

patients/clients not able to make standard visits, the additional modules: Qliq Assisted calling and Video Visits are necessary to maintain continuity of care.

This unified solution enables the program staff that provide outreach services to the community, coordinate care, provide outpatient services, and share restricted information needing immediate response, a secure solution that protects the content while enabling mobility. This solution enables efficiency for health staff without compromising the privacy of the clients served often in uses cases that are time sensitive requiring multi-disciplinary program staff communications.

Qliq Assisted calling enables the provider or clinician to call the patient/client without disclosing their cell numbers and the Video Visits enable the patient/client to participate in a telemed or telepsychiatry visit remotely. This unified solution enables the Health Department staff to text clients, initiate a call, and if a video call is needed to use the same solution to initiate a video call all without requiring the client to download an app.

The department applications administrator will be able to remotely lock and wipe out the data on the mobile device should the provider or clinician device be lost, stolen, or compromised since the application and content is managed down to the end point.

Based upon the privacy and security provision of this HIPAA compliant mobile application solution, and the efficiency provided to the program staff that require mobility while exchanging sensitive information across a multi-disciplinary team or with patients/clients, it is the recommendation of the Director of Health Services to approve this recommended action.

The staff and programs that will utilize this solution will be the Sexual Assault and Response Team (SART), the Whole Person Care program, Behavioral Health Adult System of Care, Behavioral Health Children's Programs, Public Guardian, Medical Therapy Unit, and the Privacy/Compliance Office.

The delay in renewal was due to staff changes within the Health Department during the negotiation period.

This software solution supports the Monterey County Health Department 2018-2022 Strategic Plan Initiative: 4. Engage MCHD workforce and improve operational functions to meet current and developing population health needs and supports two of the ten essential public health services, specifically; 4. Mobilize community partnerships and action to identify and solve health problems; 7. Link people to needed personal health services and assure the provision of health care when otherwise unavailable; and 8. Assure competent public and personal health care workforce.
