# EXHIBIT A DRAFT RESOLUTION

# Before the Zoning Administrator in and for the County of Monterey, State of California

In the matter of the application of:

WECKER (PLN170144) RESOLUTION NO. 18 -

Resolution by the Monterey County Zoning Administrator:

- 1) Finding that the project qualifies as a Class 3 Categorical Exemption pursuant to Section 15303 of the CEQA Guidelines, and there are no exceptions pursuant to Section 15300.2; and
- 2) Approving a Combined Development Permit consisting of a Use Permit to allow development on slope exceeding 25 percent, a Use Permit to allow removal of six (6) Monterey pine and one (1) oak, and an Administrative Permit and Design Approval to allow construction of a 1,200 square foot accessory dwelling unit with a 528 square foot attached garage; subject to eighteen (18) conditions of approval.

600 and 610 Viejo Road, Carmel, Greater Monterey Peninsula Area Plan (APNs: 103-011-004/012-000)

The Wecker application (PLN170144) came on for a public hearing before the Monterey County Zoning Administrator on June 14, 2018. Having considered all the written and documentary evidence, the administrative record, the staff report, oral testimony, and other evidence presented, the Zoning Administrator finds and decides as follows:

## FINDINGS AND EVIDENCE

## 1. FINDING: CONSISTENCY / SITE SUITABILITY / NO VIOLATIONS -

The proposed project and/or use, as conditioned, is consistent with the policies of the Monterey County 2010 General Plan, Greater Monterey Peninsula Area Plan, Monterey County Zoning Ordinance (Title 21), and other County health, safety, and welfare ordinances related to land use development. The site is physically suitable for the development proposed, and no violations exist on the property.

**EVIDENCE:** a) The proposed project involves the construction of a 1,200 square foot accessory dwelling unit with a 528 square foot attached garage; construction of an on-site wastewater treatment system, and associated grading and site improvements for access and utilities;

development on slope exceeding 25 percent, and tree removal.

The properties are located at 600 and 610 Vieio Road, Carmel

(Assessor's Parcel Numbers 103-011-004/012-000), Greater Monterey Peninsula Area Plan. The parcel is zoned Rural Density Residential, 5.1 acres per unit, with Urban Reserve, Design Control, and Site Plan Review Overlays (RDR/5.1-UR-D-S). Development of habitable accessory dwelling units and non-habitable accessory

- structures are allowed uses pursuant to MCC Sections 21.16.030.E and S. Therefore, the proposed development is an allowed use for this site. The Site Plan Review and Design Control zoning overlays require the granting of an Administrative Permit and Design Approval for the proposed development (see Finding No. 2 below).
- c) All structural development and tree removal will occur on 600 Viejo Road (Assessor's Parcel Number 103-011-012-000). The only development to occur on 610 Viejo Road (Assessor's Parcel Number 103-011-004-000) will be the development on slope exceeding 25 percent and associated grading for the driveway and utility access to the new structures. The building site is located behind and above the existing single-family dwelling on the parcel, and access to the building site crosses this adjacent parcel, for which the owner has a recorded access easement (Document 2017000938, recorded January 6, 2017).
- d) <u>Urban Reserve</u>. In this case, the Urban Reserve overlay indicates the subject properties are located within the sphere of influence of the City of Monterey. Therefore, RMA-Planning referred the project to the City of Monterey Community Development Department for review. The City of Monterey Community Development Department responded via email on June 8, 2017, and informed RMA-Planning that the City has no issues with the proposed development.
- e) The 4.98-acre lot (Assessor's Parcel Number 103-011-012-000) is identified as a 5-acre lot under separate ownership on Assessor's Map Book 103, Page 1, in both 1964 (Volume 2) and 1972 (Volume 5). A 0.02-acre portion on the property was conveyed to the State of California via deed (recorded on June 2, 1965, Reel 408, Page 628, Official Records), resulting in the current 4.98-acre configuration. The existing single-family dwelling on the parcel was initially constructed in 1963. The current owner purchased the property in 1980 (Grant Deed recorded February 5, 1980, Reel 1388, Page 385). Thus, in its current configuration, the property is a legal lot of record.
- f) The project has been reviewed for consistency with the text, policies, and regulations in the:
  - 2010 Monterey County General Plan;
  - Greater Monterey Peninsula Area Plan; and
  - Monterey County Zoning Ordinance (Title 21)
- g) No conflicts were found to exist. No communications were received during the course of review of the project indicating any inconsistencies with the text, policies, and/or regulations of the applicable Monterey County Code (MCC).
- h) The project has been reviewed for site suitability by RMA-Planning, RMA-Public Works, RMA-Environmental Services, Environmental Health Bureau, Water Resources Agency, Cypress Fire Protection District, and City of Monterey Community Development Department. There has been no indication from these departments/agencies that the site is not suitable for the proposed development. Conditions recommended by RMA-Planning and RMA-Environmental Service have been incorporated.
- i) The following technical reports have been prepared:

- Geotechnical Report (LIB170225) prepared by Grice Engineering, Inc., Salinas, California, November 25, 2015;
- Preliminary Cultural Resources Reconnaissance (LIB170228) prepared by Susan Morley, registered archaeologist, Marina, California, May 2017;
- Arborist Report (LIB170229) prepared by Albert Weisfuss, Monterey, California, May 23, 2017;
- Biological Assessment (LIB170230) prepared by Pat Regan, Consulting Biologist, Carmel Valley, California, June 2017; and
- Landslide Hazards Analysis (LIB170330) prepared by Grice Engineering, Inc., Salinas, California, September 20, 2017.
- j) County staff independently reviewed these reports and concur with their conclusions. There are no physical or environmental constraints that would indicate that the site is not suitable for the use proposed. All development shall be in accordance with these reports.
- k) <u>Cultural Resources</u>. The project site is within an area of moderate sensitivity for prehistoric cultural resources. An archaeological survey (LIB170228) prepared for the project did not identify any potential for inadvertent impacts to prehistoric or cultural resources. Therefore, the County has applied a standard project condition (Condition No. 3), to require the contractor to stop work if previously unidentified resources are discovered during construction.
- 1) <u>Design and Site Plan Review</u>. See Finding No. 2.
- m) Accessory Dwelling Unit. See Finding No. 5.
- n) <u>Long-Term Sustainable Water Supply and Adequate Water Supply</u> System. See Finding No. 6.
- o) Tree Removal. See Finding No. 7.
- p) <u>Development on Slope Exceeding 25 Percent</u>. See Finding No. 8.
- q) Monterey County RMA-Planning and RMA-Building Services records were reviewed, and the County is not aware of any violations existing on the subject property.
- r) The project planner conducted a site inspection on June 21, 2017, to verify that the proposed project on the subject parcel conforms to the applicable plans and MCC, and that the site is suitable for the proposed development and use.
- s) The project was referred to the Greater Monterey Peninsula Land Use Advisory Committee (LUAC) for review. Based on the LUAC Procedure guidelines adopted by the Monterey County Board of Supervisors, this application warranted referral to the LUAC because the project involves a Design Approval subject to review by the Zoning Administrator. The LUAC, at a duly-noticed public meeting on October 18, 2017, voted 3 0 to support the project with a recommended change to require 1:1 tree replacement. Condition No. 18 will require the Applicant to replant removed trees at a 1:1 ratio. See also Evidences j and k above.
- t) The application, plans, and supporting materials submitted by the project applicant to Monterey County RMA-Planning for the proposed development found in project file PLN170144.
- 2. **FINDING: DESIGN AND SITE PLAN REVIEW** The design of the proposed project assures protection of the public viewshed, is consistent with

neighborhood character, and assures visual integrity without imposing undue restrictions on private property. Additionally, the proposed development is not located in an area that has the potential to adversely affect or be adversely affected by natural resources or site constraints.

## **EVIDENCE**: a)

- On a 4.98-acre lot with an existing single-family dwelling, the Applicant proposes to construct a 1,200 square foot accessory dwelling unit with a 528 square foot attached garage. The proposed project also involves construction of an on-site wastewater treatment system; associated grading and site improvements for access and utilities; development on slope exceeding 25 percent, and tree removal.
- b) Pursuant to Chapter 21.44, Title 21 (Zoning Ordinance) of the Monterey County Code (MCC), the proposed project site and surrounding area are designated as a Design Control Overlay or Combining District (D District), which regulates the location, size, configuration, materials, and colors of structures and fences to assure the protection of the public viewshed and neighborhood character.
- c) Pursuant to Chapter 21.45, Title 21 (Zoning Ordinance) of the MCC, the proposed project site and surrounding area are designated as a Site Plan Review Overlay or Combining District (S District), which regulates review of development, where by reason of its location, it has the potential to adversely affect or be adversely affected by natural resources or site constraints.
- d) Material and Color Finishes. The Applicant proposes exterior colors and materials that are consistent with the rural residential setting. The primary colors and materials include tan vinyl roofing, light brown stucco and medium brown wood siding, and dark bronze aluminum windows and doors. The proposed exterior finishes would blend with the surrounding environment, are consistent with the surrounding rural residential neighborhood character, and are consistent with other dwellings in the neighborhood, including the existing single-family dwelling on the subject parcel.
- e) <u>Visual Resources</u>. The project site is within an area of high visual sensitivity, as designated on Figure 14 (Greater Monterey Peninsula Scenic Highway Corridors & Visual Sensitivity Map) of the 2010 Monterey County General Plan, due to the potential for impacts to the viewshed along Highway 1. However, the property and building site are over 300 and 500 feet, respectively, from Highway 1. The property and building site are also not visible from Highway 1. Existing distance, trees and vegetation, and topography effectively screen the proposed development from the highway viewshed. As proposed, the project would not result in any visual impacts, and the project is consistent with the applicable scenic resource policies of the 2010 General Plan and the Greater Monterey Peninsula Area Plan.
- f) Review of Development Standards. The development standards for the RDR zoning district are identified in MCC Section 21.16.060. Required setbacks in the RDR district for habitable accessory structures are 50 feet (front), 6 feet (rear), and 6 feet (sides). The proposed attached garage would be required to meet the same

structural setbacks. The corresponding maximum structure height is 15 feet. The proposed setbacks and height for the accessory dwelling unit and attached garage are approximately 220 feet (front), 92.18 feet and 164.32 feet (sides), 400 feet (rear), and 12.25 feet (height).

The allowed site coverage maximum in the RDR zoning district is 25 percent. The property is 4.98 acres or 216,746 square feet, which would allow a site coverage maximum of approximately 54,187 square feet. The existing structural coverage (i.e., single-family dwelling with an attached garage) is 3,168 square feet or 1.5 percent. The addition of the accessory dwelling unit and garage would raise the structural coverage by 1,728 square feet, resulting in a total site coverage of 4,896 square feet or 2.26 percent. Based on the information above, as proposed, the project meets all required development standards.

- g) The project planner conducted a site inspection on June 21, 2017, to verify that the proposed project on the subject parcel conforms to the applicable plans and MCC, and will not adversely impact the neighborhood character or scenic/visual resources.
- h) Based on the evidence described above, the proposed structures and uses are consistent with the surrounding rural residential neighborhood character (i.e., structural design features, colors, material finishes, and site). The proposed development is also not visible from a common public viewing area; therefore, the proposed structures would not have an impact on a public viewshed and would not create a substantially adverse visual impact when viewed from a common public viewing area. As proposed, the project assures protection of the public viewshed, is consistent with neighborhood character, and assures visual integrity.

## 3. **FINDING:**

**HEALTH AND SAFETY** – The establishment, maintenance, or operation of the project applied for will not under the circumstances of this particular case be detrimental to the health, safety, peace, morals, comfort, and general welfare of persons residing or working in the neighborhood of such proposed use, or be detrimental or injurious to property and improvements in the neighborhood or to the general welfare of the County.

## **EVIDENCE:** a)

- The project was reviewed by RMA-Planning, RMA-Public Works, RMA-Environmental Services, Environmental Health Bureau, Water Resources Agency, Cypress Fire Protection District, and the City of Monterey Community Development Department. Conditions have been recommended, where appropriate, to ensure that the project will not have an adverse effect on the health, safety, and welfare of persons either residing or working in the neighborhood.
- b) Necessary public facilities will be provided by an existing water connection, and a proposed on-site wastewater treatment system for the accessory dwelling unit. The property will continue to be served by a public water system (California American Water), using water credits gained through an interior remodel of the existing single-family dwelling (not a part of this permit action). Based on projected water use data submitted by the Applicant, and reviewed by

Monterey County Water Resources Agency, Environmental Health Bureau, and the Monterey Peninsula Water Management District, the estimated water use for the property would decrease from 0.216 acre feet to 0.212 acre feet (an overall net reduction of 0.004 acre feet). The Monterey County Environmental Health Bureau and Water Resources Agency did not apply conditions of approval. See also Finding Nos. 5 (Accessory Dwelling Unit) and 6 (Long-Term Sustainable Water Supply and Adequate Water Supply System), and supporting evidence.

c) The application, plans, and supporting materials submitted by the project applicant to Monterey County RMA-Planning for the proposed development found in RMA-Planning File No. PLN170144.

## 4. **FINDING:**

**CEQA** (**Exempt**) – The project is categorically exempt from environmental review and no unusual circumstances were identified to exist for the proposed project.

**EVIDENCE:** 

- California Environmental Quality Act (CEQA) Guidelines Section 15303 categorically exempts the construction of new, small facilities or structures, including habitable and non-habitable structures accessory to a single-family dwelling or residential use.
- b) The subject project consists of the construction of an accessory or second dwelling unit with an attached garage, an on-site wastewater treatment system, and associated grading and site improvements for access and utilities. Therefore, the proposed development is consistent with the exemption parameters of CEQA Guidelines Section 15303.
- c) None of the exceptions under CEQA Guidelines Section 15300.2 apply to this project. There is no substantial evidence of an unusual circumstance because there is no feature or condition of the project that distinguishes the project from the exempt class. The project does not involve a designated historical resource, a hazardous waste site, or development located within view of a scenic highway. There is no substantial evidence that would support a fair argument that the project has a reasonable possibility of having a significant effect on the environment or that it would result in a cumulative significant impact. The subject property is located approximately 300 feet from Highway 1; however, the property and project site are not visible from Highway 1 due to distance, trees and vegetation, and topography which effectively screen the proposed development from the highway viewshed.
- d) No adverse environmental effects were identified during staff review of the development application.

## 5. **FINDING:**

**ACCESSORY DWELLING UNIT** – The subject project meets the regulations, standards and circumstances for an accessory dwelling unit in accordance with the applicable goals, policies, and regulations of the applicable land use plan and zoning codes.

**EVIDENCE:** a)

The establishment of the accessory dwelling unit will not, under the circumstances of the particular application, be detrimental to the health, safety, peace, morals, comfort and general welfare of persons

- residing or working in the neighborhood or to the general welfare of the County (see Finding No. 3 and supporting evidence).
- b) The subject property upon which the accessory dwelling unit is to be built is in compliance with all rules and regulations pertaining to zoning uses, subdivisions and any other applicable provisions of the 2010 Monterey County General Plan, Greater Monterey Peninsula Area Plan, and zoning ordinance (Title 21). The proposed unit is in conformance with 2010 General Plan Policy LU-2.10, which allows development of accessory dwelling units provided the area does not have resource constraints. The property is not within an area of the County that limits development to the first single-family dwelling.
- c) The property is 4.98 acres, which is larger than the minimum lot size of 2 acres required pursuant to Monterey County Code (MCC) Section 21.64.030.D.2.
- d) As proposed, the Accessory Dwelling Unit would be 1,200 square feet, which is the maximum allowed pursuant to Monterey County Code (MCC) Section 21.64.030.D.4.
- Necessary public facilities will be provided by an existing water e) connection, and a proposed on-site wastewater treatment system for the accessory dwelling unit. The property will continue to be served by a public water system (California American Water), using water credits gained through an interior remodel of the existing singlefamily dwelling (not a part of this permit action). Based on projected water use data submitted by the Applicant, and reviewed by Monterey County Water Resources Agency, Environmental Health Bureau, and the Monterey Peninsula Water Management District, the estimated water use for the property would decrease from 0.216 acre feet to 0.212 acre feet (an overall net reduction of 0.004 acre feet). The Monterey County Environmental Health Bureau and Water Resources Agency did not apply conditions of approval. See also Finding Nos. 3 (Health and Safety) and 6 (Long-Term Sustainable Water Supply and Adequate Water Supply System), and supporting evidence.
- f) The proposed accessory dwelling unit will not adversely impact traffic conditions in the area. The project involves generation of new traffic; however, the proposed accessory dwelling unit would generate an insignificant amount of new traffic. Viejo Road and adjacent roads and streets within the City of Monterey are not at degraded levels of service, and the contribution of traffic from the accessory dwelling unit would not cause any intersection level of service to be degraded. The County reviewed the project application and did not require a traffic technical report. In addition, upon application for the construction permits, the Applicant shall be required to pay applicable traffic impacts fees.
- g) The application, plans, and supporting materials submitted by the project applicant to Monterey County RMA-Planning for the proposed development found in project file PLN170144.

# 6. FINDING: LONG-TERM SUSTAINABLE WATER SUPPLY AND ADEQUATE WATER SUPPLY SYSTEM – The project has an

adequate water supply system to serve the development, and the project is not required to provide proof of a Long-Term Sustainable Water Supply under Monterey County 2010 General Plan Policies PS-3.1 and PS-3.2, respectively.

## **EVIDENCE:** a)

- The proposed project will use or require the use of water.
- Policies PS-3.1 and PS-3.2 of the 2010 Monterey County General b) Plan require proof of a long term sustainable water supply and an adequate water supply system for new development requiring a discretionary permit. Based on projected water use data submitted by the Applicant, and reviewed by Monterey County Water Resources Agency, Environmental Health Bureau, and the Monterey Peninsula Water Management District, the estimated water use for the property would decrease from 0.216 acre feet to 0.212 acre feet (an overall net reduction of 0.004 acre feet). The Monterey County Environmental Health Bureau and Water Resources Agency did not apply conditions of approval. See also Finding Nos. 3 (Health and Safety) and 5 (Accessory Dwelling Unit), and supporting evidence. Based on County review, as proposed, the project would not result in intensification of water use over the existing baseline residential use of the property.
- c) The water source for the proposed development is California American Water (Cal Am), a regulated public utility that is mandated to provide water that meets public health standards and thus has adequate water quality as required by PS-3.2(a). Cal Am also has the technical, managerial, and financial capability to provide water to the subject site consistent with PS-3.2(c).
- d) Based on Evidences b and c above, the project has a long-term, sustainable water supply, both in quality and quantity, and an adequate water supply system to serve the proposed use.
- e) The application, plans and supporting materials submitted by the project applicant to Monterey County RMA-Planning for the proposed development are found in Project File PLN170144.

## 7. **FINDING:**

**TREE REMOVAL** – The project includes the removal of seven (7) protected trees. Tree removal is in accordance with the Monterey County Zoning Ordinance (Title 21). The Required Findings in order to grant the permit for tree removal have been met.

## **EVIDENCE**: a)

- Chapter 21.64.260, Title 21, of the MCC requires a Use Permit for the removal of three (3) or more protected trees within any one year period.
- b) As proposed, the project involves the removal of six (6) Monterey pine and one (1) oak (i.e., a total of 7 trees). Based on an arborist report prepared for the project (LIB170229), the proposed tree removal is the minimum necessary to accommodate the proposed structure. As described in the report, alternative building locations would result in removal of more trees and additional impact to slope exceeding 25 percent. The report further identifies that all of the Monterey pine scheduled for removal are nearing the end of their life span, and removal would not fracture the overall canopy of the surrounding stand or forest.
- c) The project planner conducted a site inspection on June 21, 2017, to

- verify that the proposed project minimizes tree removal in conformance with applicable MCC.
- d) Based on the arborist report (LIB170229) and a biological assessment prepared for the project (LIB170230), the proposed tree removal will not involve a risk of adverse environmental impacts. Per the reports, no special status flora or fauna were found. There was also no evidence of nesting birds within the trees proposed for removal. The subject parcel is heavily forested, and the construction of the accessory dwelling unit and garage, along with the tree removal, will not create a significant long-term impact to the area's ecosystem. Furthermore, the proposed project will not significantly reduce the availability of wildlife habitat on the 4.98-acre parcel or surrounding area.
- e) Measures for tree and root protection during construction and tree replacement have been incorporated as conditions of approval (Condition No. 5 and 18). Additionally, the Applicant will be required to obtain a construction permit prior to tree removal (Condition No. 6), and to submit a nesting survey prior to tree removal (Condition. No. 11)

## 8. FINDING: DEVELOPMENT ON SLOPE EXCEEDING 25 PERCENT –

There is no feasible alternative which would allow development to occur on slopes of less than 25 percent.

- **EVIDENCE:** a) Pursuant to the policies of the Monterey County 2010 General Plan and MCC, a Use Permit is required and the criteria to grant said permit have been met. No feasible alternative to access the building site exists.
  - b) The project includes application for 1,935 square feet of development on slopes exceeding 25 percent to allow construction of an access driveway to the building site. Due to the topography of the parcels, it's not possible to provide access to the building site and avoid slopes exceeding 25 percent, and there is no feasible alternative which would allow development to occur on slopes less than 25 percent.
  - c) The County reviewed the application materials, including plans, to verify the subject project minimizes development on slopes exceeding 25 percent in accordance with the applicable goals and policies of the Monterey County 2010 General Plan and applicable zoning codes. The proposed access road is the minimum necessary to accommodate access to the site by residential and emergency response vehicles. Therefore, the project is consistent with applicable policies and regulations regarding development on slopes exceeding 25 percent.
  - d) The County shall require such conditions of approval and changes in the development as it may deem necessary to assure compliance with MCC Section 21.64.230.E.2 regarding soil conditions, and to assure stability of the development and erosion control; therefore, the following conditions have been applied: Condition Nos. 12, 13, 14, 15, 16, and 17 Erosion Control Plan, Grading Plan, Inspections, and Geotechnical Certification.
  - e) The application, plans, and supporting materials submitted by the project applicant to Monterey County RMA-Planning for the

proposed development found in project file PLN170144.

9. **FINDING:** APPEALABILITY - The decision on this project may be appealed to

the Monterey County Planning Commission.

**EVIDENCE:** a) Pursuant to Section 21.80.040.B of the Monterey County Zoning

Ordinance (Title 21), the Planning Commission shall consider appeals from the discretionary decisions of the Zoning Administrator. The decision of the Planning Commission would be final and may not

be appealed.

## **DECISION**

**NOW, THEREFORE**, based on the above findings and evidence, the Zoning Administrator does hereby:

- A. Find that the project qualifies as a Class 3 Categorical Exemption pursuant to Section 15303 of the CEQA Guidelines, and there are no exceptions pursuant to Section 15300.2; and
- B. Approve a Combined Development Permit consisting of a Use Permit to allow development on slope exceeding 25 percent, a Use Permit to allow removal of six (6) Monterey pine and one (1) oak, and an Administrative Permit and Design Approval to allow construction of a 1,200 square foot accessory dwelling unit with a 528 square foot attached garage; in general conformance with the attached plans and subject to eighteen (18) conditions, both being attached hereto and incorporated herein by reference.

**PASSED AND ADOPTED** this 14<sup>th</sup> day of June, 2018.

	Mike Novo, Zoning Administrator
COPY OF THIS DECISION MAILED TO APPLICA	NT ON
THIS APPLICATION IS APPEALABLE TO THE PI WISHES TO APPEAL THIS DECISION, AN APPEA SUBMITTED TO THE SECRETARY OF THE PLAI APPROPRIATE FILING FEE ON OR BEFORE	AL FORM MUST BE COMPLETED AND

## **NOTES**

1. You will need a building permit and must comply with the Monterey County Building Ordinance in every respect.

Additionally, the Zoning Ordinance provides that no building permit shall be issued, nor any use conducted, otherwise than in accordance with the conditions and terms of the permit granted or until ten days after the mailing of notice of the granting of the permit by the appropriate authority, or after granting of the permit by the Planning Commission in the event of appeal.

Do not start any construction or occupy any building until you have obtained the necessary permits and use clearances from the offices of Monterey County RMA-Planning and RMA-Building Services in Salinas.

2. This permit expires 3 years after the above date of granting thereof unless construction or use is started within this period.

#### 5. PD011 - TREE AND ROOT PROTECTION

Responsible Department: RMA-Planning

16. BMP'S TO BE UTILIZED TO ACHIEVE THE PRECEDING MAY INCLUDE BUT ARE NOT NECESSARILY LIMITED

1. SILT FENCES SHALL BE INSTALLED ON LEVEL CONTOURS AND IN ACCORDANCE WITH THE MANUFACTURER'S SPECIFICATION AND SHOULD REMAIN IN PLACE UNTIL THE DISTURBED AREA IS PERMANENTLY STABILIZED.

FROM FLOWING AROUND THE FENCE. 3. SUFFICIENT AREA SHOULD EXIST BEHIND THE FENCE TO ALLOW PONDING WITHOUT FLOODING OR OVER TOPPING THE FENCE. 4. SILT FENCES SHALL BE INSPECTED MONTHLY DURING DRY PERIODS, WEEKLY DURING THE RAINY SEASON AND IMMEDIATELY BEFORE AND AFTER EACH RAINFALL, REPAIRS SHALL BE MADE IMMEDIATELY TO ANY DAMAGED PORTION OF THE FENCE. SEDIMENT AND DEBRIS SHOULD BE REMOVED FROM THE UPSTREAM SIDE

2. The ends of the silt fence should be turned uphill to prevent sediment laden run—of

OF THE FENCE ONCE IT REACHES ONE THIRD OF THE FENCE HEIGHT OR IF HEAVY RAINS ARE EXPECTED. 5. SILT FENCES SHALL NOT BE USED FOR CONCENTRATED FLOW. GRAVEL BAG BARRIERS

. Gravel Bag Barriers shall be installed around existing and New Storm Drain inlets as REQUIRED TO PREVENT ANY SEDIMENT LADEN RUN-OFF FROM ENTERING THE STORM DRAINAGE SYSTEM. 2. GRAVEL BAG BARRIERS SHALL BE INSPECTED MONTHLY DURING DRY PERIODS, WEEKLY DURING THE RAINY SEASON AND IMMEDIATELY BEFORE AND AFTER EACH RAINFALL. REPAIRS SHALL BE MADE IMMEDIATELY TO ANY DAMAGED PORTION OF THE BARRIER. SEDIMENT AND DEBRIS SHOULD BE REMOVED FROM THE PERIMETER OF THE BARRIER. 3. GRAVEL BAGS SHALL BE INSTALLED ON ALL ONSITE INLETS AND ALL INLETS IN THE PUBLIC RIGHT OF WAY WHICH ARE IMPACTED BY THE PROJECT.

CONSTRUCTION ENTRANCE

1. CONSTRUCTION ENTRANCES SHALL BE INSTALLED AS REQUIRED AT THE ENTRANCE TO THE CONSTRUCTION 2. RUN-OFF FROM CONSTRUCTION ENTRANCES SHALL BE DIVERTED SO AS TO PREVENT SEDIMENT LADEN RUN-OFF FROM ENTERING DIRECTLY INTO THE STORM DRAINAGE SYSTEM. 3. ALL VEHICLE LEAVING THE PROJECT SITE SHOULD PASS OVER THE CONSTRUCTION ENTRANCE AND BE CLEARED OF DIRT, MUD, OR ANY DEBRIS BEFORE ENTERING THE PUBLIC RIGHT-OF-WAY. 4. 1. FIBER ROLL SHALL BE INSTALLED ON LEVEL CONTOURS AND SHOULD REMAIN IN PLACE THROUGH THE RAINY SEASON AND OR UNTIL THE DISTURBED AREA IS PERMANENTLY STABILIZED. 2. THE ENDS OF THE FIBER ROLL SHOULD BE TURNED UPHILL TO PREVENT SEDIMENT LADEN RUN-OFF FROM FLOWING AROUND THE ROLL.

3. FIBER ROLL BARRIERS SHALL BE INSPECTED MONTHLY DURING DRY PERIODS, WEEKLY DURING THE RAINY SEASON AND IMMEDIATELY BEFORE AND AFTER EACH RAINFALL. REPAIRS SHALL BE MADE IMMEDIATELY TO ANY DAMAGED PORTION OF THE ROLL. SEDIMENT AND DEBRIS SHOULD BE REMOVED FROM THE UPSTREAM SIDE OF THE ROLL.

4. FIBER ROLL SHALL NOT BE USED FOR CONCENTRATED FLOW.

1. ALL EXPOSED SLOPES SHOULD TEMPORARILY STABILIZED UNTIL PERMANENT STABILIZATION CAN BE 2. TEMPORARY SLOPE STABILIZATION CAN BE ACHIEVED BY SEEDING, MULCHING AND OR PLACEMENT OF GEOTEXTILES OR MATS.

## **DEWATERING OPERATIONS**

1. DISCHARGES FROM DEWATERING OPERATIONS THAT CONTAIN SILT AND OR SEDIMENT SHALL BE PROPERLY TREATED BEFORE DISCHARGING INTO THE PUBLIC SYSTEM. 2. DEWATERING OPERATIONS WILL REQUIRE, AND SHOULD COMPLY WITH APPLICABLE LOCAL AND PROJECT SPECIFIC PERMITS AND REGULATIONS. IN SOME AREAS, ALL DEWATERING ACTIVITIES, REGARDLESS OF THE DISCHARGE VOLUME, REQUIRE A DEWATERING PERMIT. 3. CONTRACTOR AT HIS DISCRETION MAY USE ANY OR COMBINATION OF THE FOLLOWING METHODS FOR THE TREATMENT OF DISCHARGES FROM DEWATERING:

A. SEDIMENT BASIN (SE-2) - A SEDIMENT BASIN IS A TEMPORARY BASIN WITH A CONTROLLED RELEASE STRUCTURE THAT IS FORMED BY EXCAVATION OR CONSTRUCTION OF AN EMBANKMENT TO DETAIN SEDIMENT-LADEN RUNOFF AND ALLOW SEDIMENT TO SETTLE OUT BEFORE DISCHARGING.

B. SEDIMENT TRAP (SE-3) - A SEDIMENT TRAP IS A TEMPORARY BASIN FORMED BY EXCAVATION AND/OR CONSTRUCTION OF AN EARTHEN EMBANKMENT ACROSS A WATERWAY OR LOW DRAINAGE AREA TO DETAIN SEDIMENT-LADEN RUNOFF AND ALLOW SEDIMENT TO SETTLE OUT BEFORE DISCHARGING.

C. WEIR TANKS - A WEIR TANK SEPARATES WATER AND WASTE BY USING WEIRS. THE CONFIGURATION OF THE WEIRS (OVER AND UNDER WEIRS)MAXIMIZES THE RESIDENCE TIME IN THE TANK AND DETERMINES THE WASTE TO BE REMOVED FROM THE WATER, SUCH AS OIL, GREASE, AND SEDIMENTS.

D. DEWATERING TANKS — A DEWATERING TANK REMOVES DEBRIS AND SEDIMENT. FLOW ENTERS THE TANK THROUGH THE TOP, PASSES THROUGH A FABRIC FILTER, AND IS DISCHARGED THROUGH THE BOTTOM OF THE TANK. THE FILTER SEPARATES THE SOLIDS FROM THE LIQUIDS.

Scale 1" = 30'

E. GRAVITY BAG FILTER - A GRAVITY BAG FILTER, ALSO REFERRED TO AS A DEWATERING BAG, IS A SQUARE OR RECTANGULAR BAG MADE OF NON-WOVEN GEOTEXTILE FABRIC THAT COLLECTS GRAVEL, SAND, SILT, AND

F. PRESSURIZED BAG FILTER - A PRESSURIZED BAG FILTER IS A UNIT COMPOSED OF SINGLE FILTER BAGS MADE FROM POLYESTER FELT MATERIAL. THE WATER FILTERS THROUGH THE UNIT AND IS DISCHARGED THROUGH A HEADER. VENDORS PROVIDE BAG FILTERS IN A VARIETY OF CONFIGURATIONS. SOME UNITS INCLUDE A COMBINATION OF BAG FILTERS AND CARTRIDGE FILTERS FOR ENHANCED CONTAMINANT REMOVAL.

G. CARTRIDGE FILTER — CARTRIDGE FILTERS PROVIDE A HIGH DEGREE OF POLLUTANT REMOVAL BY UTILIZING A NUMBER OF INDIVIDUAL CARTRIDGES AS PART OF A LARGER FILTERING UNIT. THEY ARE OFTEN USED AS A SECONDARY OR HIGHER (POLISHING) LEVEL OF TREATMENT AFTER A SIGNIFICANT AMOUNT OF SEDIMENT AND OTHER POLLUTANTS ARE REMOVED. UNITS COME WITH VARIOUS CARTRIDGE CONFIGURATIONS (FOR USE IN SERIES WITH BAG FILTERS) OR WITH A LARGER SINGLE CARTRIDGE FILTRATION UNIT (WITH MULTIPLE FILTERS WITHIN).
