SUMMARY/DISCUSSION:

The Health Department Clinic Services Bureau (Clinic Services) operates nine community clinic sites designated as Federally Qualified Health Center Look-Alikes (FQHC-LA), which provide preventative,

primary, and specialty medical care services.

Biomedical services are essential in maintaining quality operation and efficiency of the medical equipment and devices located in the clinics. Equipment maintenance, testing and repairs are performed in accordance with manufacturer specifications to reduce downtime of equipment, extend the life of medical equipment and their component parts and ensure existing equipment works longer to reduce operating costs. In addition, ongoing preventative maintenance and servicing of equipment provides safety and reliability to patients and staff.

On September 13, 2018, Clinic Services published RFP #10670 to solicit one or more new agreements for biomedical equipment certification, testing and maintenance and repair services from qualified contractors. The selection panel reviewed all five (5) proposals that were received for consideration, and selected ABS as the most qualified vendor based on the RFP selection process.

Approval of the recommended action will provide Clinic Services with a new service vendor for the essential services needed for patients and staff safety, while improving the efficiency and life of medical equipment.

This work supports the Monterey County Health Department 2018-2022 Strategic Plan initiatives: 2) Enhance community health and safety through prevention. It also supports one of the ten essential public health services, specifically: 6) Enforce laws and regulations that protect health and ensure safety
