Any such tail coverage shall continue for at least three years following the expiration or earlier termination of this Agreement.

(Note: any proposed modifications to these insurance requirements shall be attached as an Exhibit hereto, and the section(s) above that are proposed as not applicable shall be lined out in blue ink. All proposed modifications are subject to County approval.)

CONTRACTOR shall at all times during the term of this Agreement maintain in force the insurance coverage required under this Agreement and shall send, without demand by County, annual certificates to County's Contract Administrator and County's Contracts/Purchasing Division. If the certificate is not received by the expiration date, County shall notify CONTRACTOR and CONTRACTOR shall have five calendar days to send in the certificate, evidencing no lapse in coverage during the interim. CONTRACTOR shall provide services and staff, and otherwise do all things necessary for or incidental to the performance of work, as set forth below:

- a. Preventative Maintenance - Preventative maintenance will be performed at a minimum once each calendar quarter. Each preventive maintenance service will be coordinated with the designated site manager for the County and scheduled by a computer-generated service report detailing the tasks to perform, the skill levels required, and the special tools and instrumentation required to maintain the systems. Maintenance intervals will be determined by either equipment run time or a frequency determined from consideration of equipment operation, application, location, or criticality of end use. Upon completion of each service call, a summary of the preventive maintenance tasks completed will be provided to the County. CONTRACTOR shall perform the applicable Preventive maintenance tasks on the equipment listed in EXHIBIT B. During the performance of such maintenance CONTRACTOR shall:
- Calibrate temperature, safety and operating controls
 - Lubricate all motors, bearings, linkages and valve stems
 - Adjust all belts, dampers, set points, water treatment, and filter feed systems

 - Replace air filters
- b. Component Replacements - CONTRACTOR shall maintain the County's presently installed system within the functional limitations of presently installed hardware, firmware, and software found on the County's system(s). CONTRACTOR shall repair or replace serviceable components and parts found on the List of Covered Equipment (EXHIBIT B) that have been found to be defective or have failed. Replaced components will be new or reconditioned components of compatible design as required to maintain the County's system. At CONTRACTOR'S sole discretion, marginal components may also be repaired or replaced. These replacements will be based upon commercial availability of parts and/or components. All exchanged parts shall become the property CONTRACTOR. Automatic valve and damper maintenance and repair are included in this Agreement. The labor required for their removal and installation is not included.

Notwithstanding the foregoing, at initial inspection, at initial seasonal start-up, or following twelve (12) months of service, if any individual component cannot, in the sole or exclusive opinion of CONTRACTOR, be properly repaired, due to obsolescence, lack of commercial availability of standard parts, and/or excessive wear or deterioration, CONTRACTOR may remove said component from the List of Covered Equipment, with sixty (60) days written notice. Non-maintainable components will be eliminated from coverage under this Agreement and CONTRACTOR shall adjust the price accordingly.

- c. Emergency Service - Activities performed under this Agreement are designed to minimize the incidence of emergency situations. However, should an emergency arise, CONTRACTOR personnel will assess the situation either by phone or remote diagnostics, or both, and will determine the required course of action with the County. If it is determined that a site visit is required, CONTRACTOR personnel will arrive at the County site within four (4) hours. If the resolution of the emergency service call requires CONTRACTOR to provide service for equipment that is not listed in Exhibit B, the County will be liable for charges for such service, as identified in *Section IV* of this Exhibit. Continuous Emergency Service will be provided 24 hours per day, seven days per week, federal holidays included.
- d. Performance Review - A review of the Services provided within this Agreement will be performed by CONTRACTOR on an annual basis at the County's request. CONTRACTOR and the County will discuss work performed since the last review; CONTRACTOR will answer questions pertaining to Service delivery and will identify opportunities to further improve performance of the Equipment.
- e. Honeywell Service Portal - CONTRACTOR will provide the County access to an Internet-based application that will allow the County to securely submit non-emergency service requests online; view status of all service calls, whether scheduled, open or closed; view appointments and task detail of work performed on contracted service calls; and view contract and equipment coverage details (12-month history and including only service performed per the CONTRACTOR contract). Entry of functionality enhancements or deletions into CONTRACTOR's Internet-based application are at the discretion of CONTRACTOR.
- f. Warranty - CONTRACTOR will replace or repair any product CONTRACTOR provides under this Agreement that fails within the warranty period of one (1) year because of defective workmanship or materials, except to the extent the failure results from the County's negligence, or from fire, lightning, water damage, or any other cause beyond the control of CONTRACTOR. This warranty applies to all products CONTRACTOR provides under this Agreement, whether or not manufactured by CONTRACTOR. The warranty is effective as of the date of the County's acceptance of the product or the date the County begins beneficial use of the product, whichever occurs first.
- g. Exclusions - Repair or replacement of non-maintainable parts of the system such as, but not limited to, ductwork, piping, shell and tube (for boilers, evaporators, condensers, and chillers), unit cabinets, boiler refractory material, heat exchangers, insulating material,
