Hi Son-After talking with the landscape architect and looking at the space available we are proposing the installation of 23 new coast live oaks throughout the homeland. Five oaks (3 72" box and 2 48" box) will be planted at the SW corner where one existing oak is growing on its own. The five trees will be spaced to give the eventual appearance of a natural grove. The remaining trees are proposed near the corners of the house, along the driveway and to the rear of the house where there is a blank slope. All trees will help screening and break up the massing of the building. Box sizes for the trees are as follows:

3-24 inch box

10 48 inch box

10 72 inch box

Please let me know if you have questions.

Maureen
