## Cell Phone Coverage Map for Jolon

Red Marker above showing location of AT&T site.

AT&T are the only provider with a wireless communications facility in the vicinity. To the right is a coverage map for AT&T.

Existing nearby AT&T site below, was considered for collocation but was deemed unsuitable. The height of the pole is only 15' and the pole diameter is 3". The exposed, highly visible location near to the public road was also not considered appropriate. The new proposed site will have capacity for collocation.
