Consider finding, pursuant to AB 361 and in order for the Monterey County Water Resources Agency Reservoir Operations Advisory Committee to continue meeting remotely, that the COVID-19 pandemic state of emergency declared by Governor Newsom is still in effect; the Reservoir Operations Advisory Committee has reconsidered the circumstances of the state of emergency; and the Monterey County Health Officer continues to recommend social distancing measures for meetings of the legislative bodies.

RECOMMENDATION:
It is recommended that the Monterey County Water Resources Agency Reservoir Operations Advisory Committee:

Find, pursuant to AB 361 and in order for the Reservoir Operations Advisory Committee to continue meeting remotely, that the COVID-19 pandemic state of emergency declared by Governor Newsom is still in effect; the Reservoir Operations Advisory Committee has reconsidered the circumstances of the state of emergency; and the Monterey County Health Officer continues to recommend social distancing measures for meetings of the legislative bodies.

SUMMARY/DISCUSSION:
On September 16, 2021, Governor Newsom signed AB 361. This legislation amends the Brown Act to allow meeting bodies subject to the Brown Act to meet via teleconference during a proclaimed state of emergency in accordance with teleconference procedures established by AB 361 rather than under the Brown Act's more narrow standard rules for participation in a meeting by teleconference. AB 361 provides that if a state or local health official recommends social distancing, a legislative body may meet remotely after September 30, 2021, provided that within 30 days of the first meeting after November 3, and every 30 days thereafter, the legislative body finds 1) the Governor's proclaimed state of emergency is still in effect; 2) the legislative body has reconsidered the circumstances of the state of emergency, and 3) either the Monterey County Health Officer continues to recommend social distancing measures for meetings of legislative bodies or the state of emergency continues to directly impact the ability of the members to meet in person.

The Monterey County Health Officer has recommended social distancing measures for meetings of legislative bodies, so the Reservoir Operations Advisory Committee of the Water Resources Agency was able to meet remotely the first time after September 30, 2021. In order to continue meeting remotely, the Reservoir Operations Advisory Committee must make the findings outlined above.

Accordingly, staff recommends making the appropriate findings. This action will be required every 30

days in order to keep meeting remotely; a special meeting may be necessary for that purpose.

OTHER AGENCY INVOLVEMENT:
The General Manager concurs in the recommendation.

FINANCING:
The only financial impact is the continuing cost of teleconferencing.

Reservoir Storage and Release Update

Reservoir Storage & Release Update

SUMMARY/DISCUSSION:
The Board of Directors receives monthly updates on the status of Agency reservoirs.

RESERVOIR ELEVATION / STORAGE: Numerous December and January storms have resulted in the sustained inflow of large quantities of water to both reservoirs. Combined reservoir storage has increased since December 1, 2022 by approximately 358,000 acre-feet, with Nacimiento Reservoir accounting for about 274,000 acre-feet and San Antonio approximately 84,000 acre-feet. As of January 18, 2023, San Antonio Reservoir has a water surface elevation of approximately 724.25 feet (NGVD 29), with 114,563 acre-feet of water in storage. Nacimiento Reservoir has a water surface elevation of approximately 792.10 feet, with 334,235 acre-feet of water in storage. San Antonio Reservoir is currently at 34% of storage capacity and Nacimiento Reservoir is at 88% of capacity.

RESERVOIR RELEASES: By January 14, storm inflow to Nacimiento Reservoir had filled the entire conservation pool volume resulting in the need to initiate flood control releases to ensure adequate space remains in the "flood pool" volume (above elevation 787.75 ft) to accommodate subsequent storm inflow events. The Agency is currently releasing approximately 3,200 cfs from Nacimiento Reservoir. The duration and magnitude of flood control releases is being evaluated on a daily basis using the latest weather and river forecast and realtime flow data. San Antonio Reservoir remains well below its flood pool elevation of 774.5 ft and releases remain at 10 cfs in support of fish habitat below the dam.

Storm activity on New Year's Eve, 2022 produced stream flow in the Arroyo Seco and lower Salinas watersheds that necessitated sandbar management at the Salinas River mouth to prevent flooding of lands near the coast, culminating in a mechanical breach of the Salinas River Lagoon on January 3rd. Salinas River flows have since kept the river open to the ocean.

Releases as of January 18, 2023:
