**Before the Board of Supervisors in and for the
County of Monterey, State of California**

Resolution No. 06-043)
 Resolution of the Monterey County)
 Board of Supervisors Approving the)
 Morisoli-Amaral Combined Development)
 Permit (PLN020016), Central Salinas Valley)
 Area Plan.

The Morisoli-Amaral Combined Development Permit Application (PLN020016) came on for public hearing before the Monterey County Board of Supervisors on February 14, 2006. Having considered all the written and documentary evidence, the administrative record, the staff report, oral testimony, and other evidence presented, the Board of Supervisors approves the Combined Development Permit with reference to the following findings:

I. FINDINGS

- 1. FINDING:** **CONSISTENCY:** The project, as proposed and conditioned, would be consistent with the General Plan, the Central Salinas Valley Area Plan, and the provisions of the Monterey County Zoning Ordinance (Title 21) and Monterey County Subdivision Ordinance (Title 19).
- EVIDENCE:**
- (a) Staff has reviewed the project, as contained in the application and accompanying materials, for consistency with the General Plan, Central Salinas Valley Area Plan, Monterey County Zoning Ordinance (Title 21), and Monterey County Subdivision Ordinance (Title 19) and has found that the project is consistent. Staff has concluded that the project complies with land use and other policies of the General and Area Plan and complies with the standards of the Zoning and Subdivision Ordinances.
 - (b) Site inspections conducted by staff on February 20, 2003, March 28, 2003, and August 18, 2005 verified that site conditions on the subject parcels would allow development of the project, as proposed and revised, in conformance to the documents listed above.
 - (c) Appropriate conditions of approval and mitigation measures have been recommended by staff and the EIR which implementation would assure compliance with the General Plan and Area Plan and the provisions of the Monterey County Zoning Ordinance (Title 21) and Subdivision Ordinance (Title 19).
 - (d) Written and verbal public testimony submitted at the public meetings before the Planning Commission.
 - (f) Draft EIR, including Chapter 4, dated September 11, 2001.
 - (g) Final EIR dated December 2004.
 - (h) Evidence for Finding No. 5 below.

- 2. FINDING: SITE SUITABILITY:** The site is suitable for the use proposed.
- EVIDENCE:**
- (a) The project has been reviewed for suitability by Planning and Building Inspection Department, Water Resources Agency, Environmental Health Department, Public Works Department, California Department of Forestry & Fire Protection; California State Department of Health Services, Monterey County Sheriff, Pacific Gas and Electric, Parks Department, Housing and Redevelopment, Agricultural Commission, California Regional Water Quality Control Board, City of King Union Elementary School District, US Fish and Wildlife Services, Monterey Bay Unified Air Pollution Control District, Association of Monterey Bay Area Governments (AMBAG), and California Department of Fish and Game. Conditions recommended have been incorporated where appropriate.
 - (b) Technical background reports by outside consultants indicate that there are no significant physical or environmental constraints such as geologic or seismic hazard areas, environmentally sensitive habitats or similar areas that would indicate the site is not suitable for the use proposed. The reports are part of the Environmental Impact Report (EIR) prepared for the project. Copies of the reports and the EIR are contained in the Project File (PLN020016).
 - (c) Site inspections conducted by staff on February 20, 2003, March 28, 2003, and August 18, 2005.
 - (d) Necessary public facilities are available or will be provided as condition of project approval and recordation of the final map.
 - (e) Evidence for Finding No. 1 above.
- 3. FINDING: FISH AND GAME:** For purposes of the Fish and Game Code, the project will have a potential for adverse impact on fish and wildlife resources upon which the wildlife depends.
- EVIDENCE:**
- (a) Analysis contained in the Environmental Impact Report and the record as a whole indicate the project may or will result in changes to the resources listed in Section 753.5(d) of the Department of Fish and Game regulations.
 - (b) The applicant shall pay the Environmental Document Fee, pursuant to Fish and Game Code Section 753.5.
- 4. FINDING: CODE COMPLIANCE:** Implementation of the recommended conditions of approval would assure that the subject property is in compliance with all rules and regulations pertaining to zoning uses, subdivision and any other applicable provisions of the County's zoning ordinance. No zoning or other type of violations would exist on the property at the time of recordation of the first phase of the Final Map. Zoning violation abatement cost, if any, has been, or will be, paid.
- EVIDENCE:**
- (a) Upon review of Monterey County Planning and Building Inspection Department records staff determined that the Little Bear Water Company is not in compliance with the conditions of approval for the Royal Estates No. 4 Subdivision (Resolution No. 76-265). These

conditions required that the Little Bear Water Company design, develop and maintain the park/playground within this subdivision as illustrated on the landscape plan approved by the Director of Planning on January 4, 1977. A code violation citation was issued by the Monterey County Planning and Building Inspection Department in October 2004.

- (b) A condition (Condition No. 13) has been incorporated to the approval of the project requiring:
- (1) Approval of a "Landscaping and Park and Recreation Facilities Plan" and a "Park and Recreation Facilities Maintenance and Operation Plan;"
 - (2) Submittal and approval of "Park and Recreation Facilities Performance Bond;"
 - (3) Installation of park and landscape improvements prior to final of building permits for expansion of the wastewater treatment facility; and
 - (4) That building permits for those lots within the subdivision requiring hook-up to Little Bear Waste Water Treatment facility not be issued until expansion of Little Bear Waste Water Treatment Facility is completed.

5. FINDING:

SUBDIVISION: None of the findings found in Section 19.03.025.F of Monterey County Code Title 19 (Subdivision Ordinance) can be made. Section 19.03.025.F requires that the subdivision be denied if any one of the findings stated is made. Planning staff has analyzed the project against the findings for denial outlined in this section and determined that the design of the subdivision and type of improvements is not likely to cause any of the findings listed in Section 19.03.025 F to be made.

EVIDENCE:

- (a) The proposed subdivision, including changes resulting from the review of the Draft EIR and conditions of approval recommended by staff, would be consistent with the General Plan, Central Salinas Valley Area Plan, and Zoning Ordinance. The project includes amendments to the property's land use designation and Zoning reclassifications needed to reflect the proposed new land uses. Additional recommendations have been made by staff regarding zoning for areas with potential visibility impacts, which would further assure compliance with current zoning regulations and general/area plan policies.
- (b) As conditioned, the design of the proposed subdivision and all required improvements would be consistent with the requirements of the General Plan, Central Salinas Valley Area Plan, and the Zoning Ordinance.
- (c) The site has been determined to be physically suitable for the type and density of development. (See Evidence for Finding No. 2 above.)
- (d) The project site is physically suitable for the proposed density of development. The project would result in low density residential development in the more environmentally sensitive areas of the site;

and medium density residential development in the central portion of the site. While extensive grading would be required for the latter, the grading and reconfiguration of the site would be completed according to applicable public works, environmental health and fire protection standards, per the recommended conditions of approval and mitigation measures.

- (e) Soils are suitable for residential construction and septic system development as evidenced in the Geotechnical and Geology Report prepared by Donald M. Tharp & Associates in association with Weber, Hayes and Associates. The conclusions and recommendations were independently reviewed and found to be adequate by Steven Rass and Associates.
- (f) The proposal will have an adequate wastewater collection system upon expansion of Little Bear Water Company. A Use Permit to allow the expansion is under consideration as part of the proposed project. The following reports/documents support this finding and are in Project File No. PLN020016 located at the Planning and Building Inspection Department.
 - 1) Original conceptual wastewater plan for the project prepared by Monterey Bay Engineers, Inc., in April and May of 1999.
 - 2) "Percolation Study for Tavernetti Subdivision," October 2001, prepared by Haro, Kasunich & Associates.
 - 3) Letter Reports of June 14, 2002, and February 26, 2003, and accompanying drawings from Monterey Bay Engineers, Inc.
 - 4) "Assessment of Proposed Wastewater Treatment and Disposal for Morisoli/Tavernetti Subdivision," July 31, 2003, prepared by Kennedy/Jenks consultants.
 - 5) Letter Reports dated January 20, 2004 and March 24, 2004, from Kennedy/Jenks Consultants clarifying and answering questions on various aspects of the proposed wastewater plans for the project.
 - 6) "City of King City Wastewater Facilities Plan (Draft)," November 2003, prepared by Corollo Engineers.
 - 7) Other related correspondence from the applicant's representatives, Central Coast Regional Water Quality Control Board, Little Bear Water Company, Monterey County Health Department, and the State Department of Health Services.
 - 8) Independent analysis by Questa Engineering in October of 1999 and a subsequent analysis in 2004.
- (g) The developer is required to install the sewer system improvements to and within portions of the subdivision and any appurtenances needed or shall enter into a Subdivision Improvement Agreement with the County to install the sewer system improvements and provide security guaranteeing the performance of the Agreement.
- (h) The source capacity and water quality for all lots proposed to be created through the subdivision meets the requirements of all applicable health and safety regulations.
 - 1) The project as described in the application and accompanying

materials was reviewed by the Environmental Health Division and the Water Resources Agency and further analyzed in the Draft and Final EIR. It was determined that sufficient water resources exist to meet the requirements of all applicable health and safety regulations. Recommended conditions of approval would assure development of infrastructure improvements necessary for the provision of potable water.

2) FEIR dated December, 2004.

- (i) The design and improvements will not conflict with easements acquired by the public at large for access through or use of property within the proposed subdivision.
- 1) E-mail Correspondence regarding existing PG&E easements with Thomas McCullough of PG&E dated October 4, 2004.
 - 2) Condition of approval No. 122 requires that septic envelopes shall not be within the recorded easements of PG & E unless explicit authorization is obtained from PG & E prior to filing of the final map.
 - 3) A condition of approval has been added requiring that an existing access easement affecting proposed Lot Nos. 158-166 be extinguished or relocated to not interfere with the easement before these lots are developed.
 - 4) The existing private easement providing vehicular access to the Canada de La Paz Subdivision can be relocated as proposed according to documents recorded with the County.
- (j) The California Department of Forestry and Fire Protection will provide fire protection services to the project site. Appropriate mitigation measures and conditions of approval have been incorporated into the proposal to ensure adequate levels of protection services.
- (k) Monterey County Sheriff will provide police protection services to the project site. Appropriate mitigation measures and conditions of approval have been incorporated into the proposal to ensure adequate levels of protection.

6. FINDING:

USE PERMIT TO ALLOW DEVELOPMENT ON SLOPES IN EXCESS OF 30%: The proposed project includes development in areas where slopes are greater than 30% which requires a Use Permit pursuant to the requirements of Section 21.64.230 of the Zoning Ordinance. Development in these areas better achieves the goals, policies, and objectives of the Monterey County General Plan and the Central Salinas Valley Area Plan.

EVIDENCE:

- (a) Most development on slopes greater than 30% is proposed in an area characterized by lower rolling hills and canyons where the majority of the lots are proposed. Most of the slopes in these areas are less than 30% but a few small portions contain slopes greater than 30%. The overall grading of this area of the subdivision is necessary to develop necessary infrastructure, including potable water distribution lines,

stormwater facilities, wastewater lines and vehicular/emergency access roads that comply with applicable standards, as well as to reduce the overall disruption of the site. The Vesting Tentative Map, prepared by Monterey Bay Engineers, and dated May 12, 2005, depicts the existing slopes and the finished grades needed to achieve the correct slopes for drainage, wastewater flows, and road gradients.

- (b) Geotechnical and geology report prepared by Donald M. Tharp & Associates in association with Weber, Hayes & Associates. The conclusions and recommendations of that report found that this type of development in areas of slopes over 30% would be appropriate. The results and recommendations of the report were independently reviewed by Steven Rass Associates who confirmed their adequacy.
- (c) Development on slopes greater than 30% is necessary to develop necessary infrastructure, including potable water distribution lines, stormwater facilities, wastewater lines and vehicular/emergency access roads that comply with applicable standards, as well as to reduce the overall disruption in other areas of the site.
- (d) Development of proposed Lot Nos. 109-115 would not result in significant grading or potentially significant visual impacts and development of these lots would be appropriate with the 24-foot height limitation recommended by the Standard Subdivision Committee. Allowing the development of these lots would allow for development of the maximum possible number of inclusionary housing units.

7. FINDING: **USE PERMIT TO ALLOW REMOVAL OF PROTECTED TREES.**
Project grading, clearing, and construction activities will result in the loss of approximately 730 oak trees, six inches in diameter or greater, which are designated as protected trees in Section 21.64.260 of the Zoning Ordinance. This proposed tree removal is the minimum required under the circumstances of the case.

- EVIDENCE:**
- (a) The application, plans, and support materials submitted by the project applicant to the Monterey County Planning and Building Inspection Department for the proposed development, found in the project file, PLN020016.
 - (b) Appropriate conditions of approval and mitigation measures have been developed to achieve a reduction of the identified impacts. These conditions include applying the "VS" (Visual Sensitivity) Zoning District to a number of the proposed lots, which would allow additional review of lot-specific development plans to achieve further reductions of tree removal in those areas.
 - (c) Discussion in Chapters 4.4 and 4.6 of the Environmental Impact Report prepared for the project.
 - (d) Appendices C.1 and C.2 to the Environmental Impact Report prepared for the project.

8. FINDING: **USE PERMIT TO ALLOW EXPANSION OF A SEWAGE TREATMENT FACILITY:** The existing Little Bear Water Company will

have to be expanded to increase its capacity for treatment of the estimated wastewater flows generated by the project. The expansion will not be detrimental or injurious to the nearby neighborhood or be detrimental or injurious to property and improvements in the neighborhood, or to the general welfare of the County.

- EVIDENCE:**
- (a) The application, plans, and support materials submitted by the project applicant to the Monterey County Planning and Building Inspection Department for the proposed development, found in Project File PLN020016.
 - (b) Analysis contained in the Draft EIR prepared for the project, including Chapters 4.11, 5, and 6.
 - (c) FEIR date December, 2004.

9. FINDING: **GRADING:** The proposed grading would be in conformance with Chapter 16.08 of the Monterey Code.

- EVIDENCE:**
- (a) The application, plans, and support materials submitted by the project applicant to the Monterey County Planning and Building Inspection Department for the proposed development, found in Project File PLN020016. Site improvement plans would be reviewed by Planning and Building Inspection, Public Works and Water Resources Agency, and CDF to assure compliance.
 - (b) Draft and Final EIR prepared for the project.

10. FINDING: **HOUSING NEEDS:** In approving the tentative map, the decision-making body has balanced the housing needs of the County against the public service needs of its residents and available fiscal and environmental resources.

- EVIDENCE:**
- (a) The project was deemed complete on September 11, 2001, which is prior to the effective date (May 23, 2003) of the County's new Inclusionary Housing Ordinance and Administrative Manual and is therefore subject to the prior ordinance, Ordinance No. 3419.
 - (b) The project is required to provide a contribution to the County's Inclusionary Housing program equal to 15% of the total new development proposed.
 - (c) The application, plans, and support materials contained in the project file (PLN020016) include 48 on-site inclusionary housing units (15 % of the total) within the 319-lot subdivision. Additionally, at the public hearing before the Board of Supervisors on February 14, 2006, the applicant agreed to provide an additional 5% (14 units) of "Workforce 2" units on site bringing the total of income-restricted units to 20%.
 - (d) The recommended conditions of approval include a condition requiring the applicant to execute a "Master Developer Inclusionary Housing Agreement" with the County prior to recordation of the first Final Map. The condition requires that the agreement be recorded with the first phase Final Map and run with the land.
 - (e) The Agreement will set forth provisions, including but not limited to the number of units required and payment of in-lieu fees for fractions of units, the location of the units, the type of units, the affordability levels, the initial pricing of the units, the buyer selection and marketing process,

and subsequent agreements that will be required.

- (f) The initial pricing of the units shall take into account, ensuring that the long-term affordability is maintained, the amount of Homeowner Association dues that will be required to be paid by the future property owners of the Inclusionary Units.
- (g) The Agreement will specify the phasing of the construction of the Inclusionary Units related to the construction of the market rate units to ensure the provision of the Inclusionary units is adequately secured, in a manner acceptable to the County.

11. FINDING:

PROTECTION OF AGRICULTURAL ACTIVITIES: Title 19, Section 19.12.220 requires agricultural buffer easements be recorded prior to the recordation of a Final Map on those parcels that may be affected by dust, noise, and odors emanating from lawful agricultural activities on adjoining or proximate real property. The requirement for an easement may be waived when the Agricultural Commissioner finds that such requirement is not necessary for the preservation or protection of agricultural activities.

EVIDENCE:

Staff has reviewed the proposed subdivision and has determined that a 200-foot agricultural buffer easement as measured from the easternmost property line of the subdivision will be required for Lots 29, 34, and 35. Such easement would also be required for proposed Lot Nos. 1, 2 and 3. A condition of approval has been recommended requiring a 200-foot buffer easement on Lot Nos. 29, 34 and 35, and a 100-foot agricultural buffer easement on Lot Nos. 1, 2 and 3. Additionally, Lots 2, 3, 29, 34, and 35 are required to record a Statement disclosing to future property owners of nearby agricultural operations.

12. FINDING:

REVIEW BY THE STANDARD SUBDIVISION COMMITTEE:

On January 27, 2005, March 31, 2005, and April 28, 2005, the Morisoli-Amaral Combined Development Permit Application was reviewed by the Monterey County Standard Subdivision Committee at noticed public hearings. The Committee considered the accompanying Environmental Impact Report. At the conclusion of the hearing, by a vote of 6 to 0, the Subdivision Committee recommended to the Planning Commission to affirm the design, improvements, and technical feasibility of the Combined Development Permit for the Morisoli-Amaral Project (PLN020016), subject to the recommended Findings and Evidence and the recommended Conditions of Approval.

EVIDENCE:

Monterey County Planning and Building Inspection File PLN020016; records and minutes of Subdivision Committee meetings of January 27, 2005, March 31, 2005, and April 28, 2005; Subdivision Committee Resolution No. 05011; administrative record.

13. FINDING:

REVIEW BY THE PLANNING COMMISSION: On July 27, 2005, August 31, 2005, and September 28, 2005, the Planning Commission conducted noticed public hearings on the Morisoli-Amaral Combined Development Permit. The Commission considered the recommendations from the Standard Subdivision Committee, as included in the staff report, and made recommendations to the Board of Supervisors relative to the

certification of the Final EIR and project design issues.

EVIDENCE:

- (a) Monterey County Planning and Building Inspection File PLN020016; Public Notices and agendas for July 27, 2005, August 31, 2005, and September 28, 2005 Planning Commission public hearings.
- (b) The Monterey County Planning Commission held duly noticed public hearings to make recommendations to the Board of Supervisors on the following actions and projects: the proposed amendments to the Monterey County General Plan and County zoning ordinance (Title 21); a proposed Combined Development Permit consisting of a Vesting Tentative Map and use permits for development on 30% slope and tree removal.

14. FINDING:

FIELD TRIP BY THE PLANNING COMMISSION; On August 24, 2005, in a Special Meeting of the Planning Commission, the Planning Commission conducted a field trip to the project site.

EVIDENCE:

Monterey County Planning and Building Inspection File PLN020016; administrative record.

EVIDENCE:

- (b) The project site consists of 402 acres and is located in central Monterey County in a planning region known as the Central Salinas Valley Area. The project site is located at Pine Canyon Road & Jolon Road, approximately two miles west of King City (APN 221-122-021 and 025; 221-155-013; 221-161-017; 420-063-044, 045, 046, 054, & 055).

15. FINDING:

REVIEW BY THE PLANNING COMMISSION: Prior to making a recommendation regarding the Morisoli-Amaral Combined Development Permit Application, the Planning Commission considered the draft and final EIR prepared for Morisoli-Amaral Combined Development Permit and recommended that the Board of Supervisors certify the final EIR, finding, among other findings, that the EIR had been completed in compliance with CEQA, that the EIR was presented to the Commission and that the Planning Commission reviewed and considered the information in the draft and final EIR, and that the EIR reflects the County's independent judgment and analysis.

EVIDENCE:

- (a) In accordance with the California Environmental Quality Act (CEQA), a Draft Environmental Impact Report (Draft EIR) was prepared to assess the potential adverse environmental impacts from the project and was circulated starting on October 17, 2001. The public review period ended December 3, 2001. The issues that were analyzed in the Draft EIR include land use, geology and soils hazards, surface hydrology/water quality, biological resources, cultural resources, aesthetics/viewshed, transportation and circulation, noise, air quality, water supply, wastewater and groundwater quality, public services, population/jobs/housing, and energy. Mitigation measures are proposed to mitigate project impacts. A Final EIR was prepared, consisting of the September 2001 Draft EIR, December 2004 Final EIR containing copies of all written and oral comments, a list of commentators, and all responses to oral and written comments, and proposed revisions to the Draft EIR in accordance with CEQA. The Final EIR was made available to the public. By separate resolution, the Planning

- Commission has reviewed and considered the FEIR, and recommended certification of the FEIR.
- (b) Planning Commission Resolution Number 05052 (three parts); Minutes of July 27, 2005, August 31, 2005, and September 28, 2005 Planning Commission meetings.
- 16. FINDING:** **REVIEW BY THE PLANNING COMMISSION:** Prior to making a recommendation regarding the Morisoli-Amaral Combined Development Permit Application, the Planning Commission made recommendations to the Board of Supervisors concerning proposed amendments to the Monterey County General Plan, proposed amendments to Title 21 (Zoning Ordinance), and the proposed Combined Development Permit.
- EVIDENCE:**
- (a) The Planning Commission recommended approval of a resolution amending the General Plan and Area Plan and an ordinance amending Title 21 (County Zoning Ordinance).
 - (b) Planning Commission Resolution Number 05052 (three parts), Minutes of July 27, 2005, August 31, 2005, and September 28, 2005 Planning Commission meetings.
- 17. FINDING:** **REVIEW BY THE BOARD OF SUPERVISORS:** On February 14, 2006, 2006, the Monterey County Board of Supervisors held a duly noticed public hearing on the following actions and the project: the proposed Morisoli-Amaral Combined Development Permit consisting of a Vesting Tentative Map and use permits for development on 30% slope, expansion of the wastewater treatment facility, and tree removal; and related proposed amendments to the Monterey County General Plan, Central Salinas Valley Area Plan, and County zoning ordinance (Title 21). The Board of Supervisors considered the recommendations from the Monterey County Subdivision Committee and Monterey County Planning Commission, as included in the staff report.
- EVIDENCE:** Monterey County Planning and Building Inspection File PLN020016; Public Notices and agendas for January 31, 2006 and February 14, 2006 Board of Supervisors public hearings.
- 18. FINDING:** **REVIEW BY THE BOARD OF SUPERVISORS:** Prior to approving the Morisoli-Amaral Combined Development Permit Application, the Board of Supervisors certified the final EIR prepared for Morisoli-Amaral Combined Development Permit, finding, among other findings, that the EIR had been completed in compliance with CEQA, that the EIR was presented to the Board of Supervisors, which reviewed and considered the information in the draft and final EIR, and that the EIR reflects the County's independent judgment and analysis.
- EVIDENCE:** Board of Supervisors Resolution Number 06-042 Minutes of February 14, 2006 Board of Supervisors meeting.
- 19. FINDING:** **REVIEW BY THE BOARD OF SUPERVISORS:** Prior to approving the Morisoli-Amaral Combined Development Permit Application, the Board of Supervisors approved proposed amendments to the Monterey County

General Plan and Central Salinas Valley Area Plan and proposed amendments to Title 21 (Zoning Ordinance).

EVIDENCE: Board of Supervisors Resolution Number 06-043, Ordinance Number 5017, and Minutes of the February, 2006 Board of Supervisors meeting.

20. FINDING:

HEALTH AND SAFETY: The establishment, maintenance or operation of the project applied for will not under the circumstances of this particular case, be detrimental to the health, safety, peace, morals, comfort, and general welfare of persons residing or working in the neighborhood of such proposed use, or be detrimental or injurious to property, improvements in the neighborhood, or to the general welfare of the County.

All preceding findings and supporting evidence.

21. FINDING:

The proposed improvements to the Little Bear Wastewater Treatment Facility to provide sewer treatment for a portion of the subdivision have been adequately reviewed and analyzed in the Final Environmental Impact Report and through review of the application, and such improvements have been reviewed per applicable requirements of the California Environmental Quality Act Guidelines.

EVIDENCE: Testimony of Alana Knaster, Acting Director of Planning and Building Inspection at the public hearing before the Planning Commission.

EVIDENCE: Testimony of Alan Stroh, Director of Environmental Health at the February 14, 2006 Board of Supervisors hearing.

EVIDENCE: Provision of sewage treatment for a portion of the proposed subdivision would require upgrades to the Little Bear Wastewater Treatment Facility to provide tertiary level treatment of wastewater not currently available. Such upgrade would result in significant benefits to the environment and for potential use of treated sewage for irrigation and other uses.

EVIDENCE: Discussions between staff from the Division of Environmental Health and staff from the Regional Water Quality Control Board during the review of the application and preparation of the environmental impact report, and discussions between County staff and City of King staff.

EVIDENCE: Final EIR Sections 4.11 (Wastewater and Groundwater Quality) and 6.0 (Project Alternatives).

II. DECISION

NOW, THEREFORE, BE IT RESOLVED that the Monterey County Board of Supervisors approves the Combined Development Permit and adopts the above findings and conditions of approval set forth in the attached Condition Compliance and/or Mitigation Monitoring Reporting Plan.

PASSED AND ADOPTED on this 14th day of February, 2006, upon motion of Supervisor Armenta seconded by Supervisor Lindley, by the following vote, to-wit:

AYES: Supervisors Armenta, Calcagno, Lindley and Smith

NOES: Supervisor Potter

ABSENT: None

I, Lew Bauman, Clerk of the Board of Supervisors of the County of Monterey, State of California, hereby certify that the foregoing is a true copy of an original order of said Board of Supervisors duly made and entered in the minutes of Minute Book 73, on February 14 2006.

Dated: February 23, 2006

Lew Bauman, Clerk of the Board of Supervisors,
County of Monterey, State of California.

By Cynthia Juarez
Cynthia Juarez, Deputy

MITIGATION MONITORING/CONDITION COMPLIANCE & REPORTING PLAN

Planning and Building Inspection Department

Condition Compliance & Mitigation Monitoring and/or Reporting Plan

**Monitoring or Reporting refers to projects with an EIR or adopted Mitigated Negative Declaration per Section 21081.6 of the Public Resources Code.*

PLANNING & BUILDING INSPECTION CONDITIONS OF APPROVAL						
1.		PBD029 - SPECIFIC USES ONLY	This Combined Development Permit (Morisoli-Amaral, PLN020016) allows: 1) General Plan Amendment to the Central Salinas Valley Area Plan to amend properties from Rural Grazing (10 – 160-Acre Minimum Lot Size) and Permanent Grazing (40-Acre Minimum Lot Size) to Low Density Residential (1 – 5-Acres Per Unit Minimum Lot Size) and Medium Density Residential (1-5 Units Per Acre Minimum Lot Size); 2) Zoning Reclassification to change the zoning designations of the subject site from PG/40 (Permanent Grazing, 40-Acre Minimum Lot Size), RG/20 (Rural Grazing 20-Acre Minimum Lot Size), LDR/1 (Low Density Residential, 1 Acre Minimum) and RG/40 (Rural Grazing, 40-Acre Minimum Lot Size) to LDR/B-6, LDR/B-6-VS, MDR/1, MDR/1 (24) and O_zoning designations; 3) Vesting Tentative Map for the subdivision of 402 acres	Adhere to conditions and uses specified in the permit.	Owner/ Applicant	Ongoing unless otherwise stated

Permit Cond. Number	Conditions of Approval and/or Mitigation Measures and Responsible Land Use Department	Compliance or Monitoring Actions to be performed. Where applicable, a certified professional is required for action to be accepted.	Responsible Party for Compliance	Timing	Classification of Compliance (name/date)
	into 319 residential lots including 48 lots for development of Inclusionary Housing Units, and 9 Open Space areas containing approximately 225 Acres and including 5.5 acres of improved parkland; 4) Use Permit to allow development on slopes in excess of 30%; 5) Use Permit to allow removal of approximately 730 Oak trees; 6) Use Permit to allow expansion of a sewage treatment facility; and 7) Grading (Approximately 700,000 cubic yards of cut and 630,000 cubic yards of fill). The property is located at Pine Canyon Road & Jolon Road, approximately two miles west of the City of King (Assessor's Parcel Numbers 221-122-021, 025; 221-155-013, 221-161-017; and 420-063-044, 045, 046, 054, 055). This permit was approved in accordance with County ordinances and land use regulations subject to the following terms and conditions. Neither the uses nor the construction allowed by this permit shall commence unless and until all of the conditions of this permit are met to the satisfaction of the Director of Planning and Building Inspection. Any use or construction not in substantial conformance with the terms and conditions of this permit is a violation of County regulations and may result in modification or revocation of this permit and subsequent legal action. No use or construction other than that specified by this permit is allowed unless additional permits are approved by the appropriate authorities.	(Planning and Building Inspection)

Where applicable, a certified professional is required for action to be accepted.	Responsible Party for Compliance	Timing	Classification of Compliance (name/date)
35.	FIRE019 - DEFENSIBLE SPACE REQUIREMENTS - (STANDARD) Remove combustible vegetation from within a minimum of 30 feet of structures. Limb trees 6 feet up from ground. Remove limbs within 10 feet of chimneys. Additional and/or alternate fire protection or firebreaks approved by the fire authority may be required to provide reasonable fire safety. Environmentally sensitive areas may require alternative fire protection, to be determined by Reviewing Authority and the Director of Planning and Building Inspection. (South Monterey County Fire District/California Department of Forestry & Fire Protection (CDF))	Applicant shall incorporate specification into design and enumerate as "Fire Dept. Notes" on plans.	Applicant or owner	Prior to issuance of grading and/or building permit.	
36.	FIRE021 - FIRE PROTECTION EQUIPMENT & SYSTEMS - FIRE SPRINKLER SYSTEM (STANDARD) The building(s) and attached garage(s) shall be fully protected with automatic fire sprinkler system(s). Installation shall be in accordance with the applicable NFPA standard. A minimum of four (4) sets of plans for fire sprinkler systems must be submitted by a California licensed C-16 contractor and approved prior to installation. This requirement is not intended to delay issuance of a building permit. A rough sprinkler inspection must be scheduled by the installing contractor and completed prior to requesting a framing inspection. (South Monterey County Fire District/California Department of Forestry & Fire Protection (CDF))	Applicant shall enumerate as "Fire Dept. Notes" on plans.	Applicant or owner	Prior to issuance of building permit.	

Permit Cond. Number	Conditions of Approval and/or Mitigation Measures and Responsible Land Use Department	Compliance or Monitoring Actions to be performed. Where applicable, a certified professional is required for action to be accepted.	Responsible Party for Compliance	Timing	Classification of Compliance (name/date)
37.	FIRE027 - ROOF CONSTRUCTION - (VERY HIGH HAZARD SEVERITY ZONE) All new structures, and all existing structures receiving new roofing over 50 percent or more of the existing roof surface within a one-year period, shall require a minimum of ICBO Class A roof construction. (South Monterey County Fire District/California Department of Forestry & Fire Protection (CDFF))	Applicant shall enumerate as "Fire Dept. Notes" on plans.	Applicant or owner	Prior to issuance of building permit.	
HOUSING AND REDEVELOPMENT CONDITIONS OF APPROVAL					
38.	REDEV - INCLUSIONARY HOUSING - (NON STANDARD) The Applicant shall execute a Master Developer Inclusionary Housing Agreement (Agreement) with the County and in a form acceptable to the County. The Agreement, consistent with the Inclusionary Housing Ordinance that was in effect at the time the application was deemed complete (#3419), shall provide that a minimum of 15% (47.85 units) of the total number of residential units approved for the project will be Inclusionary Housing units (fraction may be paid as an in-lieu fee) and will be constructed as part of the overall project. The Agreement will set forth provisions, including but not limited to the number of units required and payment of in-lieu fees for fractions of units, the location of the units, the type of units, the affordability levels, the initial pricing of the units, the buyer selection and marketing process, and subsequent	Agreement to be executed and recorded. The Applicant shall execute a Master Developer Inclusionary Housing Agreement (Agreement) with the County and in a form acceptable to the County. The Agreement, consistent with the Inclusionary Housing Ordinance that was in effect at the time the application was deemed complete (#3419), shall provide that a minimum of 15% (47.85 units) of the total number of residential units approved for the project will be Inclusionary Housing units (fraction may be paid as an in-lieu fee) and will be constructed as part of the overall project. 	approved by the Director of Environmental Health." (Environmental Health)				
131.	EH21 - SEPTIC ENVELOPES	<p>Submit an updated map indicating proposed septic envelopes for lots 2, 4, 5, 7, and 11 through 28, to the Division of Environmental Health for review and approval. Once approved the septic envelopes shall appear as part of the final map. (Environmental Health)</p>	Submit an updated map showing the proposed septic envelopes for review, Applicant approval.	Owner/ Applicant	Prior to filing the final map.
132.	EH25 - INSTALL/BOND SEWER SYSTEM IMPROVEMENTS	<p>The developer shall install the sewer system improvements to and within the subdivision and any appurtenances needed or shall enter into a Subdivision Improvement Agreement to install the sewer system improvements and provide security guaranteeing the performance of the Agreement. (Environmental Health)</p>	Submit evidence to the Division of Environmental Health that the sewer system improvement installation has been accepted by the regulating agency or that the developer has entered into a Subdivision Improvement Agreement and has provided security acceptable to the County.	CA Licensed Engineer /Applicant	Prior to filing the final map.
133.	EH26 - WDRS FOR WWTP	<p>Obtain a Waste Discharge Permit from the Regional Water Quality Control Board for a wastewater treatment plant and disposal system. The permit shall be obtained prior to the issuance of any Health Department permits for the sewage treatment facility. (Environmental Health)</p>	Submit verification from the Regional Water Quality Control Board that waste discharge requirements will be issued.	Owner/ Applicant	Prior to issuance of building permits.
134.	EH27 - SEWER SYSTEM IMPROVEMENTS	<p>Engineered plans for the sewage disposal system including all necessary redundancies shall be submitted to and approved by the Little</p>	Submit written verification to the Division of Environmental Health that plans have been reviewed and approved.	Owner/ Applicant	Prior to filing the final map or issuance of a building permit.

	Bear Water Company. (Environmental Health)				
135.	EH46 - CONTAINMENT OF WASTEWATER Wastewater shall not be permitted to flow, drain or seep into any natural waterway, pond or lake and shall be remain within the designated disposal area(s) at all times. (Environmental Health)	Comply with Title 22 regulations for the application of recycled water and comply with Waste Discharge Requirements issued by the California Regional Water Quality Control Board.	Operator of wastewater treatment facility	Continuous Condition	
136.	EH47 - POND BERM MAINTENANCE A continuous program of rodent control, and inspection and maintenance of pond berms, shall be implemented. (Environmental Health)	Comply with Title 22 regulations for the application of recycled water and comply with Waste Discharge Requirements issued by the California Regional Water Quality Control Board.	Operator of wastewater treatment facility	Continuous Condition	
137.	EH48 - POSTING SIGNS All recycled water storage ponds and disposal areas shall be posted at frequent intervals around the periphery to indicate that they contain treated wastewater and should not be entered. (Environmental Health)	Comply with Title 22 regulations for the application of recycled water and comply with Waste Discharge Requirements issued by the California Regional Water Quality Control Board.	Operator of wastewater treatment facility	Continuous Condition	
138.	EH49 - BACKFLOW PREVENTION The water supply for makeup landscaping or irrigation water required above and beyond the available quantity of treated wastewater shall incorporate back-flow prevention as required by Title 17 of the California Code of Regulations or as otherwise required by the Director of Environmental Health. (Environmental Health)	Comply with the California Code of Regulations, Title 17, and install backflow prevention devices to prevent cross-connections between potable water and recycled water systems.	Operator of wastewater treatment facility	Continuous Condition	
139.	EH50 - MOSQUITO CONTROL Appropriate mosquito control measures for the reservoir shall be implemented in accordance with standard practices of mosquito abatement and control for open reservoirs.	Submit mosquito control plan to the Division of Environmental Health for review and approval.	Operator of wastewater treatment facility	Continuous Condition	

Permit Cond. Number	Conditions of Approval and/or Mitigation Measures and Responsible Land Use Department (Environmental Health)	Compliance or Monitoring Actions to be performed. Where applicable, a certified professional is required for action to be accepted.	Responsible Party for Compliance	Timing	Certification of Compliance (name/date)
140.	EH51 - SLUDGE REMOVAL Sludge shall be removed off-site to a suitable location approved by the Director of Environmental Health. (Environmental Health)	Submit plan for sludge removal to the Division of Environmental Health for review and approval.	Operator of wastewater treatment facility	Continuous Condition	
141.	EH53 - NITRATE ORDINANCE The wastewater treatment facility shall meet the nitrogen discharge limitations found in Monterey County Code Chapter 15.23 (Nitrate Discharge Ordinance). (Environmental Health)	Submit application and necessary fees to the Division of Environmental Health for review and approval. Once approved obtain and maintain a valid permit to operate a discharge facility as required per Chapter 15.23 of the Monterey County Code.	Operator of wastewater treatment facility	Prior to the issuance of building permits/ Continuous Condition	
142.	EHSP02 - STATE WATER SYSTEM PERMIT (NON-STANDARD) Obtain a new or amended water system permit from the California Department of Health Services (CDHS). (Environmental Health)	Submit necessary application, reports and testing results to CDHS for review and approval. Submit verification from CDHS that the new or amended permit has been issued	CA Licensed Engineer /Owner/ Applicant	Prior to filing final map	

PARKS DEPARTMENT CONDITIONS OF APPROVAL

143.	PKSSP01 - RECREATION REQUIREMENTS/LAND DEDICATION (NON-STANDARD)	RECREATION	The Applicant shall submit Park and Recreation Facilities Plan, Park and Recreation Facilities Performance Bond, and Park and Recreation Facilities Maintenance and Operation Plan.	Applicant	Prior to recordation of the first phase of the Final Map.

MITIGATION MEASURES

145	1	GS 1.1 - Geology and Soils Hazard GS-1: Seismic Shaking Project design and engineering shall assume peak horizontal accelerations of 0.57 to 0.64g, or repeatable high ground accelerations of 0.38 to 0.43g for project design, subject to the review and approval of the Monterey County Public Works Department for road improvements and Monterey County Planning and Building Inspection for private improvements and structures. Structural design shall conform to UBC Zone 4 guidelines, at a minimum. All specified setbacks identified in the geological suitability map must be field-verified by a qualified geologist prior to issuance of a grading permit. (Planning and Building Inspection, Public Works)	The applicant shall submit applications for building permits demonstrating that the project's structural design meets the seismic design parameters in the geology reports, including field verification by a qualified geologist, to Planning and Building Inspection Department and Public Works for review and approval.	Applicant and Qualified Geologist	Prior to issuance of a building permit

146	GS 2.1 - Geology and Soils Hazard Impact GS-2: Landsliding Hazard No building intended for human habitation shall be sited on any recognized landslide unless the landslide is demonstrated to be stable. In addition, no building intended for human habitation shall be sited within 100 feet of the toe of landslides Qls-a or within 50 feet of the toes of landslides Qls-b or Qls-c unless site specific slope stability analyses demonstrate that smaller setbacks are warranted by site conditions. This mitigation shall be subject to the review and approval by the Monterey County Public Works Department for road improvements and Monterey County Planning and Building Inspection for private improvements and structures. (Planning and Building Inspection, Public Works)	The applicant shall submit applications for building permits demonstrating that no building is sited on any unstable landslide area or within established setbacks for identified landslide areas to Planning and Building Inspection Department and Public Works for review and approval.	Applicant and Qualified Geologist	Prior to issuance of a building permit	
147	GS2.2 – Geology and Soils Hazard Impact GS-2: Landsliding Hazard No buildings intended for human habitation should be sited on or within 50 feet of the toe of a slope over 50% gradient, or within 75 feet of the toe of a slope of gradient 60% or greater unless site specific geotechnical investigations determine that such mitigation is unnecessary. This mitigation shall be subject to the review and approval by the Monterey County Public Works Department for road improvements and Monterey County Planning and Building Inspection for private improvements and structures. (Planning and Building Inspection, Public Works)	The applicant shall submit applications for building permits demonstrating that all buildings are sited appropriately away from toes of slopes with over a 50% gradient to Planning and Building Inspection Department and Public Works for review and approval.	Applicant and Qualified Geologist	Prior to issuance of a building permit

200	57	WS-1.2 Water Supply Impact WS-1: Water Balance Design of the proposed storm water detention ponds shall include provisions to increase infiltration rates for runoff such that detention ponds function partially as percolation ponds, subject to the review of the Monterey County Health Department and Water Resources Agency. (Water Resources Agency and Environmental Health)	The Applicant shall submit plans for the storm water detention ponds to the Water Resources Agency for review and approval.	Applicant	Prior to approval of the grading plans for the storm water detention basins
201	58	WS-1.3 Water Supply Impact WS-1: Water Balance The proposed effluent disposal system shall be operated to maximize infiltration of treated effluent, until such time as commitments are secured to divert the treated water for appropriate reuse for agricultural irrigation, landscape irrigation, or other approved water recycling uses. (Environmental Health)	The Applicant shall submit plans for the effluent disposal system to the California Regional Water Quality Control Board and the Division of Environmental Health for review and approval.	Applicant	Prior to approval of the final map
202	59	WS-1.4 Water Supply Impact WW-1: Water Balance Design of the proposed residential portion of the project shall maximize the use of drought-tolerant, native, and fire resistant landscaping and each residence shall use low-flow fixtures, per the requirements of County Code 3539, as amended. (Planning and Building Inspection)	The Applicant shall submit evidence that the project maximizes the use of drought tolerant native and fire resistant landscaping and that each residence shall use low-flow fixtures to the satisfaction of the Director of the Planning and Building Inspection Department.	Applicant	Prior to approval of the final map for a specific phase of the project

203	60 WW-1.1 Wastewater and Groundwater Quality Impact WW-1: Wastewater Treatment Operations	<p>A design-level geotechnical investigation shall be performed to determine the subsurface conditions at the proposed sheet pile and tank locations. The investigation shall include a minimum of two to three boreholes drilled to a minimum of twenty-five feet below existing ground surface. Soils will be logged in accordance with the Unified Soil Classification System and samples will be collected at least every five feet and at changes in composition for logging and laboratory testing. Results of the field and laboratory investigation shall be used to provide geotechnical design recommendations for sheet pile construction, excavation stability during tank construction, shoring, excavation safety, bearing capacity for tank foundations, lateral pressures for tank sidewalls and sheet piles, required depth of embedment for sheet piles, and any other measures required to preserve the structural integrity of the adjacent wastewater ponds and facilities. Methods to control groundwater, if present, shall also be provided. Recommendations derived from this investigation shall be implemented during planning and construction of the wastewater system improvements. (Planning and Building Inspection)</p>	Applicant & Engineer	Prior to issuance of a grading and building permit for the changes to the wastewater treatment plant	

Permit Cond. Number	Conditions of Approval and/or Mitigation Measures and Responsible Land Use Department	Compliance or Monitoring Actions to be performed. 204	WW-2.1 Wastewater and Groundwater Quality Impact WW-2: Treatment Plant Maintenance and Emergency Response Prior to approval of the planned upgrade and expansion of the Little Bear Wastewater Treatment Plant, a legal (recorded) easement shall be obtained in favor of the Little Bear Water Company which provides for the construction and maintenance of an all-weather access road from Royal Drive to the treatment plant. (Public Works)	The Applicant shall obtain legal easement, in favor of the Little Bear Water Company, which provides for the construction and maintenance of an all-weather access road from Royal Drive to the treatment plant to the satisfaction of the Director of Public Works.	Applicant	Prior to approval of the Final Map	
205	WW-3.1 Wastewater and Groundwater Quality Impact WW-3: Rapid Infiltration Basins' Operation As a condition of approval, the applicant shall implement a soil-groundwater and disposal field-performance monitoring program for the RIBs. The purpose of the monitoring program will be to provide an on-going accounting of the actual amount of treated water applied to the RIBs, along with observations of the response of the soils and groundwater over time. The results of the monitoring will provide the basis for evaluating the demonstrated infiltration and deep percolation of the disposal field area, for use in determining the feasibility of increasing the rated discharge capacity. The details of the proposed monitoring program and evaluation of results shall be subject to review and approval by the RWQCB and the Monterey County Health Department. Until such time as sufficient monitoring data have been collected and the capacity evaluation reviewed and accepted, the discharge to the 1.6-acre RIBs disposal field shall be limited to a rate of 2.0	The Applicant shall develop, implement and maintain a soil groundwater and disposal field performance monitoring program for the RIBs to the satisfaction of the Director of Environmental Health and the California Regional Water Quality Control Board.	Applicant	Prior to issuance of a grading permit for the RIBs
