SUMMARY/DISCUSSION:

The Health Department Clinic Services Bureau (Clinic Services) operates twelve community clinic sites designated as Federally Qualified Health Centers (FQHCs) which provide preventive, primary, and specialty medical care services.

CT is locally based in California and has expertise providing telemedicine services to federally qualified health centers, rural health clinics, and other similar health care organizations. CT physicians, physician assistants, nurse practitioners, and licensed clinical social workers will provide medical specialty services through interactive audio, video and/or data communications (telemedicine).

On September 1, 2022, the Board of Supervisors approved an Agreement with Clinicians Telemed Medical Group to provide specialty medical services through September 1, 2023, for an amount not to exceed \$98,000. On August 1, 2023, Amendment No. 1 was executed to add an additional telehealth specialty to the scope and extend the term to June 30, 2024. Amendment No. 2 will extend the agreement for one (1) additional year and remove the Cyber Liability Insurance requirement from the new Business Associate Agreement. The Cyber Liability coverage waiver is being recommended due to CT not hosting any protected health information and being limited to secure, remote access to Clinic Services' electronic medical record (Epic) when delivering remote telehealth services.

This work supports the County of Monterey Health Department 2018-2024 Strategic Plan Goals(s): Ensure access to culturally and linguistically appropriate customer-friendly, quality health services. It also supports one or more of the ten essential public health services, specifically: 7) Link people to needed personal health services and assure the provision of health care when otherwise unavailable; and 8) Assure competent public and personal health care workforce.
