Lindsay Lerable, Assistant Director of Public Works, Facilities and Parks
Enrique Saavedra, P.E., Chief of Public Works
Nick Pasculli, Director County Communications
Maia Carroll, Coordinator County Communications
Nicole Hollingsworth, Legislative Program Manager

This memorandum is to update the Board of Supervisors on the 2026 grant funding application for Jolon Road submitted to the Office of Local Defense Community Cooperation, Defense Community Infrastructure Program (DCIP).

The DCIP grant solicitation for 2026 provides $230 million to address deficiencies in community infrastructure supportive of a military installation. The Department of Public Works, Facilities and Parks (PWFP) has identified the rehabilitation of Jolon Road as a priority project for many years. The road is in need of rehabilitation to improve safety, aesthetics and function and proposed improvements include the following: grinding of old pavement and installation of fabric reinforcement to extend service life, overlay of the existing pavement with a three-inch hot mix asphalt (HMA) layer to improve the rideability and safety, grading, striping and paving to install new or widen existing paved shoulders to a minimum of six feet to further improve the road safety. In coordination with Fort Hunter Liggett, PWFP submitted a DCIP grant proposal to request approximately $9.8 million to rehabilitate approximately 8.7 miles of Jolon Road (from the Mission Road south to Bradley Lockwood Road). External coordination was required to shape project scope, and a Board Report could not be submitted within the allotted time constraints.

If the grant proposal is selected to receive funding, staff will return to the Board for approval to accept the grant award and approve the Project. Programming Federal transportation funds support construction jobs, enhance public safety, as well as provide needed improvements for economic development, business retention, quality of life, and mobility throughout the County.
