

Kit Check provides scanning equipment and web-based software which enables NMC to automate its pharmacy kit processing. Kit Check supplies equipment consisting of 1 scanning station, 1 RFI printer suitable for printing the Kit Check RFID labels, and 1 desktop barcode scanner which is used in conjunction with Kit Check's web-based kit processing software.

Kit Check has provided installation services and training for authorized personnel in the use of the equipment and software services. Kit Check also supplies NMC with the RFID labels and tags suitable for use with the RFID printer which come in two forms, a regular tag used on various surfaces and a metal-mount tag can be used specifically to affix to metal surfaces.

NMC wishes to amend this agreement to add funds due to greater than anticipated increases in both the types and quantities of emergency kits as well as the sudden unavailability of pre-tagged compounded items available from our outsourcing facilities.
