification): The Software license fee is based on Customer's CAS Capacity which is defined as the aggregated capacity of all SAS cloud analytics services ("CAS") runtime instances (collectively, "CAS Runtime") where aggregated capacity is calculated as the total number of physical and/or virtual cores used for computation and processing. Customer may install the Software on any quantity of physical and/or virtual authorized hardware, including virtual authorized hardware within a Customer-controlled public cloud account ("Public Cloud Account"), provided that neither the aggregated capacity of the CAS Runtime nor the aggregated capacity of the SAS programming runtime engine ("Non-CAS Runtime") exceeds the licensed CAS Capacity. If CAS Runtime or Non-CAS Runtime exceeds CAS Capacity at any time, additional fees will apply in accordance with the GSA Schedule Pricelist. If the Ordering Activity exceeds the use amount, both parties will work together to either prevent such overages in the future or will execute a new agreement in writing that encompasses the higher use amount. With respect to Software installed within a public cloud, Customer will ensure that the Software is restricted at all times to Customer's Public Cloud Account and will be responsible for any use of the Software or Product Authorization Code by any party in any manner that is inconsistent with the terms and conditions herein or SAS' intellectual property rights.
- ix. The following terms apply to any license for Software that is identified in any applicable order hereunder as for "Licensed Configuration" (or such similar identification). Software functionality is dependent on the functionality of other SAS software which Customer has previously licensed under the MLA or which Customer is licensing under this Supplement ("Prerequisite Software"). Customer may install the Software on, and/or access the Software from, any Authorized Hardware included as part of a single licensed configuration of the Prerequisite Software ("Licensed Configuration"). Customer may use the Software only in conjunction with a single Licensed Configuration of the Prerequisite Software. A separate Software license is required for each Licensed Configuration with which Customer uses the Software.
- x. The following terms apply to any license for Software that is identified in any applicable order hereunder as for "Authorized Power Users." The Software license fee is based on the total number of Authorized Power Users where "Authorized Power User" is defined as an individual User, identified by a unique User ID, who is authorized by Customer use the Software to perform environment administrator tasks, to create and modify data assets (for example, tables, programs, flows, jobs, schedules), to perform data management tasks, to create and modify reports ("Reports"); and to view and interact with Reports. Authorized Power Users cannot use the Software to create models, generate model comparisons or deploy models into production.
- xi. The following terms apply to any license for Software that is identified in any applicable order hereunder as for "Authorized Viewer Users." The Software license fee is based on the total number of Authorized Viewer Users where "Authorized Viewer User" is defined as an individual User, identified by a unique User ID, who is authorized by Customer to use the Software solely to view and interact with reports created by other Users using the Software ("Reports"). Authorized Viewer Users cannot use the Software to perform environment administrator tasks; to create or modify data assets (for example, tables, programs, flows, jobs, schedules); to perform data management tasks; to create or modify Reports; or to create models, generate model comparisons or deploy models into production.

- xii. The following terms apply to any license for Software that is identified in any applicable order hereunder as for “Authorized Data Science Users.” The Software license fee is based on the total number of Authorized Data Scientist Users where “Authorized Data Scientist User” is defined as an individual User, identified by a unique User ID, who is authorized by Customer use the full functionality of the Software to perform environment administrator tasks; to perform data administrator tasks; to create and modify reports (“Reports”), to view and interact with Reports; and to create models, generate model comparisons and deploy models into production.
- xiii. The following terms apply to any license for Software that is identified in any applicable order hereunder as for “Decisions.” The Software license fee is based on the total number of Decisions supported by the Software during an annual license period where a “Decision” is defined as a query to the Software that results in one or more recommendations for an individual consumer or a process initiated using the Software that results in a batch output that represents one or more individual recommendations.
- xiv. The following terms apply to any license for Software that is identified in any applicable order hereunder as for “Events.” The Software license fee is based on the total number of Events which are published to the Software and can be acted upon by the Software during an annual license period. An “Event” is defined as (i) a single record of data consisting of metadata and field data that is generated by an external system or asset (such as, but not limited to, a machine or sensor) and (ii) a single record of data derived from the transformation of one or more Events by the Software through aggregation, projection, pattern matching or other methods which will be counted in addition to the Event or Events from which the transformed Event is derived.

c. Indemnification.

If a claim of copyright, patent, trade secret, or other intellectual property rights violation is made against Customer relating to the Software, EIS (or its designee) agrees to indemnify the Customer by paying any settlement approved by EIS (or its designee), or any judgment, costs, or attorneys' fees finally awarded against the Customer for such claim. The parties agree to cooperate with each other in the investigation, defense and/or settlement thereof. This indemnification obligation shall not apply unless EIS has been informed as soon as practicable by Customer of the claim and EIS (or its designee) has been given such opportunity as is afforded by applicable law to participate in its defense, at its own expense. This indemnification obligation does not apply to the extent the claim is based on

a combination of Institute Software with other software or a Customer modification to the Software if such claim would not have been made but for the combination or modification.

If such a claim is made or, in EIS' (or its designee's) opinion, is likely to be made, EIS (or its designee), at its option, may modify the Software, obtain rights for the Customer to continue using the Software, or terminate the license for the Software product at issue and refund the current license fee paid by Customer. Customer agrees to abide by EIS' (or its designee's) decision and, if appropriate, install a different version of the Software or stop using the Software.

d. Customer Responsibilities

- i. So the Customer can properly update and distribute information needed to keep the Software functioning properly and account for authorized hardware, the Customer will define in each order the hardware on which the Software is installed and the business addresses and points of contact of those locations.
- ii. If the Customer believes the Software is being used in violation of this Agreement, Customer will promptly notify EIS in writing and will cooperate in EIS' investigation and resolution of the situation.
- iii. The Customer will not permit anyone having access to the Software to:
 1. Reverse assemble or decompile the Software; or
 2. Mask, modify, or suppress any copyright notices or other proprietary rights notices, or fail to properly label any authorized copy; or
 3. Time-share, rent, outsource, or otherwise use the Software except as specifically permitted in this Agreement.

e. Authorized Use

Subject exclusively to the terms of this Agreement, authorized use is restricted to Customer's employees and Customer's authorized short-term on-site contractors who receive the Software under the Federal Supply Schedule.

f. Software Maintenance and Fees

Fees for particular versions or releases of the Software may differ depending upon previous versions or releases licensed by Customer. Fees for hardware changes or upgrades in users which result in additional license fees will be consistent with the approved Price List and billed under the awarded license fee schedule and will be effective and invoiced as of the date of change or upgrade. With regard to hardware changes, applicable fees are generally based on the total processing power of the hardware on which the Software is installed. With respect to server hardware, processing power includes each processor on each chip. With respect to mainframe hardware, processing power is based on Millions of Instructions Per Second ("MIPS"). Customer must notify Contractor prior to making any hardware change. License and maintenance fees that have been applied and used in the

performance of the contract are nonrefundable. Customer is not entitled to a pro-rata refund of any fees paid.

Maintenance is available for desktop and server based Software licensed under this Agreement. Maintenance beyond the first twelve months of the license will be made available for each designated server or user increment upon payment of the applicable yearly Maintenance fees contained in the Price List. Institute Maintenance in the form of updates, new releases, and fixes is cumulative. If at any time during the term of this Agreement Customer elects not to order Maintenance from EIS for a server or user increment such that there is an interruption in Maintenance for that server or user increment for the licensed Software, reinstatement of such Maintenance will require payment of a maintenance fee equal to the amount of all preceding skipped periods of Maintenance for that server or user increment of the licensed Software. If at any time during the term of this Agreement Customer elects not to order Maintenance from EIS for a server or user increment, then Customer's license rights shall continue with regard to such Software for the remainder of the license period applicable to such Software, subject to the license terms applicable to such Software on the last day for which Maintenance was purchased. Without limiting the foregoing sentence, without the payment of applicable fees consistent with the Price List, Customer may not change authorized hardware, add additional users, change operating systems, acquire additional Product Authorization Codes or license additional software products for use with such Software. Maintenance shall be provided in accordance with support as detailed in the below technical support terms, the latest version of which is at support.sas.com, terms of which may be updated from time to time. If SAS modifies its technical support policies, during an annual period for which Customer has paid maintenance fees, in a way that materially decreases the level of technical support available to Customer for the specific Software, Customer may notify EIS. EIS, at its option, will either: (a) provide the prior level of technical support to Customer for the Software at issue through the end of the then-annual license period; or (b) allow Customer to terminate its license and maintenance and receive a refund of the maintenance fees paid for such Software, prorated for the time remaining in the then-current annual maintenance period.

Technical Support. SAS will use reasonable efforts, either by telephone or electronically, to help Customer solve specific problems with installation or use of the Software. Customer may obtain additional support services from EIS by order additional services and paying applicable additional fees. It may not be possible for SAS to solve all problems or correct all errors in the Software. From time to time, SAS may make available, and Customer agrees to use reasonable efforts to install, new releases, updates and corrective code. During ongoing Software development, SAS may add, change or delete individual components or functionality in new releases. Such Software modifications shall be subject to the terms herein. If Customer chooses not to install the most current release of the Software, the level of technical support may diminish over time. EIS' obligations in this section are subject to the following: Customer shall: (a) when requesting technical support, notify SAS of any modifications to the Software not made by SAS, or at the direction of SAS; and (b) establish technical contacts with knowledge about the Software and Customer's use of the Software who will be qualified to provide SAS with information necessary for SAS to diagnose and remedy any problems with the Software. Failure to comply with these terms may result in longer response and resolution times.

Technical Support Process. The following describes how Technical Support is currently provided at SAS' worldwide headquarters in Cary, North Carolina between the hours of 9:00 a.m. and 8:00 p.m. eastern time, Monday through Friday during normal business days.

(a) Calls to Technical Support are answered by a Phone Support Operator, who determines the area of the user's problem and directs the call to a phone queue based on product or subject area. There are several queues, each having 1 to 4 Technical Support Analysts available at any given time.

(b) The first available representative in the queue handles the call. To reduce hold times when callers are holding in the queue, a message is sent to representatives in the subject group who are not "available"; they can make themselves available to receive calls as needed.

(c) When the representative receives a call, that representative obtains background information and a description of the problem, and attempts to answer the question. These first response representatives are able to resolve a majority of problems on primary contact.

(d) If the representative cannot answer the question on primary contact, the problem is placed in the "outstanding problem" list, additional details are included, and the user is provided with a tracking number. Notification of the tracked problem may be sent to a representative who has expertise in the subject area.

(e) A representative with subject area expertise who is informed of a new problem will accept the problem into a "working" file, and contact the user. Technical Support's goal for contacting users on tracked problems depends on the severity of the problem: a 2-hour callback for severe problems, up to a maximum of 24 hours for low-priority problems.

(f) The consultant is responsible for the problem until its resolution. Developers may be involved in the process, but the consultant still retains ownership of the problem. The consultant updates the problem whenever the user is contacted or additional information is required, enabling a complete audit trail of all problems. Resolved problems are moved to a "resolved" file, and then archived.

(g) The tracking system contains various signals to indicate "red flag" conditions, such as callbacks that have not been made, notifications from users, high-priority problems, or problems that have not been updated within a certain amount of time. Consultants may designate "backup" consultants to handle problems when they are out of the office.

(h) Problems submitted through e-mail or the WWW interface immediately go to the "outstanding problem" file, and are handled as problems called in by phone, but the representative can respond by phone or e-mail.

g. Ordering

To license the Software or order Maintenance, Customer will provide orders which contain complete product, pricing, hardware, operating system, software product, version, if applicable, and media information, and identification and location of the Government's premises where the Software is shipped. The Agreement will be incorporated into Customer's order. EIS has the right to request and receive written clarification of any order, which does not contain complete information. If the entity issuing a purchase order hereunder is a non-government entity authorized to order under this contract, such Customer agrees that, unless specifically agreed to in writing by EIS, without any requirement to expressly reject such terms, purchase order terms and conditions received by EIS from such entity issuing a purchase order hereunder that conflict with or are in addition to the terms hereof are expressly deleted and rejected, unless the terms and conditions to be modified are not material in nature and are evidenced by the parties' signed written agreement. Acceptance by EIS of any order does not constitute an amendment to this Agreement.

h. Institute Distribution of the Software and Documentation

Upon receipt of an acceptable order from Customer, EIS will ship F.O.B. destination (using its best efforts to ship within ten business days) to the designated contact on the order the media for the Software being licensed. One copy of the applicable Software documentation for each Software

product ordered will also be provided. For desktop and server based Software categorized as “perpetual”, the Software media shipped will be preauthorized to operate for fifty (50) years; for desktop and server based Software categorized as “annual term”, the Software media shipped will be preauthorized to operate for one (1) year. If licensed for a server, the Software media shipped will be preauthorized to operate on the designated server. If licensed for a mainframe, the Software media shipped will be preauthorized to operate on the designated mainframe or distributed server for the designated license period.

i. Hardware and Operating System Support

During the term of this Agreement, the Software will operate on hardware and operating systems listed in the Price List (which may be modified) which are compatible with and supported by the licensed Version of the Software.

j. Upgrades

Customer must notify EIS within thirty (30) days of all upgrades in designated users between user increment licenses or upgrades between mainframes or servers as classified by SAS and identified in the Price List. Upgrade fees within the same operating system are calculated by the difference in the corresponding fees (and the difference in the corresponding Maintenance fees, when applicable) for the licensed Software. No upgrades are available for a move to a different operating system.

k. Source Code

Source code from which the Software object code is derived (“Source Code”) is not being provided and is an Institute trade secret to which access is not authorized. Except to the extent allowed by law, neither Customer nor any other user may reverse assemble or decompile the Software or otherwise attempt to recreate the Source Code.

l. Licenses for Additional SAS Software

Customer may license additional Software, other than those contained in the Price List, which the parties mutually desire to make available under this Agreement, in accordance with fees to be mutually agreed upon by the parties. This provision applies to open market transactions per applicable open market regulations.

Upon termination of any license, Customer agrees to reclaim, delete, and destroy the Software product at issue and certify the same to EIS.

n. Late Shipment

EIS will use its best efforts to ship the Software within ten (10) days of receipt of an acceptable order. However, EIS does not guarantee specific delivery dates. If EIS fails to deliver the Software in

the time frame required by the Customer, the Customer may cancel its order and be reimbursed of any advanced payment(s) the ordering activity made. EIS will not be responsible for any losses incurred by the Customer in purchasing software elsewhere.

For the first year after issuance of any License Key and so long thereafter as Licensee pays annual maintenance fees with respect to such License Key, Rank One will make available to Licensee all minor version Updates or incremental patch Upgrades to the Licensed Software as Rank One generally makes such Updates and Upgrades available to Rank One customers. Updates and Upgrades will be deemed to be part of the Licensed Software, and documentation provided in connection with such Updates and Upgrades will be deemed to be part of the User Documentation. In an ongoing effort to address security, quality, and avoidance of potential infringement issues, Licensee will implement all Updates and Upgrades provided by Rank One promptly and in any event within one hundred eighty (180) days from its receipt thereof.

6. Rank One Support. For the first year after issuance of any License Key and so long thereafter as Licensee pays annual maintenance fees with respect to such License Key, Rank One will make available to Licensee the following:

a. Issue Reporting. Unlimited email support for reporting Licensed Software issues to the Rank One Support Team at support@rankone.io, which is available for reporting issues on a 24/7 basis. Rank

One's Support Team is staffed with Licensed Software support experts during Rank One's normal business hours, M-F, 9am-5pm US Mountain Time, excluding Rank One holidays. When reporting Licensed Software issues, Licensee shall first use reasonable efforts to identify any error, bug, malfunction, or network connectivity defect on its own and shall provide sufficient detail to enable Rank One to understand and reproduce the issue and any Licensee or product information reasonably required by Rank One.

b. Troubleshooting. Reasonable troubleshooting technical support services to effectively use the Licensed Software, in accordance with Rank One's then-current support guidelines in a manner provided herein ("**Tier 2 Support**"). Rank One will seek to determine if the issue Licensee is experiencing is attributable to an error in the Licensed Software and seek to resolve issues that occur during installation and normal usage of the Licensed Software in the form originally delivered by Rank One, based on an incident priority level, assigned in good faith by Rank One, as follows:

- *Priority 1:* Issue causes data corruption or causes the Licensed Software to be inoperative or unavailable or prevents meaningful use of the Licensed Software.
- *Priority 2:* Issue prevents use of a critical feature of the Licensed Software.
- *Priority 3:* Issue has a performance impact on the Licensed Software but does not prevent meaningful use of the Licensed Software.
- *Priority 4:* Issue creates inconvenience or minimal loss of functionality or constitutes a request for an enhancement.

Rank One will use commercially reasonable efforts to (i) acknowledge all issues within one business day and (ii) seek to resolve issues attributable to errors in the Licensed Software that are addressable only through modifications of the Source Code by providing an Update to Licensee as follows: Priority 1 issues as soon as possible, Priority 2 issues promptly, Priority 3 issues within the next two version Upgrade cycles and Priority 4 issues if and when Rank One, in its sole discretion, chooses to prioritize.

If Rank One determines that Licensee's issue constitutes a request for enhancement or that Licensee requires ongoing help with a problem that is not caused by errors in the Licensed Software, or is outside the scope of the original purchase of the Licensed Software, Rank One is not obligated to support but may, in its sole discretion, offer to provide professional services support at Rank One's then-current hourly rates.

c. Support Exclusions. Rank One has no obligation with respect to any issue experienced by Licensee which is due to a failure or limitation of the Licensee's

computing hardware, operating system and/or communication networks or a software virus, worm, Trojan, ransomware or any other destructive or disruptive means or which arises as a result of software not provided by Rank One. Rank One's support obligations are limited to the current and two previous Upgrade versions of the Licensed Software.

THERE ARE NO WARRANTIES THAT MAY ARISE FROM USAGE OF TRADE OR COURSE OF DEALING. RANK ONE DISCLAIMS ANY AND ALL IMPLIED WARRANTIES, INCLUDING WITHOUT LIMITATION THE IMPLIED WARRANTIES OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE, AND TITLE AND NONINFRINGEMENT, RELATING TO THE LICENSED SOFTWARE, USER DOCUMENTATION AND RELATED SERVICES. SOME JURISDICTIONS DO NOT ALLOW EXCLUSION OF OR LIMITATION ON DURATION OF AN EXPRESS OR IMPLIED WARRANTY OR LIMITATION ON ANY APPLICABLE STATUTORY RIGHTS OF A CONSUMER, SO THE ABOVE LIMITATIONS MAY NOT APPLY TO LICENSEE; IN SUCH EVENT, SUCH WARRANTIES ARE LIMITED TO THE MAXIMUM EXTENT ALLOWED BY APPLICABLE LAW.

b. Licensee's sole remedy for any alleged breach of the limited warranty set forth in Section 7(a) above shall be to request redelivery of conforming Licensed Software. If Rank One fails to deliver Licensed Software that conforms with the User Documentation in all material respects within sixty (60) days of Licensee's written notice of a warranty claim under Section 7(a) above, Rank One shall refund to Licensee all amounts received by Rank One in respect of such non-conforming Licensed Software upon written request from Licensee.

8. Limitations on Liability.

a. IN NO EVENT AND UNDER NO LEGAL THEORY, WHETHER TORT, STRICT LIABILITY, CONTRACT OR OTHERWISE, SHALL RANK ONE BE LIABLE TO LICENSEE FOR ANY CONSEQUENTIAL, INDIRECT, EXEMPLARY, PUNITIVE, STATUTORY, SPECIAL OR INCIDENTAL DAMAGES OF ANY CHARACTER, OR FOR ANY LOSS OF USE, DATA OR PROFITS, LOSS OF GOODWILL, PROCUREMENT OF SUBSTITUTE GOODS OR SERVICES, BUSINESS INTERRUPTION OR WORK STOPPAGE, COMPUTER FAILURE OR MALFUNCTION, OR ANY OTHER COMMERCIAL DAMAGES OR LOSSES RELATED TO THE LICENSED SOFTWARE OR USE THEREOF, EVEN IF RANK

9. Termination.

a. Termination. When the Licensee is an instrumentality of the U.S., recourse against the United States for any alleged breach of these Terms of Use must be brought as a dispute under the contract Disputes Clause (Contract Disputes Act). During any dispute under the Disputes Clause, Rank One shall proceed diligently with performance of these Terms of Use, pending final resolution of any request for relief, claim, appeal, or action arising under these Terms of Use, and comply with any decision of the Contracting Officer, provided that such temporary compliance shall not be deemed to be a waiver by Rank One of its right to appeal the decision to the applicable board of contractor appeals and/or bring suit on the claim in the United States Court of Federal Claims.

b. Effect of Termination. Upon termination of these Terms of Use, all licenses received by Licensee immediately terminate and Licensee must immediately cease all use of the Licensed Software and destroy all copies of the Licensed Software and User Documentation in its possession or under its control.

10. Ownership. The Licensed Software is licensed and not sold by Rank One. Rank One is and remains the sole and exclusive owner of all right, title and interest in and to the Licensed Software, including without limitation all Intellectual Property Rights embodied therein. Ownership of all Open Source Software, and all Intellectual Property Rights therein, is and will remain with the respective owners thereof, subject to Licensee's rights under the applicable license agreements. All rights not expressly granted to Licensee in these Terms of Use are reserved by Rank One.

11. General.

Except as expressly set forth in the preceding sentence, no term or provision of these Terms of Use is intended to be, or shall be, for the benefit of any person, firm, organization, or corporation other than Rank One (including without limitation its successors and assigns) and Licensee, and no such third party shall have any right or cause of action hereunder.

c. US Government Restricted Rights. The Licensed Software is commercial computer software that is provided to Licensee, including derivative works, with RESTRICTED RIGHTS. Use, duplication or disclosure to the United States Government is subject to the restrictions as set forth in Federal Acquisition Regulation (FAR) clause 12.212. Accordingly, Licensee will have the license rights contained in Sections 2 and 3 of these Terms of Use, and no greater rights in the Licensed Software except as may be expressly agreed to in writing by Rank One.

Facial Recognition Code of Ethics Rank One Computing Corporation July 27, 2020

Rank One Computing believes in a just, non-violent world of equality and fairness. We prize democratic values, civil liberties and open and informed debate. When used to further these values, automated face recognition can continue to make the world a safer, better place for everyone. And, in the absence of regulatory guidance, we have developed a Code of Ethics to set forth the principles that we believe should guide any development and use of facial recognition technology. This Code of Ethics establishes important limitations that we believe are appropriate in how face recognition should be utilized, particularly by law enforcement.

This Code of Ethics serves as a guideline both for how we will develop face recognition systems and how we will expect our integration partners and end-users to develop and utilize face recognition systems based on our algorithms. We require all of our partners and customers who use Rank One facial recognition algorithms to commit to abide by this Code of Ethics.

First Principle

Facial recognition should be used to make the world safer, more secure and more convenient while minimizing harm through proper workflows that identify and mitigate sources of error.

Commercial Use

- Facial recognition should not be used to track private details about a person without opt-in consent, except when used for security and safety purposes.

Law Enforcement Use

- Facial recognition should not be used for real-time mass surveillance of lawful activity. Any targeted surveillance of an individual should require a court-ordered warrant.
- Facial recognition should not support probable cause for arrest, search or seizure.
- Facial recognition should utilize best practices and workflows established by the Facial Identification Scientific Working Group (FISWG) and the Organization of Scientific Area Committees for Forensic Science (OSAC) Facial Identification Subcommittee, which require a trained human facial examiner to make final determinations based on morphological matching guidelines.
- Facial recognition should be used to solve violent crimes and felonies, but not victimless misdemeanors.
- Any use of facial recognition should be discoverable in criminal proceedings.
- Facial recognition use must be in compliance with police policies and procedures, all statutes and regulations and the Constitutional limits that protect civil liberties.
