Landscaping Notes

1. Soil to be amended with compost at time of planting. Compost at a rate of a minimum of four (4) cubic yards per 1,000 sq.ft. of permeable area, and incorporated to a depth of six (6) inches into the soil. Soils with greater than 6% organic matter in the top 6 inches of soil are exempt from adding compost and tiling.

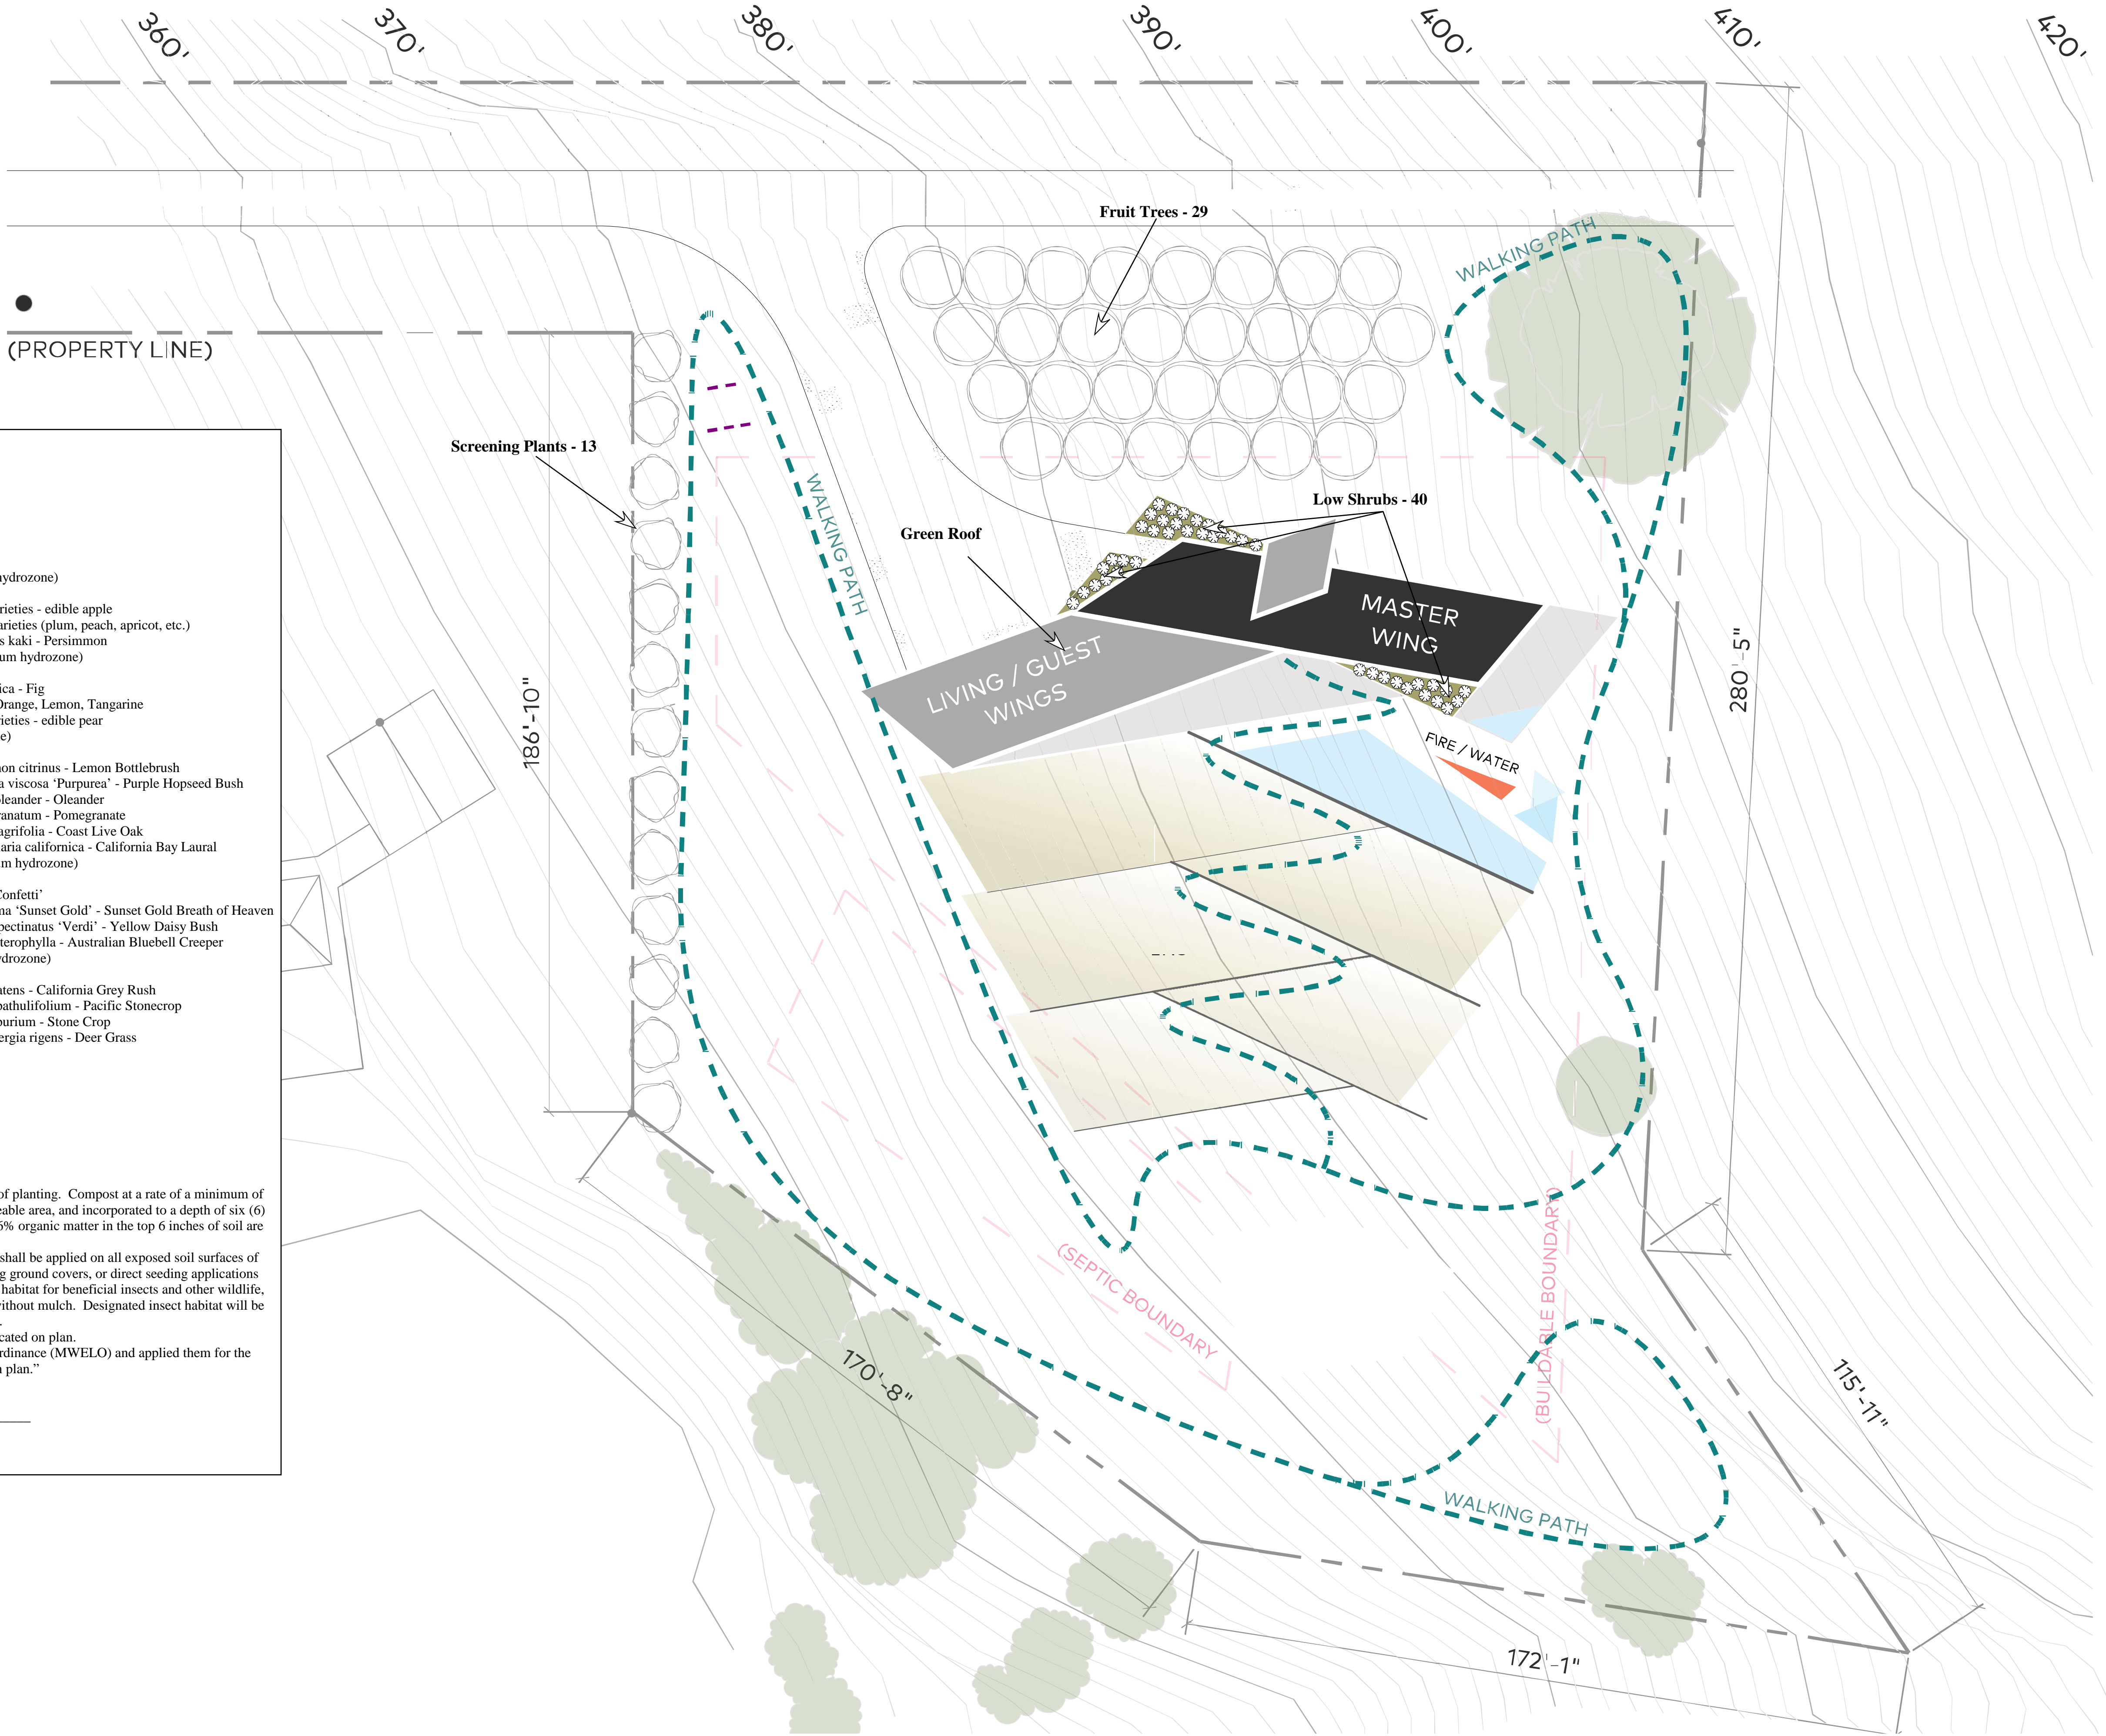

2. A minimum three (3) inch layer of mulch shall be applied on all exposed soil surfaces of planting areas except turf, creeping or rooting ground covers, or direct seeding applications where mulch is contraindicated. To provide habitat for beneficial insects and other wildlife, up to 5% of the landscape area may be left without mulch. Designated insect habitat will be indicated on the landscape plan if applicable.

3. Hydrozone areas of chosen plants are indicated on plan.

4. "I have complied with the criteria of the ordinance (MWEL0) and applied them for the efficient use of water in the landscape design plan."
