“The County of Monterey shall develop and adopt a Climate Action Plan with a target that is consistent with state-wide targets and science-based targets. The Community Climate Action Plan shall be a fully enforceable document that establishes emissions reductions targets and identifies and quantifies strategies and measures the County will undertake to reach its targets. At a minimum, the Plan shall:

- a. Conduct a current inventory of GHG emissions in the County of Monterey including but not limited to residential, commercial, industrial, and agricultural emissions; and*
- b. Forecast GHG emissions for the target year for County operations;*
- c. Forecast GHG emissions for areas within the jurisdictional control of the County for “business as usual” conditions;*
- d. Identify methods to reduce and sequester GHG emissions;*
- e. Quantify the reductions in GHG emissions from the identified methods;*
- f. Establish requirements for monitoring and reporting of GHG emissions;*
- g. Establish a schedule of actions for implementation;*
- h. Identify funding sources for implementation; and*
- j. Quantify carbon sequestration in agricultural soils and crops.*

During preparation of the Community Climate Action Plan, the County shall also evaluate potential options for changes in County policies regarding land use and circulation, as necessary, to further achieve future reduction goals and measures to promote carbon sequestration ~~urban forestry~~ and public awareness concerning climate change.”
