In the matter of the application of:

CONOVER (PLN200005)

RESOLUTION NO.

Resolution by the Monterey County Zoning
Administrator:

- 1) Finding that the project qualifies as a Class 3 Categorical Exemption pursuant to Section 15303(a) of the CEQA Guidelines, and there are no exceptions pursuant to Section 15300.2; and
- 2) Approving a Design Approval to allow the demolition of existing 2,583 square foot single family dwelling and construction of a 3,420 square foot single family dwelling inclusive of an attached two-car garage and 650 square foot deck.

[1017 Ocean Road, Pebble Beach, Greater Monterey Peninsula Area Plan (APN: 007-293-009-000)]

The Conover application (PLN200005) came on for a public hearing before the Monterey County Zoning Administrator on August 13, 2020. Having considered all the written and documentary evidence, the administrative record, the staff report, oral testimony, and other evidence presented, the Zoning Administrator finds and decides as follows:

FINDINGS

1. **FINDING:** **CONSISTENCY / HEALTH AND SAFETY / NO VIOLATIONS / SITE SUITABILITY** - The proposed project and/or use, as conditioned, is consistent with the policies of the Monterey County 2010 General Plan, Greater Monterey Peninsula Area Plan, Monterey County Zoning Ordinance (Title 21), and other County health, safety, and welfare ordinances related to land use development. The site is physically suitable for the development proposed, and no violations exist on the property.
EVIDENCE:
 - a) The proposed project involves a demolition of a 2,583 square foot single family dwelling and a construction of a 3,420 square foot single-family dwelling with an attached garage.
 - b) The property is located at 1017 Ocean Road, Pebble Beach (Assessor's Parcel Number 007-293-009-000), Greater Monterey Peninsula Area Plan. The parcel is zoned Medium Density Residential, with a Building Site, Design Control, and Parking & Use of Major Recreational Equipment Storage in Seaward zoning overlays (MDR/B-6-D-RES). Development of single-family dwellings are allowed use pursuant to Monterey County Code Section 21.12.030.A. The Design Control zoning overlay requires the

granting of a Design Approval for the proposed development (see Finding No. 2 below).

- c) The project has been reviewed for consistency with the text, policies, and regulations in:
 - the 2010 Monterey County General Plan;
 - Greater Monterey Peninsula; and
 - Monterey County Zoning Ordinance (Title 21)
- d) No conflicts were found to exist. No communications were received during the course of review of the project indicating any inconsistencies with the text, policies, and regulations in the applicable documents.
- e) Review of Development Standards. The applicable development standards include special regulations for the MDR zoning district in the Del Monte Forest area as identified in MCC Section 21.12.070. These standards require special setbacks for the main dwelling unit of: 15 feet (front), 10 feet (rear), and 10 feet (sides). The proposed dwelling has a 15 feet (front), 15 feet (rear), and 10 feet (sides). Maximum allowed structure height is 27 feet. The proposed max height for the single-family dwelling is 23'4". The allowed maximum site coverage in the MDR district is 35 percent on lots less than 20,000 square feet. The property is 9,773 square feet, which would allow site coverage of 3,420 square feet. The proposed single-family dwelling unit and garage would result in site coverage of 3,420 square feet or 35 percent. Therefore, as proposed, the project meets all required development standards.
- f) The project has been reviewed for site suitability by RMA-Planning. The project planner reviewed the application materials and plans, as well as the County's GIS database, to verify that the proposed project on the subject site conforms to the applicable plans, and that the site is suitable for the proposed development. The project will not have an adverse effect on the health, safety, and welfare of persons either residing or working in the neighborhood.
- g) The following technical report has been prepared:
 - *Historic Assessment (LIB200125) prepared by PAST Consultants LLC Pacific Grove, California, Jul 16, 2020.*
 - *Archaeological Consulting (LIB180004) prepared by Gary Breschini, Salinas, California, December 18, 2017.*County staff has independently reviewed this report and concurs with its conclusions.
- h) Necessary public facilities are available. The sewer for the site will be served by Pebble Beach Community Services District and water will be served by Cal-Am.
- i) The project is located within a high archaeological zone, a Phase I archeological report prepared by Gary Breschini dated December 18, 2017 concluded that there is no surface evidence of potentially significant archaeological resources on this parcel. Recommendations were made that any future construction projects on this parcel should not be delayed for archaeological reasons. A condition of approval (Condition No. 3) was applied to this project to include language directing the contractor to stop work within 50 meters (165 feet) of uncovered resource, immediately contact Monterey County RMA-

Planning, OCEN Tribal Council and qualified archaeologist because of the possibility of unidentified (e.g., buried) cultural resources being found during any construction involving ground disturbance.

- j) Design. See Finding No. 2.
- k) Monterey County RMA-Planning and RMA-Building Services records were reviewed, and the County is not aware of any violations existing on subject property.
- l) The project planner conducted a site inspection on July 15, 2020 to verify that the proposed project on the subject parcel conforms to the applicable plans and MCC.
- m) The project was referred to the Del Monte Forest Use Advisory Committee (LUAC) for review. Based on the LUAC Procedure guidelines adopted by the Monterey County Board of Supervisors, this application warranted referral to the LUAC because the project is a Design Approval subject to review by the Zoning Administrator. The LUAC, at a duly-noticed public meeting on May 7th, 2020 voted 5 – 0 to support the project as proposed with 3 absent.
- n) The application, plans, and supporting materials submitted by the project applicant to Monterey County RMA-Planning for the proposed development found in project file PLN200005.

2. **FINDING:** **DESIGN** – The design of the proposed project assures protection of the public viewshed, is consistent with neighborhood character, and assures visual integrity without imposing undue restrictions on private property.

- EVIDENCE:**
- a) The Applicant proposes a single-family dwelling and an attached garage on an existing residential lot.
 - b) Pursuant to Chapter 21.44, Title 21 (Zoning Ordinance) of the Monterey County Code (MCC), the proposed project site and surrounding area are designated as a Design Control Combining District (D District), which regulates the location, size, configuration, materials, and colors of structures and fences to assure the protection of the public viewshed and neighborhood character.
 - c) The proposed residence is compatible with the surrounding neighborhood character in terms of size, color, location and mass. The neighborhood consists of one and two-story dwellings ranging from 2,000-3,000 square feet within a one mile radius. The architecture style of the neighborhood is comprised of mixed designs ranging from traditional California Ranch to Spanish Revival. The neighborhood is in transition in terms of development, composed of new designs mixed in with the old. The proposed dwelling incorporates architectural aesthetics of classic California craftsman. The proposed exterior colors and materials are consistent with the residential setting. The primary colors and materials include gray board and batten siding, bronze clad windows and doors and composition shingles roofing.
 - d) The project planner conducted a site inspection on July 15, 2020 to verify that the proposed project on the subject parcel conforms to the applicable plans and MCC, and will not adversely impact the neighborhood character.

- e) Based on the evidence described above, the proposed structures and uses are consistent with the surrounding residential neighborhood character (i.e., structural design features, colors, and material finishes). As proposed, the project is consistent with neighborhood character, and assures visual integrity.
- f) The application, plans, and supporting materials submitted by the project applicant to Monterey County RMA-Planning for the proposed development found in project file PLN200005

3. **FINDING:** **CEQA (Exempt)** – The project is categorically exempt from environmental review and no unusual circumstances were identified to exist for the proposed project.

- EVIDENCE:**
- a) California Environmental Quality Act (CEQA) Guidelines Section 15303(a) categorically exempts the construction of new, small facilities or structures, including habitable and non-habitable structures accessory to a single-family dwelling or residential use.
 - b) The subject project consists of the construction of a single-family dwellings with an attached garage. Therefore, the proposed development is consistent with the exemption parameters of CEQA Guidelines Section 15303(a).
 - c) The existing structure was constructed in 1960. CEQA guidelines, PRC Sec.21084.1 requires all properties fifty years of age or older to be reviewed for potential historic significance. A historical report was prepared and submitted by Seth Bergstein, with PAST Consultants, LLC dated July 16, 2020 indicating that the structure lacks both historic integrity and significance. The subject property does not meet the necessary criterion for listing in the California Register of Historical Resources. Nor does it meet the criterion established by the County of Monterey to qualify for inclusion in the Monterey County Register of Historic Places, and therefore would not be considered as a historic resource as defined by CEQA.
 - d) None of the exceptions under CEQA Guidelines Section 15300.2 apply to this project. There is no substantial evidence of an unusual circumstance because there is no feature or condition of the project that distinguishes the project from the exempt class. The project does not involve a designated historical resource, a hazardous waste site, development located near or within view of a scenic highway. There is no substantial evidence that would support a fair argument that the project has a reasonable possibility of having a significant effect on the environment or that it would result in a cumulative significant impact.
 - e) No adverse environmental effects were identified during staff review of the development application.

4. **FINDING:** **APPEALABILITY** - The decision on this project may be appealed to the Monterey County Planning Commission.

EVIDENCE: Pursuant to Section 21.80.040.B of the Monterey County Zoning Ordinance (Title 21), the Planning Commission shall consider appeals from the discretionary decisions of the Zoning Administrator. The decision of the Planning Commission would be final and may not be appealed.

DECISION

NOW, THEREFORE, based on the above findings and evidence, the Zoning Administrator does hereby:

- A. Find that the project qualifies as a Class 3 Categorical Exemption pursuant to Section 15303(a) of the CEQA Guidelines, and there are no exceptions pursuant to Section 15300.2; and
- B. Approving the demolition of existing 2,583 square foot single family dwelling and construction of a 3,420 square foot single family dwelling inclusive of an attached two car-garage and 650 square foot deck, all in general conformance with the attached plans, which are incorporated herein by reference.

PASSED AND ADOPTED this 13th day of August, 2020.

Mike Novo, Zoning Administrator

COPY OF THIS DECISION MAILED TO APPLICANT ON _____.

DRAINAGE: Runoff from roofs and impervious surfaces on the site will be managed to prevent erosion. Containment of drainage onsite (by means of drywells and retention basins, for example) is encouraged to reduce the volume of runoff. No excess surface water may be channeled or directed onto neighboring properties or roads. Applicant intends to consult with a licensed Civil Engineer to develop drainage and erosion control plans upon receipt of design approval from Pebble Beach's Architectural Review Board and in conjunction with permitting the Project with Monterey County's Resource Management Agency.

- ALL LUMINAIRES INSTALLED IN RESIDENTIAL CONSTRUCTION MUST QUALIFY AS "HIGH EFFICACY LUMINAIRES."
- TABLE 150.0-A OF §150.0 IN 2016 CALIFORNIA ENERGY CODE, SUBCHAPTER 7, CONTAINS THE DEFINITION OF "HIGH EFFICACY LUMINAIRES". SEE TABLE BELOW FOR REFERENCE. CURRENT ENERGY CODE TO BE VERIFIED BY INSTALLER TO ENSURE COMPLIANCE WITH ENTIRE CODE. TABLE INCLUDED FOR REFERENCE ONLY.
- ALL PERMANENTLY INSTALLED LUMINAIRES WITH INTERCHANGEABLE LAMPS MUST CONTAIN LAMPS THAT COMPLY WITH THE REQUIREMENTS OF JOINT APPENDIX 8 (JA8) AND BE APPROPRIATELY MARKED TO BE CONSIDERED "HIGH EFFICACY LUMINAIRES." THE MARKING "JA8-2016" IS REQUIRED FOR COMPLIANCE AND SHALL ONLY BE USED ON LAMPS THAT MEET THE REQUIREMENTS OF JOINT APPENDIX 8 AND ARE LISTED IN THE ENERGY COMMISSION JA8 DATABASE.
- THE MARKING "JA8-2016-E" INDICATES THAT IN ADDITION TO THE REQUIREMENTS ABOVE FOR A JA8-2016 LIGHT SOURCE, THE LIGHT SOURCE HAS BEEN TESTED TO PROVIDE LONG LIFE AT ELEVATED TEMPERATURES. LIGHT SOURCES MUST BE MARKED "JA 8-2016-E" IF THEY ARE TO BE USED IN ENCLOSED OR RECESSED LUMINAIRES. RECESSED DOWNLIGHT LUMINAIRES AND ENCLOSED LUMINAIRES ARE REQUIRED TO CONTAIN A JA8 COMPLIANT LAMP THAT MEETS THE ELEVATED TEMPERATURE REQUIREMENT.  - Photocontrol and motion sensor.
 - Photocontrol and automatic time switch control.
 - Astronomical time clock control that automatically turns the outdoor lighting off during daylight hours.
 - EMCS that provides the functionality of an astronomical time clock, does not have an override or bypass switch that allows the luminaire to be always ON, and is programmed to automatically turn the outdoor lighting off during daylight hours.
- MANUAL ON AND OFF SWITCHES MUST NOT OVERRIDE THE AUTOMATIC CONTROL FUNCTIONS LISTED ABOVE, AND ANY CONTROL THAT OVERRIDES THE AUTOMATIC CONTROLS TO ON MUST AUTOMATICALLY REACTIVATE THOSE CONTROLS WITHIN SIX HOURS.
- LIGHTING THAT IS NOT PERMANENTLY ATTACHED TO A BUILDING ON A SINGLE-FAMILY SITE, SUCH AS DECORATIVE LANDSCAPE LIGHTING, IS NOT REGULATED BY THE RESIDENTIAL LIGHTING REQUIREMENTS. HOWEVER, PROVIDING HIGH EFFICACY LIGHTING AND CONTROLS SUCH AS A TIME CLOCK OR PHOTOCONTROL WILL HELP SAVE ENERGY AND ENSURE THAT THE LIGHTING IS NOT ACCIDENTALLY LEFT ON DURING DAYLIGHT HOURS.
- WET AND DAMP LOCATIONS: LUMINAIRES INSTALLED IN WET OR DAMP LOCATIONS SHALL BE INSTALLED SUCH THAT WATER CANNOT ENTER OR ACCUMULATE IN WIRING COMPARTMENTS, LAMP HOLDERS, OR OTHER ELECTRICAL PARTS. ALL LUMINAIRES INSTALLED IN WET LOCATIONS SHALL BE MARKED "SUITABLE FOR WET LOCATIONS". ALL LUMINAIRES INSTALLED IN DAMP LOCATIONS SHALL BE MARKED "SUITABLE FOR WET OR DAMP LOCATIONS".
