

three (3) additional five (5) year terms”. The Board approved the first of three (3) extensions on April 9, 2013, extending the Agreement term through May 31, 2018.

The Board initially approved the Agreement, notwithstanding non-standard liability and indemnification provisions, because the radio communications equipment installed at this site expanded radio communications coverage and connectivity for the County Emergency Communications Department and public safety agencies in south Monterey County. In addition, the microwave equipment at this site provides access to the County’s telecommunications network and enables the County to maintain a redundant data network at a reduced cost. The County departments in south county that benefit from the connectivity provided by the Bryant Canyon site are Health, Social Services, the Agriculture Commissioner, Libraries, and the District 3 Supervisor’s Office.

The proximity of the Bryant Canyon radio communications site continues to be key in providing coverage in this region of the County. The ability to exercise the extension clause in the Agreement ensures that there will be no interruption of services in order to negotiate a new Agreement. It is not a standard practice for the County of Monterey to enter into Agreements with “auto extension” clauses, however, due to the critical need for the continuity of radio, phone, and data network services in south Monterey County for public safety agencies and County departments, the Director of Information Technology seeks approval to exercise the second automatic extension for an additional five (5) years. Due to the unique nature of the Agreement terms, the Director of Information Technology will bring this request back to the Board prior to the final extension period, in 2023, to ensure that the Board is apprised of the continuing placement of County radio, phone, and data network equipment at the Bryant Canyon site.

The Board is asked for approval retroactive to June 1, 2018 due to Crown Castle’s slowness in locating and providing essential documents.

The amendment before the Board for its approval updates the descriptions and specifications of County tower equipment maintained at the site, as requested by Crown Castle. The amendment does not change any other term in the Agreement. Per Crown Castle’s internal processes, they will sign second to the County and return originally signed documents to ITD.

OTHER AGENCY INVOLVEMENT:

County Counsel, Risk, and Auditor/Controller’s Office were involved in review of the Agreement in 2008 and did not approve due to the non-standard terms. County Counsel does not approve continuance of the non-standard terms. Exercise of the second five-year extension does not alter the non-standard terms previously approved by the Board. Per ITD, performance under the Agreement has been positive to date.

County Counsel reviewed Amendment No. 2, updating descriptions of County tower equipment maintained at the site, as to form.

FINANCING:

The lease cost is paid on a yearly basis. The funds for the lease cost were included in the FY 2018-19 Recommended Budget for the Information Technology Department, ITD 1930, Budget Unit 8436, Appropriation Unit INF002. Transactions relating to future fiscal years will be included in each respective Recommended Budget. Should funding be reduced and/or terminated, the County may terminate this agreement by giving thirty (30) days written notice of such action to the Lessor.

BOARD OF SUPERVISORS STRATEGIC INITIATIVES:

The use of the Bryant Canyon communications site is crucial to the emergency communications and other County department communication systems in south county.

Economic Development
 Administration
 Health & Human Services
